INFO MEMO

TO: SECRETARY OF DEFENSE
DEPUTY SECRETARY OF DEFENSE

FROM: MR. MICHAEL W. WYNNE, USD(AT&L)

SUBJECT: Base Realignment and Closure (BRAC) Update

This is the ninth of my weekly status reports.

Time Remaining: Effectively, 15 days remain until you provide your BRAC recommendations to the Commission and Congress and hold your press conference with the Chairman on Friday, May 13th.

Current Status of Candidate Recommendations: The current list of tentatively approved major closures is at TAB A. TAB B lists the major realignments. In this report we are considering bases with at least \$100M in plant replacement value as major closures and using a reduction of 400 military and/or civilians positions as a yardstick for a major realignment. These are illustrated by the maps at TAB C.

- The DepSecDef's Infrastructure Executive Council has "tentatively" approved almost all of the Candidate Recommendations submitted by the three MilDeps and the seven cross service groups. TAB D lists the centers of excellence we expect to establish through BRAC.
- We are integrating the candidate recommendations to allocate costs and savings and combining multiples into single recommendations where that produces a complete closure or where that makes functional, strategic, or financial sense. Although nearly complete, this will continue to reduce the number of candidate recommendations. The slide at TAB E illustrates the volume of Candidates Recommendations involved in the analytical process with a reference to remaining issues.

Significant issues: A summary of significant issues tentatively approved or under consideration is at TAB F.

Combatant Commanders (CoComs): We briefed the Combatant Commanders earlier in the process and provided them with information on all candidate recommendations in play. The Joint Staff is the nexus between the CoComs and the BRAC process and they have maintained close coordination. We also held a teleconference today with the CoComs (in which the JFCOM Commander expressed interest in graduate education such as the Navy's Post Graduate School at Monterey, CA). We will receive formal

Financial Considerations: The 20-year Net Present Value from all candidate recommendations received to date: \$49 Billion (see TAB G).

- We continue to watch the financials closely. The process of integrating our candidate recommendations has the added benefit of illustrating the stand-alone “orphans” that need particular focus – that is, those that may have poor financials individually and are not directly tied to implementing a strategy that produces aggregate savings.
- There were about 20 Active Component Candidate Recommendations in this category. We have reduced this to only a few. About 36 Army Guard/Reserve initiatives are also in this category and these have been approved. There are no Air Force Guard/Reserve initiatives in this category.
- BRAC is a key catalyst for transformation and when we use it to create new capabilities, it often produces costs. However, those candidates that cannot be tied to strategies or provide significant non-monetary military benefits are being closely scrutinized before they can be recommended for your final approval.

Major themes: The slide at TAB H illustrates the current themes that have emerged from our recommendations with some examples. We’re fleshing these out and I expect some revisions. These

Commission: The Commission has scheduled its first hearings, both organizational and substantive, beginning on May 3rd. The Commission’s current hearing schedule is at TAB H.

Calendar Demands: Your schedule continues to reflect BRAC meetings. These are information meetings. In future meetings where your decisions will be required, we will ensure that we adhere to the BRAC process so that where you exercise your authority to provide direction, we will ensure the record (which will be reviewed by the Commission) is appropriately documented.

Candidate Recommendations

Major Issues – Significant Actions

Title	Description	20 Yr Net Present Value
Uniformed Services University of Health Sciences, MD	Closes DoD's medical school. [REDACTED] [REDACTED] The school enjoys support from the Congress and from some former DoD officials (see Secretary Laird's letter). Greater use of scholarships in private sector schools would allow the resources spent on this facility to be diverted to other capabilities. Dr. Winkenwerder opposes this action, primarily arguing the national medical center created from the merger of the Bethesda and Water Reed centers requires an associated medical school.	\$575M Savings
Marine Corps Logistics Base Barstow, CA	Closes this facility to eliminate excess capacity. Marines oppose because it eliminates half of its (internal) bi-coastal support capability. Capacity exists elsewhere to meet their requirements. IEC asked for and DoN prepared financials reflecting a total closure for review.	\$1,699M Savings
National Geographic-Intelligence Agency	Relocates mapping organizations from leased space to Scott AFB, IL [REDACTED]. The IEC has asked to explore options for separating the costly St Louis part and to secure assurances for NFIP funding.	
Rollout of Guard and Reserve Actions	The Military Departments propose closing or realigning numerous Guard and Reserve activities. Many Army actions do not have positive 20-year net present value savings. Ensuring coordination within the Guard chain of command is important.	Varied, some cost, some save
Implementation		
Chem-DeMil	We have a reasonable expectation that the workload of Chem-Demil sites tentatively recommended for closure will be completed within BRAC's statutory six year implementation period. BRAC positions these facilities for closure upon completion of their workload.	
Wedge Allocation	We are reviewing how the \$13 billion in the BRAC wedge (plus the \$3.2 billion for overseas actions) should be allocated. Options range from allocating by financial return to transformation potential. The Services are viewing the competition for this resource warily.
