ACTION MEMO

FOR: ASSISTANT SECRETARY OF THE NAVY (INSTALLATIONS AND ENVIRONMENT)

FROM: ADMIRAL MICHAEL G. MULLEN, Vice Chief of Naval Operations

M. G. Mullen *RADM, USN*

SUBJECT: COORDINATION OF THE TECHNICAL FINAL CAPACITY ANALYSIS REPORT

- As requested by USD(AT&L) memo of 19 Dec 03, the following issue needs to be addressed to ensure an adequate analysis by the Technical JCSG.

"Workforce Academic Credentials" and "Number of ACAT programs" represent a large percentage of all TJCSG capacity questions and are undefined in the "formula" section of the report. It is unclear how these metrics will contribute to capacity analysis.

- Overall, I concur with the proposed Technical Capacity Analysis report and recommend that it is approved by the Infrastructure Steering Group.

Prepared By: CDR David Sienicki; 703-601-1608
