

Single Drill Sergeant School

Recommendation: Realign Fort Benning, GA, and Fort Leonard Wood, MO, by relocating the Drill Sergeant School at each location to Fort Jackson, SC.

Justification: This recommendation consolidates Drill Sergeant's Training from three locations (Fort Benning, Fort Jackson, and Fort Leonard Wood) to one location (Fort Jackson), which fosters consistency, standardization and training proficiency. It enhances military value, supports the Army's force structure plan, and maintains sufficient surge capability to address future unforeseen requirements. This recommendation supports Army Transformation by collocating institutional training, MTOE units, RDTE organizations and other TDA units in large numbers on single installations to support force stabilization and engage training. It improves training capabilities while eliminating excess capacity at institutional training installations, and provides the same or better level of service at a reduced cost.

Payback: The total estimated one-time cost to the Department of Defense to implement this recommendation is \$1.8M. The net of all costs and savings to the Department of Defense during the implementation period is a saving of \$7.6M. Annual recurring savings to the Department after implementation are \$2.5M with a payback expected within one year. The net present value of the costs and savings to the Department over 20 years is a savings of \$31.3M.

Economic Impact on Communities: Assuming no economic recover, this recommendation could result in a maximum potential reduction of 171 jobs (121 direct and 50 indirect jobs) over the 2006 – 2011 period in the Columbus GA-AL Metropolitan area, which is 0.1 percent of economic area employment.

Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 237 jobs (183 direct and 54 indirect jobs) over the 2006 – 2011 period in the Ft. Leonard Wood, MO Metropolitan area, which is 0.9 percent of economic area employment.

The aggregate economic impact of all recommended actions on these economic regions of influence was considered and is at Appendix B of Volume I.

Community Infrastructure Assessment: A review of community attributes revealed no significant issues regarding the ability of the local community's infrastructure to support missions, forces, and personnel. There are no known community infrastructure impediments to implementation of all recommendations affecting the installations in this recommendation.

Environmental Impact: An Air Conformity determination and New Source Review and permitting effort will be required at Fort Jackson. This recommendation has no impact on cultural, archeological, or tribal resources; dredging; land use constraints or sensitive resource areas; marine mammals, resources, or sanctuaries; noise; threatened and

endangered species or critical habitat; waste management; water resources; or wetlands. This recommendation will require spending approximately \$0.3M for environmental compliance costs. These costs were included in the payback calculation. This recommendation does not otherwise impact the costs of environmental restoration, waste management, and environmental compliance activities. The aggregate environmental impact of all recommended BRAC actions affecting the installations in this recommendation has been reviewed. There are no known environmental impediments to implementation of this recommendation.

recommendation.

Notes:						
¹ Square Footage (SF) includes General Purpose Instructional buildings, Applied Instructional buildings, and General Administrative Buildings. SF values are in thousands.						
² Max Potential Capacity is stated as buildable acres. For comparison purposes, a large Army School (e.g. the Infantry School at Fort Benning) requires approximately 790 buildable acres. The listed acreage is available for all missions on the installation.						
³ Square Footage (SF) of General Purpose Instructional buildings, Applied Instructional buildings, and General Administrative Buildings are generally used to capacity (as measured by the use of one 8-hour shift per day) at most Army installations. Depending on an installations current use of multiple shifts, capacity can be increased by adding the number of shifts used each day. Currently, several Army installations function with multiple shifts.						
⁴ There is no specified surge requirement for institutional training.

General Schedule (GS) Locality Pay provides a relative scale to compare local salaries with government salaries and Basic Allowance for Housing (BAH) is an indicator of the local rental market. In-state tuition is an indicator of the support provided by the state for active duty family members to participate in higher-level education opportunities.

In-state Tuition for Family Member		Yes	
In-state Tuition Continues if Member PCSs Out of State		No	

Education

This attribute defines the population in local school districts and identifies capacity. The pupil/teacher ratio, graduation rate, percentage of certified teachers and composite SAT I/ACT scores provide a relative quality indicator of education. This attribute also attempts to give communities credit for the potential intellectual capital they provide.

NOTE: "MFR" means a Memorandum For Record is on file at the installation/activity/agency to document problems in obtaining the required information. Reasons for not being able to obtain information may be that the school district refused to provide the information or the school district does not use or track the information.

If the installation/activity/agency has incomplete information from the local school system in order to accurately compute a score in this area, the number of school districts reporting information will be captured in addition to the computed answer.

SCENARIO # 40

TITLE: USA-0046 DRILL SGT SCHOOL CONSOLIDATION AT FT. JACKSON

GENERAL DESCRIPTION: This recommendation, in conjunction with the Realign Fort Leonard Wood (Drill Sergeant School to Fort Jackson) recommendation, consolidates Drill Sergeant's Training from three locations Fort Benning, Fort Jackson, & Fort Leonard Wood to one location, Fort Jackson.

Proposal affects the following Army installations:

1. Ft Jackson gains approximately 300 personnel and requires no new MilCon.
2. Ft Benning loses approximately 200 personnel.
3. Ft Leonard Wood loses approximately 100 personnel.

Environmental Impact

Fort Jackson

This recommendation moves additional personnel but causes no new construction on Fort Jackson. Drill Sergeant training is predominantly classroom-based, so field training frequency and the amount of land impacted by field training, is not expected to increase significantly. Fort Jackson is located in a Non-attainment area for Ozone (8-hour). Therefore, an Air Conformity determination and New Source Review and permitting effort will be required. No adverse effects to any other environmental resource areas are expected.

This recommendation will require spending approximately \$250K for environmental compliance costs. These costs were included in the payback calculation. This recommendation does not otherwise impact the costs of environmental restoration, waste management, and environmental compliance activities.

Fort Benning and Fort Leonard Wood

These installations are losing personnel, but not closing, so no adverse impacts to any environmental resource areas are expected.
