

## **RC Transformation in Louisiana**

**Recommendation:** Close the Roberts United States Army Reserve Center Baton Rouge, LA and the Navy-Marine Corps Reserve Center, Baton Rouge, LA, and relocate units to a new Armed Forces Reserve Center and Field Maintenance Shop on suitable state property adjacent to the Baton Rouge Airport (State Property). The new AFRC shall have the capability to accommodate Louisiana National Guard Units from the Army National Guard Readiness Center located in Baton Rouge, LA and the Army National Guard Organizational Maintenance Shop #8 located in Baton Rouge, LA if the State of Louisiana decides to relocate those National Guard units.

Close United States Army Reserve Center, Shreveport, Louisiana, and the United States Army Reserve Center, Bossier City, Louisiana and relocate all Reserve Component units to a new Armed Forces Reserve Center that will be constructed on or adjacent to the Naval-Marine Corps Reserve Center, Shreveport in Bossier City, Louisiana if the Army is able to acquire suitable property for construction of the facilities.

**Justification:** This recommendation transforms Reserve Component facilities in the State of Louisiana. The implementation of this recommendation will enhance military value, improve homeland defense capability, greatly improve training and deployment capability, create significant efficiencies and cost savings, and is consistent with the Army's force structure plans and Army transformational objectives.

This recommendation is the result of a state-wide analysis of Reserve Component installations and facilities conducted by a team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command.

This recommendation closes three Army Reserve centers, one Navy-Marine Corps Reserve Center and constructs two multi component or joint, multi functional Armed Forces Reserve Centers (AFRCs), throughout the State of Louisiana, capable of accommodating National Guard, Army Reserve, Naval Reserve and Marine Corps Reserve units.

This recommendation reduces military manpower and associated costs for maintaining existing facilities by collapsing six separate facilities into two modern Armed Forces Reserve Centers. These joint use facilities will significantly reduce operating costs and create improved business processes. The Department understands that the State of Louisiana will close the Louisiana Army National Guard Readiness Center in Baton Rouge and Organizational Maintenance Shop # 8 in Baton Rouge. The Armed Forces Reserve Centers will have the capability to accommodate these units if the State decides to relocate the units from these closed facilities into the new AFRCs.

The implementation of this recommendation and creation of these new AFRCs will enhance military value, improve homeland defense capability, greatly improve training

and deployment capability, create significant efficiencies and cost savings, and is consistent with the Army's force structure plans and Army transformational objectives. This recommendation considered feasible locations within the demographic and geographic areas of the closing facilities and affected units. The sites selected were determined as the best locations because they optimize the Reserve Components ability to recruit and retain Reserve Component soldiers and to train and mobilize units impacted by this recommendation.

This recommendation provides the opportunity for other Local, State, or Federal organizations to partner with the Reserve Components to enhance Homeland Security and Homeland Defense at a reduced cost to those agencies.

Although not captured in the COBRA analysis, this recommendation avoids an estimated \$20.0M in mission facility renovation costs and procurement avoidances associated with meeting AT/FP construction standards and altering existing facilities to meet unit training and communications requirements. Consideration of these avoided costs would reduce costs and increase the net savings to the Department of Defense in the 6-year BRAC implementation period, and in the 20-year period used to calculate NPV.

**Payback:** The total estimated one-time cost to the Department of Defense to implement this recommendation is \$30.7M. The net of all costs and savings to the Department of Defense during the implementation period is a saving of \$17.7M. Annual recurring savings to the Department after implementation are \$13.6M with a payback expected in 2 years. The net present value of the costs and savings to the Department over 20 years is a savings of \$147.6M.

**Economic Impact on Communities:** Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 235 jobs (158 direct and 77 indirect jobs) over the 2006 – 2011 period in the Baton Rouge, LA Metropolitan Statistical Area, which is less than 0.1 percent of economic area employment. The aggregate economic impact of all recommended actions on this economic region of influence was considered and is at Appendix B of Volume I.

**Community Infrastructure Assessment:** A review of the community attributes revealed no significant issues regarding the ability of the infrastructure of the communities to support missions, forces, and personnel. There are no known community infrastructure impediments to implementation of all recommendations affecting the installations in this recommendation.

**Environmental Impact:** This recommendation has no impact on air quality, cultural, archeological, or tribal resources; dredging; land use constraints or sensitive resource areas; marine mammals, resources, or sanctuaries; noise; threatened and endangered species or critical habitat; waste management; water resources; or wetlands. This recommendation will require spending approximately \$0.05M for waste management and/or environmental compliance activities. These costs were included in the payback calculation. This recommendation does not otherwise impact the costs of environmental

restoration, waste management, and environmental compliance activities. The aggregate environmental impact of all recommended BRAC actions affecting the installations in this recommendation has been reviewed. There are no known environmental impediments to implementation of this recommendation.

