**ACTIVITY: N65923
CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Printer Test Set (N65923-047390)

1. State the primary purpose(s) of the facility/equipment.

This is one item of Support Equipment that is part of a larger Weapons Release System Tester system used by the Avionics Division Electric Accessories Branch (94105) to check and test F-4 Wild Weasel aircraft pylons. The EIN, weight, and cube are applicable to the Printer, but the cost is applicable to the entire system.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Equipment is moveable.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$1,147,500

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 35 lbs. Cube = 8 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

None.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

None.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

P 189R

REV - 18 AUG 1994

cc, AIR CAB3, 8/24/94

None.

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This equipment would be difficult to replicate at another site due to its weapons system specific configuration. It is moveable, therefore it would not be difficult to relocate.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Trucked by commercial carrier to site. Installed 21 January 1993.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

Based on shop workload records, the Printer Test Set is used approximately two shifts per day, five days per week, fifty-two weeks per year. Since becoming operational in 1993, the Printer Test Set has been used on an average of 4 pylons per week.

12. Provide the projected utilization data out to FY 1997.

Same as historical.

13. What is the approximate number of personnel used to operate the facility/equipment?

1 Man year.

14. What is the approximate number of personnel needed to maintain the equipment?

0.5 Man year.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.
Photo No. 104-04-08

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

No other known government facility. Since unit is being phased out and replaced by a different model that does not require this type of testing, other facilities to perform these capabilities are not required.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Currently in storage. Was previously in operation from 1960's until early 1990's. Retained for backup capability and capacity.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

Was approximately 50% through FY92. Has been in storage due to new facility being constructed, since FY93. Utilization based on hours of use divided by hours of capacity.

12. Provide the projected utilization data out to FY 1997.

Will be modified to an air turbine starter test stand. Due to other ATS already in service, utilization is expected to be between 25% and 50%.

13. What is the approximate number of personnel used to operate the facility/equipment?

One person per eight hour shift.

14. What is the approximate number of personnel needed to maintain the equipment?

0.01 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment. Photo No. - N/A, item crated and in storage.

APPENDIX A

I. FUNCTIONAL SUPPORT AREAS (PRODUCTS)

1. PLATFORMS

- 1.1 Undersea
- 1.2 Aircraft
- 1.3 Surface Ship
- 1.4 Space Satellites
- 1.5 Ground Vehicles

2. WEAPONS SYSTEMS

- 2.1 Gun Systems
- 2.2 Guided Missiles
- 2.3 Free Fall Weapons and Rockets
- 2.4 Torpedoes
- 2.5 Mines
- 2.6 Directed Energy Systems
- 2.7 Explosives
- 2.8 Launchers
- 2.9 Fire Control
- 2.10 Weapons Data Links
- 2.11 Weapons Fuzing
- 2.12 Weapons Propulsion
- 2.13 Other Ordnance
- 2.14 Explosive Ordnance Disposal

3. COMBAT SYSTEM INTEGRATION

- 3.1 Subsurface
- 3.2 Air

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS

1. **PLATFORMS.** Those self-propelled, boosted or towed conveyances used for the strategic and tactical deployment of forces, weapons, materials and supplies in support of naval warfare. Projects within this area are limited to those in which the principal objective is to provide technological wherewithal to develop Navy aerospace craft, ships, submarines, boats, and amphibians.

1.1 *Undersea.* Self-propelled, boosted, or towed conveyances for transporting a burden under the sea. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, transmissions and propulsors, fuels and lubricants, energy conservation and pollution abatement equipment, control systems, and silencing inherent in its construction and operation, but excluding mission oriented systems. Included are submarines and other submersibles including their application as unmanned autonomous vehicles (UAV) and targets.

1.2 *Aircraft.* Self-propelled, boosted, or towed conveyances for transporting a burden through the air. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, transmissions and propulsors, fuels and control systems and silencing inherent in its construction and operation, but excluding mission oriented systems. Included are all air vehicles including their application as UAVs and targets.

1.3 *Surface Ship.* Self-propelled, boosted, or towed conveyances for transporting a burden on land or sea. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, transmissions and propulsors, fuels and lubricants, energy conservation and pollution abatement equipment, control systems, and silencing inherent in its construction and operation, but excluding mission oriented systems. Included are ships and craft including their application as UAVs and targets.

1.4 *Space Satellites.* A device or spacecraft in orbit. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, and control systems, inherent in its construction and operation.

1.5 *Ground Vehicles.* Self-propelled, boosted, or towed conveyances for transporting a burden on land. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, transmissions and propulsors, fuels and lubricants, energy conservation and pollution abatement equipment, control systems, and silencing inherent in its construction and operation, but excluding mission oriented systems.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

2. **WEAPONS SYSTEMS.** A system that provides the capability to defeat naval and military targets by destructive means. Included are counter-countermeasures and other design features to reduce the susceptibility of the weapon to counter actions, but excluded are those projects in which the principal objective is to counter a weapons system or those efforts to make a system (other than weapons) less vulnerable to enemy weapons.

2.1 *Gun Systems.* Ordnance which fires projectiles; includes related ammunition (guided projectiles are included in "guided missiles". Included are gun systems aboard aircraft and ships, and gun systems used by personnel.

2.2 *Guided Missiles.* Weapons, either self-propelled, (i.e., reaction launched) or impulse driven (i.e. gun/tube impulse launched) capable of homing on, or following a beam or command signals through the air to a target (includes guided projectiles). Included are missiles that are launched by submarine, aircraft, and ship.

2.3 *Free Fall Weapons and Rockets.* Free fall weapons are those air-delivered weapons, including components and subsystems, which follow a ballistic trajectory after gravity launch without any guidance other than that from the initial orientation and velocity of the launching aircraft. A rocket is a self-propelled airborne vehicle whose trajectory or course, while in flight, cannot be controlled.

2.4 *Torpedoes.* Self-propelled, guided or unguided underwater weapons. Included are torpedoes launched by submarine, aircraft, and ship.

2.5 *Mines.* Self-activating standoff or contact explosive devices that are designed to destroy or damage ground vehicles, boats, ships, or aircraft, or designed to wound, kill, or otherwise incapacitate personnel.

2.6 *Directed Energy Systems.* Devices and techniques for generating and focusing high-intensity beams of electromagnetic energy or charged particles upon targets with lethal effects.

2.7 *Explosives.* Metastable compounds which can rapidly release large quantities of energy mostly in the form of hot, high-pressure gases. Explosives are used in naval munitions such as mines, torpedoes, missiles, etc., and also in other Navy products such as aircraft escape systems, fuse trains, etc.

ACTIVITY: N65923
CHERRY POINT

2.8 *Launchers.* That group of devices, components, or subsystems needed to support, hold, and launch expendable weapons, countermeasure devices, or other stores; the control systems for managing these systems and the stores they carry.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

2.9 *Fire Control.* Those platform-based systems which provide data for and/or control the launch platform/weapon/weapon-target interaction in all phases required by a weapons system (e.g., acquisition, track, commit-to-fire-pre-launch, post-launch, mid-course, terminal intercept, and assessment). Included are systems that are based undersea, aboard aircraft, shipboard, and on land.

2.10 *Weapons Data Links.* Efforts include the data links that are part of the weapon's command, control and communications systems.

2.11 *Weapons Fuzing.* Efforts leading to the design of systems to sense a target or the result of other prescribed conditions such as time, barometric pressure, command, etc., and initiate a train of fire. Safing and arming are primary functions performed by a fuse to preclude initiation of the ammunition before the desired position or time.

2.12 *Weapons Propulsion.* Included are propellants, subsystems and systems that comprise the means by which a weapons system moves through the air or sea.

2.13 *Other Ordnance.* Includes efforts that do not fit in the above categories (e.g., pyrotechnics, gas generators, CAD/PAD/AEPS).

2.14 *Explosive Ordnance Disposal.* Efforts relating to the technical support of explosive ordnance disposal technology and training.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

3. **COMBAT SYSTEM INTEGRATION.** That effort required to introduce a new system into the operating forces. It involves the integration and evaluation of a new hardware or software subsystem installed in a Navy platform. It includes the mating, installation, and operational support of the resulting higher level system to ensure optimum operating performance.

3.1 *Subsurface.* The integration and evaluation of the various hardware and software subsystems that make up a higher level system, and the mating, installation, and operational support of this higher level system, including its operational software and training systems into undersea platforms.

3.2 *Air.* The integration and evaluation of the various hardware and software subsystems that make up a higher level system, and the mating, installation, and operational support of this higher level system, including its operational software and training systems into air platforms.

3.3 *Surface.* The integration and evaluation of the various hardware and software subsystems that make up a higher level system, and the mating, installation, and operational support of this higher level system, including its operational software and training systems into surface platforms.

3.4 *Multiplatform.* The integration of multiplatform hardware and software subsystems to make up a higher level system, including the mating, installation, and operational support (including training systems) of this higher level system.

4. **SPECIAL OPERATIONS SUPPORT.** Those efforts which are in support of amphibious landing, Marine Corps operations, special warfare and other unique operations. It includes weapons, countermeasures, surveillance and a command support which are developed specifically for the projection of forces ashore and that do not have an application by the Navy general forces in the role of sea control.

4.1 *Landing Force Equipment and Systems.* Involved is that RDT&E effort which is not functionally a part of the amphibious platform. Specifically, this includes reconnaissance of amphibious objective areas, environmental support of amphibious operations, amphibious logistics and the integration of the amphibious and Marine Corps systems required to land

ACTIVITY: N65923
CHERRY POINT

amphibious forces on a hostile shore and establish a beachhead. (Contingency facilities in support of forces ashore are included in "facilities".)

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

4.2 *Coastal/Special Warfare Support.* Techniques and systems required to defend coastal, inshore and harbor facilities as well as those needed to conduct operations such as reconnaissance, deception, coastal or offshore interdiction and assault, counterinsurgency, intelligence gathering, remote sensor operation and waterborne intrusion detection. Special warfare systems include systems, techniques, and concepts utilized by specifically cross-trained personnel in unconventional warfare and coastal/riverine operations.

5. **SENSORS & SURVEILLANCE SYSTEMS.** Those systems used to systematically observe air, space, surface and subsurface areas to detect, classify, localize and identify real or potential military targets. Excluded are those projects in which the principal objective is navigation, weapon fire control or broadbased investigation of the properties of the media or the propagation of energy therein.

5.1 *Sonar Systems.* Those sonar systems and devices used to conduct search, reconnaissance, and surveillance operations to detect, classify, locate, and/or track targets. Included are those systems and devices that are mobile aboard undersea, air, and surface platforms, and those that are fixed.

5.2 *Radar Systems.* Those radar systems and devices used to conduct search, reconnaissance, or surveillance operations to detect, classify, locate, and/or track targets. Included are those systems and devices that are mobile aboard undersea, air, and surface platforms, and those that are fixed.

5.3 *Special Sensors.* Those systems and devices which utilize unique phenomena or methods or combinations of methods to conduct search, reconnaissance, or surveillance operations to detect, classify, locate, and/or track targets. Included are active sensors, passive sensors (e.g., thermal imagers, low light level TV, and infrared search and track systems), and the associated signal and image processing.

5.4 *Space Sensor/Surveillance Systems.* Those devices and systems in Earth orbit that are used to conduct search, reconnaissance, or surveillance operations to detect, classify, locate and/or track targets.

5.5 *Ocean Surveillance.* Systems and equipment for systematic observation of ocean areas for identification and localization of ships, submarines, and aircraft from fixed and mobile

ACTIVITY: N65923
CHERRY POINT

platforms including operational software development, and integration of multi-sensor, coordinated detection data and its display at appropriate sites.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

6. NAVIGATION. Those systems which utilize electromagnetic, acoustic, or inertial means to guide or navigate surface, subsurface, or aerospace platforms. Included are those systems deployed aboard submarines, aircraft, surface ships and satellites, as well as those used in weapons systems.

6.1 *Submarine Navigation Systems.* Navigation systems deployed aboard submarines, or other undersea vehicles.

6.2 *Aircraft Navigation Systems.* Navigation systems deployed aboard aircraft.

6.3 *Surface Ship Navigation Systems.* Navigation systems deployed aboard surface ships.

6.4 *Weapons Navigation Systems.* Navigation systems installed within weapon systems, such as guided missiles.

6.5 *Satellite Navigation Systems.* Navigation systems deployed aboard satellites.

7. COMMAND, CONTROL, COMMUNICATIONS AND INTELLIGENCE (C³I). The acquisition, processing and dissemination of information required to plan, direct, and control operations. Included are those projects in command and control, communications and intelligence. Excluded are surveillance systems, and guidance and control of vehicles and weapons. These C³ systems may be internal or external to submarine, airborne, surface, and land-based platforms.

7.1 *Submarine.* C3 systems deployed aboard submarines, or other undersea vehicles.

7.2 *Airborne.* C3 systems deployed aboard aircraft.

7.3 *Shipboard.* C3 systems deployed aboard surface ships.

7.4 *Land-Based.* C3 systems deployed at shore facilities.

7.5 *Space Communications.* Communications systems in Earth orbit used to convey information.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

7.6 *Non-Tactical Data Systems.* Data systems utilized aboard the Navy's operating forces and at shore sites that support ship, submarine and aircraft maintenance, configuration and asset management, supply, inventory, finance, medical, dental, manpower management, administration, food services (ship's mess), and resale operations (ship's stores).

7.7 *Air Traffic Control Systems.* Systems used to promote the safe, orderly, and expeditious movement of air traffic.

7.8 *Intelligence Information Systems.* The systems necessary to conduct the naval warfare task of intelligence. This task involves the assessment and management of information obtained via surveillance, reconnaissance, and other means to produce timely indications and warning, location, identification, intentions, technical capabilities, and tactics of potential enemies and other countries of interest.

8. **DEFENSE SYSTEMS.** Those systems that are principally designed to defeat a particular weapon system; those systems that are designed to reduce the effectiveness of an enemy's surveillance, communications, navigation and command and control; as well as those efforts directed toward gathering information on the emissions of enemy systems. It does not include those projects in which the principal objective is to incorporate design features in vehicles, surveillance, communication, navigation and other support systems which reduce their vulnerability to enemy action. It also does not include chemical/biological defense for personnel.

8.1 *Ballistic Missile Defense.* Systems designed to protect civilian population centers, military forces, and territory from ballistic missile attack.

