

## RC Transformation in Indiana

**Recommendation:** Close Lafayette United States Army Reserve Center in Lafayette, Indiana and relocate units into a new Armed Forces Reserve Center (AFRC) on the site of the existing Indiana Army Guard Armory (18B75) Lafayette, Indiana, if the Army is able to acquire land suitable for the construction of the facility. The new AFRC shall have the capability to accommodate the Indiana National Guard units from the following Indiana ARNG Readiness Centers: Boswell, Indiana, Attica, Indiana, Delphi, Indiana, Remington, Indiana, Monticello, Indiana, and Darlington, Indiana, if the state decides to relocate those National Guard units.

Realign Charles H. Seston United States Army Reserve Center by relocating the 402<sup>nd</sup> Engineer Company and Detachment 1 of the 417th Petroleum Company into a new Armed Forces Reserve Center in the vicinity of Greenwood and Franklin, Indiana, if the Army is able to acquire land suitable for the construction of the facility. The new AFRC shall have the capability to accommodate the Indiana National Guard units from the Camp Atterbury Army National Guard Readiness Center (building #500), and the 219<sup>th</sup> Area Support Group Readiness Center (Building #4), Camp Atterbury, Indiana, if the state decides to relocate those National Guard units.

**Justification:** This recommendation transforms Reserve Component facilities throughout the State of Indiana. The implementation of this recommendation will enhance military value, improve homeland defense capability, greatly improve training and deployment capability, create significant efficiencies and cost savings, and is consistent with the Army's force structure plans and Army transformational objectives.

This recommendation is the result of a state-wide analysis of Reserve Component installations and facilities conducted by a team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command.

This recommendation closes one Army Reserve Center in the state of Indiana and constructs two multi component, multi functional Armed Forces Reserve Centers capable of accommodating National Guard and Reserve units. This recommendation reduces the number of separate DoD installations by relocating to an existing base. The Department understands that the State of Indiana will close the following INARNG Readiness Centers: Boswell, Indiana, Attica, Indiana, Delphi, Indiana, Remington, Indiana, Monticello, Indiana, Darlington, Indiana, and Camp Atterbury, Indiana. The Armed Forces Reserve Centers will have the capability to accommodate these units if the State decides to relocate the units from these closed facilities into the new AFRCs.

This recommendation considered feasible locations within the demographic and geographic areas of the closing facilities and affected units. The site selected was determined as the best location because it optimizes the Reserve Components ability to recruit and retain Reserve Component soldiers and to train and mobilize units impacted by this recommendation.

This recommendation provides the opportunity for other Local, State, or Federal organizations to partner with the Reserve Components to enhance Homeland Security and Homeland Defense at a reduced cost to those agencies.

Although not captured in the COBRA analysis, this recommendation avoids an estimated \$34.7M in mission facility renovation costs and procurement avoidances associated with meeting AT/FP construction standards and altering existing facilities to meet unit training and communications requirements. Consideration of these avoided costs would reduce costs and increase the net savings to the Department of Defense in the 6-year BRAC implementation period, and in the 20-year period used to calculate NPV.

**Payback:** The total estimated one-time cost to the Department of Defense to implement this recommendation is \$47.6M. The net of all costs and savings to the Department of Defense during the implementation period is a cost of \$33.7M. Annual recurring savings to the Department after implementation are \$2.7M with a payback expected in 22 years. The net present value of the costs and savings to the Department over 20 years is a cost of \$6.1M.

**Economic Impact on Communities:** Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 32 jobs (21 direct and 11 indirect jobs) over the 2006 – 2011 period in the Lafayette, IN Metropolitan Statistical Area, which is less than 0.1 percent of economic area employment.

Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 16 jobs (12 direct and 4 indirect jobs) over the 2006 – 2011 period in the Indianapolis, IN Metropolitan Statistical Area, which is less than 0.1 percent of economic area employment.

The aggregate economic impact of all recommended actions on these economic regions of influence was considered and is at Appendix B of Volume I.

**Community Infrastructure Assessment:** A review of the community attributes revealed no significant issues regarding the ability of the infrastructure of the communities to support missions, forces, and personnel. There are no known community infrastructure impediments to implementation of all recommendations affecting the installations in this recommendation.

**Environmental Impact:** This recommendation has no impact on air quality, cultural, archeological, or tribal resources; dredging; land use constraints or sensitive resource areas; marine mammals, resources, or sanctuaries; noise; threatened and endangered species or critical habitat; waste management; water resources; or wetlands. This recommendation will require spending approximately \$0.02M for waste management and/or environmental compliance activities. These costs were included in the payback calculation. This recommendation does not otherwise impact the costs of environmental restoration, waste management, and environmental compliance activities. The aggregate

environmental impact of all recommended BRAC actions affecting the installations in this recommendation has been reviewed. There are no known environmental impediments to implementation of this recommendation.

#### **Competing Recommendations and Other Information:**

There are no potential or known competing recommendations that could conflict with this recommendation.

This recommendation combines the following previously approved candidate recommendations into a single candidate recommendation; USA-0027, USA-0028.