#### **Competing Recommendations and Other Information:**

There are no potential or known competing recommendations that could conflict with this recommendation.

This recommendation combines the following previously approved candidate recommendations into a single candidate recommendation; USA-0182, USA-0153.

AFRC Baton Rouge, LA - this is a joint USA and DON proposal that supports the Navy recommendation to Close NMCRC Baton Rouge LA and consolidate USMC and USNR units into AFRC Baton Rouge.

AFRC Shreveport, LA - This is a USA proposal that consolidates Army facilities into an addition/alteration of a DON facility. It does require an additional land purchase which is addressed in the capacity paragraph and in COBRA.

#### **Force Structure Capabilities:**

The Reserve Component continues to be an important and necessary part of the Army's force structure to meet its current and future operational requirements. This recommendation is consistent with and supports the Army's Force Structure Plan submitted with the FY 06 Budget Documents, and provides the necessary capacity and capability to support the units affected by this action. It considers essential manning, training, organizing, equipping, and sustaining requirements, as well as approved transformational initiatives to ensure the Army and Department of Defense have the capabilities necessary to meet mission requirements.

#### **MVA Results:**

The Department of the Army has more than 4000 reserve component facilities across the United States. Because of the sheer numbers of these facilities, the process the Army had developed for arriving at a quantitative military value score for its 97 major installations (including leases) was not practical for its reserve component facilities. Additionally, if measured by the active process, which valued training lands and ranges among other things, the reserve component facilities would not have compared well against the active installations. For these reasons, it was the military judgment of the Department of the Army that it needed to craft a unique approach for ascertaining the overall military value of reserve component facilities. A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command conducted a military value assessment of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed, specifically against DoD Criteria one through four, in their ability to

support joint stationing options that enhance Army and DoD transformation; their ability to enhance reserve component operations training, mobilization and power projection capabilities; their ability to sustain recruiting and retention; their ability to consolidate functions wherever appropriate, to include schools, personnel, logistics, and other management functions; their ability to relocate Reserve component units and activities from leased and encroached properties that do not meet anti-terrorism and force-protection requirements onto established military facilities; and their ability to ensure the future readiness of Army forces while reducing the long-term costs of sustaining the base structure. The assessments were certified by the Office of the Adjutant General and the Army Reserve Regional Readiness Command, validated by the Army Audit Agency, analyzed by the Army Basing Study Group, and utilized for deliberations.

Proposal closes lower value installations (in terms of the condition of the facilities, encroachment, proper size building, military vehicle parking and storage for the type of unit) and consolidates onto existing higher value installations where geographically feasible or onto a new installation of higher value because it meets the requirements of the Army's Stationing Strategy for Reserve Component installations. This recommendation meets the Army BRAC objectives of Deployment, Mobilization, Homeland Defense, Unit Training, C4I Headquarters and Well-Being. It supports the BRAC principles of Recruit and Train, Quality of Life, Organize and Deploy and Employ. It supports the Transformational Options "Reshape Installations" and "Consolidate Guard and Reserve units at one location." It co-locates combat arms, combat support and combat service support TOE units with institutional training units. This recommendation directly improves the Joint Force's future mission capability for contingency response. It meets the Army BRAC Objective "Deployment" by co-locating forces close to Barksdale AFB from which they could conduct air movement. This recommendation meets the Army BRAC Objective "Mobilization" by co-locating forces in support of the RC Leadership home-station mobilization initiative and enabling the Train/Alert/Deploy model. Medical, personnel and training specialists that would be co-located will have the ability to conduct many soldier readiness processing (SRP) tasks. This recommendation meets the Army BRAC Objective "Unit Training" by co-locating a series of different unit types with institutional training units in a single joint facility. It co-locates deployable units with training units to improve responsiveness to doctrinal training and facilitate enhanced home station training. This recommendation meets the Army BRAC Objective "C4I Headquarters" by co-locating functions on a joint campus. This recommendation meets the Army BRAC Objective "Well-Being" by placing soldiers in a new facility with enhanced security and force protection on an installation that will have morale, welfare and recreation opportunities. This recommendation meets the Army BRAC Objective "Mission" by creating an Armed Forces Reserve Center with

Navy, Marine and Army forces close to an Air Force Base, thus creating a flexible, multi-mission capability.

