

RC Transformation in Kentucky

Recommendation: Close the Richmond US Army Reserve Center, Maysville US Army Reserve Center and relocate and consolidate those units with Army Reserve units currently on Bluegrass Army Depot into a new Armed Forces Reserve Center (AFRC) and Field Maintenance Facility (FMS) on Blue Grass Army Depot, Kentucky. The new AFRC shall have the capability to accommodate Kentucky National Guard units located on Bluegrass Army Depot, Kentucky, if the state decides to relocate those National Guard units.

Close the Paducah Memorial United States Army Reserve Center and the Paducah #2 United States Army Reserve Center and relocate units into a new Armed Forces Reserve Center (AFRC) and Field Maintenance Shop (FMS) adjacent to the Paducah Airport, Paducah, Kentucky, if the Army is able to acquire land suitable for the construction of the facilities. The new AFRC and FMS shall have the capability to accommodate units from the Paducah Army National Guard Readiness Center and the Kentucky Army National Guard Organizational Maintenance Shop (OMS) #2, Paducah, Kentucky, if the state decides to relocate those National Guard units.

Justification: This recommendation transforms Reserve Component facilities throughout the State of Kentucky. The implementation of this recommendation will enhance military value, improve homeland defense capability, greatly improve training and deployment capability, create significant efficiencies and cost savings, and is consistent with the Army's force structure plans and Army transformational objectives.

This recommendation is the result of a state-wide analysis of Reserve Component installations and facilities conducted by a team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command.

This recommendation closes four Army Reserve Centers throughout the state of Kentucky and constructs two multi component, multi functional Armed Forces Reserve Centers, and two Field Maintenance Shops capable of accommodating National Guard and Reserve units. This recommendation reduces military manpower and associated costs for maintaining existing facilities by collapsing seven geographically separated facilities into two modern Armed Forces Reserve Centers. This recommendation reduces the number of separate DoD installations by relocating to an existing base. The Department understands that the State of Kentucky will close the Blue Grass Station and the Paducah Army National Guard Readiness Centers and the Kentucky Army National Guard Organizational Maintenance Shop, Paducah, Kentucky. The Armed Forces Reserve Centers will have the capability to accommodate these units if the State decides to relocate the units from these closed facilities into the new AFRCs.

The implementation of this recommendation will enhance military value, improve homeland defense capability, greatly improve training and deployment capability, create

significant efficiencies and cost savings, and is consistent with the Army's force structure plans and Army transformational objectives.

This recommendation considered feasible locations within the demographic and geographic areas of the closing facilities and affected units. The site selected was determined as the best location because it optimizes the Reserve Components ability to recruit and retain Reserve Component soldiers and to train and mobilize units impacted by this recommendation.

This recommendation provides the opportunity for other Local, State, or Federal organizations to partner with the Reserve Components to enhance Homeland Security and Homeland Defense at a reduced cost to those agencies.

Although not captured in the COBRA analysis, this recommendation avoids an estimated \$5,811,563 in mission facility renovation costs and procurement avoidances associated with meeting AT/FP construction standards and altering existing facilities to meet unit training and communications requirements. Consideration of these avoided costs would reduce costs and increase the net savings to the Department of Defense in the 6-year BRAC implementation period, and in the 20-year period used to calculate NPV.

Payback: The total estimated one-time cost to the Department of Defense to implement this recommendation is \$25.3M. The net of all costs and savings to the Department of Defense during the implementation period is a cost of \$6.9M. Annual recurring savings to the Department after implementation are \$4.2M with a payback expected in 6 years. The net present value of the costs and savings to the Department over 20 years is a savings of \$34.1M.

Economic Impact on Communities: Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 284 jobs (18 direct and 106 indirect jobs) over the 2006 – 2011 period in the Maysville, KY Micropolitan Statistical Area, which is less than 0.1 percent of economic area employment.

Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 48 jobs (31 direct and 17 indirect jobs) over the 2006 – 2011 period in the Paducah, KY-IL metropolitan statistical area, which is less than 0.1 percent of economic area employment.

