

**DATA CALL 1: GENERAL INSTALLATION INFORMATION**

1. **ACTIVITY:** Follow example as provided in the table below (*delete the examples when providing your input*). If any of the questions have multiple responses, please provide all. If any of the information requested is subject to change between now and the end of Fiscal Year (FY) 1995 due to known redesignations, realignments/closures or other action, provide current and projected data and so annotate.

• Name

|                                   |  |
|-----------------------------------|--|
| Official name                     | <i>Naval Ordnance Center, Pacific Division<br/>Port Hadlock Detachment</i> |
| Acronym(s) used in correspondence | NAVORDCEN PACDIV DET PORT HADLOCK  |
| Commonly accepted short title(s)  | Port Hadlock Detachment  |

• Complete Mailing Address

Officer in Charge  
 Naval Ordnance Center, Pacific Division  
 Port Hadlock Detachment  
 100 Indian Island Road  
 Port Hadlock, WA 98339-9723

• PLAD: NAVORDCEN PACDIV DET PORT HADLOCK WA

• PRIMARY UIC: N32013 (Plant Account UIC for Plant Account Holders)

Enter this number as the Activity identifier at the top of each Data Call response page.

• ALL OTHER UIC(s): N52860 PURPOSE: NON-NIF WATERFRONT  
N48537 NON-NIF SERVICE CRAFT

2. PLANT ACCOUNT HOLDER:

• Yes  No  (check one)

3. **ACTIVITY TYPE:** Choose most appropriate type that describes your activity and completely answer all questions.

• **HOST COMMAND:** A host command is an activity that provides facilities for its own functions and the functions of other (tenant) activities. A host has accountability for Class 1 (land), and/or Class 2 (buildings, structures, and utilities) property, regardless of occupancy. It can also be a tenant at other host activities.

• Yes  No  (check one)

• **TENANT COMMAND:** A tenant command is an activity or unit that occupies facilities for which another activity (i.e., the host) has accountability. A tenant may have several hosts, although one is usually designated its primary host. If answer is "Yes," provide best known information for your primary host only.

• Yes  No  (check one)

• Primary Host (current) UIC: N60701

• Primary Host (as of 01 Oct 1995) UIC: N32013

• Primary Host (as of 01 Oct 2001) UIC: N32013

- Port Hadlock is no longer an annex of Seal Beach (OPNAVNOTE 5450 of 14 Oct 93). Plant account records will be adjusted to make them their own host.

• **INDEPENDENT ACTIVITY:** For the purposes of this Data Call, this is the "catch-all" designator, and is defined as any activity not previously identified as a host or a tenant. The activity may occupy owned or leased space. Government Owned/Contractor Operated facilities should be included in this designation if not covered elsewhere.

• Yes  No  (check one)

4. **SPECIAL AREAS:** List all Special Areas. Special Areas are defined as Class 1/Class 2 property for which your command has responsibility that is not located on or contiguous to main complex.

| Name | Location | UIC |
|------|----------|-----|
| NA   |          |     |

5. DETACHMENTS: If your activity has detachments at other locations, please list them in the table below.

| Name | UIC | Location | Host name | Host UIC |
|------|-----|----------|-----------|----------|
| NA   |     |          |           |          |

6. BRAC IMPACT: Were you affected by previous Base Closure and Realignment decisions (BRAC-88, -91, and/or -93)? If so, please provide a brief narrative.

Base Realignment and Closure (BRAC)-93 identified a requirement for two Type M missile magazines due to NAS Alameda base closure and reassignment of Pacific Fleet assets to the Pacific Northwest. BRAC project P-298 was funded in the amount of \$4.8M for construction in FY94 to provide additional missile storage at Port Hadlock Detachment.

7. **MISSION:** Do not simply report the standard mission statement. Instead, describe important functions in a bulletized format. Include anticipated mission changes and brief narrative explanation of change; also indicate if any current/projected mission changes are a result of previous BRAC-88, -91,-93 action(s).

Current Missions

- Maintain and operate an explosive ordnance outloading facility.
- Maintain and operate an expendable ordnance storage and maintenance facility with the capability to receive, segregate, store, issue, maintain, repair, assemble, test, inspect, modify, renovate, demilitarize, and dispose of assigned expendable ordnance and related components.
- Maintain basic stocks of ammunition as required by the Naval Ordnance Center (NOC) Station Load Plan.
- Provide logistics and port services to fleet ships and other vessels visiting the detachment.
- Perform support functions such as Arms, Ammunition, and Explosives (AA&E) inventory and missile sentencing inspection on surface and air launched missiles.
- Provide MILVAN containerized cargo outloading support to Pacific Fleet operations, Military Sealift Command and other services.
- Coordinate and oversee the training and utilization of assigned military Naval Reserve units and civilian personnel involved in ammunition or explosive cargo handling by providing facilities, technical supervision, and administrative processing and guidance.
- Maintain intermediate and depot level overhaul and maintenance facilities for ordnance and ammunition details.
- Provide refuge and safe haven for any shipment of government property in transit.

Projected Missions for FY 2001

- Ordnance storage and renovation support requirements will increase significantly due to reassignment of West Coast fleet elements to the Pacific Northwest.
- Renovation and demilitarizing/disposal of overage and deteriorated ordnance is expected to increase significantly due to base closures and ship decommissioning.
- Containerized cargo outloading is expected to increase in support of DOD "Purple Force" fleet operations. Mobility Requirements Study (MRS), Volume 1, of January 92 recommended DOD obtain a west coast containerized capability of at least the same capacity as currently exists on the east coast (600 containers per day throughput). CNO message 311432Z Dec 92 tasked Port Hadlock Detachment to develop outload capability of 250 containers per day. MCON P-205 constructs two container holding yards and has been programmed for FY96 by the Department of the Army. As facility and equipment improvements for handling MILVAN containers are accomplished, demand for this support service is expected to increase.

8. **UNIQUE MISSIONS:** Describe any missions which are unique or relatively unique to the activity. Include information on projected changes. Indicate if your command has any National Command Authority or classified mission responsibilities.

Current Unique Missions

- Only west coast ammunition pier capable of handling 1 AOE (AOE-1 or AOE-6) and 1 CVN, or 2 AOE's simultaneously. In the outyears two AOE-6 class ships will be added to the PACFLT inventory and they will conduct loading/off-loading operations at Port Hadlock even though they are scheduled to be homeported in Bremerton.
- Provide explosive handling services to any Navy or DOD vessel pierside. No draft restrictions (60' at mean low water available).
- Provide explosive handling services for commercial explosive manufacturing companies who ship their material by water.
- As additional duty to the Commander, Naval Base Seattle, the Officer in Charge performs duties of the Naval Base Seattle Ordnance Officer as identified by local governing directives.
- Certified ammunition handling equipment weight test facility.

Projected Unique Missions for FY 2001

- All of the above plus -
  - Performs as the secondary containerized ammunition transshipment facility on the West Coast, with a capability of 250 containers per day.

9. IMMEDIATE SUPERIOR IN COMMAND (ISIC): Identify your ISIC. If your ISIC is not your funding source, please identify that source in addition to the operational ISIC.

- |  |                 |
|--|-----------------|
| • Operational name                             | UIC             |
| <u>Naval Ordnance Center, Pacific Division</u> | <u>N68968</u>   |
| • Funding Source                               | UIC             |
| <u>DBOF</u>                                    | <u>Multiple</u> |

10. PERSONNEL NUMBERS: Host activities are responsible for totalling the personnel numbers for all of their tenant commands, even if the tenant command has been asked to separately report the data. The tenant totals here should match the total tally for the tenant listing provided subsequently in this Data Call (see Tenant Activity list). (Civilian count shall include Appropriated Fund personnel only.)

On Board Count as of 01 January 1994

|                         | Officers | Enlisted | Civilian<br>(Appropriated) |
|-------------------------|----------|----------|----------------------------|
| • Reporting Command     | 2        | 29       | 91                         |
| • Reporting Reserves    | 3        | 18       |                            |
| • Tenants (w/o reserve) | 0        | 1        | 0                          |
| • Drilling reserves     | 5        | 4        |                            |
| • Tenants (Total)       | 5        | 5        | 0                          |

Authorized Positions as of 30 September 1994

|                          | Officers | Enlisted | Civilian<br>(Appropriated) |
|--------------------------|----------|----------|----------------------------|
| • Reporting Command      | 2        | 23       | 89                         |
| • Reporting Reserves     | 3        | 18       |                            |
| • Tenants (w/o reserves) | 0        | 1        | 0                          |
| • Drilling Reserves      | 5        | 5        |                            |
| • Tenants (Total)        | 5        | 6        | 0                          |

11. KEY POINTS OF CONTACT (POC): Provide the work, FAX, and home telephone numbers for the Commanding Officer or OIC, and the Duty Officer. Include area code(s). You may provide other key POCs if so desired in addition to those above.

| <u>Title/Name</u>    | <u>Office</u>                 | <u>Fax</u>                    | <u>Home</u>   |
|----------------------|-------------------------------|-------------------------------|---------------|
| • CO/OIC             |                               |                               |               |
| OIC - CDR W. D'Amico | (206)396-5227<br>DSN 744-5227 | (206)396-5267<br>DSN 744-5267 | (206)385-7310 |
| • Duty Office        | (206)396-0100<br>DSN 744-0100 | (206)396-5203<br>DSN 744-5203 | [ N/A ]       |
| •                    |                               |                               |               |
| _____                |                               |                               |               |
| •                    |                               |                               |               |
| _____                |                               |                               |               |

12. **TENANT ACTIVITY LIST:** This list must be all-inclusive. Tenant activities are to ensure that their host is aware of their existence and any "subleasing" of space. This list should include the name and UIC(s) of all organizations, shore commands and homeported units, active or reserve, DOD or non-DOD (include commercial entities). The tenant listing should be reported in the format provide below, listed in numerical order by UIC, separated into the categories listed below. Host activities are responsible for including authorized personnel numbers, on board as of **30 September 1994**, for all tenants, even if those tenants have also been asked to provide this information on a separate Data Call. (Civilian count shall include Appropriated Fund personnel only.)

• Tenants residing on main complex (shore commands)

| Tenant Command Name   | UIC   | Officer | Enlisted | Civilian |
|-----------------------|-------|---------|----------|----------|
| Navy Exchange Branch  | 45237 | 0       | 0        | 0        |
| Branch Medical Clinic |       | 0       | 1        | 0        |

• Tenants residing on main complex (homeported units.)

| Tenant Command Name | UIC | Officer | Enlisted | Civilian |
|---------------------|-----|---------|----------|----------|
| NA                  |     |         |          |          |

• Tenants residing in Special Areas (Special Areas are defined as real estate owned by host command not contiguous with main complex; e.g. outlying fields).

| Tenant Command Name | UIC | Location | Officer | Enlisted | Civilian |
|---------------------|-----|----------|---------|----------|----------|
| NA                  |     |          |         |          |          |

• Tenants (Other than those identified previously)

| Tenant Command Name | UIC | Location | Officer | Enlisted | Civilian |
|---------------------|-----|----------|---------|----------|----------|
| NA                  |     |          |         |          |          |

13. REGIONAL SUPPORT: Identify your relationship with other activities, not reported as a host/tenant, for which you provide support. Again, this list should be all-inclusive. The intent of this question is capture the full breadth of the mission of your command and your customer/supplier relationships. Include in your answer any Government Owned/Contractor Operated facilities for which you provide administrative oversight and control.

| Activity name                               | Location                 | Support function (include mechanism such as ISSA, MOU, etc.) |
|---|--------------------------|--|
| <i>Jefferson County Fire Dept Districts</i> | <i>Port Townsend, WA</i> | <i>Mutual support fire services - ISSA</i>                   |

14. FACILITY MAPS: This is a primary responsibility of the plant account holders/host commands. Tenant activities are not required to comply with submission if it is known that your host activity has complied with the request. Maps and photos should not be dated earlier than 01 January 1991, unless annotated that no changes have taken place. Any recent changes should be annotated on the appropriate map or photo. Date and label all copies.

- Local Area Map. This map should encompass, at a minimum, a 50 mile radius of your activity. Indicate the name and location of all DoD activities within this area, whether or not you support that activity. Map should also provide the geographical relationship to the major civilian communities within this radius. (Provide 12 copies.)
- Installation Map / Activity Map / Base Map / General Development Map / Site Map. Provide the most current map of your activity, clearly showing all the land under ownership/control of your activity, whether owned or leased. Include all outlying areas, special areas, and housing. Indicate date of last update. Map should show all structures (numbered with a legend, if available) and all significant restrictive use areas/zones that encumber further development such as HERO, HERP, HERF, ESQD arcs, agricultural/forestry programs, environmental restrictions (e.g., endangered species). (Provide in two sizes: 36"x 42" (2 copies, if available); and 11"x 17" (12 copies).)

- Aerial photo(s). Aerial shots should show all base use areas (both land and water) as well as any local encroachment sites/issues. You should ensure that these photos provide a good look at the areas identified on your Base Map as areas of concern/interest - remember, a picture tells a thousand words. Again, date and label all copies. (Provide 12 copies of each, 8½" x 11".)
- Air Installations Compatible Use Zones (AICUZ) Map. (Provide 12 copies.)

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

Notes: In the context of this data Call:

1. Base your responses for FY 1994 and previous years on executed workload, and for FY 1995 and subsequent years on workload as programmed in the FY 1995 Budget Submission and POM-96. Unless otherwise specified, use workload mixes as programmed. In estimating projected workload capabilities, use the activity configuration as of completion of the BRAC-88/91/93 actions.
2. Unless otherwise specified, for questions addressing maximum workload within this Data Call, base your response on an eight hour day/five day normal work week (1-8-5). Please identify any processes which, under normal operations, operate on a different schedule.
3. For purposes of this Data Call, Depot maintenance is regarded as the maintenance performed on material that requires major overhaul or a complete rebuild of parts, assemblies, subassemblies, and end items, including the manufacture of parts, modifications, testing, and reclamation, as required. Depot maintenance serves to support lower categories of maintenance. Depot maintenance provides stocks of serviceable equipment by using more extensive facilities for repair than are available in lower level maintenance activities. Depot or indirect maintenance functions are identified by the type of equipment maintained or repaired.
4. Report all workload performed, clearly identifying origin of all non-DON workload.

**If any responses are classified, so annotate the applicable question and include those responses in a separate classified annex.**

This document has been prepared in WordPerfect 5.1/5.2.

ACTIVITY: N32013

### DATA CALL WORK SHEET FOR MILITARY VALUE ANALYSIS

#### NAVAL WEAPONS STATIONS, NAVAL MAGAZINES, AND STRATEGIC WEAPONS FACILITIES

Primary Activity UIC: N32013 NOCPACDIV DET PORT HADLOCK

(Use this number as Activity identification at the top of each page.)

Mission Area

#### 1. Ordnance Storage

1.1 How much (in tons and square feet (SF)) of approved explosive ordnance (magazine) storage exists at the facility?

Table 1.1: Ordnance Storage

|               | Present Storage |       | FY 2001 |      |
|---------------|-----------------|-------|---------|------|
|               | SF              | Tons  | SF      | Tons |
| Total Storage | 167,560         | 8,496 | 189,210 | 9110 |

1.2 R What fraction of the available storage is in use and projected to be in use for the years indicated? (Note: Retain consistency with NAVSEAINST 8024.2, which indicates that 80% of the square feet in a magazine is effectively 100% full because of access and handling factors.)

Table 1.2: Fraction of Storage in Use

| Ordnance Category | FY 1991 | FY 1992 | FY 1993 | FY 1994 | FY 1995 | FY 1996 | FY 1997 | FY 1999 | FY 2001 |
|-------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| LOE               | 75%     | 80%     | 85%     | 89%     | 96%     | 100%    | 100%    | 100%    | 100%    |
| Threat            | 80%     | 85%     | 85%     | 90%     | 58%*    | 64%     | 70%     | 77%     | 83%     |
| Nuclear           | 0       | 0       | 0       | 0       | 0       | 0       | 0       | 0       | 0       |
| Other             | 63%     | 65%     | 65%     | 64%     | 60%     | 65%     | 70%     | 75%     | 85%     |
| Total             | 80%     | 85%     | 87%     | 90%     | 79%     | 84%     | 93%     | 112%    | 135%    |

\*INDICATES ADDITIONAL ASSETS BY CONSTRUCTION OF P-298 MISSILE MAGAZINES (2)- 20,000 GSF

**1. Ordnance Storage, continued**

1.3 Identify any specialized, unique or peculiar characteristics about your facilities, equipment, or skills at your activity to provide for ordnance storage? Highlight those that are "one of a kind" within the DON/DoD.

A TRAINED AND STABLE WORKFORCE HAVING ON AVERAGE OVER FIFTEEN YEARS OF ORDNANCE EXPERIENCE ALLOWS DETACHMENT PORT HADLOCK TO ANNUALLY PERFORM IT'S ORDNANCE STORAGE MISSION AT THE HIGHEST LEVEL OF INVENTORY ACCURACY AMONG ALL WEAPONS STATIONS. PORT HADLOCK IS THE ONLY DEEP WATER ORDNANCE PIER ON THE WEST COAST ALLOWING DIRECT ACCESS BY CARRIERS AND AOE'S FOR FULL LOADING. THE PUGET SOUND AREA IS BOTH A FLEET HOMEPORT FOR CARRIERS / CLF'S / COMBATENTS AND THE CARRIER REPAIR / OVERHAUL POINT, ALLOWING READY ACCESS TO AMMUNITION LOAD / OFFLOAD, ENROUTE TO SEA OR RETURNING TO REPAIR AVAILABILITY. THE DETACHMENT'S ISLAND CHARACTER PROVIDES SECURITY ENHANCEMENTS AND FREEDOM FROM CIVILIAN ENCROACHMENT ISSUES IMPACTING EXPLOSIVE SAFETY ISSUES. PORT HADLOCK HAS NOW BEEN DESIGNATED TO BECOME A CONTAINERIZED AMMUNITION TRANSHIPMENT POINT. A CAPABILITY OF 250 MILVAN CONTAINERS A DAY IS BEING CREATED.