This recommendation meets the BRAC Principle “Recruit and Train” by locating reserve component units in a joint facility which will enhance readiness and improve retention by placing them in a joint operational and training environment with greater diversity of opportunities. This recommendation meets the BRAC Principle “Quality of Life” by improving the physical plant and enhancing Anti-Terrorism/Force Protection. This recommendation meets the BRAC Principle “Organize” by creating a joint base with an improved capability to conduct surge and contingency operations. This recommendation meets the BRAC Principle “Deploy and Employ” by locating units close to where they can air-load and receive assistance from the USAF for air loading equipment and air movement planning. These units would be positioned so that it could deploy directly from home station. This recommendation meets Army Transformation Option #48 (Reshape RC

facilities to support home station mobilization). This recommendation meets Army Transformational Option #60 (Collocate Guard and Reserve units at active bases or consolidate Guard and Reserve units in joint use facilities). This recommendation creates a joint, multi-functional facility that provides an improved level of service at a reduced cost. The recommended facility consolidates common business functions to provide improved service at a reduced cost. It improves the Joint Force’s ability to support Homeland Security/Homeland Defense. Anti Terror/Force Protection (AT/FP) for all units will be improved, as the new building will meet Department of Defense standards. The new facility will improve the ability to execute Home Station Soldier Readiness Processing/mobilization/Demobilization (SRP/MOB/DEMOB) activities.

This recommendation will significantly improve readiness and home station training opportunities by collocating National Guard and Reserve Combat, Combat Support, and Combat Service Support units. This collocation of multiple and varied units will allow for more effective communications, more realistic training venues and create cross-functional career development opportunities. The new AFRCs will greatly enhance distributed learning and professional skills / sustainment training. Implementation of this recommendation will greatly enhance individual soldier and unit readiness by providing modern facilities for Reserve Component personnel and units to execute the Train/Alert/Deploy process in support of mobilization/demobilization operations.

Collocation of multiple units into joint use, multi-functional centers provides substantially improved homeland defense capabilities throughout the State of Louisiana. Upon activation of the unit/units for emergency contingency missions, the centers will provide critical enhanced communications infrastructure and staging areas for a more

rapid response. The capacity of the facilities allows for a response by larger, more capable task organized forces. Due to the existence of federally controlled enclaves and secure communication capabilities, the centers may also provide a platform for interagency participation and cooperation in response to a wide range of emergency homeland defense situations.

This recommendation will enhance recruitment and retention of the men and women in the Reserve Component by setting the conditions for better home station training and increased support for family readiness operations for mobilized reservists.

#### **Capacity Analysis Results:**

A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command utilized the Department of Defense Guard and Reserve Unit Facilities System (GRUFS) database to conduct an installation inventory and capacity analysis of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed against their ability to support Reserve Component training, operations, force structure stationing, mobilization, future expansion, potential surge, and anti-terrorism and force-protection requirements. Facilities that did not meet these requirements were identified for further analysis and potential closure or realignment. The assessments were certified by the Office of the Adjutant General and the Army Reserve Regional Readiness Command, validated by the Army Audit Agency, analyzed by the Army Basing Study Group, and utilized for deliberations.

Closing facilities do not have sufficient capacity for consolidation or expansion and do not meet current force structure or unit design requirements. Gaining installation has sufficient building capacity or buildable acres to support proposal.

AFRC Baton Rouge, LA

The Louisiana Army National Guard has offered a property (Almonaster) identified as the site for the AFRC.

AFRC Shreveport, LA

The regional command intent is to purchase land adjacent to the existing Navy-Marine Corps Reserve Center in Bossier City, Louisiana and construct an addition to that facility. Failing that, they would simply build and co-locate at another site in Bossier City. For planning purposes, a land acquisition cost of \$297,000 was used in the COBRA model. It closes 2 US Army Reserve (USAR) Centers aged 32 and 33 yrs old, over utilized 183% and 421%, where Anti Terror/Force Protection (AT/FP) upgrades are not feasible due to property size. It realigns 1 Navy- Marine Corps Reserve (NMCRC)

facility in Bossier City and converts it to a joint facility to accommodate the Army, Navy, and Marine Corps. The recommendation builds the USAR required space, adds a 7300 sq ft multi purpose (classrooms, training, billets) facility, adds 6100 sf for USMCR space and rehabs the existing USNMCRC facility.

The AFRCs will provide capacity to meet current and future mission requirements, including increased surge capability for unforeseen missions and mobilization and modified direct deployment requirements. New AFRCs are required to correct deficiencies in the availability and condition of the land and facilities currently in use by the affected Reserve Component units. Current properties and facilities do not meet Anti-terrorism/Force Protection (AT/FP) construction standards and they are surrounded by incompatible land uses that prohibit necessary stand off distances.

