The data consists of certified responses to Scenario Data Calls as listed in enclosure (1), and is provided to the Industrial JCSG via posting to the portal. The scenario template has been populated with all responses requested by the JCSG, as well as some amplifying information collected that may be useful to you in your analysis. A list of additional certified data provided by responding activities is included in enclosure (2); this data has also been posted to the portal.

During the course of our initial quality review of the data, we discovered no areas where we believe the data is incorrect, incomplete, or in need of further clarification. However, we anticipate that other areas of concern may be identified as we continue our quality assurance process. The JCSG may also find during the course of its own analysis of the data, additional areas requiring clarification or supplementation, and request additional data be collected. Updated certified data will be collected by the IAT and provided to the JCSG as it becomes available.