8.2 *Countermeasures (CM).* Those systems that are principally designed to defeat a particular weapon system; reduce the effectiveness of an enemy's surveillance, communications, navigation and command and control; as well as gather information on the emissions of enemy systems. Included are those projects to develop systems deployed aboard submarine, aircraft, and surface ship, and those for countering enemy mine warfare through the destruction or neutralization of minefields.

8.3 *Electronic Warfare (EW) Systems.* Those systems, techniques, and devices utilized to determine, exploit, reduce, or prevent hostile use of the electromagnetic spectrum.

**ACTIVITY: N65923
CHERRY POINT**

Included are those projects to develop systems deployed aboard submarine, aircraft, and surface ship, as well as those to develop EW simulators.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

9. STRATEGIC PROGRAMS. Programs conducted to support the deployment and use of the Navy's strategic deterrence force, as well as those programs conducted on nuclear weapons and effects.

9.1 *Navy Strategic Systems.* Those ships and weapon systems, subsystems, devices, techniques, trainers and facilities required specifically for the deployment and use of the Navy's strategic deterrence force.

9.2 *Nuclear Weapons and Effects.* Nuclear weapons effects and countermeasures, including thermal and nuclear radiation effects and the hardening of components and of weapons systems both nuclear and non-nuclear.

10. GENERAL MISSION SUPPORT. Those major areas of support required by Navy general forces that are not included under platforms, weapons systems, combat system integration, special operations support, sensors and surveillance systems, navigation, C³I, defense systems, strategic programs, and technology base programs.

10.1 *Personnel and Training.* Human resources research and development for the areas of manpower, personnel, education, and training and its support and service functions for human factors effort in system design, development and acquisition. Included are those systems related to submarine, aircraft, surface ship and weapons training, as well as human resources research.

- 10.1.1 Submarine-Related Training Systems
- 10.1.2 Aircraft-Related Training Systems
- 10.1.3 Surface Ship-Related Training Systems
- 10.1.4 Weapons-Related Training Systems
- 10.1.5 Human Resources Research and Development

10.2 *Logistics Planning and Implementation.* Projects for those aspects of military operations which deal with the movement, maintenance, supply, and support of Naval forces afloat and ashore, including underway replenishment, warehousing and mobile logistics maintenance and repair activities; material acquisition, control, handling, distribution and disposal processes; and logistics planning, control, and information processing functions.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

10. GENERAL MISSION SUPPORT, continued

10.3 *Facilities Engineering.* Products for (a) ocean facilities including the siting, design, construction/implant, and maintenance of facilities attached to the sea floor such as cable structures, pipelines, communications/power cables and Fleet moorings; (b) contingency facilities and equipment to support Navy and Marine Corps forces ashore in amphibious objective areas and at advanced naval bases; (c) permanent shore facilities such as buildings, piers, drydocks, airfields, POL and weapons storage, and utilities; (d) energy systems ashore including conservation, synthetic fuels, energy self-sufficiency; and (e) environmental protection systems ashore such as industrial waste-water treatment plants, air and noise pollution control devices, and solid waste management systems.

10.4 *Diving, Salvage and Ocean Engineering.* Those support systems and equipment that are required by the Navy in the performance of ocean bottom search, diving, rescue, recovery, salvage operations, and siting, design, construction/implantment, inspection, maintenance and recovery of underwater facilities and associated systems.

10.5 *Environmental Description, Prediction, and Effects.* The study, modeling, and simulation of atmospheric, oceanic, terrestrial, and space environmental effects, both natural and man-made, including the interaction of a weapon system with its operating medium and man-produced phenomena such as obscurants found on the battlefield.

10.6 *Crew Equipment and Life Support.* Techniques, equipment and devices to provide protection for and support of Navy operating personnel, including chemical/biological defense. Included are systems aboard submarines, aircraft, and surface ships, as well as medical research and combat casualty care, and clothing and textiles.

- 10.6.1 Submarine
- 10.6.2 Aircraft
- 10.6.3 Surface Ship
- 10.6.4 Medical Research and Combat Casualty Care
- 10.6.5 Clothing and Textiles

10.7 *Major Range Development and Operation.* The design, equipping, and operation of ranges offering diverse and accurate measurement and reconstruction capabilities to establish performance profile data on newly designed, as well as existing, naval vehicles and systems operating in a realistic environment.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

10. GENERAL MISSION SUPPORT, continued

10.8 *Other Subsidiary Systems or Components.* Subsidiary systems or components that do not fit within the above product areas (e.g., batteries).

10.9 *Activity Mission and Function Support.* Efforts that clearly support the Activity's responsibilities but which cannot be uniquely assigned to a specific functional area.

11. GENERIC TECHNOLOGY BASE. Includes basic research and exploratory development (Budget Categories 6.1 & 6.2) projects that do not fit under the more warfare-focused functional support areas. These areas include computers, software, communications networking, electronic devices, materials and processes, energy storage, propulsion and energy conversion, design automation, human-system interfaces, and other technology base areas.

11.1 *Computers.* High performance computing systems (and their software operating systems) providing orders-of-magnitude improvements in computational and communications capabilities as a result of improvements in hardware, architectural designs, networking, and computational methods.

11.2 *Software.* The tools and techniques that facilitate the timely generation, maintenance, and enhancement of affordable and reliable applications software, including software for distributed systems, data base software, artificial intelligence, and neural nets.

11.3 *Communications Networking.* The timely, reliable, and secure production and worldwide dissemination of information, using shared communications media and common hardware and applications software from originators to DoD consumers, in support of joint-Service mission planning, simulation, rehearsal, and execution.

11.4 *Electronic Devices.* Ultra-small (nano-scale) electronic and optoelectronic devices, combined with electronic packaging and photonics, for high speed computers, data storage modules, communications systems, advanced sensors, signal processing, radar, imaging systems, and automatic control.

11.5 *Materials and Processes.* Development of man-made materials (e.g., composites, electronic and photonic materials, smart materials) for improved structures, higher temperature

ACTIVITY: N65923
CHERRY POINT

engines, signature reduction, and electronics, and the synthesis and processing required for their application.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

11. GENERIC TECHNOLOGY BASE, continued.

11.6 *Energy Storage.* The safe, compact storage of electrical or chemical energy, including energetic materials for military systems.

11.7 *Propulsion and Energy Conversion.* The efficient conversion of stored energy into usable forms, as in fuel efficient aircraft turbine engines and hypersonic systems.

11.8 *Design Automation.* Computer-aided design, concurrent engineering, simulation, and modeling; including the computational aspects of fluid dynamics, electromagnetics, advanced structures, structural dynamics, and other automated design processes.

11.9 *Human-System Interfaces.* The machine integration and interpretation of data and its presentation in a form convenient to the human operator; displays; human intelligence emulated in computational devices; and simulation and synthetic environments.

11.10 *Other Technology Base Programs.* All technology base programs (Budget Categories 6.1 and 6.2 only) that do not fit into the above warfare-focused functional support areas (#1 - #10), or within the above generic technology base areas (#11.1 - #11.9).

II. LIFE-CYCLE WORK AREA DEFINITIONS

RDT&E

1. **BASIC RESEARCH.** (Budget Category 6.1 only) This area includes scientific study and experimentation to increase knowledge and understanding in the physical, engineering, environmental and life sciences related to long-term national security needs.
2. **EXPLORATORY DEVELOPMENT.** (Budget Category 6.2 only) This area includes efforts to solve specific military problems, short of major development. Exploratory development may vary from fairly fundamental applied research to sophisticated breadboard hardware, study programming and planning efforts.
3. **ADVANCED DEVELOPMENT.** (Budget Category 6.3 only) This area includes efforts on projects which have moved into the development of hardware for test. The prime objective is proof of design concept rather than the development of hardware for service use.
4. **ENGINEERING AND MANUFACTURING DEVELOPMENT.** (Budget Category 6.4 only) This area includes programs in full scale development, but which have not received approval for production or had production funds included in the DoD budget submission for the budget or subsequent fiscal year.
5. **RDT&E MANAGEMENT SUPPORT.** (Budget Category 6.5 only) This area includes support of installations or operations required for general research and development use. Included would be test ranges, military construction, maintenance support of laboratories, operations and maintenance of test aircraft and ships, and studies and analyses in support of the R&D program.
6. **OPERATIONAL SYSTEMS DEVELOPMENT.** (Budget Category 6.6 only) This area includes projects still in full-scale development, but which have received approval for production through Defense Acquisition Board or other action, or for which production funds have been included in the DoD budget submission for the budget or subsequent fiscal year. All work in this area is identified by major line item projects that appear as "RDT&E Costs of Weapon System Elements" in other programs.
7. **PRODUCTION.** During this phase, the system, including training equipment, spares, etc., is produced for operational use.

ACTIVITY: N65923
CHERRY POINT

8. **ACCEPTANCE TESTING.** This phase involves the test and evaluation of production items to demonstrate that the items procured fulfill the requirements and specifications of the procuring contract on agreement

APPENDIX B

II. LIFE-CYCLE WORK AREA DEFINITIONS, continued

ACQUISITION

9. **MODERNIZATION.** This phase of the work involves the modification, upgrade, or improvement of a system or subsystem.

10. **PROGRAM SUPPORT.** This phase involves all work not fully under the category of production (#7), acceptance testing (#8), or modernization (#9), that occurs during the acquisition of new systems or subsystems.

LIFE-TIME SUPPORT

11. **MAINTENANCE.** This phase of work involves the maintenance of systems and subsystems.

12. **REPAIR.** This phase of work involves the repair of systems or subsystems.

13. **TESTING.** This phase is typically funded from Budget Category 6.5 or procurement program elements. Work in this area supports developmental and/or operational testing and focuses on the evaluation of system safety, technical performance, environmental (climatic, electromagnetic, etc.) effects, sustainability and operational suitability, maturity of production processes, and compliance with the specifications and quality standards.

14. **IN-SERVICE ENGINEERING.** This phase is typically funded from Budget Category 6.6 or operations and maintenance (O&M) program elements. In-service engineering tends to focus on system peculiar capabilities in order to conduct check-out of the system and/or subsystem after they have undergone a modification, upgrade or improvement.

15. **PROGRAM SUPPORT.** This phase involves all work not falling under the categories of maintenance (#11), repair (#12), testing (#13), in-service engineering (#14) and retirement (#16) that occur during the life-time support of new systems and/or subsystems.

16. **RETIREMENT.** This phase includes the retirement and disposal of obsolete systems and/or subsystems.

APPENDIX B

II. LIFE-CYCLE WORK AREA DEFINITIONS, continued

GENERAL

17. **TRAINING/OPERATIONAL SUPPORT.** Efforts in this area, involve the training of operational forces in the use of new techniques, equipment and systems, tactics or doctrine. Training and operational support is typically funded from O&M program elements.

18. **SIMULATION, MODELING AND ANALYSIS.** This phase of work provides a simulated test environment or representation of systems, components and platforms. This work can be carried out throughout the development and test process as analytical tools, as well as tools to drive or control electronic and other environmental stimuli.

**ACTIVITY: N65923
CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Fire Control Test Bench Set

1. State the primary purpose(s) of the facility/equipment.

This equipment is on loan from the Air Force in support of the F-4 DMISA. It supports the APQ-120 Radar on the F-4E and F-4G.

2. Indicate whether the facility/equipment is portable, moveable or fixed as Defined by the definitions provided on the first page of this Tab.

Moveable.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$1,056,779

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 9,486 lbs. Cube = 120 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

None.

6. Indicate any special budget requirements for the facility/equipment (i.e., Special foundations, non-ferrous materials, shielding, hardening, etc.).

None.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Temperature and humidity controlled environment. ESD sensitive.

**ACTIVITY: N65923
CHERRY POINT**

8. Indicate if this facility/equipment would be extremely difficult or Impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This equipment is on loan as long as we have the Air Force workload. It will be returned to Air Force supply upon completion of the DMISA.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Trucked in, assembled on site. 29 October 1992.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

No utilization history since this is a fairly new program, however this equipment is utilized only when there is a problem detected with the APQ-120 radar.

12. Provide the projected utilization data out to FY 1997.

This would be based on the number of aircraft inducted under the DMISA. Scheduled workload for F-4E/G aircraft is (11) ea F-4E and (16) ea F-4G through FY95.