The existing properties and facilities are outdated and can no longer support the current/evolving force structure/equipment changes and associated training requirements. The units affected by this recommendation require 150,574 Square Feet (USF) of space while the closing facilities provide only 98,481 USF.

FOOTNOTES FOR SCREEN ONE

=====

#233 - USA 233 - AFRC Shreveport,LA

Close United States Army Reserve Center, Shreveport, Louisiana, and the United States Army Reserve Center, Bossier City, Louisiana and relocate all Reserve Component units to a new Armed Forces Reserve Center constructed on or adjacent to the Naval-Marine Corps Reserve Center, Shreveport in Bossier City, Louisiana if the Army is able to acquire suitable property for construction of the facilities.

FOOTNOTES FOR SCREEN TWO

=====

Used certified COBRA datacall from States/RRCs.

FOOTNOTES FOR SCREEN THREE

=====

Non-vehicle mission equipment from certified COBRA datacall from States/RRCs.

FOOTNOTES FOR SCREEN FOUR

=====

Shreveport USAR annual lease cost is \$1 per year.

Closing facility non-payroll federal BOS x .75 joint efficiency factor=\$22,100 for a new AFRC facility.

FOOTNOTES FOR SCREEN FIVE

=====

Cost to move computer server and related equipment from old to new facility is estimated to be \$1000 per facility.

A one-time cost of \$297K was included as the land acquisition cost based upon Regional Readiness Command input.

One-time cost for utilities calculated using the Army's Support Utility Tool = \$1453K

1 Basic EBS \* \$8,000 for Shreveport  
1 Complex EBS for Bossier City since it loses 500+ personnel

1 NEPA Record of Environmental Consideration (REC) = \$5,000 required at Shreveport.

Closing facility non-payroll federal BOS x .75 joint efficiency factor = \$ 23,925.00 BOS for new AFRC facility.

FOOTNOTES FOR SCREEN SEVEN

=====

Milcon/Rehab figures were derived by adding the SF requirements from ea facility (58,540+35,969+6100)= 100,609 x a joint savings factor of 67.6% to yield a required total SF of 68,011.

The requirement for the AFRC includes a 7300 SF multi-use building; The listed new milcon SF builds the USAR requirements and adds 6100 sf to accommodate USMCR required space. The remainder of the site (USNMCR side) would be renovated under this proposal.

## Education

This attribute defines the population in local school districts and identifies capacity. The pupil/teacher ratio, graduation rate, and composite SAT I/ACT scores provide a relative quality indicator of education. This attribute also attempts to give communities credit for the potential intellectual capital they provide.

NOTE: “MFR”--means a Memorandum For Record is on file at the installation/activity/agency to document problems in obtaining the required information. Reasons for not being able to obtain information may be that the school district refused to provide the information or the school district does not use or track the information. For each entry, the number of school districts for which data are available of the total number of school districts reported, and the number of MFRs is indicated.

		Basis
School District(s) Capacity		0 of 5 districts, 5 MFRs
Students Enrolled	83,441	5 of 5 districts
Average Pupil/Teacher Ratio	13.4:1	5 of 5 districts
High School Students Enrolled	18,606	4 of 5 districts, 1 MFR
Average High School Graduation Rate (US Avg 67.3%)	87.5%	3 of 5 districts, 2 MFRs
Average Composite SAT I Score (US Avg 1026)		0 of 5 districts, 5 MFRs

## Safety/Crime

The local community's Uniform Crime Reports (UCR) Index for 2002 per 100,000 people and the national UCR based on information from the Federal Bureau of Investigation (FBI) for 2002 is provided. The basis of the data (either MSA or state) is indicated.

Local UCR	6,680.7	Basis: MSA
National UCR	4,118.8	

*This document may contain information protected from disclosure by public law, regulations or orders.*

## **Transportation**

Distance to an airport shows convenience and availability of airline transportation. Public transportation shows potential for members and DoD civilians to use it to commute to/from work under normal circumstances and for leisure.

Distance from NAVMARCORESCEN\_BATON\_ROUGE\_LA to nearest commercial airport: 1.0 miles

Is NAVMARCORESCEN\_BATON\_ROUGE\_LA served by regularly scheduled public transportation? Yes

## **Utilities**

This attribute identifies a local community's water and sewer systems' ability to receive 1,000 additional people.

Does the local community's water system have the ability to meet an expanded need of an additional 1,000 people moving in the local community? Yes

Does the local community's sewer system have the ability to meet an expanded need of an additional 1,000 people moving in the local community? Yes