1.4 What percent of your total ordnance storage is performed for DON?

DON storage provided = 100 %

1.5 What percent of your total ordnance storage is performed for commercial manufacturers, other Military Departments, or other DoD agencies? List these customers and percent utilization.

FMS effort = 0 %

Commercial effort = 0 %

Other Military Departments (Army) = 0 %

Other Military Department (Air Force) = 0 %

Other DoD Agencies (specify) = 0 %

## Mission Area

**2. Ordnance Outload Facility**

2.1 What type of ordnance pierside outload facility (container, bulk/breakbulk or specialized) does the station, magazine, or facility operate and what type of vessel can be accommodated? In the table below mark with an "X" those operations at your facility. If your facility accommodates other vessels at anchorage, please note below.

Table 2.1: Outload Characteristics

|                  | Container | Bulk/Break Bulk | Specialized |
|------------------|-----------|-----------------|-------------|
| Amphibious       | X         | X               | X           |
| Combatant        |           |                 | X           |
| CV/CVN           |           | X               | X           |
| Submarines       |           |                 | X           |
| CLF              | X         | X               | X           |
| Other Break Bulk | X         | X               | X           |
| Container Ship   | X         | X               | X           |
| Other            |           |                 |             |

2.2 What is the daily (single shift) throughput capacity of the facility in tons for each of the three major types of naval ordnance, i.e. LOE, Threat, Strategic? If your function measures throughput using another unit of measure, provide data in terms of tons in first and your unit of measure in a separate table (specify unit of measure).

Table 2.2: Maximum Daily Throughput

((R\*

| Ordnance Categories | FY 1990 | FY 1991 | FY 1992 | FY 1993 | FY 1994 | FY 1995 | FY 1996 | FY 1997 |
|---------------------|---------|---------|---------|---------|---------|---------|---------|---------|
| LOE                 | 500     | 500     | 500     | 500     | 500     | 500     | 500     | 500     |
| Threat              | 300     | 300     | 300     | 300     | 300     | 300     | 300     | 300     |
| Strategic           | 0       | 0       | 0       | 0       | 0       | 0       | 0       | 0       |
| Other               | 200     | 200     | 200     | 200     | 200     | 200     | 200     | 200     |

\* ADDED "0" IN BLANKS - NO DATA CHANGED

|       |      |      |      |      |      |      |      |      |
|-------|------|------|------|------|------|------|------|------|
| Total | 1000 | 1000 | 1000 | 1000 | 1000 | 1000 | 1000 | 1000 |
|-------|------|------|------|------|------|------|------|------|

## 2. Ordnance Outload Facility, continued

2.3 Identify any specialized, unique or peculiar characteristics about your facilities, equipment, or skills at your activity to attain the above throughput? Specify those that are one of a kind within the DON/DoD.

DETACHMENT PORT HADLOCK'S DEEP WATER ORDNANCE PIER IS ACCESSIBLE FROM THE OPEN SEA WITHOUT NAVIGATION BARRIERS OF ANY KIND. THE PIER IS DESIGNED FOR SIMULTANEOUS OUTLOADING OF AN AOE AND CV CLASS VESSEL. THE PIER IS SITE APPROVED FOR 2.25M LBS NET EXPLOSIVE WEIGHT (N.E.W) CLASS/DIV. 1.1 AMMUNITION WITHOUT WAIVER. A FOUL WEATHER ANCHORAGE IS SITED IN PROXIMITY TO THE PIER AS WELL AS THREE EXPLOSIVE SITED FLEET MOORINGS FOR ANCHORING EXPLOSIVE BARGES FOR SURGE CAPACITY. TWO EXPLOSIVE SITED CONTAINER HOLDING YARDS ARE PROGRAMMED FOR CONSTRUCTION DURING 1995 TO PROVIDE 250 CONTAINER/DAY THROUGHPUT CAPACITY. WHILE NOT CURRENTLY PROVIDED, THE AMMUNITION PIER WAS DESIGNED AND CONSTRUCTED TO INSTALL A FIFTY TON RAIL MOUNTED CONTAINER CRANE.

2.4 At the maximum throughput levels documented above, and considering explosive quantity-distance constraints, how many ships by type (AEs/AOEs, Containerships, MSNAP breakbulk ships, etc.) can be berthed at your outload facility at one time (optimal configuration)?

Table 2.4: Maximum Outload by Ship Type

| Type Ship | Maximum Number |
|-----------|----------------|
| AOE       | 2              |
| CV        | 1 + AOE        |
| CONTAINER | 2              |

2.5 If surface combatants and/or submarines outload at your facility, how many of each type can be loaded at one time (optimal configuration)?

Optimal Configuration = 1 CV or  
2 DDG or  
2 FFG or  
2 CRUISERS or  
2 SUBMARINES or ANY MIX OF "2"

2.6 If the maximum throughput levels documented above were based on a combination of combatants and other vessels, identify the mix that provides for the maximum outload capability.

Maximum Outload Capability Vessel Mix:

1 AOE PLUS 1 COMBATANT = 1000 S/T PER DAY  
OR 1 CV PLUS 1 AOE = 1000 S/T PER DAY

OR 1 CONTAINER SHIP = 5000 S/T DAY

## 2. Ordnance Outload Facility, continued

2.7 Identify the number of vessels by type, out/downloaded by your activity in the period request (i.e. each trip to the pier = "1").

Table 2.7: **Outload History**

| Vessel Type      | FY 1991 | FY 1992 | FY 1993 |
|------------------|---------|---------|---------|
| Amphibious       | 0       | 0       | 0       |
| Combatant        | 57      | 50      | 35      |
| CV/CVN           | 0       | 1       | 1       |
| Submarines       | 0       | 0       | 0       |
| CLF              | 1       | 1       | 1       |
| Other Break Bulk | 0       | 1       | 1       |
| Container Ship   | 2       | 2       | 2       |
| Other            | 0       | 0       | 0       |
| Total:           | 60      | 55      | 40      |

(R)

2.8 What is the maximum daily (single shift) throughput capability at your facility, measured in *tons* as a function of ship type? Provide comments if the maximum throughput by ship type would be reduced if multiple ships are being accommodated simultaneously. Utilize the optimal configuration provided previously to indicate any impact of simultaneous operations.

Table 2.8: **Outload History**

| Vessel Type      | FY 1993 | FY 1997 | Comments             |
|------------------|---------|---------|----------------------|
| Amphibious       | 0       | 0       |                      |
| Combatant        | 75      | 75      | 50 IF 1 + AOE        |
| CV/CVN           | 600     | 600     | 350 IF 1 + AOE       |
| Submarines       | 30      | 30      |                      |
| CLF              | 1000    | 1000    | 950 IF 1 + COMBATANT |
| Other Break Bulk | 700     | 700     |                      |
| Container Ship   | 5000    | 5000    |                      |
| Other            | 0       | 0       |                      |
| Total:           | N/A     | N/A     | *                    |

(R\*)

\* N/A VS TOTAL

\*Totals are not cumulative for daily single shift throughput capability.

Mission Area

### 3. Ammunition and Ordnance Maintenance and Testing/Repair and Rework

3.1 In the tables below identify the intermediate level maintenance and testing performed/programmed at your activity in number of units and Direct Labor Man Years (DLMY).

Table 3.1.a: Maintenance and Testing Performance (Units)

| Ammunition/<br>Ordnance Type | FY<br>1990 | FY<br>1991 | FY<br>1992 | FY<br>1993 | FY<br>1994 | FY<br>1995 | FY<br>1996 | FY<br>1997 |
|------------------------------|------------|------------|------------|------------|------------|------------|------------|------------|

3.2 Identify any specialized, unique or peculiar characteristics about your facilities, equipment, or skills at your activity to perform the above work? Highlight those that are one of a kind within the DON/DoD.

BLDG 837 SEGREGATION/RENOVATION CONSTRUCTED IN 1980 IS AN UP TO DATE EXPLOSIVE FACILITY CONTAINING 25,025 SF. THE AREA IS DIVIDED INTO THREE WORK BAYS FOR SEGREGATED EXPLOSIVE OPERATIONS. FOUR DEFUZING CELLS ARE EQUIPPED FOR REMOTE CONTROL AND MONITORING OF HAZARDOUS EXPLOSIVE REPAIR AND REWORK.

BLDG 1030 EXPLOSIVE OPERATIONS, CONSTRUCTED IN 1989, WAS DESIGNED AS A STATE OF THE ART MISSILE TEST FACILITY. THE BUILDING IS PROVIDED WITH A 5 TON GANTRY CRANE, IDS ALARM SECURITY AND FOUR COVERED TRUCK OFF-LOADING RAMPS. WORK CREWS HAVE BEEN TRAINED AND CERTIFIED TO ENCAN AND DECAN TOMOHWK CRUISE MISSILES AND PERFORM CONTINUITY TESTING.

**3. Ammunition and Ordnance Maintenance and Testing/Repair and Rework, continued**

3.3 What percent of your total maintenance and testing effort on ordnance is performed for: FMS, commercial manufacturers, other Military Departments, or other DoD agencies?

FMS effort = 0 %

Commercial effort = 0 %

Other Military Departments (Army) = 0 %

Other Military Department (Air Force) = 0 %

Other DoD Agencies (specify) = 0 %

3.4 Identify in the table below the DLMYs expended in the RSSI process that are related to the rework and repair of ordnance (these hours should not be duplicated in Table 3.1 above).

\*NONE

Table 3.4: Rework and Repair Performance (DLMYs)

7.2 Identify any specialized, unique or peculiar characteristics about the facilities, equipment, or skills at your activity to maintain such publications? Highlight those that are one of a kind within the DON/DoD.

N/A CR

7.3 What alternatives exist for providing the publication support services (e.g. another DON activity, Army or Air Force activity, DoD agency, NATO or other treaty agencies, etc.)?

Features and Facilities

**8. Explosive Quantity Distance Factors**

8.1 What restrictions or explosive quantity distance standard limitations apply to the handling of volatile or explosive products or for hot work on submarines, surface combatants, ammunition ships, or oilers on your station/magazine/facility at the piers/wharfs?

ESQD limitations are defined for each explosive sited facility at the Detachment in accordance with OP5 Vol 1. No waivers are in effect. The ammunition pier is site approved for 2.25M lbs N.E.W. Hot work must be approved and coordinated by OIC to comply with OP5 provisions in cases of emergency or operational necessity.

8.2 What restrictions apply when moving munitions in quantity from the storage magazines to the outload facility?

All ordnance haul roads are located on the main base. No explosive quantity distance factors apply. All explosives are moved on specified explosive traffic routes. Only restriction applies to manufacturers capacity rating of trailer.

8.3 How many AEs, AORs, AOs, or AOE's can be berthed with nesting at your facility, simultaneously? Identify by each pier or wharf.

Two of any combination of AE, AOR, AO, or AOE's can be berthed simultaneously at 832 Ammunition Pier without nesting. Nesting any two would exceed the capacity of bollards.

8.4 How many surface combatants or nuclear submarines can be berthed with nesting at the weapon station, magazine, or facility, simultaneously? Identify by each pier or wharf.

Four combatants or four nuclear submarines could be berthed with nesting simultaneously at 832 Ammunition Pier.

## Features and Facilities

## 9. Availability and Condition

9.1 Identify, by three digit Category Code Number (CCN), all facilities at this activity, and their current condition and area in thousands of square feet (KSF). Duplicate the table as necessary to report all facilities of any tenants for whom your activity serves as host.

Table 9.1: Facility Conditions

Table 9.1: Facility Conditions, continued

**9. Availability and Condition, continued**

9.2 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories in Table 9.1, above, where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

(a) 42132 - Inert Storage (b) Building & Plumbing Deteriorated (g) No

(a) 72111 - BEQ E1 - E4 (b) Not up to present building code (c) BEQ E1 - E4 (d) \$400,000  
(e) Administration - \$100,000 (f) Renovation - Quality of Life - \$260,000 (g) Yes, C3

(a) 21977 - P.W. Maintenance (b) Physical condition of building and deterioration of building  
(d) \$150,000 (g) No

(a) 15520 - Small Craft Berthing (b) Wooden Pier was storm damaged (c) None (d) \$220,000  
(e) None (f) Rebuild Pier, \$220,000 (g) Yes, C3

(a) 15110 - Ammo Pier (b) Wooden Pier was storm damaged and is abandoned (c) None (d) \$3,000,000  
(e) None (f) None (g) No

(a) 44135 - Gen Storage Shed (b) Building at wrong location (g) No

(a) 73010 - Fire Station (b) Building in wrong location (c) Storage and Administration (d) \$100,000  
(e) Administration - \$225,000 (f) Current plan is to convert building to administrative space.  
Funding not programmed. (g) No

9.3 Identify if your activity has been prevented from performing any proposed or planned expansion, establishment of new arcs, or scheduled operations in the past five years due to unresolved restrictions.

\*NO

## Features and Facilities

**10. Reserve Support Capabilities**

10.1 List all reserve units (USNR, USMCR, USAFR, ANG, USAR, ARNG) that regularly train at your installation.

Table 10.1: **Hosted Reserve Units**

| Reserve Unit                 | Training Function/Facilities Used   |
|------------------------------|---|
| NR NWS PT HADLOCK HQ222      | TRAIN AS EXPLOSIVE ORDNANCE TEAM AND SAFETY/ADMIN OFFICERS. UTILIZE FACILITIES THROUGHOUT THE BASE. |
| FOREST PARK DET 113 RESERVES | TRAIN AS EXPLOSIVE ORDNANCE TEAMS. UTILIZE FACILITIES THROUGHOUT THE BASE.                          |
| WEPSTA CONCORD DET 522       | TRAIN AS EXPLOSIVE ORDNANCE TEAMS. UTILIZE FACILITIES THROUGHOUT THE BASE.                          |

10.2. For each USNR and USMCR unit that trains at your facility, provide the number of authorized billets and number of personnel actually assigned to the unit for the past three full fiscal years. Include both Selected Reserves (SELRES) and Training and Administration of Reserves (TAR) Navy/Full Time Support (FTS) Marine Corps reservists. Explain any reported differences between authorized and actual manning. Reproduce this table as necessary for each unit.

Table 10.2: **Reserve Personnel**

**10. Reserve Support Capabilities, Continued**

10.3 What is the outlook for your reserve training requirement for FY 1997?

RESERVE TRAINING IS EXPECTED TO INCREASE IN RESPONSE TO POM FY96 WARGAME 2003 SCENARIO WHICH ASSIGNS AN ORDNANCE SUPPORT ROLE TO TRAINED RESERVISTS DURING MOBILIZATION AND SUSTAINMENT PERIODS.

10.4 Does your activity possess any specialized, unique or peculiar characteristics to facilitate the reserve training?

WE ARE THE ONLY ORDNANCE STATION IN THE PACIFIC NORTHWEST. WE SUPPORT SEVERAL RESERVE GROUPS WITHIN THE REGION. RESERVISTS ARE BEING TRAINED TO PERFORM ACTUAL ORDNANCE HANDLING EVOLUTIONS.

## Costs

**11. Investments**

11.1. List the project number, description, funding year, and value of the *capital improvements at your base completed (beneficial occupancy) during FY 1988 to FY 1994*. Indicate if the capital improvement is a result of BRAC realignments or closures.

Table 11.1: Capital Improvement Expenditure

| Project | Description                             | Fund Year | Value (\$K) |
|---------|---|-----------|-------------|
| P-303   | EXPLOSIVE OPERATING FACILITY (NON BRAC) | 1988      | 2,200K      |
| P-202   | BOX A MISSILE MAGAZINES (5) (NON BRAC)  | 1988      | 3,905K      |
| MINOR C | LUMP SUM TOTAL                          | 1988      | 300K        |
| MINOR C | LUMP SUM TOTAL                          | 1989      | 1,538K      |
| MINOR C | LUMP SUM TOTAL                          | 1990      | 260K        |
| MINOR C | LUMP SUM TOTAL                          | 1991      | 218K        |
| MINOR C | LUMP SUM TOTAL                          | 1992      | 163K        |
| P-309   | FIRE STATION (NON-BRAC)                 | 1993      | 1,100K      |
| MINOR C | LUMP SUM TOTAL                          | 1993      | 389K        |
| MINOR C | LUMP SUM TOTAL                          | 1994      | 375K        |

11.2. List the project number, description, funding year, and value of the *non-BRAC related capital improvements planned* for years FY 1995 through FY 1997.

Table 11.2: **Planned Capital improvements**

| Project<br>Local #'s | Description                    | Fund<br>Year | Value<br>(\$K) |
|----------------------|--------------------------------|--------------|----------------|
| N/A                  | DUST COLLECTOR SYSTEM          | 1995         | 142,000        |
| N/A                  | MODIFY CARRIER CVA CAMELS (2)  | 1995         | 456,000        |
| N/A                  | HAZARDOUS MATERIAL WAREHOUSE   | 1996         | 120,000        |
| N/A                  | BROADBAND SYSTEM EXPANSION     | 1996         | 185,000        |
| N/A                  | SEWAGE AERATOR REPLACEMENT     | 1996         | 113,000        |
| N/A                  | SMALL BOAT PIER                | 1997         | 295,000        |
| N/A                  | LOADING DOCK ADJACENT TO B-189 | 1997         | 83,000         |

1,394,000

**11. Investment, continued**

11.3 List the project number, description, funding year, and value of the *BRAC related capital improvements planned* for FY 1995 through FY 1999.

Table 11.3: **Planned BRAC Capital improvements**

| Project | Description                  | Fund Year | Value   |
|---------|------------------------------|-----------|---------|
| P-298T  | TYPE M MISSILE MAGAZINES (2) | 1994      | 4.8 MIL |
|         |                              |           |         |
|         |                              |           |         |
|         |                              |           |         |
|         |                              |           |         |

**11. Investment, continued**

11.4 Identify by Investment Category Code and Name (e.g. 05-Training Facilities; 14-Administration) the actual investment at your activity, to include all MCON, maintenance and repair, installed equipment, and minor construction, in thousands of dollars (\$ K) over the period FY 1990 through FY 1994 for all your facilities. Report separately all other Class 2 equipment investments. The following table should include your responses to questions 11.1-11.3 above.