13. What is the approximate number of personnel used to operate the facility/equipment?

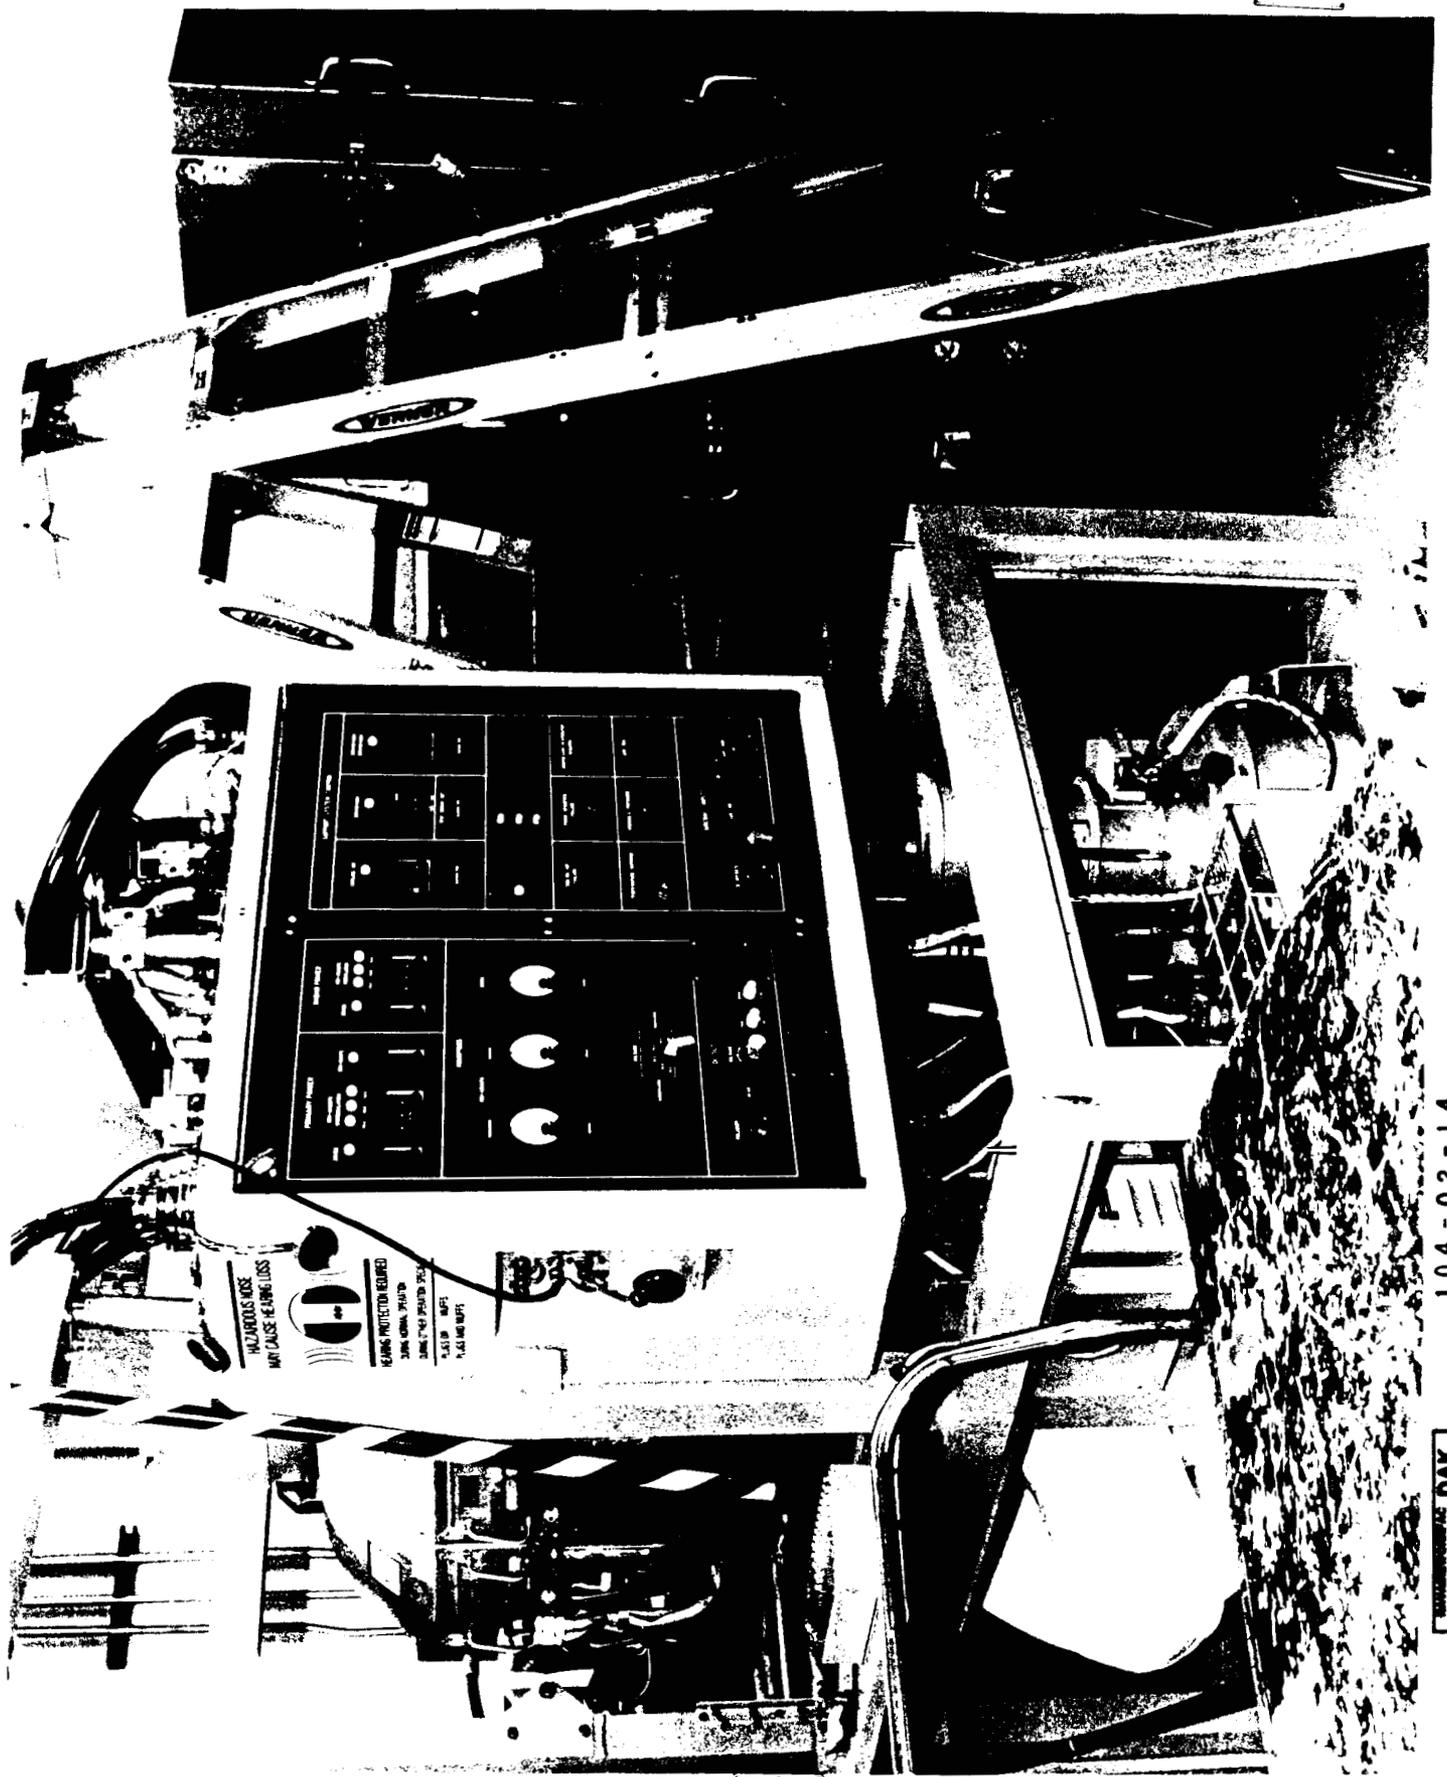

One Operator.

14. What is the approximate number of personnel needed to maintain the equipment?

0.005 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

Photo No. 104-02-14

**ACTIVITY: N65923
CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	APU/GTCP Test Cell Computers and Instrumentation (N65923-004298 and -004299)

1. State the primary purpose(s) of the facility/equipment.

For testing of various military aircraft auxiliary power units (APU) and gas turbine compressors (GTC) used for ground related and flight emergency situations.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable, however with estimated relocation costs (disassembly/reassembly), of not less than \$600,000 for all three test cells.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$2,812,500

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 30,000 lbs. Cube = 1,875 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Requires a JP5 fuel supply, 100 psig compressed air and plant water.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Since these test cells are specialized, specialized skills would be required for any major modification/relocation.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Fuel emissions monitoring.

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

Closure of NAVAVNDEPOT Alameda, places Cherry Point as the only Navy depot with this capability. Only other known government facility is Kelly AFB. Impact to Navy would be loss of special fleet support capabilities and considerations.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Semi-portable units. Transported to site by commercial carrier, installed by contractor personnel. Equipment was first installed/operational in 1982/83. Equipment is currently being upgraded/replaced by a contractor. Upgrade to be complete by 12/94.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

Utilization is currently @ 70%. This is based on engines per year workload divided by engines per year capacity. Does not take into account capacity of shop repair/rework which feeds test cell.

12. Provide the projected utilization data out to FY 1997.

Workload will increase due to transition of closing NAVAVNDEPOT Alameda workload to Cherry Point (between 40% - 60%).

13. What is the approximate number of personnel used to operate the facility/equipment?

One full time and one part time operator per 8 hour shift.

14. What is the approximate number of personnel needed to maintain the equipment?

0.1 Man years.

**ACTIVITY: N65923
CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Cooling Turbine Test Cell

1. State the primary purpose(s) of the facility/equipment.

For testing of various military aircraft (predominately Navy) cooling turbines, which provide cool air where needed for aircraft flight functions.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable, however with an estimated relocation cost (disassembly/reassembly) of approximately \$150,000.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$979,125 R

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 1,000 lbs. Cube = 480 cu. ft. R

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Uses heated compressed air at 300 pounds per minute (ppm), 1000°F, and 300 psig.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Compressed air piping for test cell is connected to compressed air utility system and would require specialized pipefitting and engineering skills for disassembly/reassembly.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

None.

**ACTIVITY: N65923
CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Cooling Turbine Test Cell

1. State the primary purpose(s) of the facility/equipment.

For testing of various military aircraft (predominately Navy) cooling turbines, which provide cool air where needed for aircraft flight functions.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable, however with an estimated relocation cost (disassembly/reassembly) of approximately \$150,000.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$750,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 4,000 lbs. Cube = 8,000 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Uses heated compressed air at 300 pounds per minute (ppm), 1000°F, and 300 psig.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Compressed air piping for test cell is connected to compressed air utility system and would require specialized pipefitting and engineering skills for disassembly/reassembly.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

None.

**ACTIVITY: N65923
CHERRY POINT**

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

Closure of NAVAVNDEPOT Alameda, places Cherry Point as the only Navy facility with this capability. Only other known government facility may be Tinker AFB. Impact to Navy would be loss of specialized fleet support capabilities, and consideration of whether it costs more for commercial rework of these components versus depot costs.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Equipment was transported on commercial carrier in June 1991 and was installed over a five month period from June to November 1991.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

Was installed/operational in November 1991. Was utilized approximately 60% in FY92 and FY93. Based on hours of use divided by hours of capacity. Does not take into account capacity of bench rework/repair which feeds test cell.

12. Provide the projected utilization data out to FY 1997.

Should remain at 60% to 70% utilization based on hours of use divided by hours of capacity.

13. What is the approximate number of personnel used to operate the facility/equipment?

One person per 8 to 10 hour shift.

14. What is the approximate number of personnel needed to maintain the equipment?

0.1 Man years.

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Fuel Component Test Rig (N65923-036687)

1. State the primary purpose(s) of the facility/equipment.

For testing of MK-IV AV-8B APU fuel accessories; IPC pump assembly, sprayer, SDV valve.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$780,000.

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 25,000 lbs. Cube = 224 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

None

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

None

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Fuel emissions monitoring only.

**ACTIVITY: N65923
CHERRY POINT**

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

Impact to Navy would be loss of organic capability for these components and consideration of whether it costs more for commercial rework of these components versus depot costs. This is only government facility with this capability.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Equipment was transported by commercial carrier to this site in September 1991. Due to contractual issues was not installed until September 1992. Was installed per contractor instructions by depot personnel.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

Was installed in September 1992. No utilization data has been determined to date.

12. Provide the projected utilization data out to FY 1997.

Depends on ASO allocation of workload. Cannot be predicted. So far ASO has not allocated regular production workload to this depot. May be due to existing contracts with commercial producer.

13. What is the approximate number of personnel used to operate the facility/equipment?

One person per eight hour shift.

14. What is the approximate number of personnel needed to maintain the equipment?

0.05 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.
Photo No. - 104-03-16.

1. State the primary purpose(s) of the facility/equipment.

Provide a clean, dust-free environment to build fuel and hydraulic system components.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Fixed.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$825,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 12,000 lbs. Cube = 57,375 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Temperature and humidity control by air conditioner. Filtering system for Class 10,000 clean room (down flow system).

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Raised floors.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Temperature/humidity control required. ESD (electro-static discharge) sensitive.

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

Not impossible, but very difficult, to replicate or relocate.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Erected on site. 11 November 1987.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

16 hr/day, 5 days/week. (20 operator stations)

12. Provide the projected utilization data out to FY 1997.

Same as above. (40 operator stations)

13. What is the approximate number of personnel used to operate the facility/equipment?

One operator per station.

14. What is the approximate number of personnel needed to maintain the equipment?

0.001 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

Photo No. 104-03-25.

Facility or Equipment Nomenclature or Title	Automated Fluorescent Penetrant Inspection System (N65923-011640)

1. State the primary purpose(s) of the facility/equipment.

Nondestructive inspection of turbine engine blades and vanes.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable, but with considerable effort and expense.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$865,179 R

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 10,000 lbs. Cube = 1,152 cu. ft. R

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Plant air, water. Electricity for computers, air conditioner.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

None.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Air conditioning.

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Automated Fluorescent Penetrant Inspection System (N65923-011640)

1. State the primary purpose(s) of the facility/equipment.

Nondestructive inspection of turbine engine blades and vanes.
2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable, but with considerable effort and expense.
3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$865,500
4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 10,000 lbs. Cube = 2,152 cu. ft.
5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Plant air, water. Electricity for computers, air conditioner.
6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

None.
7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Air conditioning.

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This item was specifically designed and fabricated to process turbine engine blades and vanes. While the process of inspection is not unique, its application and automation are.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Shipped by truck. Installed in 1986.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

(1st shift: 6 hr/shift x 200 days) + (2nd shift: 6 hr/shift x 100 days) =
45% (Best estimate)

12. Provide the projected utilization data out to FY 1997.

Should increase between 50% to 75%.

13. What is the approximate number of personnel used to operate the facility/equipment?

One operator.

