

USAR Command and Control New England

Recommendation: Close the Westover Armed Forces Reserve Center, Chicopee, Massachusetts, the MacArthur United States Army Reserve Center, Springfield, Massachusetts, the United States Army Reserve Area Maintenance Support Activity, Windsor Locks, Connecticut, and realign the Malony United States Army Reserve Center on Devens Reserve Forces Training Area by disestablishing the 94th Regional Readiness Command, and relocate all units from the closed facilities to a new Armed Forces Reserve Center on Westover Air Reserve Base. Establish an Army Reserve Sustainment Brigade headquarters in the new Armed Forces Reserve Center on Westover Air Reserve Base. Realign Devens Reserve Forces Training Area by relocating the 5th JTF, 654th ASG and the 382nd MP Battalion to the new Armed Forces Reserve Center on Westover Air Reserve Base. The new Armed Forces Reserve Center shall have the capability to accommodate Massachusetts Army National Guard units from the Massachusetts Army National Guard Armory in Agawam Massachusetts, if the state decides to relocate those National Guard units.

Justification: This recommendation transforms Reserve Component facilities and command and control structure throughout the Southeast Region of the United States. The implementation of this recommendation will enhance military value, improve homeland defense capability, greatly improve training and deployment capability, create significant efficiencies and cost savings, and is consistent with the Army's force structure plans and Army transformational objectives.

This recommendation is the result of a nation-wide analysis of Reserve Component installations and facilities conducted by a team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command.

This recommendation supports the Army Reserve's Command and Control restructuring initiative to reduce Regional Readiness Commands from ten to four by disestablishing one major peacetime administrative headquarters, the 94th Regional Readiness Command and creating a new deployable headquarters on Westover Air Reserve Base.

This recommendation closes one Armed Forces Reserve Center in Chicopee, one United States Army Reserve Center in Springfield, Massachusetts; one United States Army Reserve Area Maintenance Support Activity in Windsor Locks, Connecticut and constructs a multi-component, multi-functional Armed Forces Reserve Center on Westover Air Reserve Base. The Marine Corps Reserve units located in the Armed Forces Reserve Center in Chicopee will relocate to the new AFRC on Westover Air Reserve Base. The Department understands that the State of Massachusetts will close one Massachusetts Army National Guard Armory in Agawam, Massachusetts. The Armed Forces Reserve Center will have the capability to accommodate these units if the State decides to relocate the units from the closed facilities into the new AFRC.

Although not captured in the COBRA analysis, this recommendation avoids an estimated \$21,640,584 in mission facility renovation costs and procurement avoidances associated with meeting AT/FP construction standards and altering existing facilities to meet unit training and communications requirements. Consideration of these avoided costs reduce costs and increase the net savings to the Department of Defense in the 6-year BRAC implementation period, and in the 20-year period used to calculate NPV.

This recommendation provides the opportunity for other Local, State, or Federal organizations to partner with the Reserve Components to enhance Homeland Security and Homeland Defense at a reduced cost to those agencies.

Payback: The total estimated one-time cost to the Department of Defense to implement this recommendation is \$96.1M. The net of all costs and savings to the Department of Defense during the implementation period is a cost of \$61.2M. Annual recurring savings to the Department after implementation are \$8.4M with a payback expected in 13 years. The net present value of the costs and savings to the Department over 20 years is a savings of \$21.8M.

Economic Impact on Communities: Cambridge: Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 243 jobs (155 direct and 88 indirect jobs) over the 2006 – 2011 period in the Cambridge-Newton-Framingham Massachusetts Metropolitan Division, which is less than 0.1 percent of economic area employment. The aggregate economic impact of all recommended actions on this economic region of influence was considered and is at Appendix B of Volume I.

Community Infrastructure Assessment: A review of the community attributes revealed no significant issues regarding the ability of the infrastructure of the communities to support missions, forces, and personnel. There are no known community infrastructure impediments to implementation of all recommendations affecting the installations in this recommendation.

Environmental Impact: A minor air permit revision may be needed at Westover. Additional operations may impact historic sites and sensitive resource areas and constrain operations at Westover. The hazardous waste program at Westover may need to be modified. Additional operations may impact wetlands, which may restrict operations. This recommendation will require spending approximately \$0.6M for waste management and/or environmental compliance activities. These costs were included in the payback calculation. This recommendation does not otherwise impact the costs of environmental restoration, waste management, and environmental compliance activities. The aggregate environmental impact of all recommended BRAC actions affecting the installations in this recommendation has been reviewed. There are no known environmental impediments to implementation of this recommendation.

Competing Recommendations and Other Information:

There are no potential or known competing recommendations that could conflict with this recommendation.

This recommendation consolidates USAR and ARNG facilities onto an AF installation. The USMCR is a tenant of one of the USARC Navy has indicated they will move as a tenant.

Force Structure Capabilities:

The Reserve Component continues to be an important and necessary part of the Army's force structure to meet its current and future operational requirements. This recommendation is consistent with and supports the Army's Force Structure Plan submitted with the FY 06 Budget Documents, and provides the necessary capacity and capability to support the units affected by this action. It considers essential manning, training, organizing, equipping, and sustaining requirements, as well as approved transformational initiatives to ensure the Army and Department of Defense have the capabilities necessary to meet mission requirements.

