INFO MEMO

Peter J. Potoczney

I certify this to be a true copy.

**TO: SECRETARY OF DEFENSE
DEPUTY SECRETARY OF DEFENSE**

FROM: MR. MICHAEL W. WYNNE, ACTING USD(AT&L)

SUBJECT: Base Realignment and Closure (BRAC) Update

This is the fourth of my weekly status reports.

Time Remaining: Effectively, 44 days remain until you provide your BRAC recommendations to the Commission and Congress and publish them in the Federal Register by Monday, May 16th, the statutory deadline. Strategic and technical reasons drive us toward announcing on the Friday before the statutory deadline because it's best to release this kind of news to the weekend media and we're required to first "post" your recommendations for public review at the Federal Register a couple of days before publishing. As such, a Friday morning press conference, posting later that morning and then publishing the following Monday makes sense. (I also expect we'll make advance calls to impacted members the night before and provide a written announcement to all members just before the press conference.) As I pointed out in last week's report, the Office of Management and Budget (OMB) will play. OMB has reserved approval authority for all significant Federal Register notices.

Significant events: Senator Lott has placed a hold on the confirmation of the President's nominee for Chairman of the Commission, Anthony Principi. (A recess appointment would allow the prospective Chairman to begin hiring staff and taking other actions to get organized. Leg Affairs is working this.) The remainder of the President's commission nominees have not yet made it out of committee.

Current Status of Candidate Recommendations (TABs A and B): Of the 385 Candidate Recommendations under consideration (TAB C), 5 have been disapproved and the DepSecDef's Infrastructure Executive Council has "tentatively" approved 352 to date.

- Major Closures: 25 with work distributed to ~77 locations
- Minor Closures: ~487 with work distributed to ~263 locations
- Major Realignments: ~102 with work distributed to a few hundred locations

Financial Considerations: The 20-year Net Present Value from all candidate recommendations received to date: \$43.8 Billion (see TAB D).

- We continue to watch the financials closely. You may recall my first status report indicated the 20-year Net Present Value of candidate recommendations received to that point exceeded \$24 billion, my second report raised that to over \$32 billion and last week's indicated \$38 billion.
- We're leveling off and will be refining this number to avoid double counting and to "knit" the candidate recommendations together. The three MilDeps and seven cross service groups have produced recommendations that often cause multiple impacts to individual installations and similar impacts to multiple installations. Many of these candidate recommendations are part of a comprehensive strategy (for instance, where similar operations at a variety of bases are consolidated into a smaller number of regional centers). Aligning recommendations that are linked is important to reinforcing their justification and, in particular, portraying those that may have poor financials individually but are necessary to enable implementation of a cost effective strategies that produces aggregate savings exceeding individual components.
- Previously, I have also indicated that accommodating the return of overseas forces and rationalizing guard and reserve facilities do not translate into offsetting savings that can be booked in the BRAC process.
- Currently, 131 or about a third of the 380 candidate recommendations now in play yield a negative 20-year Net Present Value. The listing at TAB E arrays these in descending net present value order with associated one-time costs, payback years, and annual recurring savings also indicated. I have asked the services and the joint groups to carefully justify those that yield savings at the bottom of the cost spectrum. I expect that those that cannot be tied to other strategies or provide significant military benefits will receive close scrutiny before we recommend them for your final approval.
- Even when the financial benefit is apparent, we are engaged in some significant debates regarding recommendations that break precedents or achieve benefits to the entire DoD at the expense of individual service authorities. I am pursuing these aggressively so they are fully vetted and can be decided upon in the most informed basis as possible. Given the bills we face for modernization and healthcare, I think we can do nothing less.
- Conversely, we have viewed BRAC as a key catalyst for transformation and when we use it to create new capabilities, it often produces costs.

Calendar Demands: As you directed, your calendar now includes frequent meetings on BRAC – an hour a week through April.

- In our meeting scheduled for this Monday, March 28th, I intend to provide you with in depth information on two more of the significant issues listed at TAB F (the candidate recommendations that would close DoD's medical school and consolidate civilian personnel offices). This is an information meeting. In future decision meetings we will ensure that we adhere to the BRAC process so that where you decide to exercise your authority to provide direction and decision, we will be careful to ensure the record (which will be reviewed by the Commission) is appropriately documented.
- The Deputy's Infrastructure Executive Council (Service Secretaries, Chiefs, and the Chairman) is also meeting about once a week. This is appropriate as we are now firmly in the decision-making stage.