14. What is the approximate number of personnel needed to maintain the equipment?

0.05 Man years.

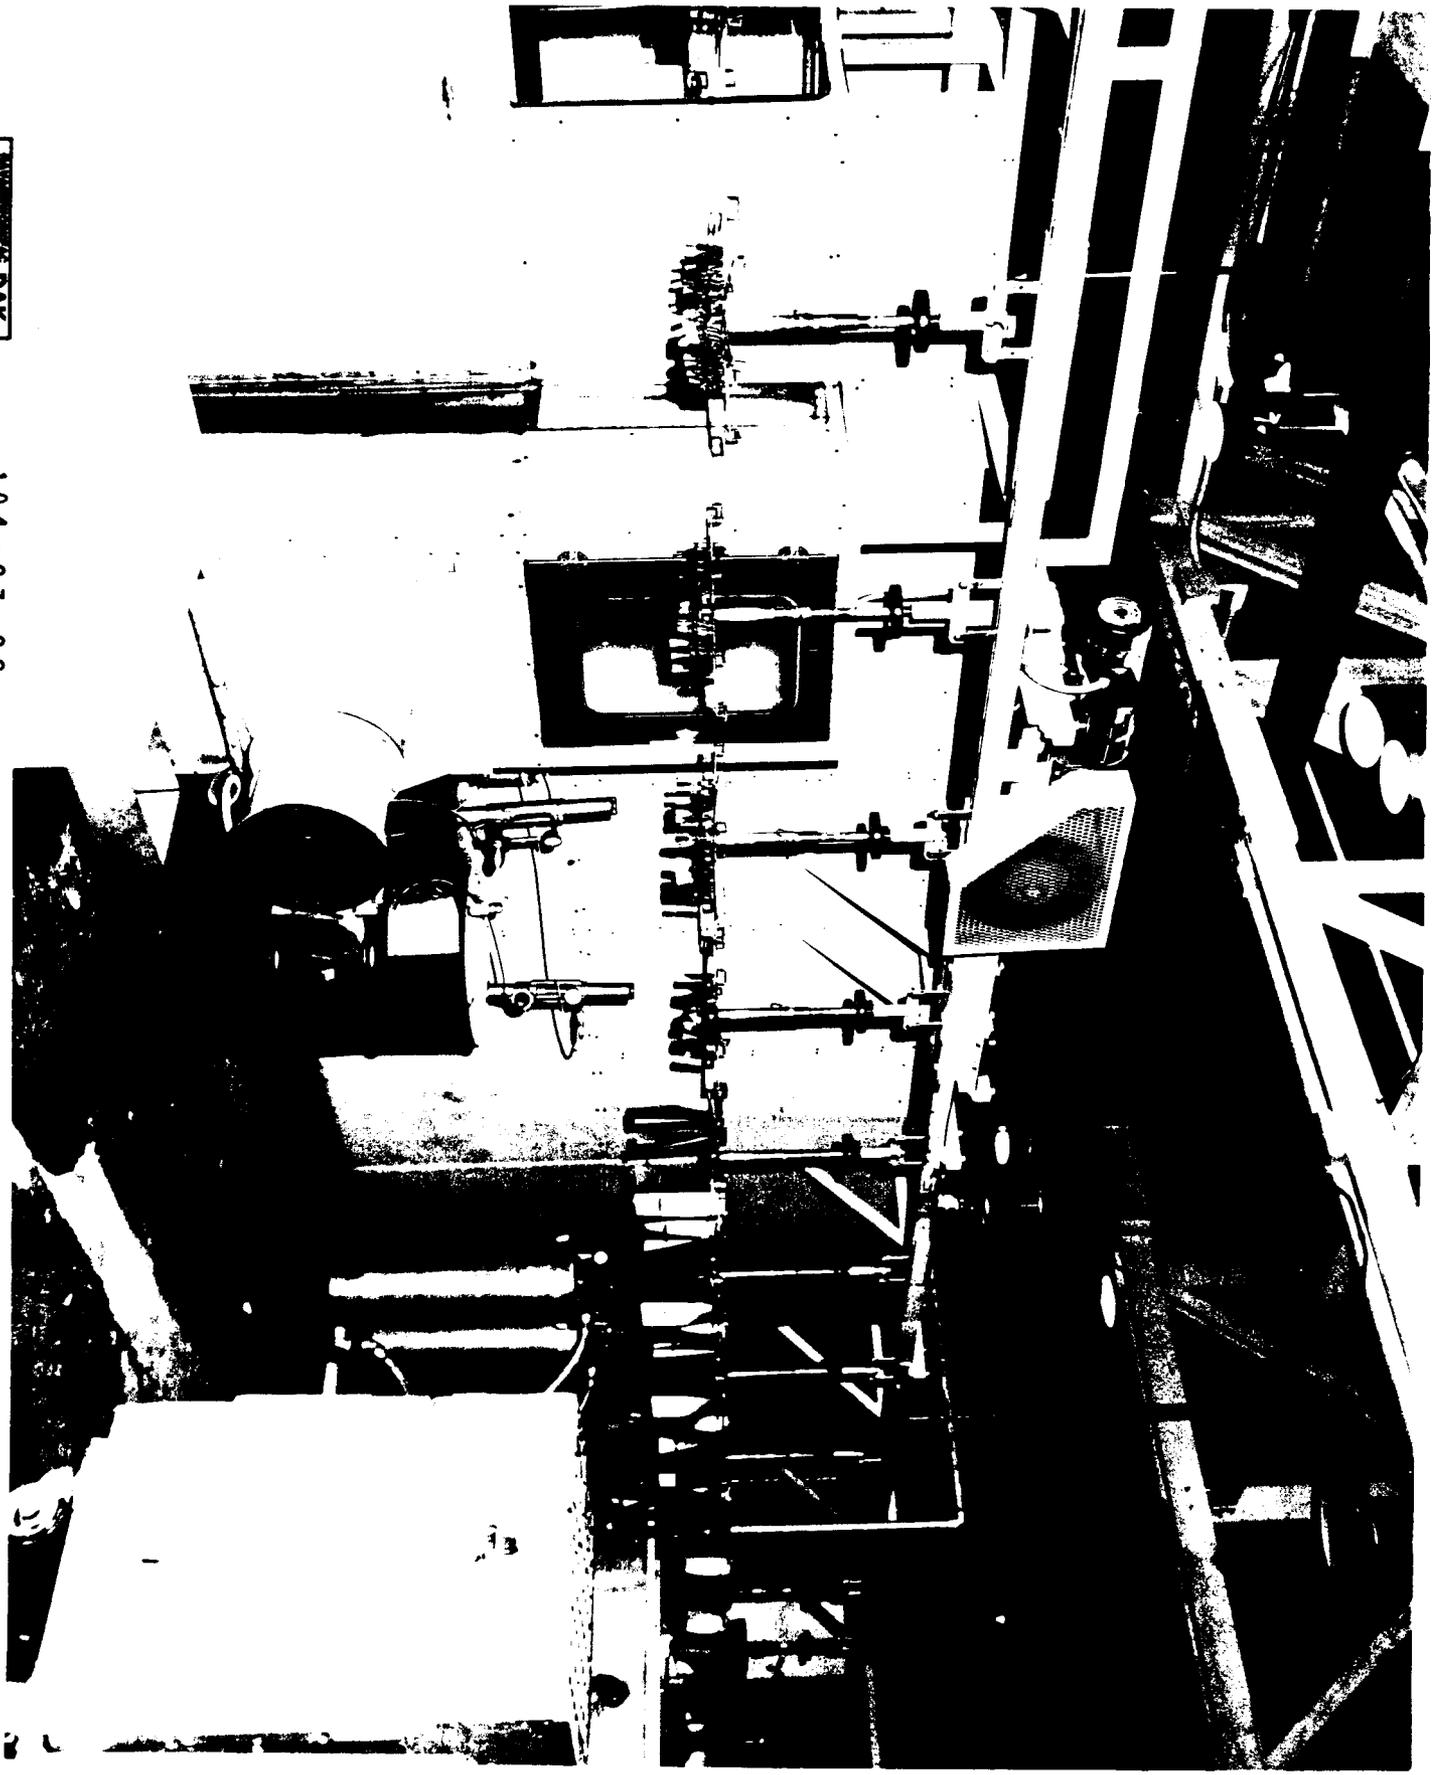

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

Facility or Equipment Nomenclature or Title	V/STOL "Hush House" Building 4036

1. State the primary purpose(s) of the facility/equipment.

The primary purpose of the V/STOL "Hush House" Facility is to provide an acoustical enclosure for full power run up of V/STOL Aircraft.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

This facility is fixed as defined by the definitions provided.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 4,844,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = N/A Cube = N/A

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power. NONE

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Special budget requirements where provided for Acoustical Construction.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Exhaust Control Technology

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this

facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This facility could not be relocated, but it could be replicated. This facility provides the capability to test aircraft at full throttle without concerns relating to noise impacts on the environment. If this facility were lost, the hours of operation of full-throttle testing would be limited.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

This facility was constructed with a construction contract (MILCON) in 1986.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

1.2 Aircraft

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

This facility has 6,803 SF and is 100% utilized.

12. Provide the projected utilization data out to FY 1997.

100%.

13. What is the approximate number of personnel used to operate the facility/equipment?

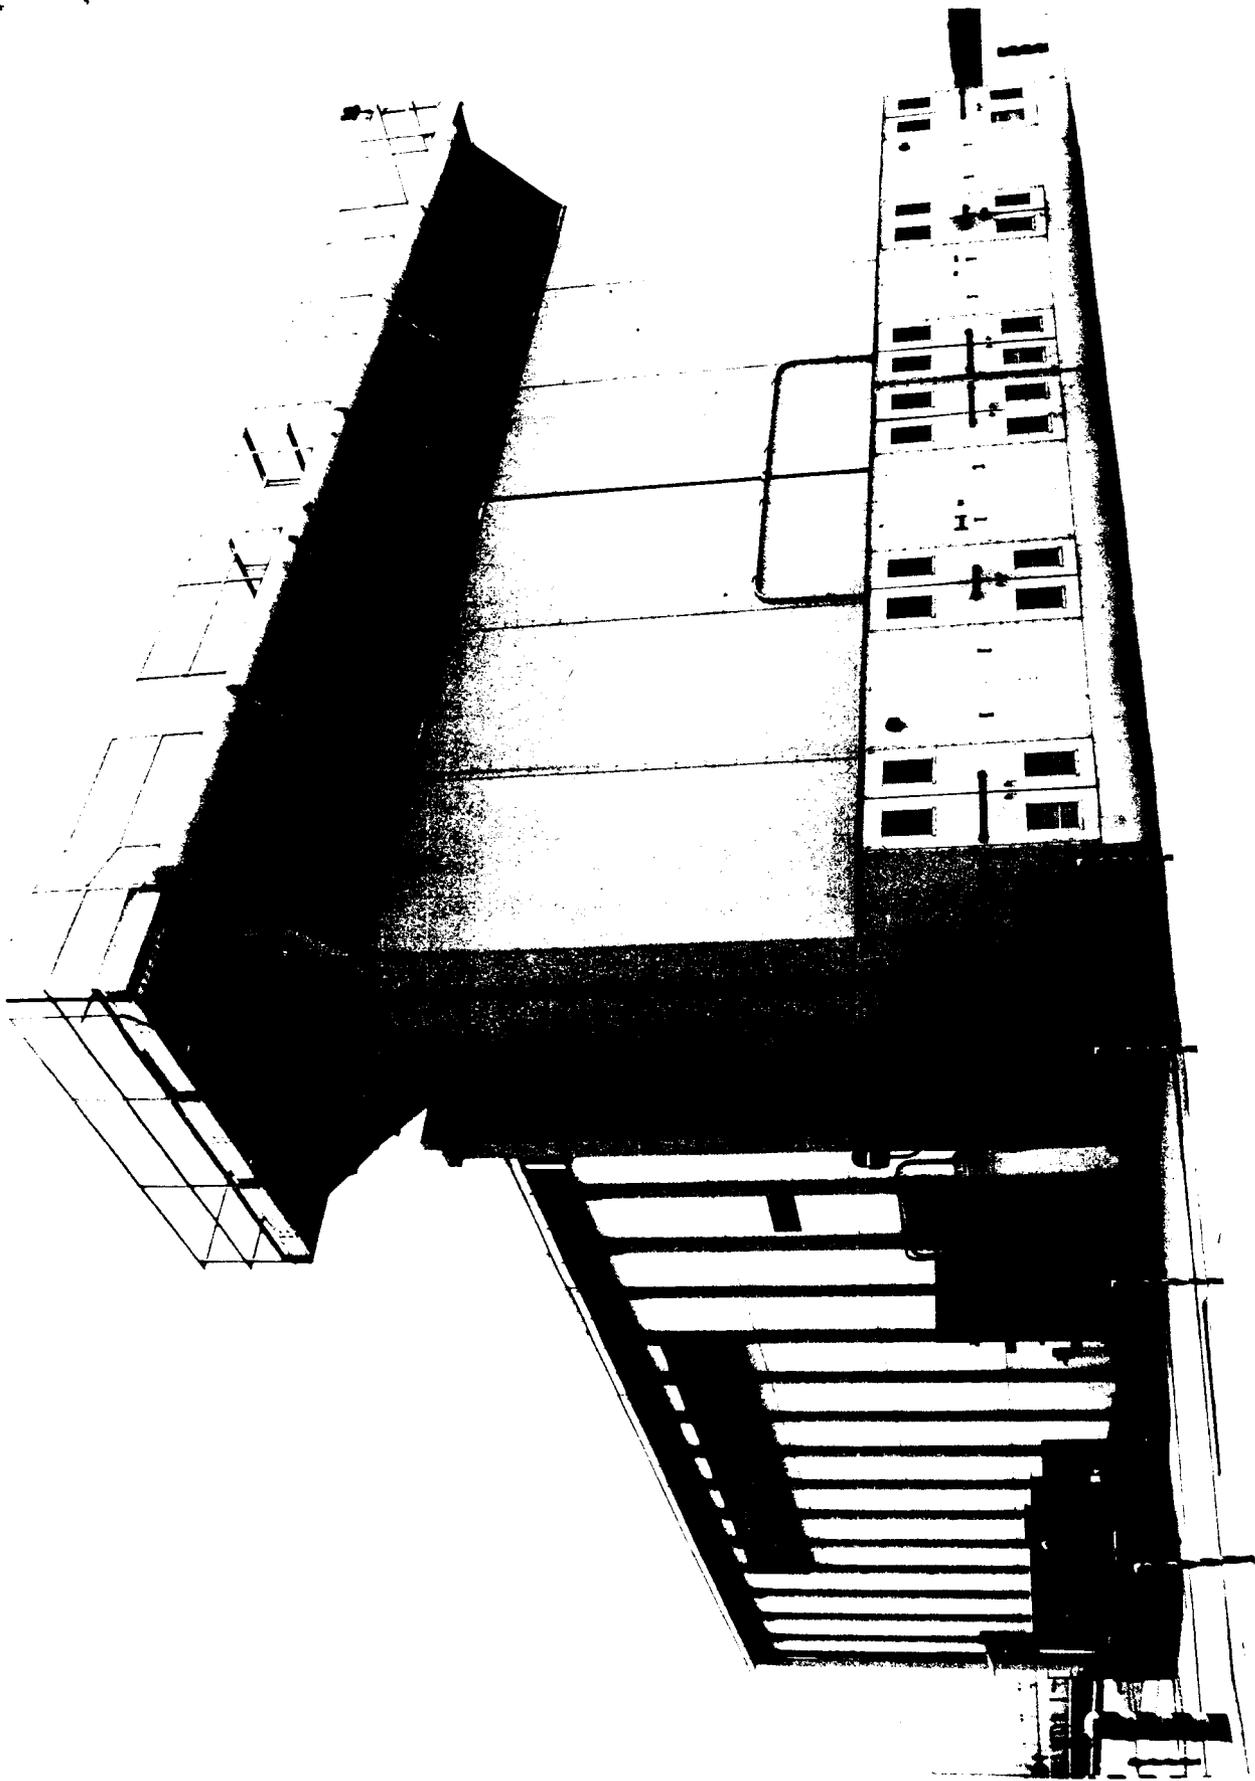

Eight.

