Dear Mr. Meyer:

I respectfully request a written response from the Department of Defense concerning the enclosed document:

- Base Closure & Realignment Commission question
- Question for the record
- Community input
- COBRA run: COBRA Run for Tech Scenario #44, which moves most or all of Picatinny Arsenal to a Navy facility - I believe NSWC Dahlgren.
-

I would appreciate your response by June 24, 2005. Please provide a control number for this request and do not hesitate to contact me if I can provide further information concerning this request.

Yours sincerely,

Frank Cirillo

Dear Mr. Meyer:

I respectfully request a written response from the Department of Defense concerning the enclosed document:

X OTHER: Ms. Davis previously signed a letter relating to recommendation IND-4, one part of which says to "relocate the depot maintenance of tactical missiles Letterkenny Army Depot, PA". The letter says something to the effect that this is not really depot maintenance. Is this letter intended to acknowledge that this part of the recommendation is no longer being considered as part of the SECDEF recommendation, is it still part of the SECDEF recommendation but one that you are no longer supporting, or what? If you still view it as an active part of the recommendation, please provide two COBRAS dealing just with this sub-recommendation. The first should show performing the work at Seal Beach. The second should show shipping the containers to Letterkenny, repairing them there, and then shipping them back. It is not clear to me whether they containers are coming from and returning to Seal Beach, so please explain how and where you propose to ship the containers.

I would appreciate your response by July 29, 2005. Please provide a control number for this request and do not hesitate to contact me if I can provide further information concerning this request.

Yours sincerely,

Frank Cirillo

Dear Mr. Meyer:

I respectfully request a written response from the Department of Defense concerning the enclosed document:

OTHER: Does the part of the sub-recommendation in Tech 15 to “realign Naval Weapons Station Seal Beach, CA, by relocating all Weapons and Armaments Research, Development & Acquisition, and Test & Evaluation, except underwater weapons and energetic materials, to Naval Air Weapons Station China Lake, CA” intend to refer to Naval Weapons Station Seal Beach or should there be a technical correction and have it refer to Naval Surface Warfare Center detachment Seal Beach?

I would appreciate your response by July 29, 2005. Please provide a control number for this request and do not hesitate to contact me if I can provide further information concerning this request.

Tues 8:06

Dear Mr. Meyer:

I respectfully request a written response from the Department of Defense concerning the following:

The Crane, IN community commented on the sub-recommendation of recommendation Ind-19 (Fleet Readiness Centers) that reads “Realign Naval Support Activity Crane, IN, by relocating the depot maintenance workload and capacity for ALQ-99 Electronic Warfare to Fleet Readiness Center Northwest, Naval Air Station Whidbey Island, WA” with the observation that the ALQ-99 is scheduled to be phased out in a 2010-2015 timeframe. Please describe plans for that system, including (but not limited to) the year that this phase out is due to start and end. Assuming that the community statement is fairly accurate, please explain how much equipment is slated to be moved to Whidbey, how much it costs to train people if the Crane people do not move, how much equipment has to be purchased to set up the facility at Whidbey, and other relevant information. Please provide the COBRA of this sub-recommendation. Explain why it makes sense to approve the sub-recommendation, given the phase out plans.

I would appreciate your response by August 3, 2005. Please provide a control number for this request and do not hesitate to contact me if I can provide further information concerning this request. Alternatively, contact David Epstein (699-2947), the author of this request. Tom Pantelides (699-2961), who now has responsibility for Ind-19 may also be consulted.

Yours sincerely,

Frank Cirillo

Tues

8:00

Dear Mr. Meyer:

I respectfully request a written response from the Department of Defense concerning the following:

The Fort Eustis, VA community commented on the proposed relocation of Navy Supply Corps School, Athens, GA which is discussed in DoN 14. They suggest that if the Transportation School were relocated from that base, then NSCS could be efficiently moved to Fort Eustis. Please comment on that recommendation and provide a COBRA. You may recall that you have already done a COBRA for the proposed move to Dam Neck.

I would appreciate your response by August 3, 2005. Please provide a control number for this request and do not hesitate to contact me if I can provide further information concerning this request. Alternatively, contact David Epstein (699-2947), the author of this request.

Dear Mr. Meyer:

I respectfully request a written response from the Department of Defense concerning the following:

In your COBRA describing costs associated with a move from Corona to China Lake, you appear to assume the elimination of 139 positions, rather than the 37 in the Corona – Pt. Mugu scenario. Was this intentional? If so, please explain how this would work. If not, please redo the COBRA.

I would appreciate your response by August 4, 2005. Please provide a control number for this request and do not hesitate to contact me if I can provide further information concerning this request. Alternatively, contact David Epstein (699-2947), the author of this request.

Aaron.Butler@wso.whs.mil, Nathaniel.Sillin@wso.whs.mil,

FROM: BRAC Commission

SUBJECT: Request Comment on Red River Army Depot Closure Recommendation.

1. There will be 2.6 million direct labor hours (DLH) of capacity built at Anniston and Letterkenny with the closure of Red River. At what shift calculation are those 2.6 million DLHs calculated?
2. Workload will move from Red River to Anniston, Letterkenny, Tobyhanna and Albany. At what shift calculation is that workload integrated into those facilities?
3. If the workload was not calculated on a 1-8-5 shift calculation, how is that reconciled with the DoD 4151.18H Depot Maintenance Capacity and Utilization Measurement Handbook requirement to base capacity on the single 1-8-5 shift? Is the DoD allowed to deviate from this mandatory calculation? What are the penalties for not complying with this Handbook?
4. Please lay out the progression of the recommendation to close Red River Army Depot.
5. The community representatives disputed the 75% movement of personnel with the Red River closure, since only about 12% moved with the BRAC 1995 Red River realignments.
6. There is no MILCON money for the capacity to be built at Anniston and Letterkenny. Were these costs part of the one-time costs? Was this an error?
7. Did DLA intend to designate the Red River Distribution Center as a SDP until the recommendation to close Red River was submitted?

8. According to the community representatives, there are approximately 3 million square feet of munitions currently located at the Red River Munitions Center, and there are only about 200 thousand square feet available at Blue Grass and 1 million square feet available at McAlester. What is the plan for and where will all those munitions go?
9. The community representatives estimated the cost to build a new Chapparral facility at approximately \$3M. What is the cost included in the COBRA model to build the Chapparral facility? If the costs are different, please verify the COBRA cost and discuss why the estimated costs might be different.
10. It was stated that to date the Army has not been able to attain permits to either demilitarize or move these motors. What is the plan for the Spartan Rocket motors?
11. It was stated that the Red River munitions personnel are currently on McAlester TDAs. The COBRA model does not include any position transfers to McAlester with the movement of the munitions. Are these positions eliminated or do they move from Red River to McAlester?
12. With the drawdown overseas, will any of the munitions to be retrograded be stored at Red River or other CONUS facilities?
13. Is there any source, commercial or organic, that is currently capable of replicating the rubber mission at Red River AD?
14. What is the current planned quantity of HMMWVs to be workloaded through Red River AD in FY05 – FY11? How much of that is funded?

Regards,

R. Gary Dinsick
Army Team Leader