Quality control: The "Red Team" led by H. T. Johnson, the former acting SecNAV and BRAC 93 commissioner, is evaluating our candidate recommendations from the expected perspective of the Commission. This team has been carefully directed to focus on how our candidate recommendations are documented and supported and to avoid entering into dueling analyses with the services and joint groups. They are providing me with their observations, and I am tasking the services and joint groups to address their concerns in order to provide the strongest possible analysis to the Commission and the Congress.

We remain focused on making decisions on the candidate recommendations under review and ensuring that we have covered the available options comprehensively. We are also focused on ensuring accuracy of our data, and building the individual justifications of candidate recommendations into larger strategic picture(s) that will best represent this effort before the Commission, Congress, and public. This effort includes developing the roll-out plan and final report. We are beginning to close the process down and transition to preparations for defending your recommendations.

Major Issues – Significant Actions
Approved through the Infrastructure Executive Council

Title	Description	20 Yr Net Present Value
Walter Reed Army Medical Center, DC APPROVED	Closes this facility to eliminate excess and concentrate resources on building a world-class joint medical center in this area. Bethesda & Belvoir pick up requirement. Eliminating this prominent facility is very emotional but capacity and economics may override. Currently examining options that could realign, not close, this facility.	\$436M Savings
Red River Army Depot, TX	Closes this facility to eliminate excess capacity. Army now supports this recommendation and is preparing financials for IEC review reflecting the closure of the entire installation.	\$35M Savings
Marine Corps Logistics Base Barstow, CA	Closes this facility to eliminate excess capacity. Marines oppose because it eliminates half of its (internal) bi-coastal support capability. Capacity exists elsewhere to meet their requirements. IEC asked the DoN prepare financials reflecting a total closure for their review.	\$215M Savings
Portsmouth Naval Shipyard, ME APPROVED	Difficult decision, but supported by Service.	\$486M Savings
Pilot Training BEING MODIFIED	Realigns several locations to increase joint training. Closes one base and frees capacity at two others. Air Force opposes because of the transition risks and status quo benefits and has offered an alternative. New end state would foster jointness and realize efficiencies that status quo cannot offer.	\$131M Savings
Joint Strike Fighter Initial Training Site APPROVED	Relocates instructor pilots, operations support personnel, maintenance instructors, maintenance technicians, and other associated personnel and equipment to Eglin AFB, FL. Air Force was concerned about establishing a precedent for follow-on JSF sites and aligning maintenance and pilot training at the same site. Language changed to address their concern.	\$221M Cost

Title	Description	20 Yr Net Present Value
Defense Research Service Led Laboratories (Air Force locations) & Consolidate Domain-Centric C4ISR RDAT&E	Consolidates Air Force laboratory facilities and C4ISR RDAT&E functions to Hanscom AFB, MA. Air Force is concerned about the population increase at Hanscom AFB, MA.	\$486M Savings
Joint Meteorology & Oceanography Center at Stennis Space Center, MS	Establishes a Joint Meteorology & Oceanography Center at Stennis Space Center. The Navy has raised an issue with the cost of moving the Naval Research Lab (NRL) detachment as well as the cost of moving an activity that is remaining in place.	\$21M Savings
Depot Level Repairables	This pending candidate recommendation would consolidate the management and acquisition of these expensive spare parts by shifting responsibility from the services to the Defense Logistics Agency. Extraordinarily controversial but we expect this could yield some of the best financial returns of any recommendation.	\$2,899M Savings
Consolidate National Geospatial-Intelligence Agency	The Army has raised an issue with specifying the Engineering Proving Ground at Fort Belvoir, VA, as the location for this consolidation. They would prefer to just say Ft Belvoir and make site selection during implementation. Since site selection affects costs, NGA prefers selection now.	\$461M Savings
Consolidate DISA Components to Offutt AFB, NE	Concern from OSD Networks and Information Integration regarding DISA's relocation is being reviewed.	\$340M Savings
Los Angeles AFB, CA	The Technical cross service group is analyzing closing Los Angeles AFB and relocating the space mission acquisition function to Peterson AFB, CO, to be collocated with Space Command. Air Force has expressed concern about disrupting the space mission and losing the intellectual capital of Aerospace Corporation space systems experts who may not move to Peterson.	TBD (potential for \$500M Savings)

Title	Description	20 Yr Net Present Value
Aircraft Carrier/Fleet Stationing	BRAC's use to implement potential stationing changes	TBD, but substantial costs
ICBMs/warheads	BRAC's use to implement potential stationing changes	TBD