14. What is the approximate number of personnel needed to maintain the equipment?

0.05 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

DAK

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Plastic Media Blasting Aircraft Stripping Hangar Building 3766

1. State the primary purpose(s) of the facility/equipment.

The primary purpose of the Plastic Media Blasting Aircraft Stripping Hangar is to strip Aircraft of paint without the use of chemical strippers.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

This facility is fixed as defined by the definitions provided.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 638,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = N/A Cube = N/A

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Special utility support required by this facility is Special Air Compressor Requirements.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

NONE.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Air Emission Stacks with Dust Collectors

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This facility could not be relocated, but it could be replicated. If this facility were lost, the NAVAVNDEPOT would be forced to use chemical strippers again for cleaning aircraft and components. This would put the NAVAVNDEPOT in violation of many Federal, State and local environmental regulations. It would also increase Depot rates based on increased Hazardous Waste Disposal of chemical strippers.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Construction Contract, 1974

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

1.2 Aircraft

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

This facility has 2,485 SF and is 100% utilized.

12. Provide the projected utilization data out to FY 1997.

100%.

13. What is the approximate number of personnel used to operate the facility/equipment?

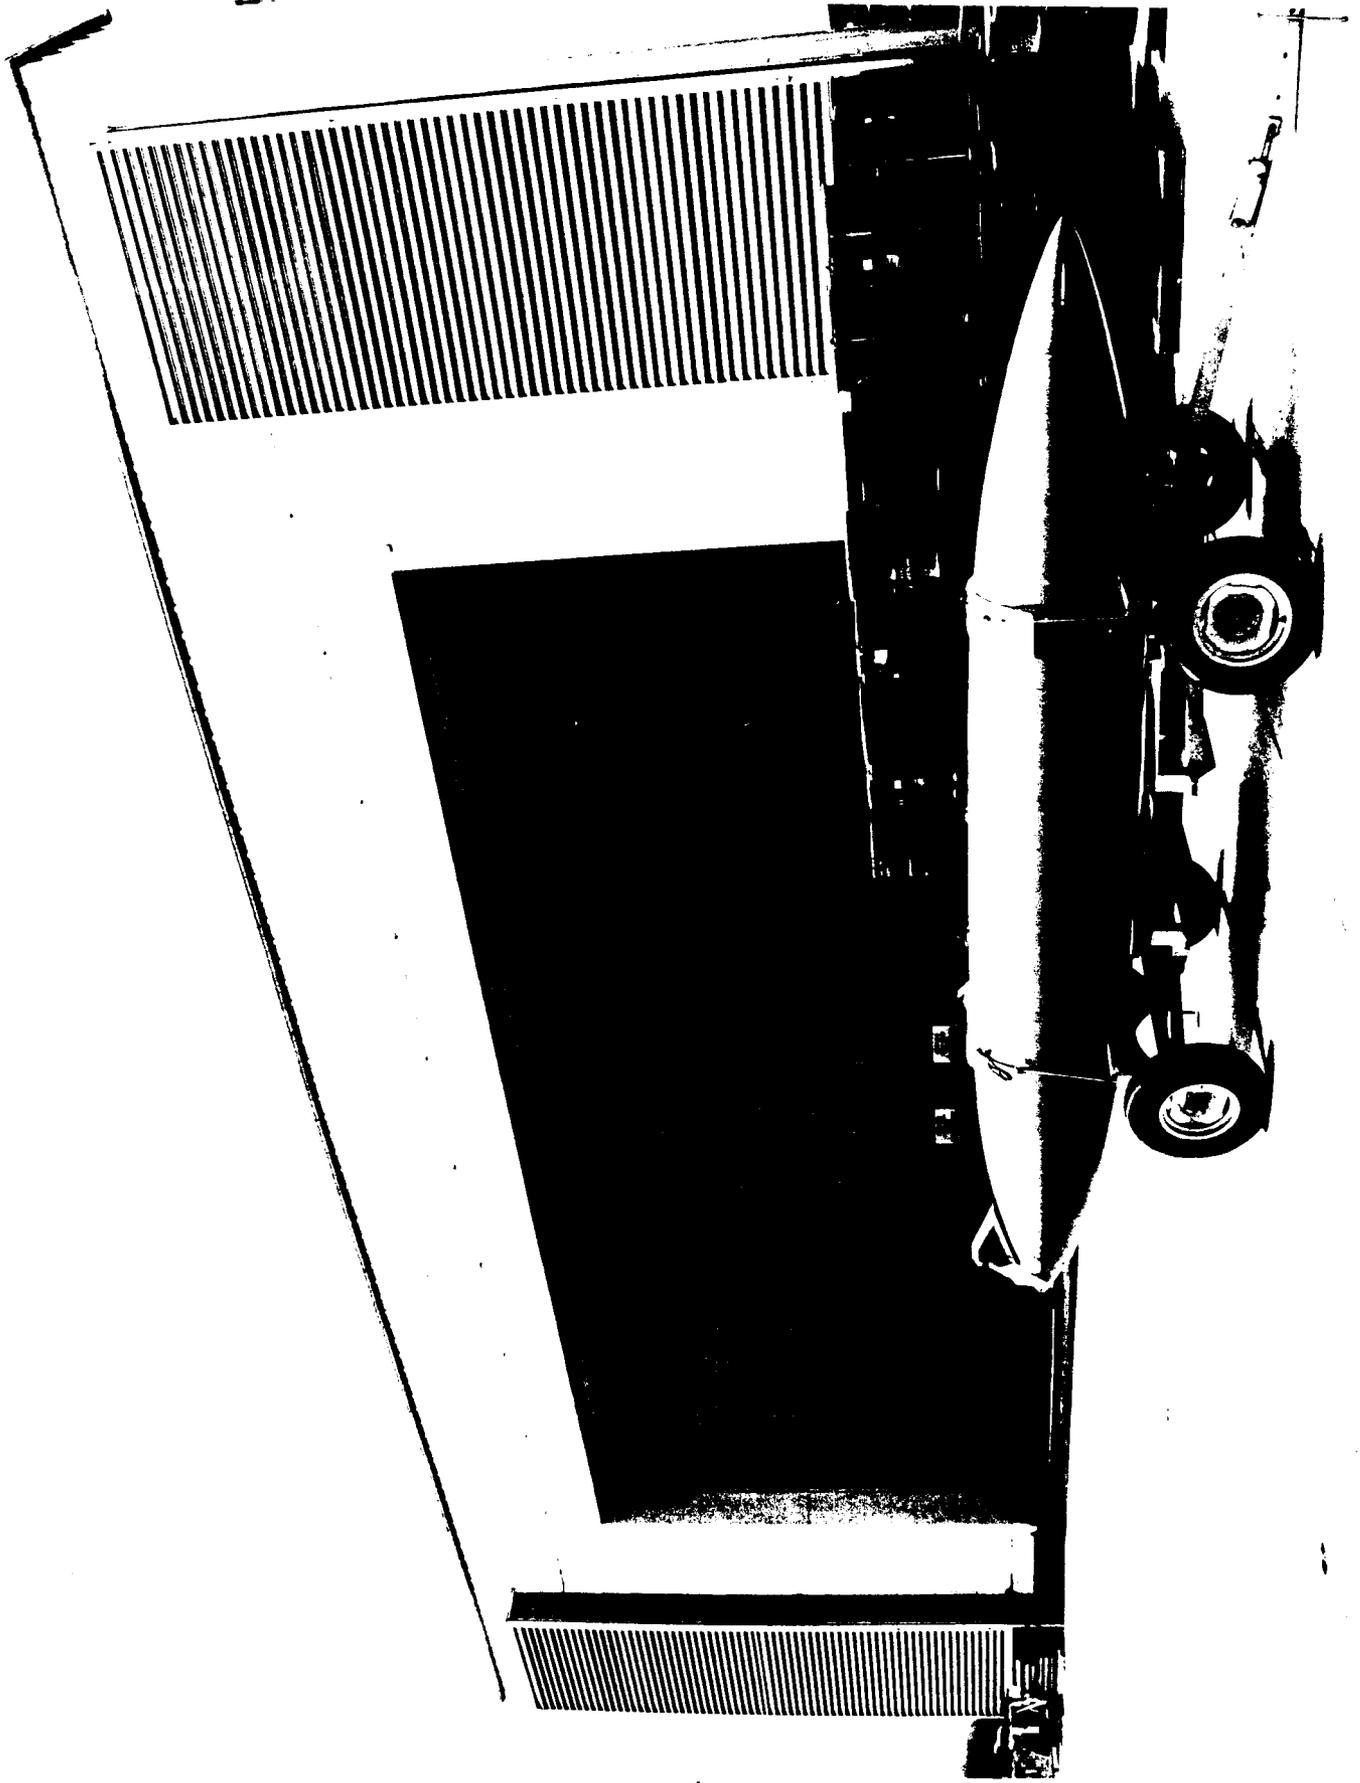

Six.

14. What is the approximate number of personnel needed to maintain the equipment?

1.0 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Media Density (PMB) Cleaning System (N65923-036068)

1. State the primary purpose(s) of the facility/equipment.

Environmentally compliant Plastic Media Blast paint stripping of aircraft and components.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable, but with considerable effort.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$825,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 20,000 lbs. Cube = 4,200 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Plant air (100 psi). Lots of compressed air volume required.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Machine is located outside. Hoses, blasting done inside. Special self-recovery floor.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Dryers in air lines. Special ventilation to filter air in building.

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

DOD and Navy unique, one of a kind system.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Shipped by truck. Installed here July 1990.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

3 shifts x 7 hr/shift (1 hr maintenance) x 300 days = 87.5%.
(Best estimate. No records. At times operated Sat and Sun)

12. Provide the projected utilization data out to FY 1997.

The utilization rate is expected to be the same 87.5% or a slight increase.

13. What is the approximate number of personnel used to operate the facility/equipment?

Minimum 2 operators for safety reasons. Maximum 5 operators.

14. What is the approximate number of personnel needed to maintain the equipment?

1.0 Man years.

15. Provide one 8 1/2" x 11" black and white photo of the facility/equipment.

CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Whirl Tower Test Facility Buildings 1792/1793

1. State the primary purpose(s) of the facility/equipment.

The primary purpose of the Whirl Tower Test Facility is to provide testing capability for Helicopter Rotor Blades.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

This facility is fixed as defined by the definitions provided.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 453,000 / 323,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = N/A Cube = N/A

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Special utility support required by this facility is Additional Electrical Requirements.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Special budget requirements where provided for Special Foundation.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

NONE.

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This facility could not be relocated, but it could be replicated. If this facility were lost, the Navy's ability to test Rotary Blades would be severely handicapped. It would require a MILCON of approximately \$3M to build a new Whirl Tower Test Facility.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

This facility was constructed as a Construction Project in 1987.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

1.2 Aircraft

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

These facilities include 2,130 SF and are 100% utilized.

12. Provide the projected utilization data out to FY 1997.

100%.