Table 11.4: **Historic Investment Summary**

| Investment Category                  | \$ K  |
|--------------------------------------|-------|
| 03 Waterfront Operational Facilities | 1228  |
| 04 Other Operational Facilities      | 429.8 |
| 08 Other Maintenance/Production      | 736.8 |
| 10 POL Supply Storage                | 61.4  |

Strategic Concerns

12. Stand Alone and Location Factors

12.1 Identify the support (police, fire protection, etc.) now that is now provided by a nearby base, station or activity and will be needed by your facility if that activity is closed.

Table 12.1: Support Facilities

| Support    | Currently Obtained from: | Needed if Host Closes? |
|------------|--------------------------|------------------------|
| Police     | N/A                      | NONE                   |
| Security   | N/A                      | NONE                   |
| Fire       | N/A                      | NONE                   |
| Cafeteria  | N/A                      | NONE                   |
| Parking    | N/A                      | NONE                   |
| Utilities  | N/A                      | NONE                   |
| Child Care | N/A                      | NONE                   |
|            |                          |                        |

12.2 What is the distance in nautical miles and the average transit time from your activity to the open sea?

Distance = 85 NM  
Transit Time = 5 hours

12.3 List and indicate the distance in road-miles to Interstate Highways, airports of embarkation, seaports of embarkation, and cargo rail terminals.

Interstate Highways. I-5 from the Naval Ordnance Center Port Hadlock is 40 miles and a 30 minute ferry crossing from Kingston to Edmonds. The alternate overland route to I-5 via Tacoma is 79 miles.

Airports. Seatac International Airport is 65 miles, Bremerton National Airport is 40 miles, Jefferson International Airport is 8 miles.

Seaports. Port of Seattle is 40 miles, Port of Tacoma is 60 miles.

Cargo Rail Terminals. Burlington Northern is 40 miles (Seattle), 60 miles (Tacoma), Union Pacific Railroad Company is 40 miles (Seattle), 60 miles (Tacoma). There is also a Railhead located at the Naval Submarine Base Bangor, 35 miles.

**12. Stand Alone and Location Factors, continued**

12.4 Is your activity serviced by rail trackage providing direct access to the commercial rail network?

No

If Yes, are you serviced by single or multiple tracks?

Single / Multiple (#     )

If No, identify the distance in road-miles separating your activity from the nearest railhead/access.

Distance = 35 Miles

12.5 List the homeports within the service area of your facility and the distance to each.

Table 12.5: Proximity to Homeport

| Homeport                    | Distance |
|-----------------------------|----------|
| NAVAL STATION EVERETT       | 60 MILES |
| PUGET SOUND NAVAL SHIPYARD  | 43 MILES |
| NAVAL SUBMARINE BASE BANGOR | 35 MILES |
|                             |          |

12.6 Identify the factors that limit access to your piers, i.e. bridge height restrictions, channel depth, turning basin constraints, etc. Identify by ship type the largest vessel that can gain access to your piers.

Table 12.6: Pier Access

| Largest Vessel   | Limiting Factors |
|------------------|------------------|
| AIRCRAFT CARRIER | NONE             |

R

ACTIVITY: N32013

*Strategic Concerns*

**13. Contingency and Mobilization Features**

13.1 Identify the amount of storage space for explosives or munitions surplus to the planned need, expressed in square feet (SF) at your facility. (Note: For contingency and mobilization purposes, storage space includes revetments, railcars, barges, explosive holding yards, explosive anchorages and barricaded railroad sidyard.) Provide data for each category.

Table 13.1R: Contingency/Mobilization Storage

TABLE REVISED 27 OCT 1994

| Category of Space          | Total SF | # of Units | Comment |
|----------------------------|----------|------------|---------|
| Revetments                 | 0        | 0          |         |
| Railcars                   | 0        | 0          |         |
| Barges                     | 0        | 0          |         |
| Explosive Holding Yards    | 129,870  | 6          | (R)     |
| Explosive Anchorages       | *        | 3          |         |
| Barricaded Railroad Siding | 0        | 0          |         |
| Other (specify)            | 0        | 0          |         |
|                            |          |            |         |

NOTE: 73,470 SF OF THE TOTAL SHOWN FOR EXPLOSIVE HOLDING YARDS TO BE CONSTRUCTED BY ARMY FUNDED P-205 (\$1.4M) TO CONSTRUCT CONTAINER HOLDING YARDS IN FY95. NO UNITS ARE EXCESS TO PLANNED NEEDS. (R)

13.2 What is the fraction and square footage of your excess to the total storage space that is or will be available at each location with the completion of the MILCON projects that have been awarded but are yet to be completed.

Fraction Excess = 0

Amount Excess = 0

- Explosive anchorages at NOCPACDIV Port Hadlock are categorized in N.E.W. not square feet. The three (3) explosive anchorages are designed to moor YCs or YFNs that store ammunition. N.E.W. at Port Hadlock are two (2) each at 200,000 lbs Class 1.1 and one (1) each at 125,000 lbs Class 1.1.

31R 10/27/94

## Strategic Concerns

**13. Contingency and Mobilization Features**

13.1 Identify the amount of storage space for explosives or munitions surplus to the planned need, expressed in square feet (SF) at your facility. (Note: For contingency and mobilization purposes, storage space includes revetments, railcars, barges, explosive holding yards, explosive anchorages and barricaded railroad sidyard.) Provide data for each category.

Table 13.1: **Contingency/Mobilization Storage**

| Category of Space          | Total SF | # of Units | Comment |
|----------------------------|----------|------------|---------|
| Revetments                 | 0        | 0          |         |
| Railcars                   | 0        | 0          |         |
| Barges                     | 0        | 0          |         |
| Explosive Holding Yards    | 56400    | 4          |         |
| Explosive Anchorages       | *        | 3          |         |
| Barricaded Railroad Siding | 0        | 0          |         |
| Other (specify)            | 0        | 0          |         |
|                            |          |            |         |

13.2 What is the fraction and square footage of your excess to the total storage space that is or will be available at each location with the completion of the MILCON projects that have been awarded but are yet to be completed.

Fraction Excess = 0  
Amount Excess = 0

\* Explosive anchorages at NOCPACDIV Port Hadlock are categorized in N.E.W. not square feet. The three (3) explosive anchorages are designed to moor YCs or YFNs that store ammunition. N.E.W. at Port Hadlock are two (2) each at 200,000 lbs Class 1.1 and one (1) each at 125,000 lbs Class 1.1.

**13. Contingency and Mobilization Features, continued**

13.3 What ship berthing by general class, may be available for naval ship berthing during holiday surge periods? Address available berthing for the CVN, SSBN, CG-52, LPD, and FFG classes, as a minimum. State answers in terms of the number of ships that can be berthed without nesting. Information is only desired on ship berthing, that, if used for holiday surge berthing, will not interfere with ongoing or planned logistic loadouts or downloading. Also indicate the largest ship possible that can be berthed at each pier and wharf.

CVN is largest ship that can be berthed at the Ammunition Pier. Any other class of ship can be berthed at the same time without nesting. Ships of CG, LPD, and FFG Classes may be berthed. SSBN Class may be and have been berthed for a capability test in 1992.

13.4 Identify any HERO restrictions for operating radars and other sensors of Navy ships at your ordnance piers. Also identify any hot work restrictions or inhibitions against berthing POL or other ships with empty fuel tanks that are not gas-free.

We prohibit use of HF Radio (2 - 32 Megahertz) and track and fire control radars on berthed ships while handling ordnance. We do not permit hot work to be performed without gas free certification.

## Strategic Concerns

**14. Natural Inhibitors of Operations**

14.1 Identify the percent of the planned work schedule at your facility for the period FY 1990-1993 (averaged by month) interrupted by local weather or climatic conditions (i.e., how many man-years are lost annually by month because of: thunder storm, hurricane, tornado, blizzard, below freezing conditions, earthquake or other performance-impinging natural condition?).

Table 14.1.a: Impact on Operations

(R\*)

|                                      | January             | February           | March | April | May | June |
|--------------------------------------|---------------------|--------------------|-------|-------|-----|------|
| Average %<br>Schedule<br>Interrupted | 1.2 ICE &<br>STORMS | 1.2 ICE &<br>STORM | 0     | 0     | 0   | 0    |

Table 14.1.b: Impact on Operations

|                                      | July | August | September | October | November     | December     |
|--------------------------------------|------|--------|-----------|---------|--------------|--------------|
| Average %<br>Schedule<br>Interrupted | 0    | 0      | 0         | 0       | 1.2<br>STORM | 1.2<br>STORM |

\* ADDED CAUSE OF INTERRUPTION

## Environment and Encroachment

**15. Environmental Considerations****15.1** Identify all environmental restrictions to expansion at your activity.

Port Hadlock has 1085 acres of forested/undeveloped land. Approximately 713 acres would have construction restrictions or timing constraints, currently. These "environmental restrictions: would include threatened species management areas, wetlands, Heron Rookeries, and Installation Restoration Sites.

**15.2** Describe the undeveloped acreage or waterfront that is unique to the station or facility. Include any acreage that is suitable for industrial development.

The undeveloped acreage is in its natural forested state. Firewood gathering of dead and downed trees is allowed to reduce the fire hazard. A varied population of wildlife, including deer, coyotes, racoons, squirrels, chipmunks and numerous birds inhabit the forest and are routinely seen along roadways, lawns and cleared areas. The facility is an Island connected to the Olympic Peninsula to the west by a bridge over a narrow reach of water between two bays at the southwest end; it is connected to another Island to the east by a built-up roadway over a tidal flat. Except for the ammo pier at the northwest end, an old abandoned pier, small boat pier and filled industrial area on the west center of the Island, the shoreline is undeveloped and supports a substantial natural population of several species of clams and an introduced population of oysters. Of the 1,085 undeveloped acres 372 are considered to be without development constraints. The remaining 713 acres may have operational/man caused restraints (i.e., HERO, HERF, HERP, ESQD, AICUZ, etc.). Possibly the western portion of the Island would be suitable for development with timing restrictions for construction, NEPA compliance, and appropriate permitting.

**15.3** Identify any specific facilities, programs, or capabilities in regard to the handling and disposal of hazardous materials / waste at your activity.

TSD Facility 325 sq. ft., Interim status permitted. FY 95 undergoing closure of TSD <90 day facility 2,496 sq. ft. constructed in Fy 94, conforming storage. HM Storage totals 1450 sq. ft. located within three separate facilities. HM Tracking System integrated with HW Tracking System using Oracle Data Base. HMC&M Program/HMIS/Enflex Environmental Law CD Rom Library

**16. Encroachment Considerations**

16.1 Identify any ground, industrial noise, approach channel, waterway, harbor, bridge height, turning basin, Explosive Quantity Distance Standard (ESQD), HERO, and airspace encroachments of record at your activity.

Table 16.1: **Encroachments of Record**

| Encroachment | Date Recorded | Current Status |
|--------------|---------------|----------------|
| NONE         | NONE          | NONE           |

CR

**17. Military Housing - Family Housing, continued**

17.4R Complete the following table for the military housing waiting list. Report Number on list as of 31 March 1994.

MILITARY HOUSING IS MANAGED BY SUBASE BANGOR. Assets are fourteen housing units: One 4 bedroom, 6 three bedroom and 7 two bedroom units. All units are normally occupied by activity military. No activity personnel are on waiting list. Revised 9/23/94 *(R)*

Table 17.4: Military Housing Waiting List

| Pay Grade   | Number of Bedrooms | Number on List | Average Wait |
|-------------|--------------------|----------------|--------------|
| O-6/7/8/9   | 1                  |                |              |

\* ADDED "N/A" - "0" IN BLANKS

17.3 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information.

- Facility type/code:
- What makes it inadequate?
- What use is being made of the facility?
- What is the cost to upgrade the facility to substandard?
- What other use could be made of the facility and at what cost?
- Current improvement plans and programmed funding:
- Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**17. Military Housing - Family Housing, continued**

17.4 Complete the following table for the military housing waiting list. Report Number on list as of 31 March 1994.

MILITARY HOUSING IS MANAGED BY SUBASE BANGOR. THEY ARE RESPONDING TO A SEPARATE BRAC DATA CALL. THEY WILL PROVIDE THE INFORMATION FOR THE TABLE BELOW.

Table 17.4: **Military Housing Waiting List**

| Pay Grade   | Number of Bedrooms | Number on List | Average Wait |
|-------------|--------------------|----------------|--------------|
| O-6/7/8/9   | 1                  |                |              |

| 4  | QUALITY OF LIFE IN THE NEIGHBORHOOD IS OUTSTANDING   |
| 5  | RECREATIONAL FACILITIES FOR CHILDREN ARE OUTSTANDING |

17.6 What percent of your family housing units have all the amenities required by "The Facility Planning & Design Guide" (Military Handbook 1190 & Military Handbook 1035-Family Housing)?

100 %

17.7 Provide the utilization rate for family housing for FY 1993.

Table 17.7: **Family Housing Utilization**

(CR)

| Type of Quarters | Utilization Rate (%) |
|------------------|----------------------|
| Adequate         | 97%                  |
| Substandard      | 0                    |
| Inadequate       | 0                    |

17.8 As of 31 March 1994, have you experienced much of a change since FY 1993? If so, why? If occupancy is under 98% ( or vacancy over 2%), is there a reason? YES, DIFFICULTY IN ASSIGNING TWO BEDROOM UNITS

## Quality of Life

**18. Military Housing - Bachelor Quarters**

18.1 Provide the utilization rate for Bachelor Enlisted Quarters (BEQs) for FY 1993.

Table 18.1: BEQ Utilization

(( R \*

| Type of Quarters | Utilization Rate |
|------------------|------------------|
| Adequate         | 0                |
| Substandard      | 0                |
| Inadequate       | 70%              |

\* ADDED "0" IN BLANKS

18.2 As of 31 March 1994, have you experienced much of a change since FY 1993? If so, why? If occupancy is under 95% (or vacancy over 5%), is there a reason?

YES, DUE TO THE INCREASE IN NUMBER OF FEMALES ASSIGNED. MANNING DOCUMENTS REFLECT 35 TOTAL PERSONNEL.

18.3 Calculate the Average on Board (AOB) for Geographic Bachelors (GB) as follows:

$$\text{AOB} = \frac{(\# \text{ GB}) \times (\text{average \# of days in barracks})}{365}$$

AOB = 1.0

18.4 Indicate in the following chart the percentage of Geographic Bachelors (GB) by category of reasons for family separation. Provide comments as necessary.

Table 18.4: Reasons for Geographic Separation (BEQ)

(( R \*

| Reason for Separation from Family                        | Number of GB | Percent of GB | Comments   |
|--|--------------|---------------|------------|
| Family Commitments (children in school, financial, etc.) | 0            | 0             |            |
| Spouse Employment (non-military)                         | 0            | 0             |            |
| Other  | 1            | 100%          | SEPARATION |
| TOTAL  | 1            | 100%          |            |

\* ADDED "0S"

18.5 How many enlisted Geographic Bachelors (GB) do not live on base?

# GB Off-Base = 0

**18. Military Housing - Bachelor Quarters, continued:**

18.6 Provide the utilization rate for Bachelor Officers Quarters (BOQs) for FY 1993.

Table 18.6: **BOQ Utilization**

| Type of Quarters | Utilization Rate |
|------------------|------------------|
| Adequate         | N/A              |
| Substandard      | N/A              |
| Inadequate       | N/A              |

18.7 As of 31 March 1994, have you experienced much of a change since FY 1993? If so, why? If occupancy is under 95% (or vacancy over 5%), is there a reason?

N/A

18.8 Calculate the Average on Board (AOB) for Geographic Bachelors as follows:

$$\text{AOB} = \frac{\text{\# GB} \times \text{average \# days in barracks}}{365}$$

AOB = 0

N/A

18.9 Indicate in the following chart the percentage of Geographic Bachelors by category of reasons for family separation. Provide comments as necessary.

Table 18.9: **Reasons for Geographic Separation (BOQ)**

(R\*)

| Reason for Separation from Family                        | Number of GB | Percent of GB | Comments |
|--|--------------|---------------|----------|
| Family Commitments (children in school, financial, etc.) | 0            | 0             |          |

19.2 Is your library part of a regional interlibrary loan program? NO

## Quality of Life

**20. Base Family Support Facilities and Programs**

20.1 Complete the following table on the availability of child care in a child care center on your base.

Table 20.1: Child Care Availability

((R) \*

| Age Category | Capacity<br>(# of<br>Children) | SF       |             |            | Number<br>on Wait<br>List | Average<br>Wait<br>(Days) |
|--------------|--------------------------------|----------|-------------|------------|---------------------------|---------------------------|
|              |                                | Adequate | Substandard | Inadequate |                           |                           |
| 0-6 Months   | N/A                            | N/A      | N/A         | N/A        | N/A                       | N/A                       |
| 6-12 Months  | N/A                            | N/A      | N/A         | N/A        | N/A                       | N/A                       |
| 12-24 Months | N/A                            | N/A      | N/A         | N/A        | N/A                       | N/A                       |
| 24-36 Months | N/A                            | N/A      | N/A         | N/A        | N/A                       | N/A                       |
| 3-5 Years    | N/A                            | N/A      | N/A         | N/A        | N/A                       | N/A                       |

\* ADDED "N/A" ALL BLOCKS

20.2 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means." For all the categories above where inadequate facilities are identified provide the following information: N/A

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**20. Base Family Support Facilities and Programs, continued**

20.3 If you have a waiting list, describe what programs or facilities, other than those sponsored by your command, are available to accommodate those on the list.

N/A

20.4 How many "certified home care providers" are registered at your base?

# = 0 CR

20.5 Are there other military child care facilities within 30 minutes of the base? No  
State owner and capacity (e.g. 60 children, 0-5 years).

**20. Base Family Support Facilities and Programs, continued**

20.6 Complete the following table for services available on your base. If you have any services not listed, include them at the bottom.