The aggregate economic impact of all recommended actions on these economic regions of influence was considered and is at Appendix B of Volume I.

Community Infrastructure Assessment: A review of the community attributes revealed no significant issues regarding the ability of the infrastructure of the communities to support missions, forces, and personnel. There are no known community infrastructure impediments to implementation of all recommendations affecting the installations in this recommendation.

Environmental Impact: Due to presence of cultural resources and a very limited portion of the installation having been surveyed, surveys may have to occur at Blue Grass. Blue Grass Army Depot has a limited ability to accept new missions due to threatened and endangered species. This recommendation has no impact on air quality, dredging; land use constraints or sensitive resource areas; marine mammals, resources, or sanctuaries; noise; waste management; water resources; or wetlands. This recommendation will require spending approximately \$0.04M for waste management and/or environmental compliance activities. These costs were included in the payback calculation. This recommendation does not otherwise impact the costs of environmental restoration, waste management, and environmental compliance activities. Installation has no jurisdictional wetlands. The aggregate environmental impact of all recommended BRAC actions affecting the installations in this recommendation has been reviewed. There are no known environmental impediments to implementation of this recommendation.

Competing Recommendations and Other Information:

There are no potential or known competing recommendations that could conflict with this recommendation.

This recommendation combines the following previously approved candidate recommendations into a single candidate recommendation; USA-0172, USA-0075.

Force Structure Capabilities:

The Reserve Component continues to be an important and necessary part of the Army's force structure to meet its current and future operational requirements. This recommendation is consistent with and supports the Army's Force Structure Plan submitted with the FY 06 Budget Documents, and provides the necessary capacity and capability to support the units affected by this action. It considers essential manning, training, organizing, equipping, and sustaining requirements, as well as approved transformational initiatives to ensure the Army and Department of Defense have the capabilities necessary to meet mission requirements.

MVA Results:

The Department of the Army has more than 4000 Reserve Component facilities across the United States. Because of the sheer numbers of these facilities, the process the Army had developed for arriving at a quantitative military value score for its 97 major installations (including leases) was not practical for its Reserve Component facilities. Additionally, if measured by the active process, which valued training lands and ranges among other things, the Reserve Component facilities would not have compared well against the active installations. For these reasons, it was the military judgment of the Department of the Army that it needed to craft a unique approach for ascertaining the overall military value of Reserve Component facilities. A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command conducted a military value assessment of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed, specifically against DoD Criteria one through four, in their ability to support joint stationing options that enhance Army and DoD transformation; their ability to enhance Reserve Component operations training, mobilization and power projection capabilities; their ability to sustain recruiting and retention; their ability to consolidate functions wherever appropriate, to include schools, personnel, logistics, and other management functions; their ability to relocate Reserve Component units and activities from leased and encroached properties that do not meet anti-terrorism and force-protection requirements onto established military facilities; and their ability to ensure the future readiness of Army forces while reducing the long-term costs of sustaining the base structure. The assessments were certified by the Office of the Adjutant General and

the Army Reserve Regional Readiness Command, validated by the Army Audit Agency, analyzed by the Army Basing Study Group, and utilized for deliberations.

Proposal closes lower value installations (in terms of the condition of the facilities, encroachment, proper size building, military vehicle parking and storage for the type of unit) and consolidates onto existing higher value installations where geographically feasible or onto a new installation of higher value because it meets the requirements of the Army's Stationing Strategy for Reserve Component installations. Blue Grass Army Depot has 175 acres of land with maneuver space and ranges and ranks #45 in Military Value.

This recommendation will significantly improve readiness and home station training opportunities by collocating National Guard and Reserve Combat, Combat Support and Combat Service Support units. This collocation of multiple and varied units will allow for more effective communications, more realistic training venues and create cross-functional career development opportunities. The new AFRCs will enhance distributed learning and professional skills / sustainment training. Implementation of this recommendation will enhance individual soldier and unit readiness by providing modern facilities for Reserve Component personnel and units to execute the Train/Alert/Deploy process in support of mobilization/demobilization operations.