13. What is the approximate number of personnel used to operate the facility/equipment?

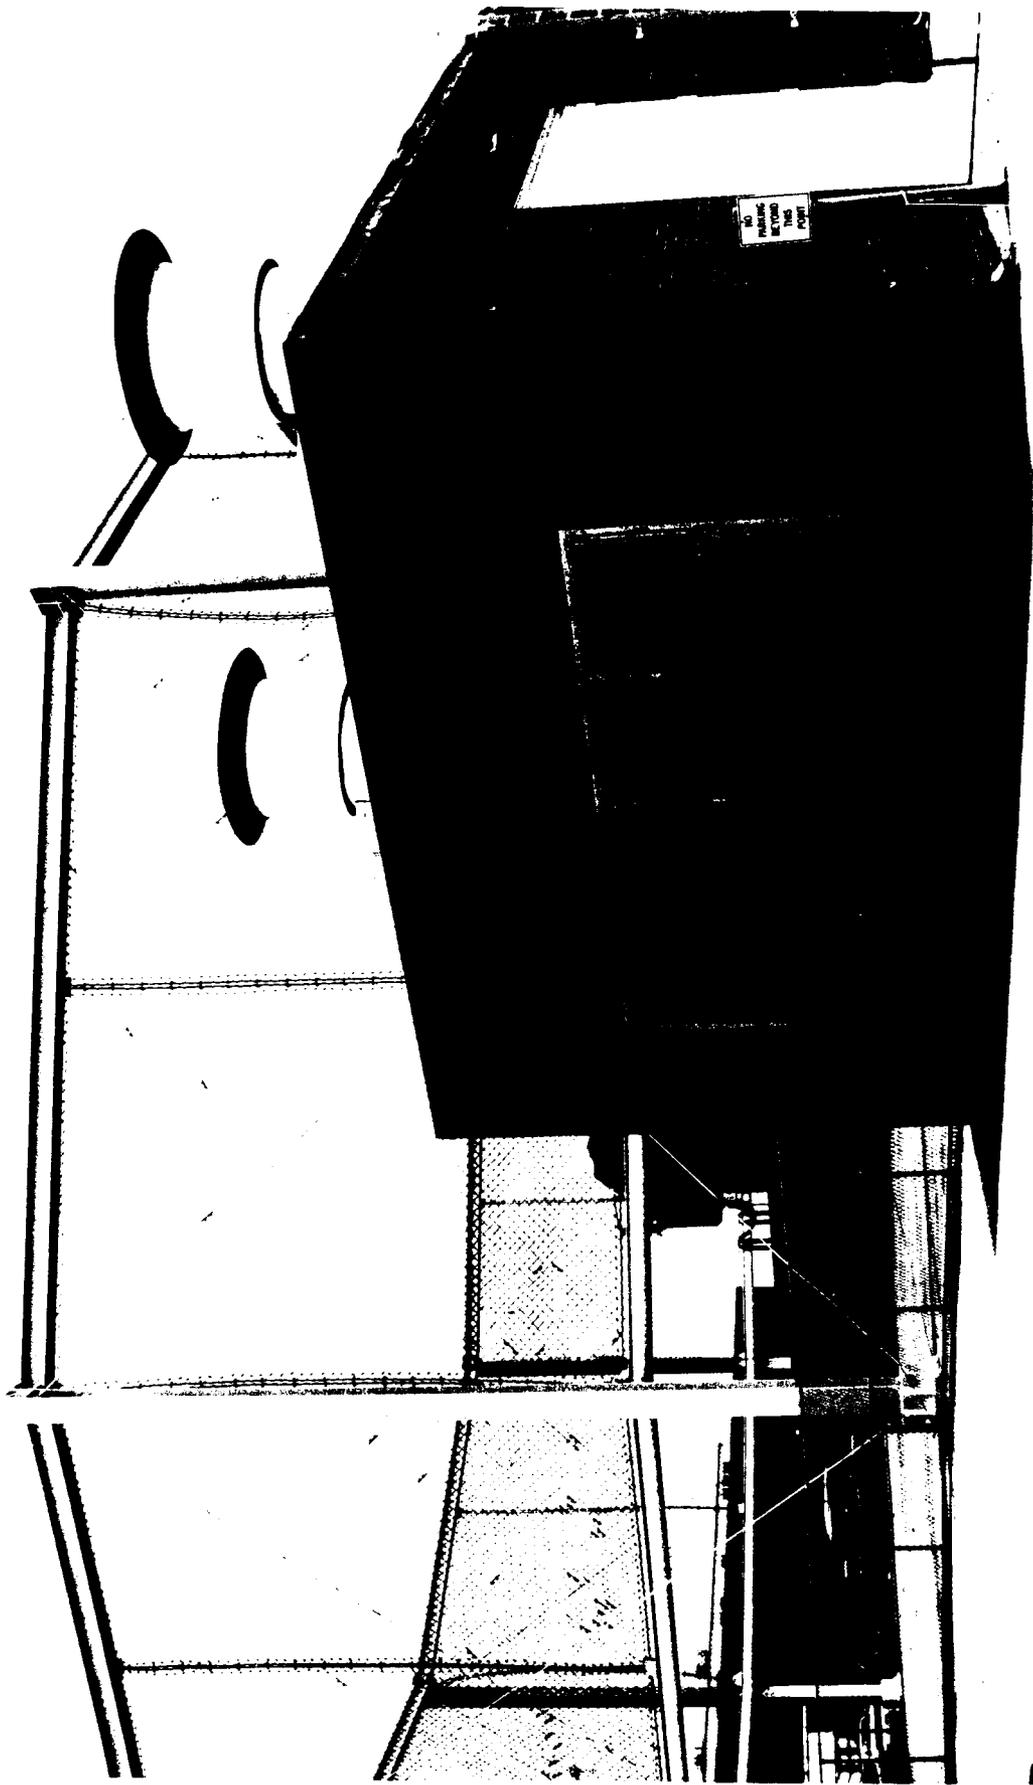

Two.

14. What is the approximate number of personnel needed to maintain the equipment?

0.2 Man years.

**ACTIVITY: N65923
CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Aircraft Electrical Harness Fabrication System

1. State the primary purpose(s) of the facility/equipment.

Used for the manufacture, assembly, and testing of Aircraft electrical wiring harnesses.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$1,125,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 500 lbs. Cube = 1,000 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

100 psi plant air

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

None.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Normal HVAC only.

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This is a unique system that was specifically configured/integrated at this facility, and designed to function in a relatively small production area. It is unique to the Navy, does not exist anywhere else in the Navy, and possibly DOD. May exist in a different configuration commercially. Provides complete system for manufacture of electrical wire harnesses in a "paperless" manufacturing environment.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Components (crimpers, strippers, ink jet markers, PCs, graphics software) were procured and installed over a two year period. Was integrated and operational in April 1992.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

On line April 1992. Utilization has been 80%, based on hours of use divided by hours of capacity.

12. Provide the projected utilization data out to FY 1997.

Same as above.

13. What is the approximate number of personnel used to operate the facility/equipment?

Total system consists of several workstations. Total of 13 personnel.

14. What is the approximate number of personnel needed to maintain the equipment?

1.0 Man years.

Revised pg

**ACTIVITY: N65923

**ACTIVITY: N65923
CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	NALC LAN Head End Unit (N65923-036434)

1. State the primary purpose(s) of the facility/equipment.

The nomenclature refers to only the Head End Unit, however the item consists of the entire depot Local Area Network (LAN). The LAN provides telecommunications utility for the depot.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

The Local Area Network is an assortment of cables, connectors, and electrical devices distributed throughout the depot. While all items could be removed and relocated, it would not be economical. It is considered that the equipment ~~is~~ fixed.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$2,951,646

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 400 lbs. Cube = 144 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Conditioned and uninterruptable electrical power.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Computer room security.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Computer room air conditioning.

**ACTIVITY: N65923
CHERRY POINT**

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This equipment would be difficult to replicate at another site due to its configuration specific installation. It is moveable, but not without substantial labor to remove it and new procurement of replacement cable and connectors that could not be salvaged from the existing installation.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Trucked by commercial carrier to site. Installed 3 November 1989.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

It is difficult to determine the utilization of a LAN. Utilization is considered to be the availability of the telecommunications utility to the depot. To that end, the LAN has historically been utilized three shifts per day, five days per week, fifty-two weeks per year.

12. Provide the projected utilization data out to FY 1997.

Same as historical.

13. What is the approximate number of personnel used to operate the facility/equipment?

1.5 Man years.

14. What is the approximate number of personnel needed to maintain the equipment?

1.5 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

INSTRUCTIONS FOR TAB B

A. Definitions

Special Facilities/Equipment Resources. Include a copy of the form provided at Tab B of this data call for each conventional (non-nuclear) facility and "major" piece of equipment located at this activity. Include information on separate detachments. The following definitions will apply:

Facilities will include such things as rocket firing bays, towing tanks, anechoic chambers, hypervelocity gun ranges, hyperbaric chambers, wind tunnels, simulation/emulation laboratories, etc. Include buildings that are integral to the facility/equipment. Do not include major outdoor ranges or land.

Additionally, describe modeling and simulation capabilities, hardware in-the-loop facilities and analysis or war-gaming capabilities, as appropriate.

Equipment includes resources used to support the operation of the site with a replacement value of \$500,000 or greater. Do not include land or buildings in this category. In reporting equipment, provide information to indicate the degree of portability of the equipment.

Class 3 Personal Property items ("plant equipment" or "equipment in place") by definition are highly portable and can be moved easily. Some Class 2 Installed Equipment, such as Main-frame computers, test stands and small hyperbaric chambers, require more extensive utilities support and assembly of components, but can be relocated without damage to the facility or equipment, and therefore are considered "moveable" assets. Other Class 2 items are so large and/or integral to the facility that houses them that major demolition and construction would be required to relocate them, and therefore are considered "fixed" assets.

B. Instructions

1. Complete Tab B for each piece of identified conventional facilities and equipment (as defined above) supporting all Functional Support Areas (products) marked in the matrix (Tab A, Tables 1.a-1.h).

2. Where appropriate, pieces of equipment may be aggregated for the purposes of completing Tab B. For example, inside shop equipment may be consolidated as a shop facility; cranes, special hull treatment enclosures, portable test equipment, etc.

ACTIVITY: N65923
CHERRY POINT

3. Do not list drydocks as a facility or an equipment.

FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	25MM Gun Test Facility Buildings 4205/4206

1. State the primary purpose(s) of the facility/equipment.

The primary purpose of the 25 MM Gun Test Facility is to test 25MM Guns.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

This facility is fixed as defined by the definitions provided.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 90,000 / 50,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = N/A Cube = N/A

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power. **NONE**

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

Special budget requirements where provided for Acoustical Construction.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

NONE

**ACTIVITY: N65923
CHERRY POINT**

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This facility could not be relocated, but it could be replicated. If this facility were lost, the NAVAVNDEPOT would have to prepare another site for this purpose and testing of 25MM guns could be severely handicapped.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

This facility was constructed as a Minor Construction Project in 1987.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

These two facilities have 864 SF. The space is utilized 100%.

12. Provide the projected utilization data out to FY 1997. 100%

13. What is the approximate number of personnel used to operate the facility/equipment?

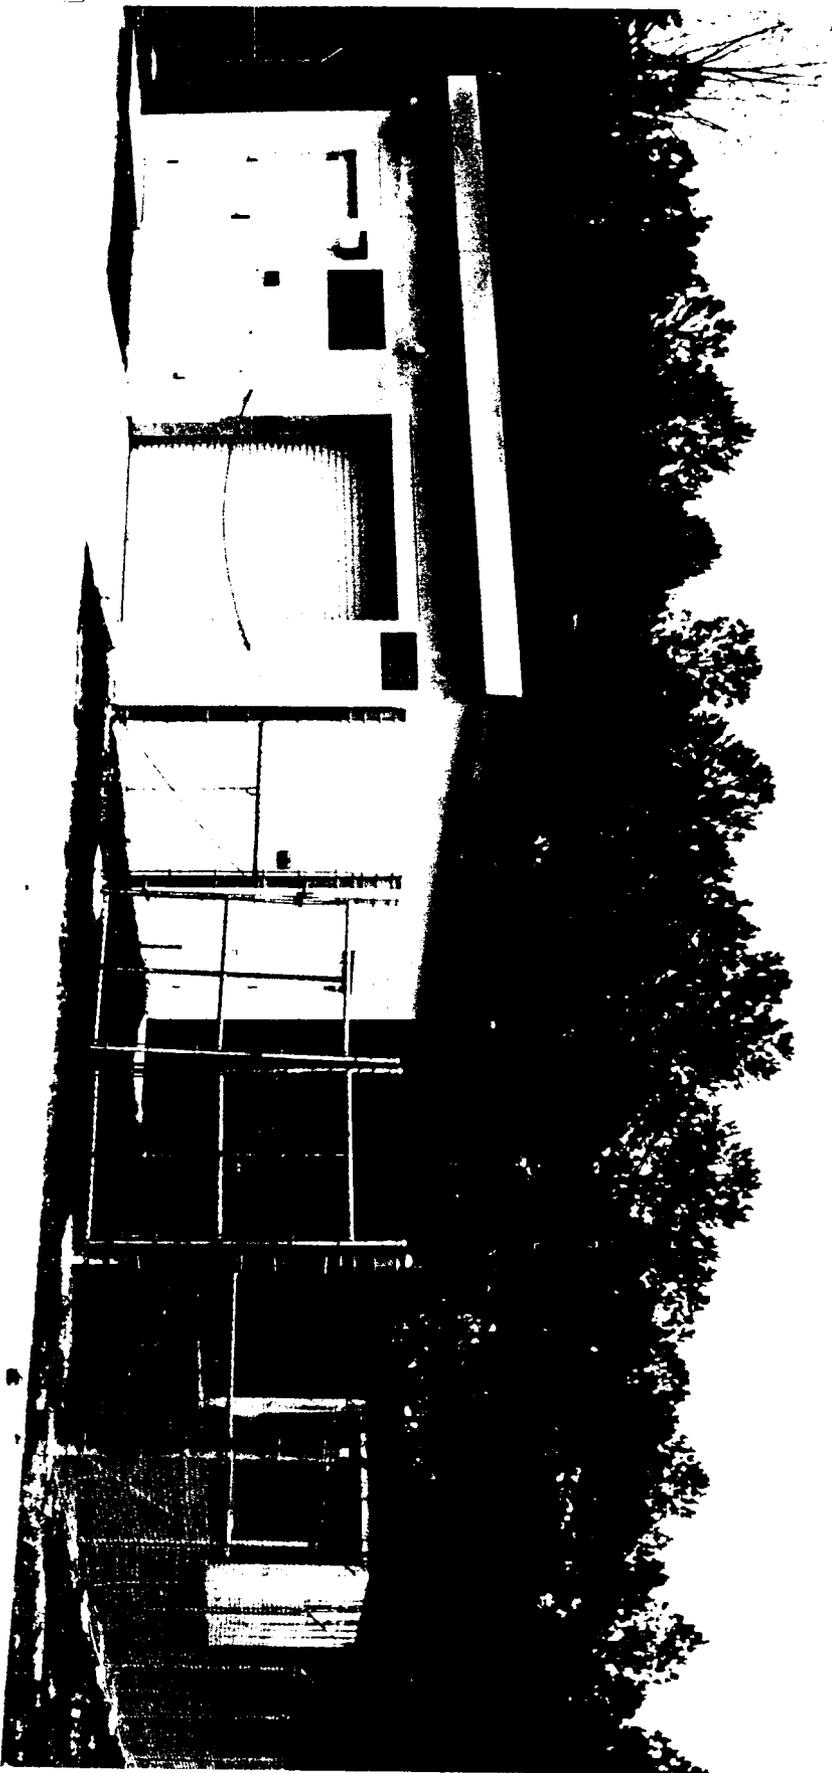

Two

14. What is the approximate number of personnel needed to maintain the equipment?

0.5 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.
103-05-01

FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Naval Engine Airfoil Center Building 4225

1. State the primary purpose(s) of the facility/equipment.

The primary purpose of the Naval Engine Airfoil Center is to provide for the repair of engine blades/airfoil for the Department of Defense.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

This facility is fixed as defined by the definitions provided.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 7,286,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = N/A Cube = N/A

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power. **NONE**

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.). **NONE**

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Air Conditioning and Humidity Controls

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This facility could not be relocated, but it could be replicated. If this facility were lost, the impact would be drastically increased repair costs for engines due to the cost of buying new blades versus repairing old ones.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

MILCON, 1990

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

This facility has 73,907 SF and is 100% utilized.

12. Provide the projected utilization data out to FY 1997. 100%

13. What is the approximate number of personnel used to operate the facility/equipment?

67

14. What is the approximate number of personnel needed to maintain the equipment?

2.0 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.
104-01-01

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Parts Wash Line

1. State the primary purpose(s) of the facility/equipment.

Soap wash and degrease of parts.