Table 20.6: **Available Services**

| Service                  | Unit of Measure | Quantity |
|--------------------------|-----------------|----------|
| Exchange                 | SF              | 2790     |
| Gas Station              | SF              | 0        |
| Auto Repair              | SF              | 0        |
| Auto Parts Store         | SF              | 0        |
| Commissary               | SF              | 0        |
| Mini-Mart 60 X 36        | SF              | 0        |
| Package Store            | SF              | 0        |
| Fast Food Restaurants    | Each            | 0        |
| Bank/Credit Union        | Each            | 0        |
| Family Service Center    | SF              | 0        |
| Laundromat               | SF              | 0        |
| Dry Cleaners             | Each            | 0        |
| ARC                      | PN              | 0        |
| Chapel                   | PN              | 0        |
| FSC Classroom/Auditorium | PN              | 0        |
|                          |                 |          |

**21. Metropolitan Areas**

21.1 Identify proximate major metropolitan areas closest to your base (provide at least three):

Table 21.1: **Proximate Metropolitan Areas**

| City      | Distance (Miles) |
|-----------|------------------|
| Seattle   | 47               |
| Bremerton | 43               |
| Tacoma    | 60               |

## Quality of Life

**22. VHA Rates**

22.1 Identify the Standard Rate VHA Data for Cost of Living in your area:

Table 22.1: **VHA Rates**

## Quality of Life

**23. Off-base Housing Rental and Purchase**

23.1 Fill in the following table for average rental costs in the area for the period 1 April 1993 through 31 March 1994.

Table 23.1: Recent Rental Rates

| Type of Rental                  | Average Monthly Rent |            | Average Monthly Utilities Cost<br>Electrical/Heat,<br>Water/Sewer/Garbage |
|---------------------------------|----------------------|------------|---|
|                                 | Annual High          | Annual Low |   |
| Efficiency                      | 350.00               | 300.00     | 60.00   |
| Apartment (1-2 Bedroom)         | 450.00               | 400.00     | 120.00  |
| Apartment (3+ Bedroom)          | 800.00               | 700.00     | 120.00  |
| Single Family Home (3 Bedroom)  | 700.00               | 650.00     | 150.00  |
| Single Family Home (4+ Bedroom) | 800.00               | 700.00     | 150.00  |
| Town House (2 Bedroom)          | 750.00               | 650.00     | 120.00  |
| Town House (3+ Bedroom)         | 800.00               | 700.00     | 140.00  |
| Condominium (2 Bedroom)         | 750.00               | 650.00     | 120.00  |
| Condominium (3+ Bedroom)        | 800.00               | 700.00     | 140.00  |

23.2 What was the rental occupancy rate in the community as of 31 March 1994?

Table 23.2: Rental Occupancy Rate

| Type Rental                     | Occupancy Rate (%) |
|---------------------------------|--------------------|
| Efficiency                      | 95%                |
| Apartment (1-2 Bedroom)         | 94%                |
| Apartment (3+ Bedroom)          | 95%                |
| Single Family Home (3 Bedroom)  | 93%                |
| Single Family Home (4+ Bedroom) | 96%                |
| Town House (2 Bedroom)          | 95%                |
| Town House (3+ Bedroom)         | 95%                |
| Condominium (2 Bedroom)         | 94%                |
| Condominium (3+ Bedroom)        | 94%                |

**23. Off-base Housing Rental and Purchase, continued**

23.3 What are the median costs for homes in the area?

Table 23.3: Regional Home Costs

| Type of Home                    | Median Cost |
|---------------------------------|-------------|
| Single Family Home (3 Bedroom)  | \$130,000   |
| Single Family Home (4+ Bedroom) | \$145,000   |
| Town House (2 Bedroom)          | \$125,000   |
| Town House (3+ Bedroom)         | \$140,000   |
| Condominium (2 Bedroom)         | \$125,000   |
| Condominium (3+ Bedroom)        | \$140,000   |

23.4 For calendar year 1993, from the local MLS listings, provide the number of 2, 3, and 4 bedroom homes available for purchase. Use only homes for which monthly payments would be within 90 to 110 percent of the E5 BAQ and VHA for your area.

Table 23.4: Housing Availability

| Month     | Number of Bedrooms |   |    |
|-----------|--------------------|---|----|
|           | 2                  | 3 | 4+ |
| January   | 5                  | 2 | 0  |
| February  | 4                  | 3 | 0  |
| March     | 4                  | 2 | 0  |
| April     | 7                  | 5 | 0  |
| May       | 6                  | 5 | 0  |
| June      | 5                  | 4 | 0  |
| July      | 5                  | 3 | 0  |
| August    | 6                  | 3 | 1  |
| September | 5                  | 1 | 1  |
| October   | 4                  | 1 | 0  |
| November  | 4                  | 3 | 0  |
| December  | 4                  | 3 | 0  |

23.5 Describe the principle housing cost drivers in your local area.

ACTIVITY: N32013

The principle housing cost driver in our area is the attractiveness of the area to retired persons relocating from urban and suburban communities within and outside the state.

## Quality of Life

**24. Sea-Shore Opportunities**

24.1 For the top five sea intensive ratings in the principle warfare community your base supports, provide the following:

Table 24.1: **Sea Shore Opportunities**

| Rating | # Sea Billets in Local Area | # Shore Billets in Local Area |
|--------|-----------------------------|-------------------------------|
| BM     | 0                           | 3                             |
| EM     | 0                           | 2                             |
| EW     | 0                           | 0                             |
| IC     | 0                           | 0                             |
| OS     | 0                           | 0                             |

**25. Commuting Distances**

25.1 Complete the following table for the average one-way commute for the five largest concentrations of military and civilian personnel living off-base.

Table 25.1: **Commuting Distances**

| Location      | % Employees | Distance (mi) | Time (min) |
|---------------|-------------|---------------|------------|
| Port Hadlock  | 40%         | 6 Miles       | 10 Minutes |
| Port Townsend | 24%         | 12 Miles      | 20 Minutes |
| Chimacum      | 5%          | 6 Miles       | 10 Minutes |
| Bremerton     | 4%          | 45 Miles      | 1 Hour     |
| Port Ludlow   | 3%          | 9 Miles       | 15 Minutes |

## Quality of Life

**26. Regional Educational Opportunities**

Complete the tables below to indicate the civilian educational opportunities available to service members stationed at your activity (to include any outlying fields) and their dependents:

26.1 List the local educational institutions which offer programs available to dependent children. Indicate the school type (e.g. DoDDS, private, public, parochial, etc.), grade level (e.g. pre-school, primary, secondary, etc.), what students with special needs the institution is equipped to handle, cost of enrollment, and for high schools only, the average SAT/ACT score of the class that graduated in 1993 and the number of students in that class who enrolled in college in the fall of 1994.

Table 26.1R: Educational Opportunities Revised 9/23/94 *(R)*

| Institution                    | Type      | Grade Level(s) | Special Education Available | Annual Enrollment Cost/Student | SAT/ACT Score | % HS to College | Source of Info |
|--------------------------------|-----------|----------------|-----------------------------|--------------------------------|---------------|-----------------|----------------|
| Chimacum High School           | Public    | 1-12           | Yes                         | 0                              | 898.5         | 48%             | Ed Serra       |

**28. Medical / Dental Care**

28.1 Do your active duty personnel have any difficulty with access to medical or dental care, in either the military or civilian health care system? Develop the why of your response.

Yes.

- 1) Military Active Duty pregnancies are required to be Temporary Assigned Duty to the other side of the Hood Canal Bridge.
- 2) Transit time is greater than one hour one way for Military Health Care at Bremerton Navy Hospital, a distance of fifty miles.

28.2 Do your military dependents have any difficulty with access to medical or dental care, in either the military or civilian health care system? Develop the why of your response.

Yes.

- 1) Transit time is greater than one hour one way for Military Health Care at Bremerton Navy Hospital, a distance of fifty miles.
- 2) Limited Champus opportunities in the Port Hadlock area.

## Quality of Life

**29. Crime Rate**

29.1 Complete the table below to indicate the crime rate for your activity for the last three fiscal years. The source for case category definitions to be used in responding to this question are found in the NCIS Manual, dated 23 February 1989, at Appendix A, entitled "Case Category Definitions." Note: the crimes reported in this table should *include* (a) all reported criminal activity which occurred on base regardless of whether the subject or the victim of that activity was assigned to or worked at the base; *and* (b) all reported criminal activity off base. \*

Table 29.1.a: Local Crime Rate

(CR\*)

| Crime Definitions             | FY 1991 | FY 1992 | FY 1993 |
|-------------------------------|---------|---------|---------|
| 1. Arson (6A)                 | 0       | 0       | 0       |

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAG95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAG95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

## CLARIFICATION QUESTIONS FOR DATA CALL #46

### PORT HADLOCK DETACHMENT

1. Table 1.2 Fraction of Storage in Use. We have assumed no greater than 100% storage is feasible therefore did not indicate the 135% excess requirement of predicted FY 2001 Inventory over Maximum Stowage capability indicated by DC25 Table 2.2. We have used the same reasoning in the DC46 Table 1.1 report of FY 2001 storage, which uses the figure for calculated SF and tons of storage at maximum stowage capability. Fraction of storage for the ordnance categories of DC46 Table 1.2 was calculated based upon the Load Plan mix distributed among the various categories of magazines. The ratios of fractional storage for various categories of ordnance are complicated by the fact that appropriate magazine categories used to store them will vary as a fraction of total magazine space. For example, when in FY 2001 Threat tonnage will represent 83% within the table row of available missile storage, it only represents 21% taken as a fraction of total magazine square footage. Our DC25 Table 2.2 shows an excess inventory in FY 2001 of 3797 tons over maximum storage capability for LOE category ordnance currently stored in HE magazines.. In FY 2001, 5121 SF excess will be found for SP&P magazine storage which for a full accounting of total fraction of storage, barring compatibility and ESQD factors, might be considered for alternate use at the higher (more efficient space utilization for Box magazines) SF/TON storage factor of 11.5 SF/Ton found at our activity and satisfy 445 tons of the deficiency. 808 SF excess of storage capability will exist in FY 2001 in Fuze/Detonator magazines which could be converted to HE storage at the factor of 17.69 SF/Ton (less efficient storage in igloo magazines) and store an additional 46 tons. 8030 SF of excess missile magazine storage in FY 2001 could be converted for LOE storage at the 13SF/Ton conversion rate to account for an additional quantity of 617 Tons. The net deficiency in FY 2001 is 2689 Tons of LOE category ordnance.

2. Table 14.1 DC25 MRP expense information for the years FY 1986-1988 is not available. During that time this activity was an annex of NAVUNSEAWARCEN Keyport. Budget requirements were not broken out for the separate annexes and we have been told records are not available.

BRAC-95 CERTIFICATION

TABLE 13.1 DC #46

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**Notes:** In the context of this Data Call

1. Base your responses for FY 1994 and previous years on executed workload, and for FY 1995 and subsequent years on workload as programmed in the FY 1995 Budget Submission and POM-96. Unless otherwise specified, use workload mixes as programmed. In estimating projected workload capabilities, use the activity configuration as of completion of the BRAC-88/91/93 actions.
2. Unless otherwise specified, for questions addressing maximum workload within this Data Call, base your response on an eight hour day/five day notional work week (1-8-5). Please identify any processes which, under normal operations, operate on a different schedule. Also, identify your "40 hour" work week schedule, if different from "1-8-5".
3. "Production" equates to the number of items processed per Fiscal Year (FY), unless otherwise specified. Report Direct Labor Man Hours (DLMHs) in thousands of Man Hours, to the nearest tenth, e.g. 32.2 K DLMHs.
4. For purposes of this Data Call, Depot maintenance is regarded as the maintenance performed on material that requires major overhaul or a complete rebuild of parts, assemblies, subassemblies, and end items, including the manufacture of parts, modifications, testing, and reclamation, as required. Depot maintenance serves to support lower categories of maintenance. Depot maintenance provides stocks of serviceable equipment by using more extensive facilities for repair than are available in lower level maintenance activities. Depot or indirect maintenance functions are identified by the type of equipment maintained or repaired.
5. Report all workload performed, clearly identifying origin of all non-DON workload.
6. Mission area work (as defined in sections 1 through 7) performed by tenant activities (e.g. MOMAG) should be reported in separate, duplicate tables in the applicable sections.

**If any responses are classified, so annotate the applicable question and include those responses in a separate classified annex.**

This document has been prepared in WordPerfect 5.1/5.2.

**Note:** The Box below breaks out Defense Department Depot Maintenance and Industrial activities by Commodity Groups for further assessment. The highlighted items have been incorporated into this Data Call. If your activity performs depot work in any other area, please include such workload and so annotate your Data Call response.

## Commodity Groups List

1. Aircraft Airframes:
  - Rotary
  - VSTOL
  - Fixed Wing
    - Transport / Tanker / Bomber /
    - Command and Control
    - Light Combat
    - Admin / Training
  - Other
2. Aircraft Components
  - Dynamic Components
  - Aircraft Structures
  - Hydraulic/Pneumatic
  - Instruments
  - Landing Gear
  - Aviation Ordnance
  - Avionics/Electronics
  - APUs
  - Other
3. Engines (Gas Turbine)
  - Aircraft
  - Ship
  - Tank
  - Blades / Vanes (Type 2)
4. **Missiles and Missile Components**
  - Strategic
  - Tactical / MLRS
5. Amphibians
  - Vehicles
  - Components (less GTE)
6. Ground Combat Vehicles
  - Self-propelled
  - Tanks
  - Towed Combat Vehicles
  - Components (less GTE)
7. Ground and Shipboard Communications and Electronic Equipment
  - Radar
  - Radio Communications
  - Wire Communications
  - Electronic Warfare
  - Navigational Aids
  - Electro-Optics / Night Vision
  - Satellite Control / Space Sensors
8. Automotive / Construction Equipment
9. Tactical Vehicles
  - Tactical Automotive Vehicles
  - Components
10. **Ground General Purpose Items**
  - Ground Support Eqpmt (except aircraft)**
  - Small Arms / Personal Weapons**
  - Munitions / Ordnance**
  - Ground Generators
  - Other

(R) TABLE REVISED JUNE 17, 1994

NOTE:

(\*) = ASSUMES NAVORDCEN IMPLEMENTS OVERSIGHT AUTHORITY FY 96

**2. Stowage**

2.1 Identify by units of weapon type the quantity of all weapons which can be presently stored at your facility and the maximum storage capability through FY 2001. In determining maximum capability assume (a) the current projected total workload and mix remains as assigned; (b) maximum personnel and equipment support are available; and (c) facility additions are limited to that MILCON already programmed. In distributing the overall ordnance stowage, choose the best configuration based on type of facilities available and predicted requirements.

Table 2.1: **Present and Predicted Stowage Capability**

| Ammunition / Ordnance<br>Commodity Type | Present Stowage Capability | Maximum Stowage Capability |
|---|----------------------------|----------------------------|
| Mines                                   | 1200                       | 1200                       |

NOTE: PROGRAMMED MILCON P-298T WILL EXPAND PRESENT TO MAXIMUM STOWAGE QUANTITIES SHOWN. TORPEDO WORKLOAD ASSUMES NAVORDCEN OVERSIGHT IN FY96. TORPEDO STORAGE IS ASSUMMED TO REMAIN AT ASSETS CURRENTLY OWNED BY NUWC KEYPORT. WILL NOT AFFECT STORAGE CAPABILITY AT DET PH.

**2. Stowage, continued**

2.2 (R) Provide, by facility number, the present and predicted inventories and the maximum stowage capability in tons and square feet for each stowage facility (e.g. box, igloo) under your cognizance. Using the assumptions given in section 2.1 in predicting the outyear facility utilization, distribute your overall ordnance compliment to the most likely configuration. When listing storage by facility, group facilities by location (e.g. main base, outlying area, special area, detachment), and identify that location in the space provided. Present and Predicted Inventories' SF reports the square footage required by those inventories; Maximum Stowage SF values will indicate the total square footage available. Reproduce Table 2.2 as necessary. *If any non-DON inventory is held/programmed to be held, report that material separately from your DON stock.*

(R) TABLE REVISED JUNE 17, 1994

**2. Stowage, continued**

**2.3 (R)** In the table below, provide the basic characteristics of the stowage facilities under your cognizance. Identify the type of structure (e.g. box, igloo), its rated category, rated Net Explosive Weight (N.E.W.) and status of ESQD arc for each stowage facility listed above.

## 2. Stowage, continued

2.4(R) Provide details of your calculations and the assumptions made to determine the differences reported in Table 2.2. between present and maximum capability, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased stowage workload at this activity. Indicate by Fiscal Year (FY) when programmed MILCON will increase your stowage capability and by how much. Specify any factors that significantly inhibit this facility realizing its maximum storage capability (e.g. condition of storage facilities, personnel to maintain necessary operations, operating equipment, ESQD limits, environmental constraints, physical security, etc.). (R)

Tons and square footage of present inventory was derived by wall to wall audit of current magazine storage. All jam stows and aisle stows were identified and restowed in accordance with NAVSEAINST. 8024.2. Predicted inventory was derived using Load Plan High quantities of explosive storage provided by NAVSURFWARCEN. Crane. We made a planning assumption that the Load Plan High considers additional mission requirements associated with CVN and AOE homeporting initiatives in the Pacific Northwest. Magazine square foot was derived using NAFDB GSF. Maximum storage was derived by extending tons per square foot conversions derived from present storage for the total square footage of the four categories of magazines and includes the additional missile magazine space (21,732 GSF) to be constructed by BRACON P-298T, currently programmed for construction in 1994. There are no inhibitions that would significantly limit this facility achieving maximum storage capability.

(R) EXPLANATION OF METHODOLOGY REVISED JUNE 17, 1994 (R)

2.5 For each inhibiting item identified in question 2.4, assess a cost or impact of eliminating the inhibitor, the Fiscal Year (FY) in which such elimination would be completed, and the quantity increase in storage capability realized (express in terms of tons and square feet).

No inhibiting factors.

2.6 Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance stowage at this activity (AICUZ encroachment, pollutant discharge, etc.)? Development of ordnance stowage would be impacted by ESQD considerations and in some cases by threatened and endangered species primary and secondary nesting zones. Wetlands impacts may inhibit development in some areas. Currently no wetlands delineation has defined the extent of that limitation. No other environmental limitations are foreseen.

