*Commissioner Samuel K. Skinner*  
22 August 2005

A Motion to Amend  
Air Force Recommendation 10,  
Beale Air Force Base, California, and Selfridge Air National Guard Base,  
Michigan,  
appearing at Chapter III, Section 82 of the Bill.

Deletes change to fighter mission at Selfridge ANGB, MI.

Offered by: \_\_\_\_\_

Seconded by: \_\_\_\_\_

Approved                  Disapproved

I move:

- that the Commission find that when the Secretary of Defense made Air Force Recommendation 10, Beale Air Force Base, California, and Selfridge Air National Guard Base, Michigan, he substantially deviated from Final Selection Criteria 1 and 3 and the Force Structure Plan;
- that the Commission strike the language "15 F-16 aircraft and" and the language "A-10 and" where it appears in paragraph "b" of Chapter III, Section 82 of the Bill, and;
- that the Commission find this change and the recommendation as amended are consistent with the Final Selection Criteria and Force Structure Plan.

A Motion to Make  
Additional Recommendation 3,  
Naval Air Station, Oceana, Virginia,  
to appear at Chapter XI, Section 193 of the Bill.

Realigns Naval Air Station Oceana, Virginia Beach, VA by relocating the East Coast Master Jet Base to Cecil Field, FL, conditioned on prior actions by the State of Florida.

Offered by: \_\_\_\_\_

Seconded by: \_\_\_\_\_

Approved                      Disapproved

I move:

- that the Commission find that when the Secretary of Defense failed to recommend the realignment of Naval Air Station Oceana, Virginia Beach, Virginia, he substantially deviated from Final Selection Criteria 1, 2, 3, 4 and 5 and the Force Structure Plan;
- that the Commission add to the list of installations to be closed or realigned the recommendation:
  - **“Realign Naval Air Station Oceana, Virginia by relocating the East Coast Master Jet Base to Cecil Field, Florida,**
    - if the Commonwealth of Virginia and the municipal governments of Virginia Beach, Virginia and Chesapeake, Virginia fail to enact and enforce legislation to prevent further encroachment of Naval Air Station Oceana by the end of March 2006, to wit:
      - enact State-mandated zoning controls requiring the cities of Virginia Beach and Chesapeake to adopt zoning ordinances that require the governing body to follow Air Installation Compatibility Use Zone

(AICUZ) guidelines in deciding discretionary development applications for property in Noise Level 70 dB Day Night Average Noise Level DNL or greater;

- enact state and local legislation and ordinances to establish a program to condemn and purchase all the property located within all the Accident Potential Zone One areas for Naval Air Station Oceana as depicted for 1999 AICUZ Pamphlet published by the U.S. Navy. AND TO BOND THAT PROGRAM

- codify the 2005 Final Hampton Roads Joint Land Use Study (JLUS) recommendations;
- legislate requirements for the cities of Virginia Beach and Chesapeake to evaluate undeveloped properties in Noise Zones 70dB DNL or greater for rezoning classifications that would not allow uses incompatible under AICUZ guidelines;
- establish programs for purchase of development rights of the Inter-facility Traffic Area between NAS Oceana and NALF Fentress; Enact legislation creating the Oceana/Fentress Advisory Council." at Chapter XI, Section 193 of the Bill, and;

and if the State of Florida:

- appropriates sufficient funds to relocate commercial tenants presently located at Cecil Field, Florida,
- appropriates sufficient funds to secure Public Private Ventures for all the personnel housing required by the Navy at Cecil Field to accomplish this relocation, and;
- turns over fee simple title to the property comprising the former Naval Air Station Cecil Field, including all infrastructure improvements that presently exist, to the Department of Defense on or before December 31, 2006, if the Commonwealth of Virginia and the

municipal governments of Virginia Beach, Virginia and Chesapeake, Virginia decline from the outset to take the actions required above, or within six months of the Commonwealth of Virginia and the municipal governments of Virginia Beach, Virginia and Chesapeake, Virginia failing to carry through with any of the actions set out above, whichever is later. The State of Florida may not encumber the title by any restrictions other than a reversionary clause in favor of the State of Florida and short-term tenancies consistent with the phased relocation of the Master Jet Base to Cecil Field.