#### **Force Structure Capabilities:**

The Reserve Component continues to be an important and necessary part of the Army's force structure to meet its current and future operational requirements. This recommendation is consistent with and supports the Army's Force Structure Plan submitted with the FY 06 Budget Documents, and provides the necessary capacity and capability to support the units affected by this action. It considers essential manning, training, organizing, equipping, and sustaining requirements, as well as approved transformational initiatives to ensure the Army and Department of Defense have the capabilities necessary to meet mission requirements.

#### **MVA Results:**

The Department of the Army has more than 4000 Reserve Component facilities across the United States. Because of the sheer numbers of these facilities, the process the Army had developed for arriving at a quantitative military value score for its 97 major installations (including leases) was not practical for its Reserve Component facilities. Additionally, if measured by the active process, which valued training lands and ranges among other things, the Reserve Component facilities would not have compared well against the active installations. For these reasons, it was the military judgment of the Department of the Army that it needed to craft a unique approach for ascertaining the overall military value of Reserve Component facilities. A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command conducted a military value assessment of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed, specifically against DoD Criteria one through four, in their ability to support joint stationing options that enhance Army and DoD transformation; their ability to enhance Reserve Component operations training, mobilization and power projection capabilities; their ability to sustain recruiting and retention; their ability to consolidate functions wherever appropriate, to include schools, personnel, logistics, and other management functions; their ability to relocate Reserve Component units and activities from leased and encroached properties that do not meet anti-terrorism and force-protection requirements onto established military facilities; and their ability to ensure the future readiness of Army forces while reducing the long-term costs of sustaining the base structure. The assessments were certified by the Office of the Adjutant General and

the Army Reserve Regional Readiness Command, validated by the Army Audit Agency, analyzed by the Army Basing Study Group, and utilized for deliberations.

Proposal closes lower value installations (in terms of the condition of the facilities, encroachment, proper size building, military vehicle parking and storage for the type of unit) and consolidates onto existing higher value installations where geographically feasible or onto a new installation of higher value because it meets the requirements of the Army's Stationing Strategy for Reserve Component installations.

This recommendation will significantly improve readiness and home station training opportunities by collocating National Guard and Reserve Combat, Combat Support and Combat Service Support units. This collocation of multiple and varied units will allow for more effective communications, more realistic training venues and create cross-functional career development opportunities. The new AFRCs will enhance distributed learning and professional skills / sustainment training. Implementation of this recommendation will enhance individual soldier and unit readiness by providing modern facilities for Reserve Component personnel and units to execute the Train/Alert/Deploy process in support of mobilization/demobilization operations.

Collocation of multiple units into multi-functional centers provides substantially improved homeland defense capabilities throughout the State of Indiana. Upon activation of the unit/units for emergency contingency missions, the centers will provide critical enhanced communications infrastructure and staging areas for a more rapid response. The capacity of the facilities allows for a response by larger, more capable task organized forces. Due to the existence of federally controlled enclaves and secure communication capabilities, the centers may also provide a platform for interagency participation and cooperation in response to a wide range of emergency homeland defense situations.

This recommendation will enhance recruitment and retention of the men and women in the Reserve Component by setting the conditions for better home station training and increased support for family readiness operations for mobilized reservists.

#### **Capacity Analysis Results:**

A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command utilized the Department of Defense Guard and Reserve Unit Facilities System (GRUFS) database to conduct an installation inventory and capacity analysis of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed against their

ability to support Reserve Component training, operations, force structure stationing, mobilization, future expansion, potential surge, and anti-terrorism and force-protection requirements. Facilities that did not meet these requirements were identified for further analysis and potential closure or realignment. The assessments were certified by the Office of the Adjutant General and the Army Reserve Regional Readiness Command, validated by the Army Audit Agency, analyzed by the Army Basing Study Group, and utilized for deliberations.

AFRC Lafayette, IN – The closing USAR Center in Lafayette, IN does not have sufficient capacity for consolidation or expansion and no existing active duty installations are feasible. The existing INARNG Readiness Center in Lafayette has sufficient capacity to accommodate the construction of a new Armed Forces Reserve Center.

AFRC Greenwood-Franklin, IN – Realigning location (Charles H. Seston USAR Center) does not have sufficient capacity for consolidation or expansion and no existing active duty installations are feasible, so a new location that can support the consolidated facility must be identified.

The new AFRCs will provide capacity to meet current and future mission requirements, including increased surge capability for unforeseen missions and mobilization and modified direct deployment requirements. New AFRCs are required to correct deficiencies in the availability and condition of the land and the facilities currently in use by the affected Reserve Component units. The current properties and facilities do not meet Anti-terrorism/Force Protection (AT/FP) construction standards and they are surrounded by incompatible land uses that prohibit necessary stand off distances.

The existing facilities are outdated and can no longer support the current/evolving force structure/equipment changes and associated training requirements. The units affected by this recommendation require 264,839 Usable Square Feet (USF) of space while the closing facilities provided 139,640 USF.