**Mission Area**

**3. Throughput**

3.1 Based on current programmed workload and mix, identify the current outload requirements for each commodity type of each munition stored at this facility, in each of the following operational scenarios. Provide Unit Throughput as available.

**Table 3.1.a: Over-The-Pier Throughput Requirements**

| Munitions Type    | Throughput Requirement (tons/day) |              |             |

**3. Throughput, continued NOTE: Table Revised 11/10/94**

**3.2R** Identify the throughput in Tons for your facility as rated, as required under the operational conditions specified, and as executed or programmed for requested Fiscal Years. In determining your maximum rated capability, assume: (a) the current projected total workload and mix remains as assigned; (b) maximum personnel and equipment support are available; and (c) facility additions are limited to that MILCON already programmed. In distributing the overall ordnance requirement, choose the best configuration based on type of facilities available and predicted requirements. In the space provided below Table 3.2.a, detail the basis for your calculations of your maximum rated capability. If the Fiscal Years sampled in Table 3.2.b do not reflect your highest and lowest levels of activity for the period FY 1986-2001, add those years in the space provided.

**Table 3.2.aR: Throughput in Tons/Per Day**

(R)  
(R)  
(R)

**BASIS OF CALCULATION TABLE 3.2.a:** All scenarios were calculated using single eight hour shifts. Personnel required: Maximum rated capability = x 34 ordnance handlers. Peacetime = x 23 RSSI Civilian personnel. Mobilization M+1 to M+14= x 23 RSSI Civilian + 27 Reserve. Sustainment M+15 to M+30= x 23 RSSI Civilian + 32 Reserve. Additional equipment required for Mobilization and Sustainment= 2 Additional mobile cranes to support total of 5 stations on the pier.

**3. Throughput, continued**

**3.2** Identify the throughput in Tons for your facility as rated, as required under the operational conditions specified, and as executed or programmed for requested Fiscal Years. In determining your maximum rated capability, assume: (a) the current projected total workload and mix remains as assigned; (b) maximum personnel and equipment support are available; and (c) facility additions are limited to that MILCON already programmed. In distributing the overall ordnance requirement, choose the best configuration based on type of facilities available and predicted requirements. In the space provided below Table 3.2.a, detail the basis for your calculations of your maximum rated capability. If the Fiscal Years sampled in Table 3.2.b do not reflect your highest and lowest levels of activity for the period FY 1986-2001, add those years in the space provided.

Table 3.2.a: **Throughput in Tons/Per Day**

\* ZEROS IN BLANKS - NO DATA CHANGE

*Handwritten marks*

**BASIS OF CALCULATION TABLE 3.2.a: Maximum rated capability at 1-8-5 shift.**  
**Peacetime= 1.93 short tons (ST) per M/H x 23 RSSI Civilian personnel.**  
**Mobilization M+1 to M+14= 1.93 ST per M/H x 23 RSSI Civilian + 27 Reserve**  
**Sustainment M+15 to M+30= 1.93 ST per M/H x 23 RSSI Civilian + 32 Reserve**  
**Additional equipment required for Mobilization and Sustainment= 2 Additional mobile cranes to support total of 5 stations on the pier.**  
**Maximum rated capability would be reached at sustainment level of operations.**

\*THROUGHPUT REPORTED IS NOT CUMULATIVE. TONS REPORTED ARE TOTALS THAT CAN BE THROUGHPUT FOR EACH CLASS OF SHIP.

\* ZEROS ADDED IN BLANKS - No Data Change

**3. Throughput, continued Note: Page Revised 08/01/94**

**3.5** Provide details of the calculations used to complete Tables 3.4, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased outload workload at this activity. SHIFT ASSUMPTION: 1-8-5.

1 CVN 500 tons per day = 54 personnel x 1.16 ST/HR Threat category of ordnance.

1 Combatant 200 tons per day = 32 personnel x .77 ST/HR Mixed Threat, Loe.

1 AOE 1000 tons per day = 65 personnel x 1.93 ST/HR LOE category of ordnance.

1 self provisioned Container Ship 5000 tons per day = 250 containers/day @ 40K lbs ea. 10.4 lifts/hr @ three stations. Container throughput constrained by lack of container crane and container handlers.

**3.6** Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform ordnance outloads? What other investments in the industrial infrastructure would you make to increase activity outload capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

A. A Mobile Gantry Container Crane - 6.5 Million Dollars Discounted for 30 years = \$2,122,900. Efficiency assumptions - Current capability is 10 container lifts per hour from each crane station of a self provisioned container ship. A pierside mobile crane can perform 25 lifts per hour from a single station which would eliminate two stations and 14 personnel. One 250 container evolution per year during peace time = 105 DLMH savings per year. Assume 250 containers per day sustained mobilization requirements for 120 days every 15 years = 12600 DLMH savings. Payback = Approximately 45 years.

B. An additional south access to the ammunition pier to relieve congestion and improve safety - \$1.2 Million discounted 30 years = \$391,920.

Increased capability and efficiency - 150 DLMH per multiple ship evolution X 10 evolutions/yr = \$83,460 annual savings. Payback = Approximately 5 years.

C. Two 50 ton container handlers are required to support container throughput in holding yards. Cost of \$170K each is programmed in FY95 Capital Purchase Program.

**3.7** Are there any ultimate and overriding limiting factors to expansion of this activity's outloading workload? If so, what are they? NONE

**3.8** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance outloading at this activity (AICUZ encroachment, pollutant discharge, etc.)?

The following factors may inhibit the development of additional Ordnance Outloading activities: Detachment Port Hadlock is allowed a total of 100,000 gallons of potable water, averaged over a month time frame, from our water supplier (Port Townsend Water Department). The increase in outloading will have an increase in water consumption associated with it due to the presence of the ships and additional personnel. Alternative water supplies would have to be developed by activated an existing well located at the activity.

The domestic sewage treatment system is allowed to discharge 36,000 gallons of treated effluent a day. The increase in ordnance outloading will increase the amount of domestic sewage requiring treatment. This increase in treatment requirements may overload the facilities current capabilities.

### 3. Throughput, continued

3.5 Provide details of the calculations used to complete Tables 3.4, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased outload workload at this activity.

SHIFT ASSUMPTIONS:

- 1 CV 500 tons per active day - One ten hour shift
- 1 AOE 1000 tons per active day - Two ten hour shifts
- 1 Combatant 80 tons per active day - One ten hour shift
- 1 Container Ship 5000 tons per active day - Two ten hour shifts

3.6 Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform ordnance outloads? What other investments in the industrial infrastructure would you make to increase activity outload capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

A Portal Crane for container loading - 6.5 Million Dollars

Efficiency assumptions - Current capability is 8 container lifts per hour, a Container Crane lifts 25 containers per hour. Two 680 container evolutions per year during peace time = 2320 DLMH savings per year. Assume 250 containers per day sustained mobilization requirements for 120 days every 15 years = 2520 DLMH savings. Payback = Approximately 34 years.

An additional south access to the ammunition pier to relieve congestion and improve safety - \$1.2 Million

Increased capability and efficiency - 150 DLMH per multiple ship evolution X 12 evolutions/yr = \$90,000 annual savings. Payback = Approximately 13 years excluding any costs avoidances due to increased safety factor.

3.7 Are there any ultimate and overriding limiting factors to expansion of this activity's outloading workload? If so, what are they? NONE

3.8 Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance outloading at this activity (AICUZ encroachment, pollutant discharge, etc.)?

The following factors may inhibit the development of additional Ordnance Outloading activities: Detachment Port Hadlock is allowed a total of 100,000 gallons of potable water, averaged over a month time frame, from our water supplier (Port Townsend Water Department). The increase in outloading will have an increase in water consumption associated with it due to the presence of the ships and additional personnel. Alternative water supplies would have to be developed by activated an existing well located at the activity.

Activity: N32013

The domestic sewage treatment system is allowed to discharge 36,000 gallons of treated effluent a day. The increase in ordnance outloading will increase the amount of domestic sewage requiring treatment. This increase in treatment requirements may overload the facilities current capabilities.

**Mission Area****4. Maintenance and Testing**

4.1 By units of ordnance type and by DLMHs, identify what maintenance and testing has been or is programmed to be performed at this location for the period requested. Report depot-level maintenance as a separate line from intermediate-level maintenance.

Table 4.1.a: **Historic and Predicted Maintenance and Testing Workload**

| Ordnance Type                    | Units Throughput |               |               |              |              |               |               |               |

**4. Maintenance and Testing, continued**

**4.2** Assuming (a) the current projected total workload remains as assigned; (b) that sufficient demand is available to justify maximum hiring, optimum procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which this activity could expand the maintenance and testing conducted, based on the current and future planned workload mixes? Please provide your response in the absolute number of units throughput and DLMHs that could be accomplished at this facility. Report depot-level maintenance as a separate line from intermediate maintenance.

Table 4.2.a: **Maximum Potential Maintenance and Testing Workload**

**4. Maintenance and Testing, continued**

**4.3** Provide details of the calculations used to complete Tables 4.2, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased maintenance and testing workload at this activity.

Information comes from funding documents, Ammunition Maintenance Progress Reporting System.

**4.4** Table 4.7, on the following page, may be used as a worksheet for the following questions. Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform maintenance and testing workload? What other investments in the industrial infrastructure would you make to increase maintenance and testing capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

Asset readiness posture indicates that maintenance/testing requirements will decrease. No further investments are predicted.

**4.5** Are there any ultimate and overriding limiting factors to expansion of this activity's maintenance and testing workload? If so, what are they?

None

**4.6** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance maintenance and testing at this activity (AICUZ encroachment, pollutant discharge, etc.)?

The major limiting factor that may inhibit the development of ordnance maintenance is the lack of a facility which is capable of handling Industrial Wastewater.

B3

**4. Maintenance and Testing, continued Table Revised 08/01/94**

**4.7** For all Maintenance and Testing identified in section 4.1, specify which items (by family of weapon) and the quantity (by number of units per year) you can maintain (e.g. Captor 50/yr, Phoenix 100/yr, etc.). Identify factors limiting your capability, the total cost to remove the limiting factor and the new rate that could be maintained.

**Table 4.7: Ordnance Maintenance and Testing Factors**

| Ordnance<br>(Type-Qty)     | Current<br>Rate | Limiting<br>Factors                        | Cost to<br>Remove<br>(\$K) | New Rate |
|----------------------------|-----------------|--|----------------------------|----------|
| Gun Ammo 5"/54<br>13000/yr | 144/day         | Additional remote<br>defuzing cells needed | \$175K                     | 288/day  |
|                            |                 |  |                            |          |
|                            |                 |  |                            |          |
|                            |                 |  |                            |          |
|                            |                 |  |                            |          |
|                            |                 |  |                            |          |
|                            |                 |  |                            |          |
|                            |                 |  |                            |          |
|                            |                 |  |                            |          |

**4. Maintenance and Testing, continued**

**4.7** For all Maintenance and Testing identified in section 4.1, specify which items (by family of weapon) and the quantity (by number of units per year) you can maintain (e.g. Captor 50/yr, Phoenix 100/yr, etc.). Identify factors limiting your capability, the total cost to remove the limiting factor and the new rate that could be maintained.

**Table 4.7: Ordnance Maintenance and Testing Factors**

| Ordnance<br>(Type-Qty) | Current<br>Rate | Limiting<br>Factors | Cost to<br>Remove<br>(\$K) | New Rate |
|------------------------|-----------------|---------------------|----------------------------|----------|
| N/A                    | N/A             | N/A                 | N/A                        | N/A      |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |

|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |

**4. Maintenance and Testing, continued**

**4.8** If the workload reported in section 4.1 is not the complete maintenance/testing package required by the munition, briefly describe what additional work is required, where the weapon must be sent to accomplish the work, and at what frequency the work must be done. Report depot-level maintenance as a separate line from intermediate maintenance.

**Table 4.8: Additional Ordnance Maintenance and Testing Requirements**

| Munitions Type | Additional Work Required | Location for Additional Work | Frequency of Additional Work |
|----------------|--------------------------|------------------------------|------------------------------|
| N/A            | N/A                      | N/A                          | N/A                          |
|                |                          |                              |                              |
|                |                          |                              |                              |
|                |                          |                              |                              |
|                |                          |                              |                              |
|                |                          |                              |                              |
|                |                          |                              |                              |

**4.9** For each additional maintenance or testing action listed in Table 4.8 above, identify if that workload could be performed at your activity. Briefly describe what modifications would be necessary to accomplish that workload at your activity, and the associated costs.

**4. Maintenance and Testing, continued**

*Questions 4.10-4.15 refer to Depot Maintenance workload performance only.*

**4.10** Given the current configuration and operation of your activity, provide the depot/industrial level maintenance by commodity group (from the Commodity List in the Notes at the beginning of this Data Call) that was executed in and is programmed for the Fiscal Years (FY) requested in units throughput and in Direct Labor Man Hours (DLMHs). Summarize ordnance commodity types serviced at this activity from the totals provided in Tables 4.1.a-d.

**Table 4.10.a: Historic and Predicted Depot/Industrial Workload**

| Commodity Type | Throughput (Units) |         |         |         |         |         |         |         |
|----------------|--------------------|---------|---------|---------|---------|---------|---------|---------|
|                | FY 1986            | FY 1987 | FY 1988 | FY 1989 | FY 1990 | FY 1991 | FY 1992 | FY 1993 |

**4. Maintenance and Testing, continued**

**4.11** For each commodity group type reported in Tables 4.10.a through 4.10.d, assume (a) the current projected total depot / industrial workload remains as assigned; (b) that sufficient production demand is available to justify maximum hiring, optimum (repeat order manufacturing lead times) procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which depot / industrial maintenance operations could be expanded at this activity, based on the current and future planned workload mixes, for the requested period? Please provide your response in both the absolute maximum number of units and DLMHs that could be processed at this activity by applicable commodity group. Summarize Ordnance from Table 4.2.a-b.

**Table 4.11.a: Maximum Potential Depot/Industrial Workload**

**4. Maintenance and Testing, continued**

**4.12** Provide details of your calculations in Tables 4.11.a-b including assumptions on additional space utilized, major equipment required, production rates, and constraints that limit increased workload by commodity group at this activity.

N/A

**4.13** Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform workload in each of the applicable commodity groups? Describe quantitatively how the changes above would increase your activity's depot/industrial level maintenance capabilities. What would the associated costs be? What would be the payback period and return on investment?

N/A

**4.14** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of depot/industrial level workload and this activity (AICUZ encroachment, pollutant discharge, etc.)?

N/A

**4. Maintenance and Testing, continued**

**4.15 Workload Summary.** Enter the information from the Predicted and Potential Workload sections of Tables 4.10 and 4.11 into the table below and calculate the variance between projected and potential workloads. Again, clearly identify each commodity and include all commodities serviced at this activity.

**Table 4.15.a: PREDICTED WORKLOAD VARIANCE FOR FY 1995**

| <i>FY 1995</i><br>Commodity Type | Product (units)    |                    |          | DLMHs              |                    |          |

**5. Manufacturing Workload, continued**

**5.2** Assuming (a) the current projected total workload and mix remains as assigned; (b) that sufficient demand is available to justify maximum hiring, optimum procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which this activity could expand the manufacturing conducted, based on the current and future planned workload mixes?

Please provide your response in the absolute number of units throughput and DLMHs that could be accomplished at this facility. Report depot-level maintenance as a separate line from intermediate and below level maintenance.

Table 5.2.a: **Maximum Potential Manufacturing Workload**

| Ordnance Type                    | Units Throughput |            |            |            |            |            |            |
|----------------------------------|------------------|------------|------------|------------|------------|------------|------------|

| Other (specify)                  |         |         |         |         |         |         |         |

## **5. Manufacturing Workload, continued**

**5.3** Provide details of the calculations used to complete Tables 5.2, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased manufacturing workload at this activity.

None currently performed or predicted to be performed.

**5.4** Table 5.7, on following page, may be used as a worksheet for the following questions. Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform manufacturing workload? What other investments in the industrial infrastructure would you make to increase manufacturing capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

No investment in manufacturing capability is anticipated.

**5.5** Are there any ultimate and overriding limiting factors to expansion of this activity's manufacturing workload? If so, what are they?

Manufacturing workload is currently and principally a single manager function.

**5.6** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance manufacturing at this activity (AICUZ encroachment, pollutant discharge, etc.)? The major limiting factor that may inhibit the development of ordnance manufacturing is the lack of a facility which is capable of handling Industrial Wastewater.

## **5. Manufacturing Workload, continued**

**5.7** For each weapons manufacturing capability included in section 5.1 above, identify by type of weapon (Captor, Harpoon, Tomahawk, etc.) the production rate per year, and what factors limit that rate, the cost to eliminate those limiting factors, and what increased workload would be realized at that cost. In the space below the Table, please briefly describe the actions, and associated costs, necessary to improve your production rates.

**Table 5.7: Manufacturing Production Factors**

| Ordnance Type | Current Production Rate | Limiting Factor | Cost to Remove (\$ K) | New Production Rate |
|---------------|-------------------------|-----------------|-----------------------|---------------------|
| N/A           | N/A                     | N/A             | N/A                   | N/A                 |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |

**6. In-Service Engineering Workload, continued**

**6.2** Assuming (a) the current projected total workload remains as assigned; (b) that sufficient demand is available to justify maximum hiring, optimum procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which this activity could expand the in-service engineering conducted, based on the current and future planned workload mixes? Please provide your response in the absolute number of DLMHs that could be accomplished at this facility. Report depot-level maintenance as a separate line from intermediate and below level maintenance.

