**OFFICE OF THE SECRETARY**  
1000 NAVY PENTAGON  
WASHINGTON DC 20350-1000

23 June 2005

The Honorable Anthony J. Principi  
Chairman  
Defense Base Closure and Realignment Commission  
2521 South Clark Street, Suite 600  
Arlington, VA 22202

Dear Chairman Principi:

This is a partial response to Clearinghouse Tasker #292 (HJT#1) regarding the June 10, 2005 inquiry from Mr. Frank Cirillo of your staff concerning Submarine Base New London. Below you will see the question asked of us, along with our response. I will forward other responses to Tasker #292 as we finalize the answers.

HJT#1: "It appears that data call statements/questions and weighting discretion available to the analyst could skew or pre-determine the outcome. What method was used to ensure a level playing field?"

This question appears to address the Surface-Subsurface Military Value Analysis.

The Military Value data call questions and statements and the weighting were developed and approved by the Infrastructure Evaluation Group (IEG) prior to any receipt or review of data call answers. The rationale was to develop a set of questions/statements to capture what is valued at DON Surface-Subsurface activities, without a view to any predetermined conclusion. The weighting was developed iteratively, first assigning weights to selection criteria, and weights to the five attributes within each selection criteria. Each specific statement received an IEG assigned "score" of 1-10 based on its importance, and was assigned applicability to any number of the four selection criteria. The resultant weighting of a question was therefore a function of the weighting of the attribute, number of applicable selection criteria, the number of other statements in its attribute applicable to the selection criteria (more questions would reduce the weight of each individual question), the weighting of the selection criteria, and the score assigned. Once the weights were tabulated, the IEG reviewed the final weighting to ensure there were no anomalies. Refer to the deliberative record (IEG minutes - RP 0080, 0082, 0085, 0103, 0111, 0121, 0124, 0130) found on the DoD website:  
<http://www.dod.mil/brac>.

The questions were constructed to provide either a "yes/no" or scalable response. For the yes/no questions, the activity received full or no credit depending on their response. For scalable questions, the analysts tabulated the value or the rolled-up values for each activity, and applied a function to assign credit ranging from full credit to zero credit. Linear or Non-linear functions were used to provide meaningful discrimination for the answers and prevent skewed results. When any function was used, the results for the scoring statement was graphically displayed to the Department of the Navy Analysis

Group (DAG). Although the analyst exercised some discretion, it was within the limits of the approved military value scoring process and the DAG reviewed the functions used. Refer to DAG minutes (RP-0189, 0190, 0203) found on the DoD website: <http://www.dod.mil/brac>. The worksheets for the scalable questions for the surface/subsurface function are attached to this letter. We will be happy to provide other functional worksheets upon request.

I trust this information is responsive to your requirements. If we can be of further assistance, or if you would like to meet with me staff to discuss further, please contact us via e-mail to [bracprocess@navy.mil](mailto:bracprocess@navy.mil).

Sincerely,

Anne Rathmell Davis  
Special Assistant to the Secretary of the  
Navy for Base Realignment and Closure

DCN 3743

24 June 2005

The Honorable Anthony J. Principi  
 Chairman  
 Defense Base Closure and Realignment Commission  
 2521 South Clark Street, Suite 600  
 Arlington, VA 22202

Dear Chairman Principi:

This is a partial response to Clearinghouse Tasker #292 (HJT#2) regarding the June 10, 2005 inquiry from Mr. Frank Cirillo of your staff concerning Naval Air Station Brunswick. Below you will see the question asked of us, along with our response. I will forward other responses to Tasker #292 as we finalize the answers.

HJT #2, A: "DON initial recommendation, based on analysis of data call information, was to close NAS Brunswick. After an IEG meeting, the decision was to Realign Brunswick from a Naval Air Station to a Naval Air Facility. What was the rationale?"

On May 4, 2005, the Infrastructure Executive Counsel (IEC), not the IEG, changed the "Close NAS Brunswick" scenario to a realignment (Naval Air Facility) to retain a DoD active duty operational presence in New England for homeland defense and surge capability. (Refer to IEC Minutes of 4 May 2005). Although this change in the recommendation was made late in the process, DON had reviewed, in deliberative sessions, several alternatives regarding NAS Brunswick. NAS Brunswick had been evaluated within DON for either total closure, conversion to a Naval Air Facility (operational air field but no permanently assigned aircraft), or conversion to a Naval Support Activity (airfield would be retained but not in a ready operational status). (Refer to Infrastructure Evaluation Group Minutes of 27 January, 10 February, and 17 February 2005 and DoN Analysis Group Minutes of 17 January, 24 January, 7 February, and 15 February 2005). Therefore, when the discussion took place at the IEC, they had the advantage of knowing the trade-offs between the options analyzed allowing them to make an informed decision.

HJT #2, B: "If Brunswick has a critical geographical homeland security strategic role, why move the assets to NAS Jacksonville when it would appear that immediate reassignment (via detachments) would be required?"

The intention is not to realign assets to NAS Jacksonville so that detachments can then be immediately reassigned back to NAS Brunswick, but rather assign a detachment on an "as needed" basis in response to an operational tasking or training requirement. These detachments would consist of one or two aircraft and would use NAS Brunswick only as long as required to satisfy the training requirement or operational tasking..
