RECEIVED DCN 3212

Attention: 0626200

To Whom It Concerns: All Americans -

Read history and realize this
depleting our Security Base on
the parameter of USA - is Wrong.
Early Entry + destruction of 11 should
show how unprotected we are
at present. -

Surely Security is self preserving
and even Permitted should know how
precious this is! The 1940's proved that.

I was in El Paso when Biggs AFB
was closed - Fear ran over the
place - Don't let Cannon or Edison
become fodder for the Democrats to
play with + feed on - He was Air
Force - Career + My M/34 is buried
in the ground.

He gave his Ak for God + Country ✓

Samely willingly.

Don't let this stupidity destroy
him + the giltion others before
after him. Study the importance of
location + purpose + use of all this
Lifetime devotion + the Future -
Loyally - Juanita Johnson (91)