Table 6.2: **Maximum Potential In-Service Engineering Workload**

| Ordnance Type                    | Workload (DLMHs) |         |         |         |         |         |         |
|----------------------------------|------------------|---------|---------|---------|---------|---------|---------|
|                                  | FY 1995          | FY 1996 | FY 1997 | FY 1998 | FY 1999 | FY 2000 | FY 2001 |
| Mines                            | N/A              | N/A     | N/A     | N/A     | N/A     | N/A     | N/A     |

| Ordnance Type   | Workload (DLMHs) |  |  |  |  |  |  |
|-----------------|------------------|--|--|--|--|--|--|
| Other (specify) |                  |  |  |  |  |  |  |

**6. In-Service Engineering Workload, continued**

**6.3** Provide details of the calculations used to complete Table 6.2, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased in-service engineering workload at this activity.

None historically or currently performed. None anticipated to be performed.

**6.4** Table 6.7, on following page, may be used as a worksheet for the following questions. Given a environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add delete, or modify) to increase your activity's capability to perform in-service engineering workload? What other investments in the industrial infrastructure would you make to increase in-service engineering capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would th associated costs be? What would be the payback period and return on investment?

N/A

**6.5** Are there any ultimate and overriding limiting factors to expansion of this activity's in-service engineering workload? If so, what are they?

N/A

**6.6** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development o ordnance in-service engineering at this activity (AICUZ encroachment, pollutant discharge, etc.)?

There are no limiting factors which would inhibit the development of Ordnance In-Service Engineering.

**6. In-Service Engineering Workload, continued**

6.7 For each ordnance in-service engineering capability included in section 6.1 above, identify by type of weapon (Captor, Harpoon, Tomahawk, etc.), the rate that type receives this support per year, what factors limit that rate, the cost to eliminate those limiting factors, and what increased workload would be realized at that cost.

**Table 6.7: In-Service Engineering Factors**

| Ordnance Type | Current Servicing Rate | Limiting Factor | Cost to Remove (\$ K) | New Servicing Rate |
|---------------|------------------------|-----------------|-----------------------|--------------------|
| N/A           | N/A                    | N/A             | N/A                   | N/A                |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |

**Mission Area**

**7. Technical Support**

**7.1** Identify the workload executed in or programmed to be accomplished in ordnance Technical Support for the period requested. Do not include In-Service Engineering in the workload reported below. Complete Table 7.1.a-b using the product mix as executed and programmed to be executed.

**Table 7.1.a: Historic and Predicted Technical Support**

| Program Element                  | Throughput (DLMHs) |         |         |         |         |         |         |         |

**7. Technical Support, continued**

**7.2** Assuming (a) the current projected total workload remains as assigned; (b) that sufficient demand is available to justify maximum hiring, optimum procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which this activity could expand the technical support conducted, based on the current and future planned workload mixes? Please provide your response in the absolute number of DLMHs that could be accomplished at this facility. Report depot-level maintenance as a separate line from intermediate and below level maintenance.

**Table 7.2: Maximum Potential Technical Support**

| Program Element                  | DLMHs   |         |         |         |         |         |         |
|----------------------------------|---------|---------|---------|---------|---------|---------|---------|

**7. Technical Support, continued**

**7.3** Provide details of the calculations used to complete Table 7.2, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased technical support workload at this activity.

None historically or currently performed. None anticipated to be performed.

**7.4** Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform technical support workload? What other investments in the industrial infrastructure would you make to increase technical support capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

N/A

**7.5** Are there any ultimate and overriding limiting factors to expansion of this activity's technical support workload? If so, what are they?

N/A

**7.6** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance technical support at this activity (AICUZ encroachment, pollutant discharge, etc.)?  
There are no limiting factors which would inhibit the development of Ordnance Technical Support.

**Features and Capabilities****8. Stowage Facilities**

**8.1** List by facility number each weapon storage facility under the cognizance of this activity. Use separate tables for each location and magazine type, e.g. main base will have a table for igloo facilities and another for bo magazines.

- Identify the current rated condition of each facility (Adequate/Inadequate/Substandard), its total square footag and if it is equipped with environmental controls.
- Is this facility currently used for weapons storage? If yes, what type of ordnance, from the commodity type previously listed, is currently stowed here?
- If ordnance is currently stowed in the facility, identify the reason(s) for which this ordnance is stowed at you facility from the following list: own activity use (training); own activity use (operational stock) Receipt/Segregation/Stowage/Issue (RSSI); transshipment/awaiting issue; deep stow (war reserve); awaitin Demil; other. Explain each "other" entry in the space provided, including ordnance stowed which is not a DO asset.

Table 8.1: **Stowage Facility Conditions**Site/Magazine Type: PH/IGLOO/HE

| Facility Number | Condition |     | Environment Controls (Y/N) | Currently In Use? (Y/N) | Type of Ordnance Stowed | Reason for Stowage |

**8. Stowage Facilities, continued**

**8.3** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the facilities in section 8.1 and 8.2 above where inadequate facilities are identified, provide the following information:

No facilities are inadequate.

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**8. Stowage Facilities, continued**

**8.4** For all facilities identified in the Tables of 8.1 as currently not in use for ordnance stowage, provide a brief explanation of its current use and identify its primary usage, if different.

Facilities not in use for ordnance stowage are empty and being held in reserve for designated use by EOD or Ready Service Magazines.

**8.5** If the facilities identified in Table 8.1 are distributed over a noncontiguous area (e.g. one or more Annexes, special areas, etc.), list by location all identified holdings. For any holdings detached from the main base, identify the distance from the primary activity.

None

**Table 8.5: Facility Locations**

| Site (Full Title and location) | Distance |
|--------------------------------|----------|
| N/A                            | N/A      |
|                                |          |
|                                |          |

**Features and Capabilities**

**9. Other Facilities**

9.1 Identify by facility number, giving condition code and total area, all those facilities under your cognizance utilized to perform the following functions: Intermediate and Depot level Maintenance (IM; DM) and Testing (T); Manufacturing (Mftg); In-Service Engineering (ISE); or Technical Support (TS) services. NONE

**Table 9.1: Condition of Other Facilities**

| Facility Number | Function | Condition (KSF) |             |            | Total |
|-----------------|----------|-----------------|-------------|------------|-------|
|                 |          | Adequate        | Substandard | Inadequate |       |
| 77              | IM       | 13*             |             |            | 13    |
| 187             | IM       | 5               |             |            | 5     |
| 189             | IM       |                 | 4.743       |            | 4.743 |
|                 |          |                 |             |            |       |
|                 |          |                 |             |            |       |

\* NOTE: ONLY 13 KSF OF TOTAL 26 KSF IS USED FOR IM WORK.

9.2 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the facilities in section 9.1 above where inadequate facilities are identified, provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**9. Other Facilities, continued**

**9.3** An activity's expansion capability includes its ability to reconfigure / rehab existing underutilized facilities to accept new or increased requirements. Identify in the Table below the space available for expansion, by building type and facility number.

Table 9.3: **Space Available for Expansion**

| Building Type | Facility Number | Installation Space (KSF) |             |            | Total KSF |
|---------------|-----------------|--------------------------|-------------|------------|-----------|
|               |                 | Adequate                 | Substandard | Inadequate |           |
| PERMANENT     | 64              | 10.0                     | 0           | 0          | 10.0      |
| SEMI-PERM     | 77              | 26.5*                    | 0           | 0          | 13        |
| SEMI-PERM     | 90              | 5.0                      | 0           | 0          | 5.0       |

\* NOTE: BLDG 77 ONLY 13 KSF IS AVAILABLE FOR EXPANSION OF TOTAL 26 KSF.

**Features and Capabilities**

**10. Workforce**

**10.1** Identify in Direct Labor Man Hours the workforce employed at your activity (all locations) for the period requested. Use the conversion standard of 1615 DLMHs per Work Year. Provide the Conversion Factor employed for computing DLMHs to DLMYs.

Conversion rate = 1615 DLMHs/DLMY

Additional Comments:

**Features and Capabilities, continued****12. Berthing Capability**

**12.1** Identify the age and structural characteristics for each pier and wharf at your facility or under your cognizance by NAVFAC P-80 Category Code Number (CCN), and dimensions as requested. If unable to maintain the stated design dredge depth, provide explanatory comment following the Table. Identify water distance between adjacent piers, in lieu of slip width, where appropriate. Indicate if the pier is inside a Controlled Industrial Area or High Security Area and the Net Explosive Weight (NEW) ESQD limits, if applicable. Identify any additional controls required in the space following this Table. Identify the average number of days per year over the last eight years (the period FY 1987-1994) that the pier or wharf was out of service (OOS) for maintenance (including dredging of the associated slip).

Table 12.1: **Pier and Wharf Characteristics**

| Pier or Wharf         | Age    | CCN   | Moor Length (FT) | Design Dredge Depth (FT)(MLLW) | Slip Width (FT) | Pier Width (FT) | CIA / Security Area? (Y/N) | ESQD NEW Limit | Average Annual Days OOS |
|-----------------------|--------|-------|------------------|--------------------------------|-----------------|-----------------|----------------------------|----------------|-------------------------|
| A832 AMMUNITION WHARF | 14 YRS | 15210 | 1663             | 55                             | N/A             | 115'            | NO                         | 2.25M          | 0                       |

Additional comments:

No dredging is required at NOCPACDIV Port Hadlock Ammunition Pier; Water Depth Is 55 Feet of mean low water.

**12. Berthing Capability, continued**

**12.2** Identify all MILCON improvements executed in the period FY 1986-1994 for each pier or wharf identified in Table 30.1

**Table 12.2: Pier and Wharf MILCON**

| Pier or Wharf         | Year MILCON Executed | Nature of Improvement |
|-----------------------|----------------------|-----------------------|
| A832 AMMUNITION WHARF | N/A                  | NONE                  |
|                       |                      |                       |
|                       |                      |                       |
|                       |                      |                       |

**12.3** List all ESQD waivers currently in effect, with expiration dates, for all applicable piers and wharve identified in Table 12.1.

**Table 12.3: ESQD Waivers In Effect**

| Pier or Wharf         | Nature of Waiver | Date Waiver Expires |
|-----------------------|------------------|---------------------|
| A832 AMMUNITION WHARF | N/A              | N/A                 |
|                       |                  |                     |
|                       |                  |                     |
|                       |                  |                     |

**12. Berthing Capability, continued**

**12.4** For all piers and wharves at your facility or under your cognizance, indicate which, if any, are RO/R and/or aircraft accessible, and conditions which apply.

**Table 12.4: Pier and Wharf Access**

| Pier or Wharf         | RO/RO Access? | Aircraft Access? |
|-----------------------|---------------|------------------|
| A832 AMMUNITION WHARF | NONE          | NONE             |
|                       |               |                  |
|                       |               |                  |

**12.5** How much pier space is required to berth and support ancillary craft (tugs, barges, floating cranes, etc. currently at your facility? Indicate if certain piers are uniquely suited to support these craft. NONE.

No pier space required. The south end of the ammunition wharf at NOCPACDIV DET Port Hadlock is 115 feet wide and has a mooring barge to accommodate tugs, barges or a floating crane.

**12. Berthing Capability, continued**

**12.6** Identify the ship support characteristics for each Pier and Wharf under your activity's cognizance. Indicate if the pier or wharf is listed in OPNAVINST 3000.8. For Compressed Air and Oily Waste disposal, list only permanently installed facilities. For steam, indicate below the Table if any piers or wharves provide certified steam. If any permanent fendering arrangement limits apply, identify them in the space following the Table.

**Table 12.6: Pier and Wharf Ship Support Characteristics**

| Pier/ Wharf                 | NPW Berth?<br>(Y/N)                    | KVA            |       | Comp. Air<br>Pressure<br>& Max<br>Capability | Potable<br>Water<br>(GPD) | CHT<br>(GPD) | Oily<br>Waste<br>(GPD) | Steam<br>(LBM/HR<br>& PSI) | Fendering<br>Limits<br>(Y/N) |

|                             |  |                |       |  |                           |              |                        |                            |                              |
|                             |  |                |       |  |                           |              |                        |                            |                              |

Additional comments:

**12. Berthing Capability, continued**

**12.7** For each pier and wharf listed above, state today's normal loading by ship class with current facility ship loading, the maximum berthing, maximum berthing for weapons handling evolutions, and maximum berthing to conduct maintenance. For ordnance handling capability, identify the maximum number of ships that can be moored at each pier or wharf to conduct ordnance handling evolutions, without necessitating berth shifts. Incorporate all applicable safety, ESQD, and access limitations. Include comments below the Table if necessary. For berthing in support of maintenance, list the maximum number of ships that can be serviced in maintenance availabilities at each pier or wharf without necessitating berth shifts to accommodate crane, laydown or access limitations. Provide any additional comments in the space following the Table.

**Table 12.7: Pier and Wharf Normal Loading**

| Pier or Wharf                  | Typical Steady State Loading | Maximum Ship Berthing | Ordnance Handling Pierside? | Perform Maintenance Pierside? |
|--------------------------------|------------------------------|-----------------------|-----------------------------|-------------------------------|
| A832 Ammunition Wharf          | AOE, CVN                     | 2 - 1663LF            | YES                         | NOT ALLOWED                   |
| DOES NOT HAVE MAINT CAPABILITY |                              |                       |                             |                               |
|                                |                              |                       |                             |                               |
|                                |                              |                       |                             |                               |
|                                |                              |                       |                             |                               |

**12. Berthing Capability, continued**

**12.8** How much pier space is required to berth and support ancillary craft (tugs, barges, floating cranes, etc. currently at your facility? Indicate if certain piers are uniquely suited to support these craft.

The south end of the ammunition wharf at NOCPACDIV DET Port Hadlock has a mooring barge to accommodate tugs, barges or a floating crane.

**12.9** What is the average pier loading in ships per day due to visiting ships at your facility/piers or wharves under your cognizance? Indicate if this varies significantly by season.

35 ship evolutions per year. There are no seasonal affects on ship evolutions.

**12.10** Given no funding or manning limits, what modifications or improvements would you make to the waterfront infrastructure to increase the cold iron ship berthing capability of your installation/under your cognizance. Provide a description, cost estimates, and additional capability gained.

Ordnance handling piers are not required to provide cold iron berthing capabilities. The length of time ships are at the pier rarely exceeds one week.

**12.11** Describe any unique limits or enhancements on the berthing of ships at specific piers or wharves under your cognizance.

1. Private development in the surrounding areas will never affect NOCPACDIV Port Hadlock ESQD N.E.W on the ammunition wharf.
2. No dredging is required at NOCPACDIV Port Hadlock.
3. The ammunition pier is unencumbered by navigation hazards.
4. The ammunition pier is the only pier at a weapons station on the entire west coast designed to accommodate a rail mounted container crane.

**Features and Capabilities, continued****13. Physical Space for Industrial Support**

**13.1** Identify in the table below the real estate resources which have the potential to facilitate future development and for which you are the plant account holder or into which, though a tenant, your activity could reasonably expect to expand. Complete a separate table for each individual site, i.e., main base, outlying airfields, special off-site areas, etc. The unit of measure is acres. Developed area is defined as land currently with buildings, roads, and utilities where further development is not possible without demolition of existing improvements. Include in "Restricted" areas that are restricted for future development due to environmental constraints (e.g. wetlands, landfills, archaeological sites), operational restrictions (e.g. ESQD areas, HERO, HERP, HERF, AICUZ, ranges) or cultural resources restrictions. Identify the reason for the restriction when providing the acreage in the table. Specify any entry in "Other" (e.g. submerged lands).

Table 13.1: **Real Estate Resources**Site Location: NOCPACDIV DET PORT HADLOCK

| Land Use                           | Total Acres | Developed Acreage | Available for Development |              |
|------------------------------------|-------------|-------------------|---------------------------|--------------|
|                                    |             |                   | Restricted                | Unrestricted |
| Maintenance                        | 33          | 23                | 0                         | 10           |

**Features and Capabilities, continued****14. Facility Measures**

**14.1** Identify the facility and equipment values for all activities under your cognizance in the Table below, a executed and budgeted for the period requested. As applied herein:

- Maintenance of Real Property (MRP) is the budgetary term gathering the expenses or budget requirements for facility work and includes recurring maintenance, major repairs and minor construction (non-MILCON) inclusive of all Major Claimant funded Special Projects. It is the amount of funds spent on or budgeted for maintenance and repair of real property assets to maintain the facility in satisfactory operating condition. For purposes of this Data Call, MRP includes all M1/R1 and M2/R2 expenditures.
- Current Plant Value (CPV) refers to incorporates Class 2 Real Property and is the hypothetical dollar amount required to replace a Class 2 facility in kind at today's dollars (e.g.: the cost today to replace an existing wood frame barracks with another barracks, also wood frame).
- Acquisition Cost of Equipment (ACE) reports the total cumulative acquisition cost of all "Personal Property equipment which includes the cost of installed equipments directly related to mission execution (such as lab test equipment). Class 2 installed capital equipment which is integral to the facility should not be reported as ACE.

Table 14.1: **Expenditures and Equipment Values**

| FY   | MRP (\$ K) | CPV (\$ K) | ACE (\$ K) |
|------|------------|------------|------------|
| 1986 | UNK        | 82311      | UNK        |
| 1987 | UNK        | 83265      | UNK        |
| 1988 | UNK        | 89178      | UNK        |
| 1989 | 1200       | 90514      | UNK        |
| 1990 | 1300       | 92326      | UNK        |
| 1991 | 1400       | 93692      | UNK        |
| 1992 | 1500       | 95378      | 10         |
| 1993 | 950        | 100751     | 97         |

| 1995 | 1992       | 106887     | 86         |
| 1996 | 1200       | 110093     | 83         |
| 1997 | 1997       | 113396     | 72         |

**Features and Capabilities, continued**

**15. Personnel Support Facility Data**

**15.1** Housing and Messing. Provide data on the BOQs and BEQs assigned to your current plant account. The unit of measure for this capability is number of people housed. Use CCN to differentiate between pay grades (i.e. E1-E4, E5-E6, E7-E9, CWO-O2, O3 and above).

