CHARTER FOR THE INFORMATION TECHNOLOGY SUB-GROUP TECHNICAL JOINT CROSS-SERVICE GROUP (TJCSG)

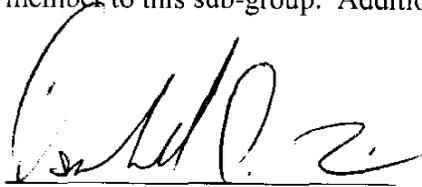

PURPOSE: To make informed recommendations to the Technical Joint Cross-Service Group regarding Information Technology infrastructure and to coordinate Information Technology infrastructure activities with the Headquarters & Support Activities Joint Cross-Service Group.

SCOPE: The Subgroup will review and analyze all Information Technology activities of both the Technical Joint Cross-Service Group and the Headquarters & Support Activities Joint Cross-Service Group. The primary focus will be on the Information Technology infrastructure of the Services and Agencies from Headquarters to deployed forces.

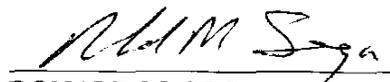

ROLES & RESPONSIBILITIES: The activities and outputs of the Information Technology Subgroup will support the TJCSG and H&SAJCSG Working Groups with the following objectives:

- a) Identify existing Information Technology infrastructure and capabilities
- b) Determine those capabilities that will be needed to support the warfighters
- c) Provide inputs to the TJCSG and to the H&SAJCSG.
- d) Coordinate compatible and complementary recommendations between the TJCSG and H&SAJCSG to realign DoD infrastructure to meet future defense strategy, including opportunities for joint service programs/activities.
- e) Participate in developing questions for capacity, Military Value and Scenario Analyses as required.

MEMBERSHIP: Each Service, the TJCSG, the H&SAJCSG and OSD will provide a principal member to this sub-group. Additional members will be invited as required by the principals.