- If the Commonwealth of Virginia and the municipal governments of Virginia Beach, Virginia and Chesapeake, Virginia fail to take all of the prescribed actions, and the State of Florida meets the conditions established by this recommendation, the units and functions that shall relocate to Cecil Field will include, but are not limited to, all of the Navy F/A-18 Strike Fighter Wings, aviation operations and support schools, maintenance support, training and any other additional support activities the Navy deems necessary and appropriate to support the operations of the Master Jet Base.” at Chapter XI, Section 193 of the Bill, and;
- that the Commission find this additional recommendation is consistent with the Final Selection Criteria and Force Structure Plan.

Additional statement of the Commission:

The BRAC 2005 report language shall state:

“It is the sense of the Commission that the Secretary of Defense deviated from the BRAC criteria by failing to consider NAS OCEANA for closure or realignment. The long standing and steadily worsening

encroachment problem around NAS OCEANA, without strong support from State and City governments to eliminate current and arrest future encroachment, will in the long term, create a situation where the military value of NAS OCEANA will be unacceptably degraded. The remedies presented to the Commission thus far have been unconvincing.

It is also the sense of the Commission that the future of Naval Aviation is not Naval Air Station Oceana. The Commission urges the Navy to begin immediately to mitigate the noise encroachment and safety issues associated with flight operations around the Virginia Beach area by transitioning high intensity training evolutions to other bases that are much less encroached such as Navy Outlying Field Whitehouse, Florida or Kingsville, Texas.

The Secretary of Defense is directed to cause a rapid, complete, due diligence review of the offer of the State of Florida to reoccupy the former NAS Cecil Field and to compare this review against any plan to build a new master jet base at any other location. This review is to be completed within six months from the date the BRAC legislation enters into force, and is to be made public to the effected states for comment.

After review of the states comments, which shall be submitted with 120 days after publishing the review, the Secretary of Defense shall forward to the oversight committees of Congress the review, the states comments and his recommendation on the location of the Navy's future Atlantic Fleet Master Jet Base."

A Motion to Amend  
Additional Recommendation 3,  
Naval Air Stations Oceana  
to appear at Chapter XI, Section 193 of the Bill.

Offered by: \_\_\_\_\_  
Seconded by: \_\_\_\_\_

Approved      Disapproved

I move that the commission find that when the Secretary of Defense failed to recommend the realignment of Naval Air Station Oceana in Virginia Beach, VA, he substantially deviated from Final Selection Criteria 1, 2, 3, and 5; that the Commission add the recommendation "If the State of Virginia and the municipal governments of Virginia Beach, VA and Chesapeake, VA fail to enact and enforce legislation to prevent further encroachment of Naval Air Station Oceana by the end of March 2006, to wit, State mandated zoning controls requiring the cities of Virginia Beach and Chesapeake to adopt zoning ordinances that require the governing body to follow Air Installation Compatibility Use Zone (AICUZ) guidelines in deciding discretionary development applications for property in Noise Level 70 dB Day Night Average Noise Level DNL or greater; State and local legislation to establish and fund in the amount of not less than \$15 million annually for period of ten years a program for the purchase of property rights on developed and undeveloped land in the Accident Potential Zones (APZ) in Virginia Beach and Chesapeake; Codification of Joint Land Use Study (JLUS) recommendations; Legislation requiring cities of Virginia Beach and Chesapeake to evaluate undeveloped properties in Noise Zones 70dB DNL or greater for rezoning classifications that would not allow uses incompatible under AICUZ guidelines; Establish programs for purchase of development rights of the Inter-facility Traffic Area between NAS Oceana and NALF Fentress; Enact legislation creating the Oceana/Fentress Advisory Counsel, realign all the ~~Navy F-18~~ Strike Fighter Wings, aviation operations and support schools, maintenance support, training and any additional supporting activities that the United States Navy deems appropriate from NAS Oceana, Virginia to Cecil Field, Florida." to the list of installations to be closed or realigned, and that the Commission find this additional recommendation is consistent with the Final Selection Criteria and Force Structure Plan.

That the foregoing finding is conditional provided that the State of Florida appropriates sufficient funds to relocate commercial tenants presently located at Cecil Field, appropriates funds to secure Public Private Ventures for all the personnel housing required by the Navy and turns over title to the property comprising all of the former Naval Air Station Cecil Field, Florida, including all infrastructure improvements already made, to the Department of Defense on or before June 30, 2006.