Collocation of multiple units into joint use, multi-functional centers provides substantially improved homeland defense capabilities throughout the State of Kentucky. Upon activation of the unit/units for emergency contingency missions, the centers will provide critical enhanced communications infrastructure and staging areas for a more rapid response. The capacity of the facilities allows for a response by larger, more capable task organized forces. Due to the existence of federally controlled enclaves and secure communication capabilities, the centers may also provide a platform for interagency participation and cooperation in response to a wide range of emergency homeland defense situations.

This recommendation will enhance recruitment and retention of the men and women in the Reserve Component by setting the conditions for better home station training and increased support for family readiness operations for mobilized reservists.

Capacity Analysis Results:

A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command utilized the Department of Defense Guard and Reserve Unit Facilities System (GRUFS)

database to conduct an installation inventory and capacity analysis of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed against their ability to support Reserve Component training, operations, force structure stationing, mobilization, future expansion, potential surge, and anti-terrorism and force-protection requirements. Facilities that did not meet these requirements were identified for further analysis and potential closure or realignment. The assessments were certified by the Office of the Adjutant General and the Army Reserve Regional Readiness Command, validated by the Army Audit Agency, analyzed by the Army Basing Study Group, and utilized for deliberations.

Closing facilities do not have sufficient capacity for consolidation or expansion and do not meet current force structure or unit design requirements. Gaining installation has sufficient building capacity or build-able acres to support proposal. Proposed site is located on Federal property assigned to the Blue Grass Army Depot (BGAD). Blue Grass Army Depot comprises 175 acres with one qualification range and it has set aside 25 acres for this facility. BGAD is a storage depot for ammo and chem. One closing facility is leased with an annual lease of \$80,000 that has no ability to meet contingency, mobilization, future force or force protection requirements. One on Blue Grass Depot is a trailer. Closes Maysville Army Reserve Center but does not move soldiers to Blue Grass Army Depot.

The new AFRCs will provide capacity to meet current and future mission requirements, including increased surge capability for unforeseen missions and mobilization and modified direct deployment requirements. New AFRCs are required to correct deficiencies in the availability and condition of the land and the facilities currently in use by the affected Reserve Component units. The current properties and facilities do not meet Anti-terrorism/Force Protection (AT/FP) construction standards and they are surrounded by incompatible land uses that prohibit necessary stand off distances.

The existing facilities are outdated and can no longer support the current/evolving force structure/equipment changes and associated training requirements. The units affected by this recommendation require 122,459 Usable Square Feet (USF) of space while the closing facilities provided 74,000 USF.

Cultural/Archeological/Tribal Resources	A very limited portion of this installation has been surveyed for cultural resources (< 5%); therefore, the extent of cultural resources on the installation and impacts to these resources is uncertain". Impact unlikely since BGAD has already identified 10 acres for facility, but area may have to be surveyed before construction.	ISR – Cannot dig or disturb site #230, 231 Archeological sites present, 3 burial sites (Indian Mounds) # 235 1 historic district identified, with one resource in the district #236 No programmatic agreement #234 – Native tribes have not asserted interest and contact is very rare. #232-Areas with high potential for archaeological resources identified #233 -.33% of installation surveyed
Dredging	No Impacts	No dredging impacts for this scenario.
Land Use Constraints/Sensitive Resource Areas	No Impacts. Restrictions present on activities and therefore ability to accept new missions due to TES present. 23 acres have been identified for new AFRC, but TES impact may have to be considered.	#30- Buildable Acres – Approx. 10 req'd and 498 available. #254, #256- Limited ability to accept new missions due to threatened and endangered species – restrictions present. CERL-high encroachment
Marine Mammals/Marine Resources/Sanctuaries	No Impacts	There are no impacts to marine resources from this proposal.
