Dear member of BRAC Commision,

Dear member of BRAC commision,

Please do not shut down the Cannon Air Force Base. It is a big part of the community with the annual air shows and things. Their will be economic issues and problems happening. Keeping the base here, we will have a secure state. With the Sandia labs and atomic bomb stuff here, the base helps protect all of that. Their will be no use in putting a base in a populated area. Take New York for example. They have a bunch of people that live there, testing missles and bombs there will harm civilians severely. As for keeping the base, they have plenty of room to test that kind of stuff. Just please keep the base here. I live by the base and ever since I was a little kid I have enjoyed listening to the jets ROAR their engines and watching them fly over my house. Please don't take that away! Thank you for your time.

Aaron Cline