**PROPOSED RELOCATION OF DEPOT MAINTENANCE WORKLOAD AND CAPACITY FOR ALQ-99 FROM CRANE, IN. TO WHIDBEY ISLAND, WA.**

We are questioning the proposed realignment of Crane, IN. to Whidbey Island, WA, contained as one of the many realignment recommendations in DoD recommendation 165. Because the proposed move would require substantial construction at Whidbey Island for a system that supports the EA6B aircraft, an aircraft that is being moved out of the inventory in 10 – 15 years. Additionally, the proposed realignment is not cost effective, implementation costs are \$143.6 million with a net present value cost of \$163.9 million.

The Community at Naval Support Activity Crane objects to the relocation on the grounds that Crane is the best value for the Navy because Crane incorporates jointness and has the best return on investment. Additionally, they noted that the relocation sub-optimizes the special missions of cross-service capabilities at Crane, Indiana.

DoD supports the relocation of Naval Support Activity Crane to Whidbey Island because the realignment of the ALQ-99 workload supports the Navy's strategy of positioning maintenance activities closer to fleet concentrations.

We are supporting DoD recommendation 165 with the exception of the proposed realignment of the Crane workload for the ALQ – 99 to Whidbey Island.

This recommendation covers a Navy business reengineering proposal to streamline the way Naval air maintenance is accomplished. The proposal transforms and blends some depot and intermediate level maintenance, in order to position depot level maintenance closer to fleet concentrations. The recommendation can be summarized into three types of reorganizations.

The first type of reorganization, combines existing depots with co-located, non-deployable, intermediate maintenance activities and designates these activities, as the 6, Fleet Readiness Centers, or FRC's.

Secondly, the recommendation combines co-located, non-deployable intermediate maintenance activities and augments, the majority, with depot personnel and designates these 16 activities as FRC Sites, in support of the Fleet Readiness Centers.

Thirdly, the recommendation closes six other intermediate maintenance activities and transfers associated workload to Fleet Readiness Centers and FRC Sites.

The next two slides graphically portray the proposed reorganizations.

This slide illustrates the proposed East Coast reorganization with the 3 Fleet Readiness Centers, color coded, with associated FRC Sites.

The assumption used in this proposal is that workload transferred to consolidated sites will result in a reduction of 697 civilian equivalent positions at the 3 East Coast depot location, as indicated by the red arrows in this slide.

The reduction to civilian and military positions are projected because of the expected efficiencies, as a result of the transfer of the 115 depot level personnel, to the indicated FRC sites.

This slide illustrates the proposed reorganization within the 3 West Coast Fleet Readiness Centers and associated FRC Sites.

The consolidation of the West Coast FRC's will result in a reduction of 490 civilian equivalent positions, at the 3 Fleet Readiness Centers, as a result of expected efficiencies in the transfer of 97 depot personnel, to the indicated FRC Sites.

This recommendation was justified on the basis that consolidation and reorganization is expected to reduce maintenance repair time, reduce supply inventory, and reduce the number of items sent to depots for repair. The recommendation also positions maintenance activities closer to fleet concentrations and eliminates a total of 529,000 square feet of maintenance production space.

COBRA data for this recommendation estimated a one-time cost of \$298.1 million, an immediate payback, a 20-year net present value savings of \$4.7 Billion, and projects the elimination of 1,192 civilian and 465 military positions.

We found the cost associated with the closure and movement of Naval Support Activity Crane, ALQ-99 workload, to Whidbey Island is not cost effective. Because, it requires a one time cost of \$180 million with a net present value cost of \$687 million. Additionally, the ALQ-99 supports the EA6B aircraft that is being moved out of the inventory in 10-15 years.

We also found, the cost saving estimates, of this recommendation do not represent fairly, savings that will be obtained. We found errors in the estimation of construction costs, and the saving projections as a result of personnel eliminations.

Additionally, as GAO, we questioned the estimated net annual recurring savings projected, because savings were from overhead efficiency gains, that have not been validated.

#### COBRA DATA

	DoD COBRA Run	Commission COBRA	Without Military Personnel
One Time Cost Cost/(Savings)	\$ 298.1M	\$33.5M	\$33.4M
Net Implementation Cost/(Savings)	(\$1,528.2 M)	(\$1,412M)	(\$1,365.1M)
Annual Recurring Cost/(Savings)	(\$341.2 M)	(\$248.4M)	(\$238M)
Payback Period Cost/(Savings)	Immediate	Immediate	Immediate
Net Present Value at 2025 Cost/(Savings)	(\$4,724.2M)	(\$3,715M)	(\$3,570.1M)

This slide compares the DoD cost and savings estimates of this recommendation to our estimated costs, factoring estimated savings for revised military construction cost, the elimination of the Crane realignment to Whidbey Island, and compensating for the estimated empty positions as a result of efficiencies already realized.