2. Indicate whether the facility/equipment is portable, moveable or fixed as Defined by the definitions provided on the first page of this Tab.

Moveable.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$1,085,439

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 550,000 lbs. Cube = 6,300 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

High pressure steam; drain connections.

6. Indicate any special budget requirements for the facility/equipment (i.e., Special foundations, non-ferrous materials, shielding, hardening, etc.).

Independent ventilation.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Environment must support PLC electronic cabinet. Stacks are on EPA permit.

8. Indicate if this facility/equipment would be extremely difficult or Impossible to replicate or relocate at another site and the impact to the Department of the Navy if this

facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

Equipment could be moved.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Trucked in, assembled on site.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

2 hrs/day

12. Provide the projected utilization data out to FY 1997.

Remain the same.

13. What is the approximate number of personnel used to operate the facility/equipment?

One Operator.

14. What is the approximate number of personnel needed to maintain the equipment?

0.2 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

Photo No. - 104-01-02.

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	V/STOL Aircraft Maint. Facility Building 4224

1. State the primary purpose(s) of the facility/equipment.

The primary purpose of the V/STOL Aircraft Maintenance Facility is to provide for the complete overhaul and repair of V/STOL Aircraft.

This facility includes three (3) autoclaves which are considered "fixed" assets. These three (3) autoclaves are computer controlled, nitrogen purged, capable of processing most current aircraft composite components including AV-8B, A-6, & V-22 Wings. The dimensions of these autoclaves are 15'X 45', 8'X 20', and 3'X 4'. The 15'X 45' autoclave is the largest computer controlled autoclave in DON inventory and meets critical processing requirements required for higher temperature advance composite structures.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

The V/STOL Aircraft Maintenance Facility is fixed as defined by the definitions provided.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 16,409,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = N/A Cube = N/A

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power. **NONE**

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.). **NONE**

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing). **Air Conditioning/ Humidity Controls**

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This facility could not be relocated, but it could be replicated. If this facility were lost the NAVAVNDEPOT's ability to perform Depot Level Maintenance on V/STOL aircraft would be handicapped by a shortage of space to perform that work.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

This facility was constructed with a construction contract (MILCON) in 1990.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

1.2 Aircraft

10.2 Logistics Planning & Implementation

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	F402 Engine Test Facility Building 4188

1. State the primary purpose(s) of the facility/equipment.
The primary purpose of the F402 Engine Test Facility is to test vectored thrust engines.
2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

This facility is fixed as defined by the definitions provided.
3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 9,605,000
4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = N/A Cube = N/A
5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power. NONE
6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.). NONE
7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Air Emission Exhaust Control Technology

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

This facility could not be relocated, but it could be replicated. If this facility were lost, due to its being Navy and DOD unique as well as being the only automated test facility that meets OSH standards, the NAVAVNDEPOT's ability to test vectored thrust engines would be severely handicapped. It would require a MILCON of approximately \$4M to reconfigure any existing DOD Test Cell. A new V/STOL Test Cell would cost about \$15M.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

This facility was constructed with a construction contract (MILCON) in 1989.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

1.2 Aircraft

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

This facility has 19,081 SF and is 100% utilized.

12. Provide the projected utilization data out to FY 1997. 100%

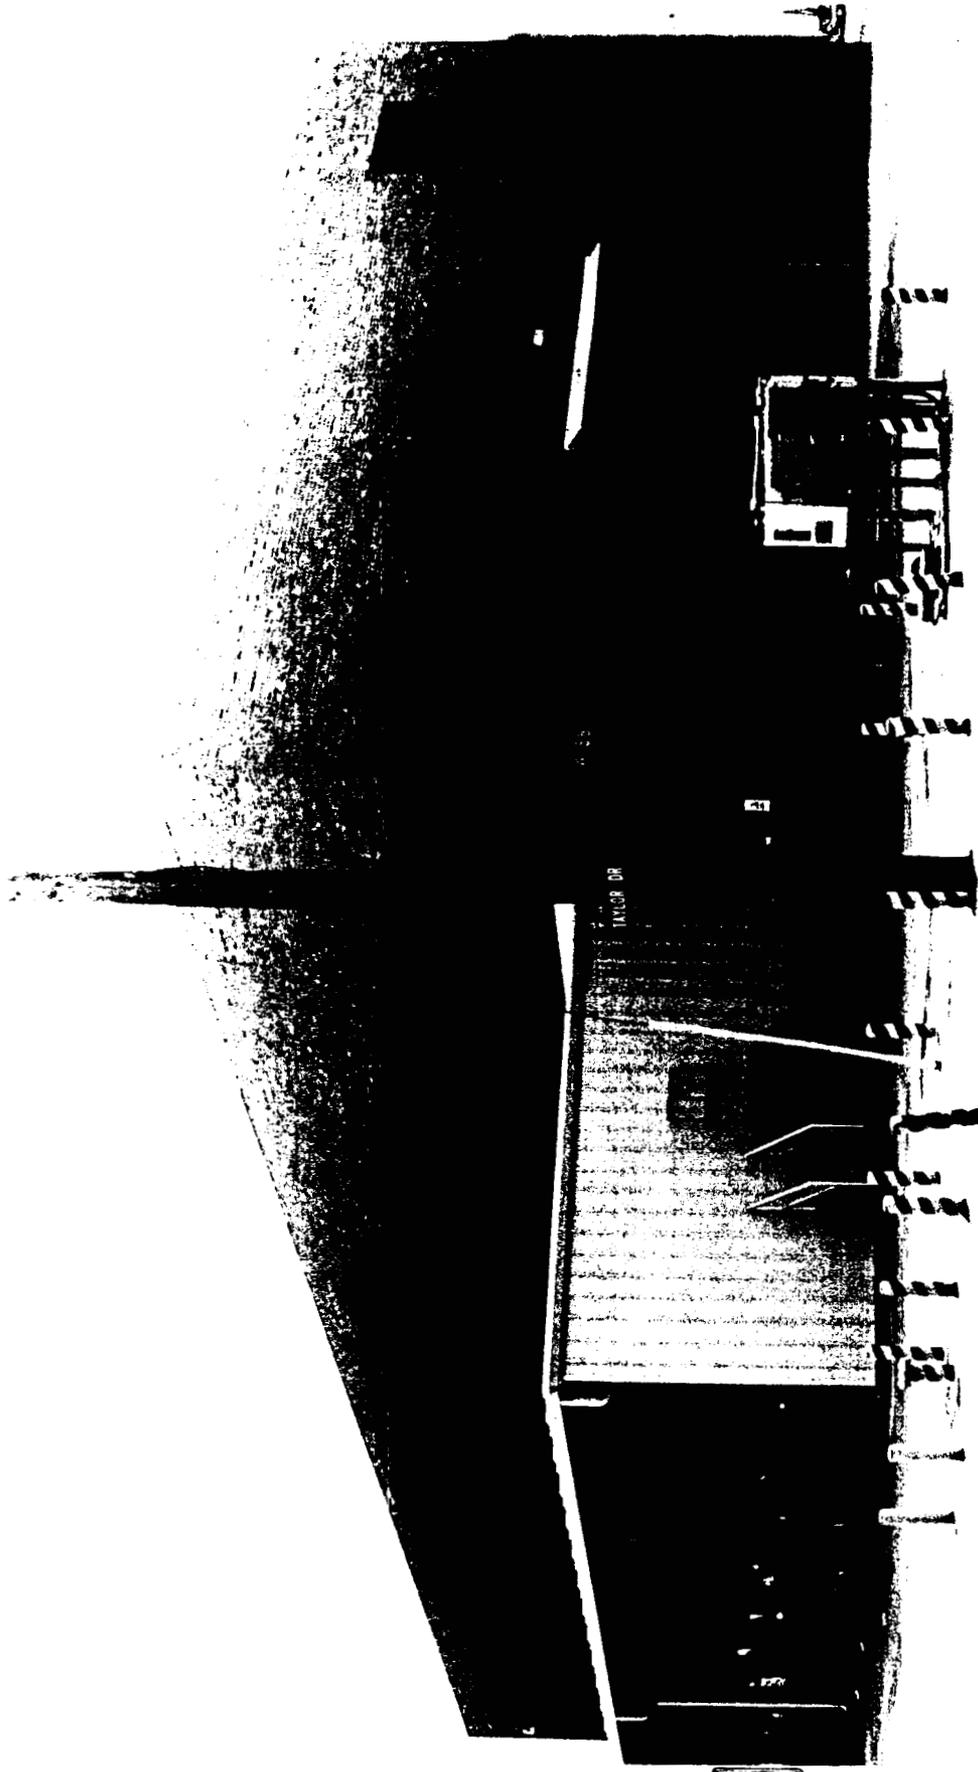

13. What is the approximate number of personnel used to operate the facility/equipment?
24

14. What is the approximate number of personnel needed to maintain the equipment?

2.0 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

104-01-32

75

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	F402 Test Cell ADAPS (N65923- 046156)

1. State the primary purpose(s) of the facility/equipment.

Test Cell Instrumentation for use in testing F402 and J79 engines.

2. Indicate whether the facility/equipment is portable, moveable or fixed as Defined by the definitions provided on the first page of this Tab.

Fixed, built into test cell.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$3,021,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 1,000 lbs. Cube = 2,400 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

Plant air (high pressure), potable water, demineralizer, steam, fuel supply system.

6. Indicate any special budget requirements for the facility/equipment (i.e., Special foundations, non-ferrous materials, shielding, hardening, etc.).

Special foundation, noise abatement, fire suppression system, overhead thrust bed (support engine from roof).

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Temperature controlled computer room, specially designed facility for air port holes.

8. Indicate if this facility/equipment would be extremely difficult or Impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment

**ACTIVITY: N65923
CHERRY POINT**

were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

Extremely difficult to relocate. It is Navy and DOD unique, is the only automated test facility for these engines, and is the only one that meets all OSH standards.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Shipped by truck. 28 July 1992.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

This equipment is highly sensitive electronic equipment which would be difficult to move and reinstall elsewhere due to the complexity of the systems. Physically moving the equipment would require special packaging and extreme care. Installation would require many hours of support by personnel who are thoroughly familiar with these systems.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

HTS transported by commercial truck.

Dec 1984/010810	Apr 1988/012419	May 1988/012503
May 1988/012474	May 1989/041127	Feb 1992/045648
Feb 1992/045649	July 1993/046682	Nov 1993/048650

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

80 hours/week for all stations combined. There are five stations currently operational.

12. Provide the projected utilization data out to FY 1997.

Workload is expected to increase due to remanufacture of the AV-8B.

