Letters From Concerned Citizens In Support Of Pittsburgh Air Reserve Station, 99th RSC, and Charles E. Kelly Support Facility

DCN 5077
Community Input

The Honorable Anthony J. Principi, Chairman
Defense Base Closure and Realignment Commission
2521 South Clark Street, Suite 600
Arlington, VA 22202

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Donald J. Walsh

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

John W. Franko

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Nicole Holmen

Re: PITTSBURGH, LAND & MORE

July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Michelle Beck

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely, Rosemarie L Varsanik

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Jean O'Neil

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,
Patty Vast

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Charlotte Adams

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Hans Weber

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Larry Ellison

Re: **Pittsburgh, Land and More** July 9, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renowned for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Re: **Pittsburgh, Land and More** July 9, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renowned for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Brian Regan

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Daniel F Dohm

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Frank Burgard

Re: **Pittsburgh, Land and More** July 9, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renowned for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Linda Headley

Re: **Pittsburgh, Land and More** July 9, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renowned for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Heather Myers

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center combining the 99th RSC and Charles E. Kelly Support Facility.

The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

J. E. Worthley

Re: **Pittsburgh, Land and More**

July 9, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renowned for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned. qualified personnel who have volunteered to serve. Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Peter M. Ferguson

Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely, Robert W. Jones

Re: **Pittsburgh, Land and More**

Dear Chairman Principi and Fellow BRAC Commissioners,

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renowned for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Rebecca C Vaccarelli

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renowned for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Terry Sonini

This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 99th RSC and Charles E. Kelly Support Facility.

Sincerely,

Cheryl Bayer

Re: **Pittsburgh, Land and More**

Dear Chairman Principi and Fellow BRAC Commissioners,

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renowned for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to be spent at the gaining bases to support this. The 911th AW should not be closed! Re: PITTSBURGH, LAND & MORE July 10, 2005

The 911th Airlift Wing is vital to our nation's defense, and in a strategic location for homeland security. Pittsburgh's renown for its medical community and an excellent recruiting area. The 911th can support additional aircraft right now. Land is not the issue! The four runways afford any and all aircraft ready accessibility. "If it can fly, it can land at Pittsburgh!" This cost-effective operation also hosts a variety of tenant functions which result in taxpayer savings.

The data used in analyzing this base's military value was flawed! Relocating these aircraft would not best serve our military defense posture, nor would it result in retaining the assigned, qualified personnel who have volunteered to serve. Additionally, more monies will have to spent at the gaining bases to support this. The 911th AW should not be closed! It should be considered for expansion as part of a Joint Readiness Regional Center -- combining the 90th RSC and Charles E. Kelly Support Facility.

Sincerely,

Thomas C. Heath