The comparison shows a one time cost reduction from \$298.1 million to \$33.4 million, and a the 20 year net present value reduction from \$4.7 Billion to \$3.6 Billion. However, this proposal continues to be cost effective with an immediate payback period.

The last column estimates the cost difference between Commission COBRA estimates and a revised COBRA eliminating all military personnel positions in estimating cost savings. Because the majority of eliminations in this recommendation are civilians, there is only \$145 million dollar change in the 20 year net present value savings projected.

A Motion to Make  
Additional Recommendation 3,  
Naval Air Station, Oceana, Virginia,  
to appear at Chapter XI, Section 193 of the Bill.

Realigns Naval Air Station Oceana, Virginia Beach, VA by relocating the East Coast Master Jet Base to Cecil Field, FL, conditioned on prior actions by the State of Florida.

Offered by: \_\_\_\_\_

Seconded by: \_\_\_\_\_

**Approved**

**Disapproved**

I move:

- that the Commission find that when the Secretary of Defense failed to recommend the realignment of Naval Air Station Oceana, Virginia Beach, Virginia, he substantially deviated from Final Selection Criteria 1, 2, 3, 4 and 5 and the Force Structure Plan;
- that the Commission add to the list of installations to be closed or realigned the recommendation:
  - **“Realign Naval Air Station Oceana, Virginia by relocating the East Coast Master Jet Base to Cecil Field, Florida,**
    - if the Commonwealth of Virginia and the municipal governments of Virginia Beach, Virginia and Chesapeake, Virginia fail to enact and enforce legislation to prevent further encroachment of Naval Air Station Oceana by the end of March 2006, to wit:
      - enact State-mandated zoning controls requiring the cities of Virginia Beach and Chesapeake to adopt zoning ordinances that require the governing body to follow Air Installation Compatibility Use Zone (AICUZ) guidelines in deciding discretionary development applications for property in Noise Level 70 dB Day Night Average Noise Level DNL or greater;

- enact state and local legislation and ordinances to establish a program **that requires the Commonwealth of Virginia and the city of Virginia Beach to condemn fund the condemnation** and purchase of all the property located within all the Accident Potential/Zone One areas for Naval Air Station Oceana as depicted for 1999 AICUZ Pamphlet published by the U.S. Navy, and to appropriate and expend \$15 million dollars annually for such purposes, *more of which can be from federal funds,*
- codify the 2005 Final Hampton Roads Joint Land Use Study (JLUS) recommendations;
- legislate requirements for the cities of Virginia Beach and Chesapeake to ~~evaluate~~ **ensure that** undeveloped properties in Noise Zones 70dB DNL or greater ~~for are rezoning classifications that would~~ **rezoned to** not allow uses incompatible under AICUZ guidelines; and  
*state and local*
- establish programs **and dedicated funding** for purchase of development rights of the Inter-facility Traffic Area between NAS Oceana and NALF Fentress; Enact legislation creating the Oceana/Fentress Advisory Council." at Chapter XI, Section 193 of the Bill.
- **It shall be deemed that the actions prescribed to be taken by the state of Virginia and the Cities of Virginia Beach and Chesapeake by the end of March 2006 have not been taken in their entirety unless the Chairman of the Commission certifies in writing to the President by April 15, 2006 that such actions have been taken.**
- and if the State of Florida:
  - appropriates sufficient funds to relocate commercial tenants presently located at Cecil Field, Florida,
  - appropriates sufficient funds to secure Public Private Ventures for all the personnel housing required by the Navy at Cecil Field to accomplish this relocation, and;
  - turns over fee simple title to the property comprising the former Naval Air Station Cecil Field, including all infrastructure improvements that presently exist, to the Department of Defense on or before December 31, 2006, if the Commonwealth of Virginia and the municipal governments of Virginia Beach, Virginia and Chesapeake, Virginia decline from the outset to take the actions required above, or within six months of the Commonwealth of Virginia and the municipal governments of Virginia

Beach, Virginia and Chesapeake, Virginia failing to carry through with any of the actions set out above, whichever is later. The State of Florida may not encumber the title by any restrictions other than a reversionary clause in favor of the State of Florida and short-term tenancies consistent with the phased relocation of the Master Jet Base to Cecil Field.