**Table 15.1: Bachelor Housing Facilities**

| Facility Type,<br>Bldg. # & CCN | Total #<br>Beds | Total #<br>Rooms | Adequate |    | Substandard |     | Inadequate |      |
|---------------------------------|-----------------|------------------|----------|----|-------------|-----|------------|------|
|                                 |                 |                  | Beds     | SF | Beds        | SF  | Beds       | SF   |
| 721-11                          | 18              | 9                |          |    |             |     | 18         | 1620 |
| 721-12                          | 4               | 2                |          |    | 1           | 150 | 3          | 540  |
|                                 |                 |                  |          |    |             |     |            |      |
|                                 |                 |                  |          |    |             |     |            |      |

**15.2** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP? Yes.

(A) 721-11 and 721-12 (B) Does not meet UEPH standards for space, life safety building codes or Quality of Life standards. (C) Current use as BEQ. (D) BEQ Rehab cost = \$575K. (E) Alternate use as administrative headquarters = \$275K. (F) BEQ remodel of moderate scope to meet UEPH standards. \$255K FY9 programming. (G) FY93 BASEREP rating of C3.

**15. Personnel Support Facility Data, continued**

**15.3** Provide data on the BOQs and BEQs projected to be assigned to your plant account in FY 1997. The desired unit of measure for this capacity is people housed. Use CCN to differentiate between pay grades, i.e., E1 E4, E5-E6, E7-E9, CWO-O2, O3 and above.

Table 15.3: **Bachelor Housing Facilities**

| Facility<br>Type, Bldg. # &<br>CCN | Total #<br>Beds | Total #<br>Rooms | Adequate |      | Substandard |    | Inadequate |    |
|------------------------------------|-----------------|------------------|----------|------|-------------|----|------------|----|
|                                    |                 |                  | Beds     | SF   | Beds        | SF | Beds       | SF |
| 721-11                             | 18              | 9                | 18       | 1620 | 0           |    | 0          |    |
| 721-12                             | 4               | 2                | 4        | 720  | 0           |    | 0          |    |
|                                    |                 |                  |          |      |             |    |            |    |
|                                    |                 |                  |          |      |             |    |            |    |

**15.4** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?

|                                  |             |          |    |             |    |            |    |                            |
|                                  |             |          |    |             |    |            |    |                            |
|                                  |             |          |    |             |    |            |    |                            |

**15.6** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**15. Personnel Support Facility Data, continued**

**15.7** Provide data on the messing facilities projected to be assigned to your plant account in FY 1997.

\* No messing facilities are proposed. A fast food facility will be provided in the Social Center designed to serve 30 noon meals.

Table 15.7: **Messing Facilities**

(R)

| Facility Type, CC and Bldg. # | Total SF | Adequate |    | Substandard |    | Inadequate |    | Avg # Noon Meals Served |
|-------------------------------|----------|----------|----|-------------|----|------------|----|-------------------------|
|                               |          | Seats    | SF | Seats       | SF | Seats      | SF |                         |
| None                          |          |          |    |             |    |            |    |                         |
|                               |          |          |    |             |    |            |    |                         |
|                               |          |          |    |             |    |            |    |                         |
|                               |          |          |    |             |    |            |    |                         |

**15.8** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**16. Training Facilities**

**16.1.** By Category Code Number (CCN) (5 digits), complete the following student throughput capacity table for all training facilities (adequate, substandard and inadequate) aboard the installation, including tenant activities. Include all 171-XX and 179-XX CCNs and any other applicable CCN. Following the table, describe how the reported Student Hours/Year capacity was derived. Personnel Capacity (PN) is the total number of seats available for students in spaces used for instruction, based on the current configuration and use of the facilities.

*EX: A type of training facility in the category 171-10 is an academic instruction classroom. If you have 1 classrooms with a capacity of 25 students per room, the design capacity reported would be 250. If these classrooms are available 8 hours a day for 300 days in a year, the capacity would be 600,000 student hours per year.*

Table 16.1: **Training Facilities**

| Parent UIC | CCN    | Type of Training Facility | Total # this Type | Personnel Capacity (PN) | Capacity (Student Hours/Year) |
|------------|--------|---------------------------|-------------------|-------------------------|-------------------------------|
|            | 721-11 | CONF ROOM                 | 1                 | 15                      | 36,000                        |
|            | 721-11 | HALL, SOCIAL              | 1                 | 55                      | 132,000                       |

**16. Training Facilities, continued**

**16.2** By facility Category Code Number (CCN), provide the number of hours per year of classroom time require for each course of instruction taught at formal schools on your installation. Include all applicable 171-XX an 179-XX CCNs. For requirements, report in column "A" the number of students per requested year; report in "B" the number of hours each student spends in this training facility for each course; report in "C" the product (AxB) the number of hours of instruction per year.

**Table 16.2: Formal Classroom Training**

CCN: 721-11

| Type of Training Facility | School              | Type of Training         | FY 1993 Requirements |    |      | FY 2001 Requirements |    |       |
|---------------------------|---------------------|--------------------------|----------------------|----|------|----------------------|----|-------|

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**CAPACITY DATA CALL**

**NAVAL WEAPONS STATIONS,  
NAVAL MAGAZINES,  
and  
STRATEGIC MISSILE FACILITIES**

Questions for the Activities

|              |       |  |
|--------------|-------|--|
| Category     | ..... | <b>Industrial Activities</b>   |
| Sub-Category | ..... | <b>Naval Weapons Stations,<br/>Naval Magazines, and<br/>Strategic Weapons Facilities</b> |
| Claimants    | ..... | <b>COMNAVSEASCOM - Naval Weapons Stations</b>  |
|              | ..... | <b>CINCPACFLT A - Naval Magazines (on U.S. territory)</b>                                |
|              | ..... | <b>DIRSSP - Strategic Missile Facilities</b>   |

**Notes:** In the context of this Data Call

1. Base your responses for FY 1994 and previous years on executed workload, and for FY 1995 and subsequent years on workload as programmed in the FY 1995 Budget Submission and POM-96. Unless otherwise specified, use workload mixes as programmed. In estimating projected workload capabilities, use the activity configuration as of completion of the BRAC-88/91/93 actions.
2. Unless otherwise specified, for questions addressing maximum workload within this Data Call, base your response on an eight hour day/five day notional work week (1-8-5). Please identify any processes which, under normal operations, operate on a different schedule. Also, identify your "40 hour" work week schedule, if different from "1-8-5".
3. "Production" equates to the number of items processed per Fiscal Year (FY), unless otherwise specified. Report Direct Labor Man Hours (DLMHs) in thousands of Man Hours, to the nearest tenth, e.g. 32.2 K DLMHs.
4. For purposes of this Data Call, Depot maintenance is regarded as the maintenance performed on material that requires major overhaul or a complete rebuild of parts, assemblies, subassemblies, and end items, including the manufacture of parts, modifications, testing, and reclamation, as required. Depot maintenance serves to support lower categories of maintenance. Depot maintenance provides stocks of serviceable equipment by using more extensive facilities for repair than are available in lower level maintenance activities. Depot or indirect maintenance functions are identified by the type of equipment maintained or repaired.
5. Report all workload performed, clearly identifying origin of all non-DON workload.
6. Mission area work (as defined in sections 1 through 7) performed by tenant activities (e.g. MOMAG) should be reported in separate, duplicate tables in the applicable sections.

**If any responses are classified, so annotate the applicable question and include those responses in a separate classified annex.**

This document has been prepared in WordPerfect 5.1/5.2.

**Note:** The Box below breaks out Defense Department Depot Maintenance and Industrial activities by Commodity Groups for further assessment. The highlighted items have been incorporated into this Data Call. If your activity performs depot work in any other area, please include such workload and so annotate your Data Call response.

**2. Stowage**

2.1 Identify by units of weapon type the quantity of all weapons which can be presently stored at your facility and the maximum storage capability through FY 2001. In determining maximum capability assume (a) the current projected total workload and mix remains as assigned; (b) maximum personnel and equipment support are available; and (c) facility additions are limited to that MILCON already programmed. In distributing the overall ordnance stowage, choose the best configuration based on type of facilities available and predicted requirements.

Table 2.1: **Present and Predicted Stowage Capability**

| Ammunition / Ordnance Commodity Type | Present Stowage Capability | Maximum Stowage Capability |
|--------------------------------------|----------------------------|----------------------------|
| Mines                                | 1200                       | 1200                       |

Activity: N32013

NOTE: PROGRAMMED MILCON P-298T WILL EXPAND PRESENT TO MAXIMUM STOWAGE QUANTITIES SHOWN.

**2. Stowage, continued**

2.2 Provide, by facility number, the present and predicted inventories and the maximum stowage capability in tons and square feet for each stowage facility (e.g. box, igloo) under your cognizance. Using the assumptions given in section 2.1 in predicting the outyear facility utilization, distribute your overall ordnance compliment to the most likely configuration. When listing storage by facility, group facilities by location (e.g. main base, outlying area, special area, detachment), and identify that location in the space provided. Present and Predicted Inventories' SF reports the square footage required by those inventories; Maximum Stowage SF values will indicate the total square footage available. Reproduce Table 2.2 as necessary. *If any non-DON inventory is held/programmed to be held, report that material separately from your DON stock.*

## **2. Stowage, continued**

**2.4** Provide details of your calculations and the assumptions made to determine the differences reported in Table 2.2. between present and maximum capability, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased stowage workload at this activity. Indicate by Fiscal Year (FY) when programmed MILCON will increase your stowage capability and by how much. Specify any factors that significantly inhibit this facility realizing its maximum storage capability (e.g. condition of storage facilities, personnel to maintain necessary operations, operating equipment, ESQD limits, environmental constraints, physical security, etc.).

Tons to square foot conversion was derived using Magazine Capacities shown by PH Magazine Report NWS 8024/01 which shows tons of material stored capacity and utilization percentage for each magazine. Magazine square foot was derived using NAFDB GSF. Net usable square foot was considered 80% of GSF. By extending percentage of utilized space (if less than 100%) to 100%, tons per square foot of magazine capacity at 100% was derived. Predicted inventories were derived by planning assumption which considered additional stowage requirements based upon CVN and AOE homeporting. Additional missile magazine space (21,732 GSF) will be constructed by BRACON P-298T programmed for construction in 1994. There are no inhibitions that would significantly limit this facility achieving maximum storage capability.

**2.5** For each inhibiting item identified in question 2.4, assess a cost or impact of eliminating the inhibitor, the Fiscal Year (FY) in which such elimination would be completed, and the quantity increase in storage capability realized (express in terms of tons and square feet).

No inhibiting factors.

**2.6** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance stowage at this activity (AICUZ encroachment, pollutant discharge, etc.)?

Activity: N32013

Further development of ordnance stowage would be impacted by ESQD considerations and in some cases by threatened and endangered species primary and secondary nesting zones. Wetlands impacts may inhibit development in some areas. Currently no wetlands delineation has defined the extent of that limitation. No other environmental limitations are foreseen. No other legal or other inhibitions are known.

**Mission Area**

**3. Throughput**

**3.1** Based on current programmed workload and mix, identify the current outload requirements for each commodity type of each munition stored at this facility, in each of the following operational scenarios. Provide Unit Throughput as available.

**Table 3.1.a: Over-The-Pier Throughput Requirements**

| Munitions Type    | Throughput Requirement (tons/day) |              |             |
|-------------------|-----------------------------------|--------------|-------------|
|                   | Peacetime Operations              | Mobilization | Sustainment |
| LOE               | 200                               | 400          | 500         |
| Threat            | 100                               | 200          | 300         |
| Nuclear Threat    | -                                 | -            | -           |
| Milvan Containers | 5000*                             | 5000*        | 5000*       |
| Other             | 50                                | 100          | 200         |

\* Container throughput is not cumulative and can only be performed in lieu of all other throughput.

**Table 3.1.b: Over-The-Pier Throughput Requirements**

| Munitions Type | Throughput Requirement (units/day) |              |             |

Activity: N32013

**3. Throughput, continued**

**3.2** Identify the throughput in Tons for your facility as rated, as required under the operational conditions specified, and as executed or programmed for requested Fiscal Years. In determining your maximum rated capability, assume: (a) the current projected total workload and mix remains as assigned; (b) maximum personnel and equipment support are available; and (c) facility additions are limited to that MILCON already programmed. In distributing the overall ordnance requirement, choose the best configuration based on type of facilities available and predicted requirements. In the space provided below Table 3.2.a, detail the basis for your calculations of your maximum rated capability. If the Fiscal Years sampled in Table 3.2.b do not reflect your highest and lowest levels of activity for the period FY 1986-2001, add those years in the space provided.

Table 3.2.a: **Throughput in Tons/Per Day**

|  |                | PIER | VERTREP | RAIL | TRUCK |

| Container Ship*                   |          | 5000                                 | 5000    | 5000    | 5000    | 5000    | 5000    | 5000    |

\* Throughput reported is not cumulative. Tons reported are totals that can be loaded for each class of ship.

### 3. Throughput, continued

**3.5** Provide details of the calculations used to complete Tables 3.4, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased outload workload at this activity.

- 1 CV 500 tons per active day
- 1 AOE 1000 tons per active day
- 1 Combatant 80 tons per active day
- 1 Container Ship 5000 tons per active day

**3.6** Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform ordnance outloads? What other investments in the industrial infrastructure would you make to increase activity outload capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

A Portal Crane for container loading - 6.5 Million Dollars

Efficiency assumptions - Current capability is 8 container lifts per hour, a Container Crane lifts 25 containers per hour. Two 680 container evolutions per year during peace time = 2320 DLMH savings per year. Assume 250 containers per day sustained mobilization requirements for 120 days every 15 years = 2520 DLMH savings. Payback = Approximately 34 years.

An additional south access to the ammunition pier to relieve congestion and improve safety - \$1.2 Million

Increased capability and efficiency - 150 DLMH per multiple ship evolution X 12 evolutions/yr = \$90,000 annual savings. Payback = Approximately 13 years excluding any costs avoidances due to increased safety factor.

**3.7** Are there any ultimate and overriding limiting factors to expansion of this activity's outloading workload? If so, what are they? NONE

**3.8** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance outloading at this activity (AICUZ encroachment, pollutant discharge, etc.)?

The following factors may inhibit the development of additional Ordnance Outloading activities: Detachment Port Hadlock is allowed a total of 100,000 gallons of potable water, averaged over a month time frame, from our water supplier (Port Townsend Water Department). The increase in outloading will have an increase in water consumption associated with it due to the presence of the ships and additional personnel. Alternative water supplies would have to be developed by activated an existing well located at the activity.

The domestic sewage treatment system is allowed to discharge 36,000 gallons of treated effluent a day. The increase in ordnance outloading will increase the amount of domestic sewage requiring treatment. This increase in treatment requirements may overload the facilities current capabilities.

1. Aircraft Airframes:

**JCSG-DM: Maintenance and Industrial Activities**

**Mission Area****4. Maintenance and Testing**

4.1 By units of ordnance type and by DLMHs, identify what maintenance and testing has been or is programmed to be performed at this location for the period requested. Report depot-level maintenance as a separate line from intermediate-level maintenance.

Table 4.1.a: **Historic and Predicted Maintenance and Testing Workload**

#### 4. Maintenance and Testing, continued

4.2 Assuming (a) the current projected total workload remains as assigned; (b) that sufficient demand is available to justify maximum hiring, optimum procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which this activity could expand the maintenance and testing conducted, based on the current and future planned workload mixes? Please provide your response in the absolute number of units throughput and DLMHs that could be accomplished at this facility. Report depot-level maintenance as a separate line from intermediate maintenance.

Table 4.2.a: Maximum Potential Maintenance and Testing Workload

#### 4. Maintenance and Testing, continued

4.3 Provide details of the calculations used to complete Tables 4.2, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased maintenance and testing workload at this activity.

Information comes from funding documents, Ammunition Maintenance Progress Reporting System.

4.4 Table 4.7, on the following page, may be used as a worksheet for the following questions. Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform maintenance and testing workload? What other investments in the industrial infrastructure would you make to increase maintenance and testing capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

Asset readiness posture indicates that maintenance/testing requirements will decrease. No further investments are predicted.

4.5 Are there any ultimate and overriding limiting factors to expansion of this activity's maintenance and testing workload? If so, what are they?

None

4.6 Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance maintenance and testing at this activity (AICUZ encroachment, pollutant discharge, etc.)?

The major limiting factor that may inhibit the development of ordnance maintenance is the lack of a facility which is capable of handling Industrial Wastewater.

**4. Maintenance and Testing, continued**

4.7 For all Maintenance and Testing identified in section 4.1, specify which items (by family of weapon) and the quantity (by number of units per year) you can maintain (e.g. Captor 50/yr, Phoenix 100/yr, etc.). Identify factors limiting your capability, the total cost to remove the limiting factor and the new rate that could be maintained.

Table 4.7: **Ordnance Maintenance and Testing Factors**

| Ordnance<br>(Type-Qty) | Current<br>Rate | Limiting<br>Factors | Cost to<br>Remove<br>(\$K) | New Rate |
|------------------------|-----------------|---------------------|----------------------------|----------|
| N/A                    | N/A             | N/A                 | N/A                        | N/A      |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |
|                        |                 |                     |                            |          |

**4. Maintenance and Testing, continued**

**4.8** If the workload reported in section 4.1 is not the complete maintenance/testing package required by the munition, briefly describe what additional work is required, where the weapon must be sent to accomplish the work, and at what frequency the work must be done. Report depot-level maintenance as a separate line from intermediate maintenance.

**Table 4.8: Additional Ordnance Maintenance and Testing Requirements**

| Munitions Type | Additional Work Required | Location for Additional Work | Frequency of Additional Work |
|----------------|--------------------------|------------------------------|------------------------------|
| N/A            | N/A                      | N/A                          | N/A                          |
|                |                          |                              |                              |
|                |                          |                              |                              |
|                |                          |                              |                              |
|                |                          |                              |                              |
|                |                          |                              |                              |
|                |                          |                              |                              |

**4.9** For each additional maintenance or testing action listed in Table 4.8 above, identify if that workload could be performed at your activity. Briefly describe what modifications would be necessary to accomplish that workload at your activity, and the associated costs.

**4. Maintenance and Testing, continued**

*Questions 4.10-4.15 refer to Depot Maintenance workload performance only.*

**4.10** Given the current configuration and operation of your activity, provide the depot/industrial level maintenance by commodity group (from the Commodity List in the Notes at the beginning of this Data Call) that was executed in and is programmed for the Fiscal Years (FY) requested in units throughput and in Direct Labor Man Hours (DLMHs). Summarize ordnance commodity types serviced at this activity from the totals provided in Tables 4.1.a-d.