Army BRAC analysis and this recommendation enable the efficient and effective reduction of 33 military positions to the Reserve Component in Massachusetts in accordance with the Force Structure Plan and the Total Army Analysis process.

MVA Results:

The Department of the Army has more than 4000 Reserve Component facilities across the United States. Because of the sheer numbers of these facilities, the process the Army had developed for arriving at a quantitative military value score for its 97 major installations (including leases) was not practical for its Reserve Component facilities. Additionally, if measured by the active process, which valued training lands and ranges among other things, the Reserve Component facilities would not have compared well against the active installations. For these reasons, it was the military judgment of the Department of the Army that it needed to craft a unique approach for ascertaining the overall military value of Reserve Component facilities. A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command conducted a military value assessment of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed, specifically against DoD Criteria one through four, in their ability to support joint stationing options that enhance Army and DoD transformation; their ability to enhance Reserve Component operations training, mobilization and power projection capabilities; their ability to sustain recruiting and retention; their ability to consolidate functions wherever appropriate, to include schools, personnel, logistics, and other

management functions; their ability to relocate Reserve Component units and activities from leased and encroached properties that do not meet anti-terrorism and force-protection requirements onto established military facilities; and their ability to ensure the future readiness of Army forces while reducing the long-term costs of sustaining the base structure. The assessments were certified by the Office of the Adjutant General and the Army Reserve Regional Readiness Command, validated by the Army Audit Agency, analyzed by the Army Basing Study Group, and utilized for deliberations.

Proposal closes lower value installations (in terms of the condition of the facilities, encroachment, proper size building, military vehicle parking and storage for the type of unit) and consolidates onto existing higher value installations where geographically feasible or onto a new installation of higher value because it meets the requirements of the Army's Stationing Strategy for Reserve Component installations.

This recommendation will significantly improve readiness and home station training opportunities by collocating United States Army Reserve, Army National Guard and tenant United States Marine Corps Reserve Combat, Combat Support, and Combat Service Support units. This collocation of multiple and varied units will allow for more effective communications, more realistic training venues and create cross-functional career development opportunities. The new AFRC will enhance distributed learning and professional skills / sustainment training. Implementation of this recommendation will also enhance individual soldier and unit readiness by providing modern facilities for Reserve Component personnel and units to execute the Train/Alert/Deploy process in support of mobilization/demobilization operations.

Collocation of multiple units into a joint use, multi-functional center provides substantially improved homeland defense capabilities throughout the State of Massachusetts. Upon activation of the unit/units for emergency contingency missions, the center will provide critical enhanced communications infrastructure and staging areas for a more rapid response. The capacity of the facility allows for a response by larger, more capable task organized forces. Due to the existence of federally controlled enclaves and secure communication capabilities, the center may also provide a platform for interagency participation and cooperation in response to a wide range of emergency homeland defense situations.

This recommendation will enhance recruitment and retention of the men and women in the Reserve Component by setting the conditions for better home station training and increased support for family readiness operations for mobilized reservists.

This recommendation considered feasible locations within the demographic and geographic areas of the closing facilities and affected units. The site selected was determined as the best location because it optimizes the Reserve Components ability to recruit and retain Reserve Component soldiers and to train and mobilize units impacted by this candidate recommendation.

Capacity Analysis Results:

A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command utilized the Department of Defense Guard and Reserve Unit Facilities System (GRUFS) database to conduct an installation inventory and capacity analysis of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed against their ability to support Reserve Component training, operations, force structure stationing, mobilization, future expansion, potential surge, and anti-terrorism and force-protection requirements. Facilities that did not meet these requirements were identified for further analysis and potential closure or realignment. The assessments were certified by the Office of the Adjutant General and the Army Reserve Regional Readiness Command, validated by the Army Audit Agency, analyzed by the Army Basing Study Group, and utilized for deliberations.

This recommendation reduces the number of separate DOD installations by relocating to an existing base. Closing facilities do not have sufficient capacity for consolidation or expansion and do not meet current force structure or unit design requirements. Gaining installation has sufficient building capacity or build-able acres to support proposal. Property controlled by the United States Army Reserve (USAR) on Westover Air Reserve Base (ARB) will accommodate this proposed facility but a more efficient project would involve a combination of new facilities and enhancement of existing ARB facilities.

The new AFRC will provide capacity to meet current and future mission requirements, including increased surge capability for unforeseen missions and mobilization and modified direct deployment requirements. A new AFRC is required to correct deficiencies in the availability and condition of the land and the facilities currently in use by the affected Reserve Component units. Current properties and facilities do not meet Anti-terrorism/Force Protection (AT/FP) construction standards and they are surrounded by incompatible land uses that prohibit necessary stand off distances.

The existing facilities are outdated and can no longer support the current/evolving force structure/equipment changes and associated training requirements. The units affected by