- If the Commonwealth of Virginia and the municipal governments of Virginia Beach, Virginia and Chesapeake, Virginia fail to take all of the prescribed actions, and the State of Florida meets the conditions established by this recommendation, the units and functions that shall relocate to Cecil Field will include, but are not limited to, all of the Navy F/A-18 Strike Fighter Wings, aviation operations and support schools, maintenance support, training and any other additional support activities the Navy deems necessary and appropriate to support the operations of the Master Jet Base.” at Chapter XI, Section 193 of the Bill, and;
  - that the Commission find this additional recommendation is consistent with the Final Selection Criteria and Force Structure Plan.

Additional statement of the Commission:

The BRAC 2005 report language shall state:

“It is the sense of the Commission that the Secretary of Defense deviated from the BRAC criteria by failing to consider NAS OCEANA for closure or realignment. The long standing and steadily worsening encroachment problem around NAS OCEANA, without strong support from State and City governments to eliminate current and arrest future encroachment, will in the long term, create a situation where the military value of NAS OCEANA will be unacceptably degraded. The remedies presented to the Commission thus far have been unconvincing.

It is also the sense of the Commission that the future of Naval Aviation is not Naval Air Station Oceana. The Commission urges the Navy to begin immediately to mitigate the noise encroachment and safety issues associated with flight operations around the Virginia Beach area by transitioning high intensity training evolutions to other bases that are much less encroached such as Navy Outlying Field Whitehouse, Florida or Kingsville, Texas.

The Secretary of Defense is directed to cause a rapid, complete, due diligence review of the offer of the State of Florida to reoccupy the former NAS Cecil Field and to compare this review against any plan to build a new master jet base at any other location. This review is to be completed within six months from the date the BRAC legislation enters into force, and is to be made public to the effected states for comment.

After review of the states comments, which shall be submitted with 120 days after publishing the review, the Secretary of Defense shall forward to the oversight committees of Congress the

8/24/2005 7:02 PM

review, the states' comments and his recommendation on the location of the Navy's future Atlantic Fleet Master Jet Base.”

Fort Monmouth Talking Points

1. The closure of Ft. Monmouth is the single largest Army savings generator at \$1,025.8 Million Dollars 20-year NPV savings with a 6 year payback.

~~2. Closing Ft. Monmouth but leaving the Night Vision Lab at Ft. Monmouth. Savings \$1,159.0 M NPV, and it pays back~~

Commissioner Skinner

Sir - Attached are

Expanded Talking Points

Talking points to support the closure recommendation for Red River Army Depot:

1. Red River Army Depot (RRAD) does the depot-level repair of systems which are concentrated at other Army maintenance depots. Consolidation of their outlier programs would create efficiencies within the depot maintenance program:
  - a. The Patriot Missile mission performed at RRAD will integrate well with other tactical missile programs at the Letterkenny Army Depot in Chambersburg, Pennsylvania.
  - b. The Bradley Fighting Vehicle and MLRS which is on the Bradley chassis missions will integrate well with other combat vehicle programs at the Anniston Army Depot, in Anniston, Alabama.
  - c. The Recapitalization of HMMWVs is also performed at Letterkenny Army Depot and with the Maine Military Authority at the former Loring Air Force Base in Limestone, Maine. This workload can transfer as well.
  - d. Munitions missions are performed at multiple locations across the Army's industrial base.
2. The arguments that have been made to keep the aging facilities open at RRAD are all related to current efforts and surge as opposed to looking at the 2025 structure the BRAC Commission was asked to plan for.
3. At some point, the surge in depot level maintenance will be over and all of the Army's maintenance depots will face declining workload. Reducing the infrastructure by one installation will make those remaining facilities more cost efficient.
4. The rubber facility where they reclaim track and the M1 Abrams Tank road wheel is only important now. Understanding that private industry has not been able to successfully replicate this, do we really need this capability in the future, or is this something we can get private industry involved with and fix?
5. This installation was on the BRAC list in 1995 as a closure for the same reasons it's listed today. Other depots perform similar functions and can absorb these missions.