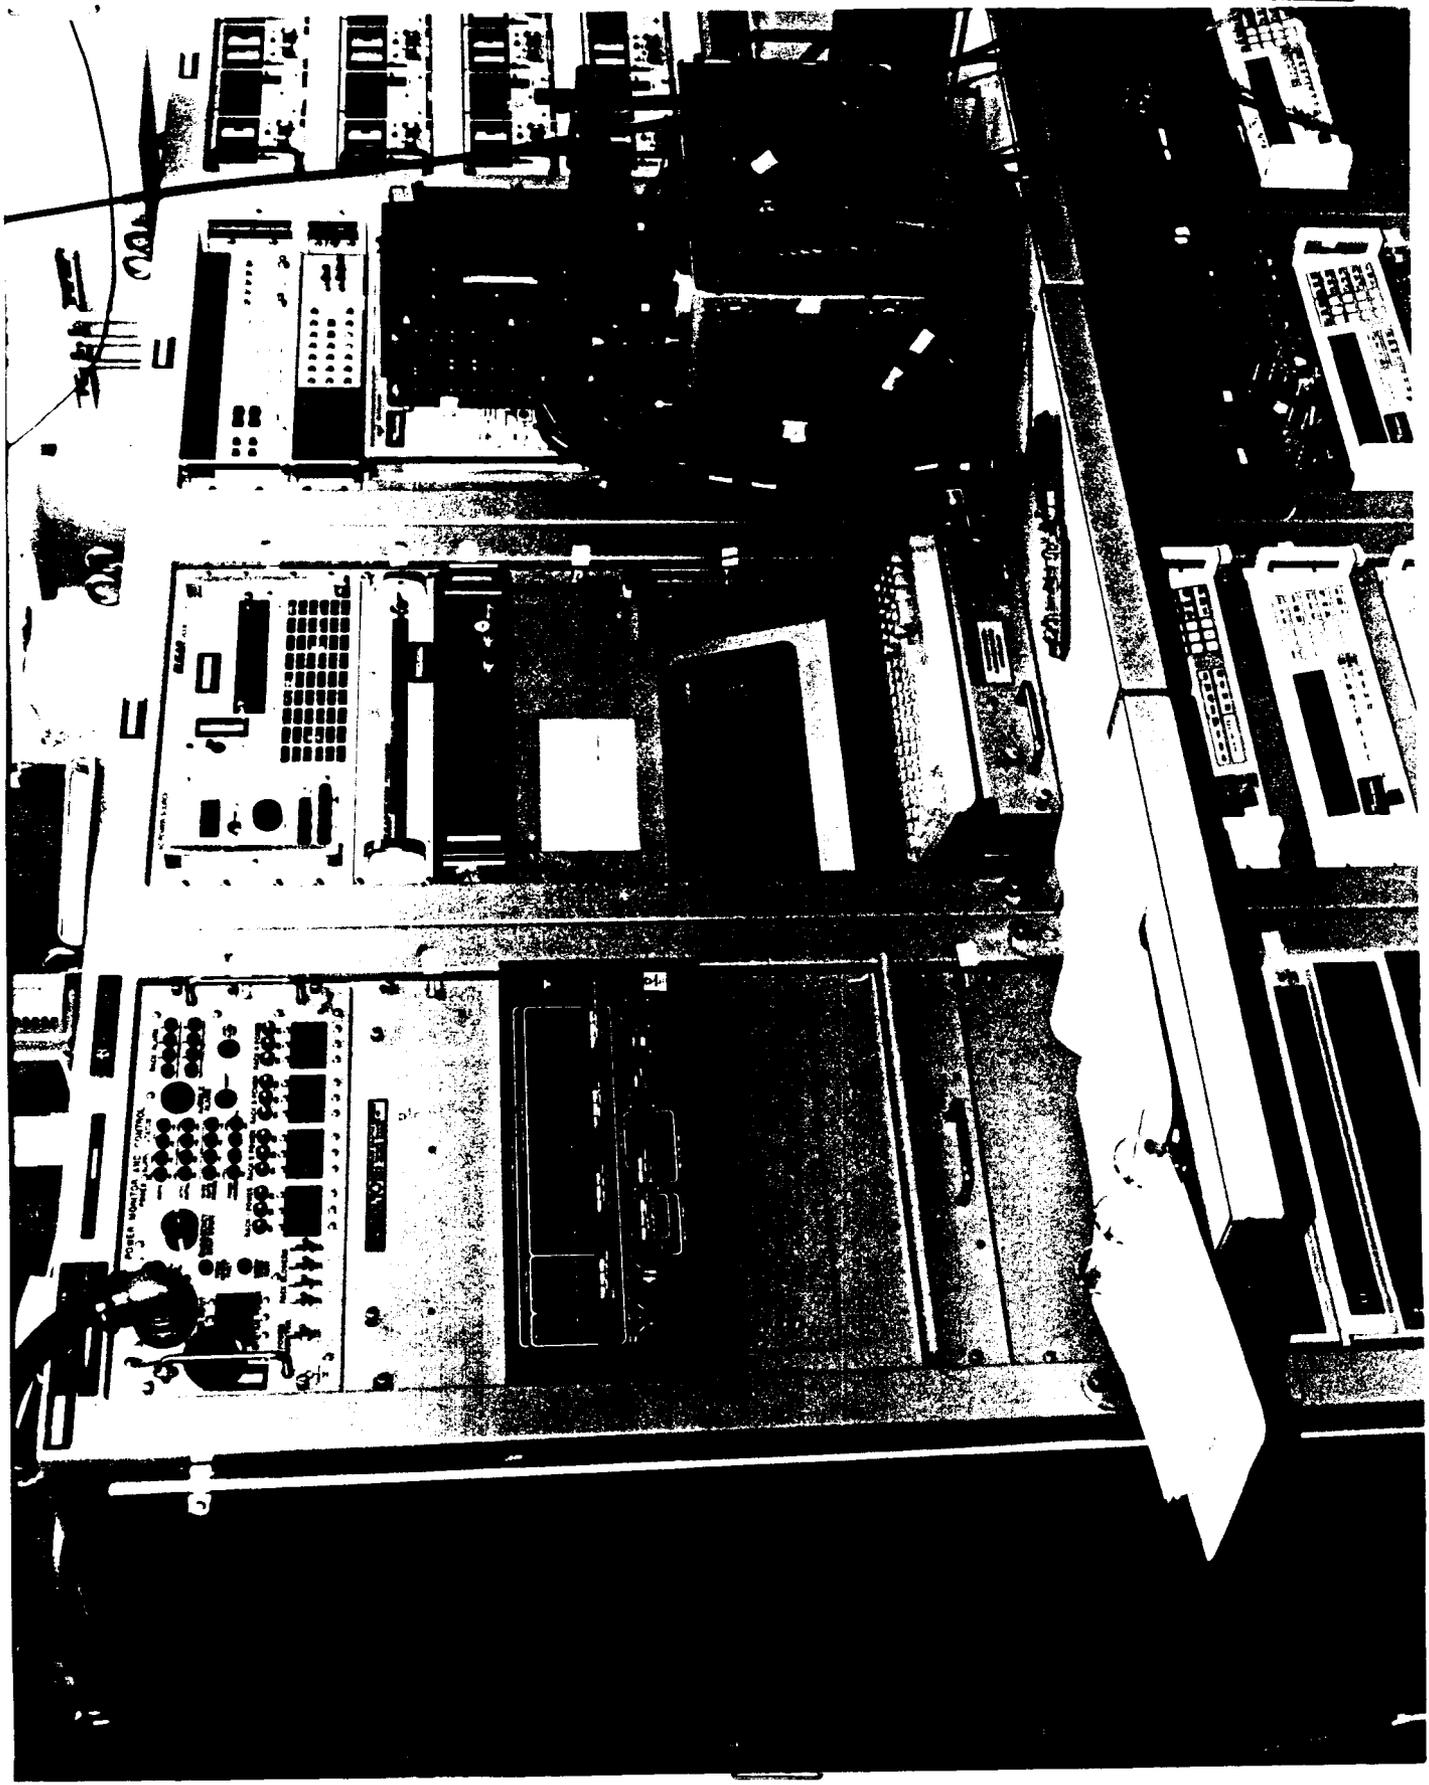

13. What is the approximate number of personnel used to operate the facility/equipment?

One person per station. Five of the six stations are currently operational.

14. What is the approximate number of personnel needed to maintain the equipment?

0.005 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.
Photo No. - 104-02-02.

DAK

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	SRA Converter Interface (N65923-047014)

1. State the primary purpose(s) of the facility/equipment.

This is support equipment for repair of the EETS test equipment.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Moveable.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$1,251,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 75 lbs. Cube = 18 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

None

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

None

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Temperature and humidity control required. ESD sensitive.

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment

were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

Not difficult to relocate. Difficult to replicate.

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

Semi-portable units. Transported to site by commercial carrier, installed by government personnel. Equipment has been in use since December 1992.

10. List the functional support areas (previously provided in T A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

Repair.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

Since this equipment is relatively new it has not been used by the shop very much. Engineering personnel are currently programming the unit to be able to do automatic checkout of the EETS equipment.

12. Provide the projected utilization data out to FY 1997.

Estimated usage is two occurrences per month of EETS equipment where this equipment would be used to troubleshoot. Average time of use per occurrence is 30 hours.

13. What is the approximate number of personnel used to operate the facility/equipment?

One person per eight hour shift.

14. What is the approximate number of personnel needed to maintain the equipment?

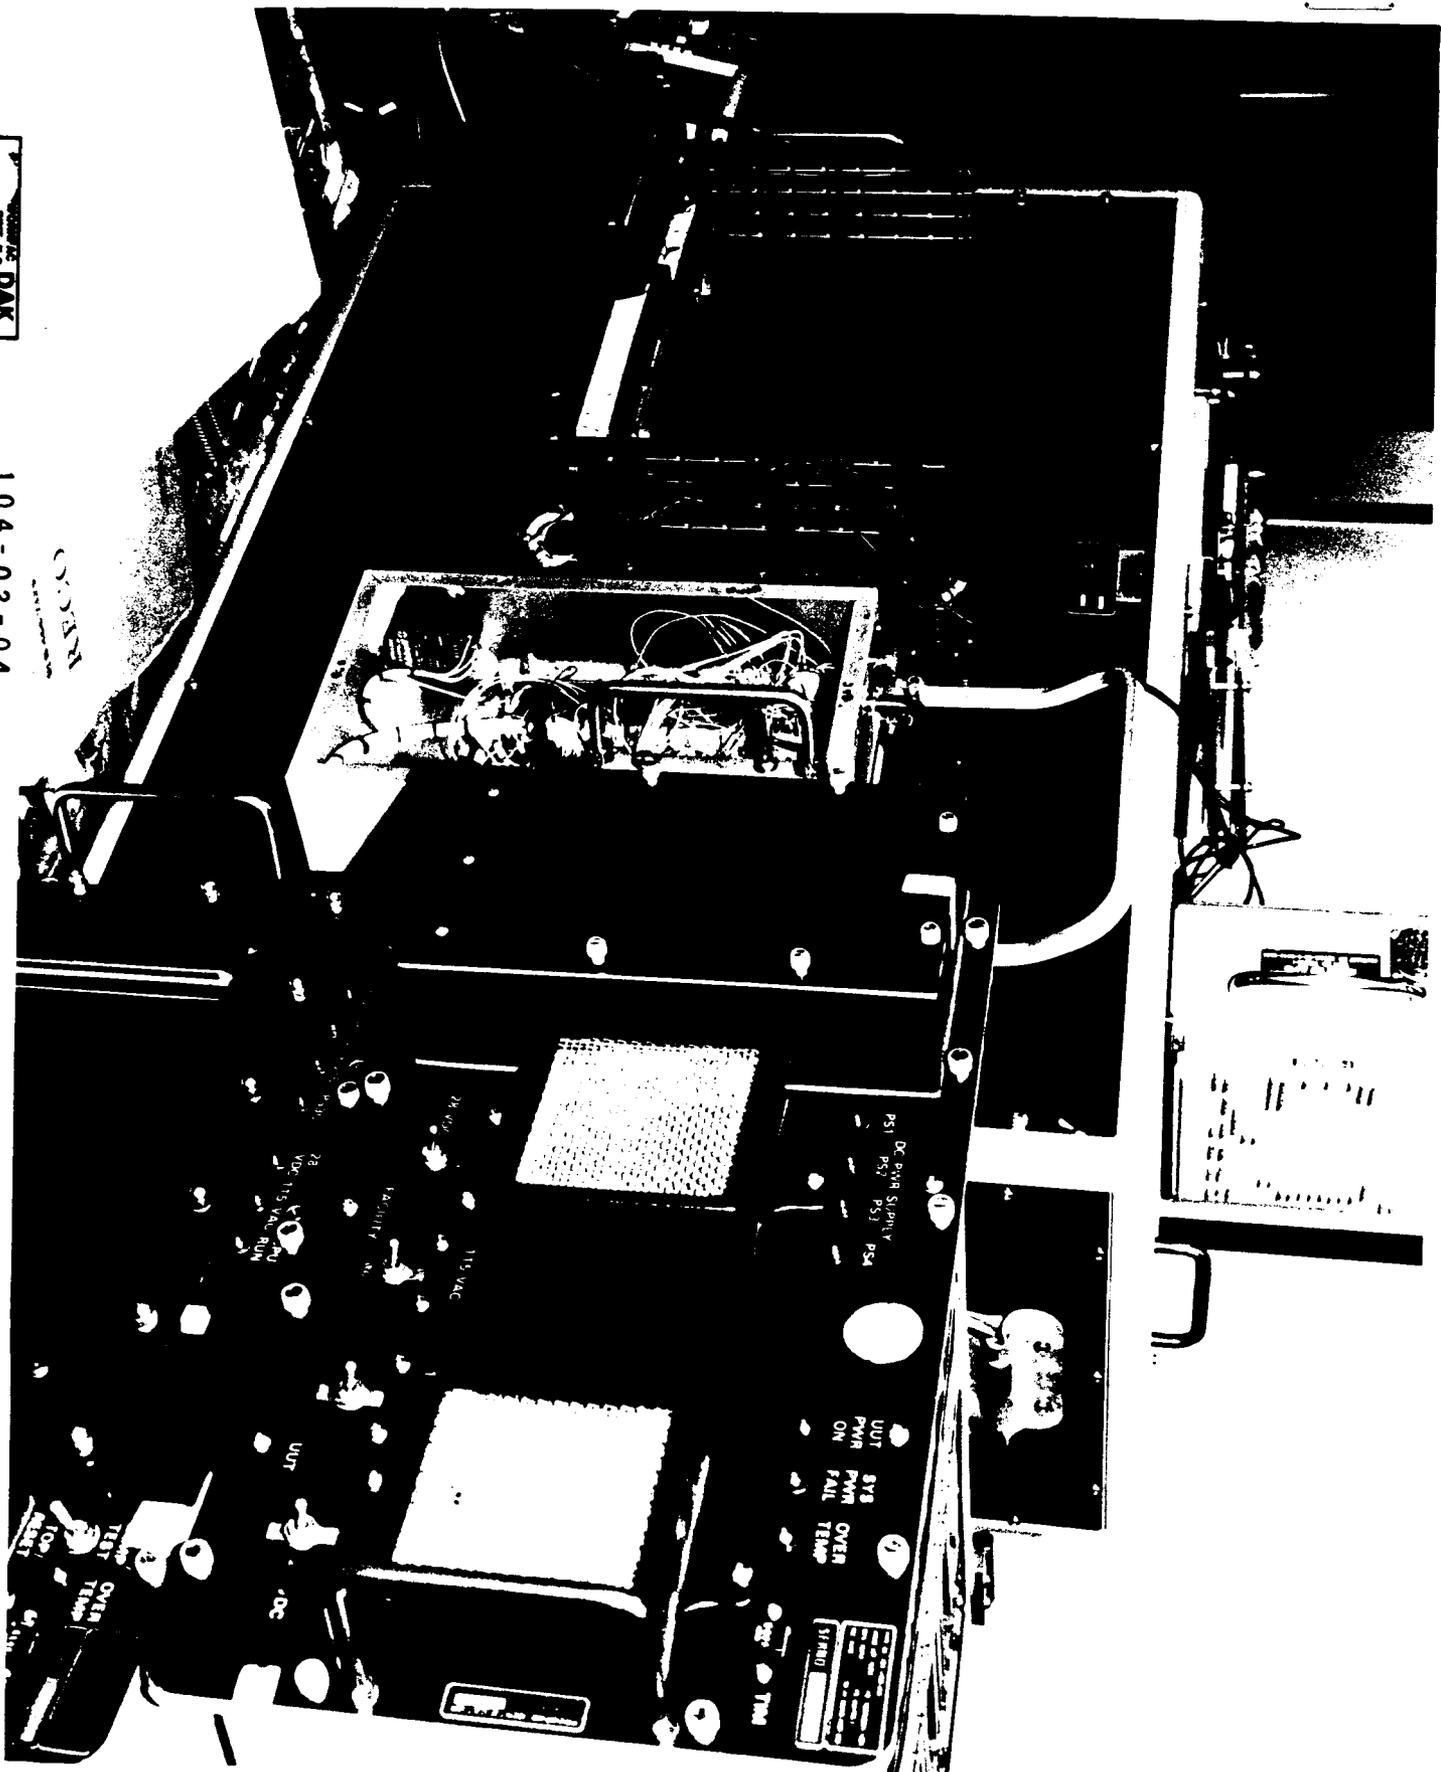

0.005 Man years.

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

Photo No. - 104-02-04.

CHERRY POINT**

Activity Name:	NAVAVNDEPOT CHERRY POINT
Facility or Equipment Nomenclature or Title	Electric Equipment Test Sets (EETS)

1. State the primary purpose(s) of the facility/equipment.

Used to troubleshoot and repair AV-8B electronic components. There are approximately 35 different components worked on this equipment.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

Portable. Test sets are individual modules in separate boxes.

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$7,500,000 R

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 2,000 lbs. Cube = 1,024 cu. ft.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

None

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).

None

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).

Temperature and humidity control required. ESD sensitive.