**Table 4.10.a: Historic and Predicted Depot/Industrial Workload**

| Commodity Type | Throughput (Units) |         |         |         |         |         |         |         |
|----------------|--------------------|---------|---------|---------|---------|---------|---------|---------|

**4. Maintenance and Testing, continued**

**4.11** For each commodity group type reported in Tables 4.10.a through 4.10.d, assume (a) the current projected total depot / industrial workload remains as assigned; (b) that sufficient production demand is available to justify maximum hiring, optimum (repeat order manufacturing lead times) procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which depot / industrial maintenance operations could be expanded at this activity, based on the current and future planned workload mixes, for the requested period? Please provide your response in both the absolute maximum number of units and DLMHs that could be processed at this activity by applicable commodity group. Summarize Ordnance from Table 4.2.a-b.

**Table 4.11.a: Maximum Potential Depot/Industrial Workload**

| Commodity Type | Throughput (Units) |         |         |         |         |         |         |         |
|----------------|--------------------|---------|---------|---------|---------|---------|---------|---------|
|                | FY 1994            | FY 1995 | FY 1996 | FY 1997 | FY 1998 | FY 1999 | FY 2000 | FY 2001 |

**4. Maintenance and Testing, continued**

**4.12** Provide details of your calculations in Tables 4.11.a-b including assumptions on additional space utilized, major equipment required, production rates, and constraints that limit increased workload by commodity group at this activity.

N/A

**4.13** Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform workload in each of the applicable commodity groups? Describe quantitatively how the changes above would increase your activity's depot/industrial level maintenance capabilities. What would the associated costs be? What would be the payback period and return on investment?

N/A

**4.14** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of depot/industrial level workload and this activity (AICUZ encroachment, pollutant discharge, etc.)?

N/A

**4. Maintenance and Testing, continued**

**4.15 Workload Summary.** Enter the information from the Predicted and Potential Workload sections of Tables 4.10 and 4.11 into the table below and calculate the variance between projected and potential workloads. Again, clearly identify each commodity and include all commodities serviced at this activity.

**Table 4.15.a: PREDICTED WORKLOAD VARIANCE FOR FY 1995**

| <i>FY 1995</i><br>Commodity Type | Product (units)    |                    |          | DLMHs              |                    |          |
|----------------------------------|--------------------|--------------------|----------|--------------------|--------------------|----------|

**5. Manufacturing Workload, continued**

**5.2** Assuming (a) the current projected total workload and mix remains as assigned; (b) that sufficient demand is available to justify maximum hiring, optimum procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which this activity could expand the manufacturing conducted, based on the current and future planned workload mixes?

Please provide your response in the absolute number of units throughput and DLMHs that could be accomplished at this facility. Report depot-level maintenance as a separate line from intermediate and below level maintenance.

Table 5.2.a: **Maximum Potential Manufacturing Workload**

| Grenades / Mortars / Projectiles |            |            |            |            |            |            |            |
| Other (specify)                  |            |            |            |            |            |            |            |

## **5. Manufacturing Workload, continued**

**5.3** Provide details of the calculations used to complete Tables 5.2, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased manufacturing workload at this activity.

None currently performed or predicted to be performed.

**5.4** Table 5.7, on following page, may be used as a worksheet for the following questions. Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform manufacturing workload? What other investments in the industrial infrastructure would you make to increase manufacturing capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

No investment in manufacturing capability is anticipated.

**5.5** Are there any ultimate and overriding limiting factors to expansion of this activity's manufacturing workload? If so, what are they?

Manufacturing workload is currently and principally a single manager function.

**5.6** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance manufacturing at this activity (AICUZ encroachment, pollutant discharge, etc.)? The major limiting factor that may inhibit the development of ordnance manufacturing is the lack of a facility which is capable of handling Industrial Wastewater.

## **5. Manufacturing Workload, continued**

**5.7** For each weapons manufacturing capability included in section 5.1 above, identify by type of weapon (Captor, Harpoon, Tomahawk, etc.) the production rate per year, and what factors limit that rate, the cost to eliminate those limiting factors, and what increased workload would be realized at that cost. In the space below the Table, please briefly describe the actions, and associated costs, necessary to improve your production rates.

**Table 5.7: Manufacturing Production Factors**

| Ordnance Type | Current Production Rate | Limiting Factor | Cost to Remove (\$ K) | New Production Rate |
|---------------|-------------------------|-----------------|-----------------------|---------------------|
| N/A           | N/A                     | N/A             | N/A                   | N/A                 |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |
|               |                         |                 |                       |                     |

Additional Comments:

**Mission Area****6. In-Service Engineering Workload**

6.1 Identify ordnance in-service engineering capabilities of your activity Direct Labor Man Hours (DLMHs) that have been executed or are programmed to be performed in the period requested, within each ammunition/ordnance type. Specify all "other" entries (e.g. PHS&T).

Table 6.1.a: **Historic and Predicted In-Service Engineering Workload**

**6. In-Service Engineering Workload, continued**

**6.2** Assuming (a) the current projected total workload remains as assigned; (b) that sufficient demand is available to justify maximum hiring, optimum procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which this activity could expand the in-service engineering conducted, based on the current and future planned workload mixes? Please provide your response in the absolute number of DLMHs that could be accomplished at this facility. Report depot-level maintenance as a separate line from intermediate and below level maintenance.

**Table 6.2: Maximum Potential In-Service Engineering Workload**

| Ordnance Type                    | Workload (DLMHs) |         |         |         |         |         |         |
|----------------------------------|------------------|---------|---------|---------|---------|---------|---------|
|                                  | FY 1995          | FY 1996 | FY 1997 | FY 1998 | FY 1999 | FY 2000 | FY 2001 |

| Ordnance Type   | Workload (DLMHs) |  |  |  |  |  |  |
|-----------------|------------------|--|--|--|--|--|--|
| Other (specify) |                  |  |  |  |  |  |  |

**6. In-Service Engineering Workload, continued**

**6.3** Provide details of the calculations used to complete Table 6.2, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased in-service engineering workload at this activity.

None historically or currently performed. None anticipated to be performed.

**6.4** Table 6.7, on following page, may be used as a worksheet for the following questions. Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add delete, or modify) to increase your activity's capability to perform in-service engineering workload? What other investments in the industrial infrastructure would you make to increase in-service engineering capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

N/A

**6.5** Are there any ultimate and overriding limiting factors to expansion of this activity's in-service engineering workload? If so, what are they?

N/A

**6.6** Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance in-service engineering at this activity (AICUZ encroachment, pollutant discharge, etc.)?

There are no limiting factors which would inhibit the development of Ordnance In-Service Engineering.

**6. In-Service Engineering Workload, continued**

6.7 For each ordnance in-service engineering capability included in section 6.1 above, identify by type of weapon (Captor, Harpoon, Tomahawk, etc.), the rate that type receives this support per year, what factors limit that rate, the cost to eliminate those limiting factors, and what increased workload would be realized at that cost.

**Table 6.7: In-Service Engineering Factors**

| Ordnance Type | Current Servicing Rate | Limiting Factor | Cost to Remove (\$ K) | New Servicing Rate |
|---------------|------------------------|-----------------|-----------------------|--------------------|
| N/A           | N/A                    | N/A             | N/A                   | N/A                |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |
|               |                        |                 |                       |                    |

**Mission Area**

**7. Technical Support**

**7.1** Identify the workload executed in or programmed to be accomplished in ordnance Technical Support for the period requested. Do *not* include In-Service Engineering in the workload reported below. Complete Table 7.1.a-b using the product mix as executed and programmed to be executed.

**Table 7.1.a: Historic and Predicted Technical Support**

| Program Element                  | Throughput (DLMHs) |         |         |         |         |         |         |         |
|----------------------------------|--------------------|---------|---------|---------|---------|---------|---------|---------|

**7. Technical Support, continued**

**7.2** Assuming (a) the current projected total workload remains as assigned; (b) that sufficient demand is available to justify maximum hiring, optimum procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which this activity could expand the technical support conducted, based on the current and future planned workload mixes? Please provide your response in the absolute number of DLMHs that could be accomplished at this facility. Report depot-level maintenance as a separate line from intermediate and below level maintenance.

**Table 7.2: Maximum Potential Technical Support**

| Program Element                  | DLMHs   |         |         |         |         |         |         |
|----------------------------------|---------|---------|---------|---------|---------|---------|---------|

## 7. Technical Support, continued

7.3 Provide details of the calculations used to complete Table 7.2, including assumptions on additional space utilized, major equipment required, production rates, and constraint that limit increased technical support workload at this activity.

None historically or currently performed. None anticipated to be performed.

7.4 Given an environment unconstrained by funds or manning, what Industrial Plant Equipment (IPE) would you change (add, delete, or modify) to increase your activity's capability to perform technical support workload? What other investments in the industrial infrastructure would you make to increase technical support capabilities? Describe quantitatively how the changes above would increase your activity's capabilities. What would the associated costs be? What would be the payback period and return on investment?

N/A

7.5 Are there any ultimate and overriding limiting factors to expansion of this activity's technical support workload? If so, what are they?

N/A

7.6 Are there any environmental, legal, or otherwise limiting factors that inhibit further the development of ordnance technical support at this activity (AICUZ encroachment, pollutant discharge, etc.)?  
There are no limiting factors which would inhibit the development of Ordnance Technical Support.

**Features and Capabilities****8. Stowage Facilities**

**8.1** List by facility number each weapon storage facility under the cognizance of this activity. Use separate tables for each location and magazine type, e.g. main base will have a table for igloo facilities and another for box magazines.

- Identify the current rated condition of each facility (Adequate/Inadequate/Substandard), its total square footage and if it is equipped with environmental controls.
- Is this facility currently used for weapons storage? If yes, what type of ordnance, from the commodity type previously listed, is currently stowed here?
- If ordnance is currently stowed in the facility, identify the reason(s) for which this ordnance is stowed at you facility from the following list: own activity use (training); own activity use (operational stock) Receipt/Segregation/Stowage/Issue (RSSI); transshipment/awaiting issue; deep stow (war reserve); awaiting Demil; other. Explain each "other" entry in the space provided, including ordnance stowed which is not a DOD asset.

Table 8.1: **Stowage Facility Conditions**Site/Magazine Type: PH/IGLOO/HE

| Facility Number | Condition |     | Environment Controls (Y/N) | Currently In Use? (Y/N) | Type of Ordnance Stowed | Reason for Stowage |
|-----------------|-----------|-----|----------------------------|-------------------------|-------------------------|--------------------|

| Total:   |                   | 167,560        |             |            | 167,560 |

**8. Stowage Facilities, continued**

**8.3** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the facilities in section 8.1 and 8.2 above where inadequate facilities are identified, provide the following information:

No facilities are inadequate.

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**8. Stowage Facilities, continued**

**8.4** For all facilities identified in the Tables of 8.1 as currently not in use for ordnance stowage, provide a brief explanation of its current use and identify its primary usage, if different.

Facilities not in use for ordnance stowage are empty and being held in reserve for designated use by EOD or Ready Service Magazines.

**8.5** If the facilities identified in Table 8.1 are distributed over a noncontiguous area (e.g. one or more Annexes, special areas, etc.), list by location all identified holdings. For any holdings detached from the main base, identify the distance from the primary activity.

None

**Table 8.5: Facility Locations**

| Site (Full Title and location) | Distance |
|--------------------------------|----------|
| N/A                            | N/A      |
|                                |          |
|                                |          |

**Features and Capabilities****9. Other Facilities**

**9.1** Identify by facility number, giving condition code and total area, all those facilities under your cognizance utilized to perform the following functions: Intermediate and Depot level Maintenance (IM; DM) and Testing (T); Manufacturing (Mftg); In-Service Engineering (ISE); or Technical Support (TS) services. NONE

Table 9.1: **Condition of Other Facilities**

| Facility Number | Function | Condition (KSF) |             |            | Total |
|-----------------|----------|-----------------|-------------|------------|-------|
|                 |          | Adequate        | Substandard | Inadequate |       |
| 77              | IM       | 13*             |             |            | 13    |
| 187             | IM       | 5               |             |            | 5     |
| 189             | IM       |                 | 4.743       |            | 4.743 |
|                 |          |                 |             |            |       |
|                 |          |                 |             |            |       |

\* NOTE: ONLY 13 KSF OF TOTAL 26 KSF IS USED FOR IM WORK.

**9.2** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the facilities in section 9.1 above where inadequate facilities are identified, provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**9. Other Facilities, continued**

**9.3** An activity's expansion capability includes its ability to reconfigure / rehab existing underutilized facilities to accept new or increased requirements. Identify in the Table below the space available for expansion, by building type and facility number.

**Table 9.3: Space Available for Expansion**

| Building Type | Facility Number | Installation Space (KSF) |             |            | Total KSF |
|---------------|-----------------|--------------------------|-------------|------------|-----------|
|               |                 | Adequate                 | Substandard | Inadequate |           |
| PERMANENT     | 64              | 10.0                     | 0           | 0          | 10.0      |
| SEMI-PERM     | 77              | 26.5*                    | 0           | 0          | 13        |
| SEMI-PERM     | 90              | 5.0                      | 0           | 0          | 5.0       |

\* NOTE: BLDG 77 ONLY 13 KSF IS AVAILABLE FOR EXPANSION OF TOTAL 26 KSF.

**Features and Capabilities**

**10. Workforce**

**10.1** Identify in Direct Labor Man Hours the workforce employed at your activity (all locations) for the period requested. Use the conversion standard of 1615 DLMHs per Work Year. Provide the Conversion Factor employed for computing DLMHs to DLMYs.

Conversion rate = 1615 DLMHs/DLMY

Additional Comments:

**Features and Capabilities, continued****12. Berthing Capability**

**12.1** Identify the age and structural characteristics for each pier and wharf at your facility or under your cognizance by NAVFAC P-80 Category Code Number (CCN), and dimensions as requested. If unable to maintain the stated design dredge depth, provide explanatory comment following the Table. Identify water distance between adjacent piers, in lieu of slip width, where appropriate. Indicate if the pier is inside a Controlled Industrial Area or High Security Area and the Net Explosive Weight (NEW) ESQD limits, if applicable. Identify any additional controls required in the space following this Table. Identify the average number of days per year over the last eight years (the period FY 1987-1994) that the pier or wharf was out of service (OOS) for maintenance (including dredging of the associated slip).

Table 12.1: **Pier and Wharf Characteristics**

| Pier or Wharf         | Age    | CCN   | Moor Length (FT) | Design Dredge Depth (FT)(MLLW) | Slip Width (FT) | Pier Width (FT) | CIA / Security Area? (Y/N) | ESQD NEW Limit | Average Annual Days OOS |
|-----------------------|--------|-------|------------------|--------------------------------|-----------------|-----------------|----------------------------|----------------|-------------------------|
| A832 AMMUNITION WHARF | 14 YRS | 15210 | 1663             | 55                             | N/A             | 115'            | NO                         | 2.25M          | 0                       |

Additional comments:

No dredging is required at NOCPACDIV Port Hadlock Ammunition Pier; Water Depth Is 55 Feet of mean lower low water.

**12. Berthing Capability, continued**

**12.2** Identify all MILCON improvements executed in the period FY 1986-1994 for each pier or wharf identified in Table 30.1

**Table 12.2: Pier and Wharf MILCON**

| Pier or Wharf         | Year MILCON Executed | Nature of Improvement |
|-----------------------|----------------------|-----------------------|
| A832 AMMUNITION WHARF | N/A                  | NONE                  |

| A832 AMMUNITION WHARF | NONE          | NONE             |
|                       |               |                  |
|                       |               |                  |

**12.5** How much pier space is required to berth and support ancillary craft (tugs, barges, floating cranes, etc. currently at your facility? Indicate if certain piers are uniquely suited to support these craft. NONE.

No pier space required. The south end of the ammunition wharf at NOCPACDIV DET Port Hadlock is 115 feet wide and has a mooring barge to accommodate tugs, barges or a floating crane.

**12. Berthing Capability, continued**

**12.6** Identify the ship support characteristics for each Pier and Wharf under your activity's cognizance. Indicate if the pier or wharf is listed in OPNAVINST 3000.8. For Compressed Air and Oily Waste disposal, list only permanently installed facilities. For steam, indicate below the Table if any piers or wharves provide certified steam. If any permanent fendering arrangement limits apply, identify them in the space following the Table.

**Table 12.6: Pier and Wharf Ship Support Characteristics**

| Pier/ Wharf                 | NPW Berth?<br>(Y/N)                    | KVA            |       | Comp. Air<br>Pressure<br>& Max<br>Capability | Potable<br>Water<br>(GPD) | CHT<br>(GPD) | Oily<br>Waste<br>(GPD) | Steam<br>(LBM/HR<br>& PSI) | Fendering<br>Limits<br>(Y/N) |

Additional comments:

**12. Berthing Capability, continued**

**12.7** For each pier and wharf listed above, state today's normal loading by ship class with current facility ship loading, the maximum berthing, maximum berthing for weapons handling evolutions, and maximum berthing to conduct maintenance. For ordnance handling capability, identify the maximum number of ships that can be moored at each pier or wharf to conduct ordnance handling evolutions, without necessitating berth shifts. Incorporate all applicable safety, ESQD, and access limitations. Include comments below the Table if necessary. For berthing in support of maintenance, list the maximum number of ships that can be serviced in maintenance availabilities at each pier or wharf without necessitating berth shifts to accommodate crane, laydown or access limitations. Provide any additional comments in the space following the Table.

**Table 12.7: Pier and Wharf Normal Loading**

| Pier or Wharf                  | Typical Steady State Loading | Maximum Ship Berthing | Ordnance Handling Pierside? | Perform Maintenance Pierside? |
|--------------------------------|------------------------------|-----------------------|-----------------------------|-------------------------------|
| A832 Ammunition Wharf          | AOE, CVN                     | 2 - 1663LF            | YES                         | NOT ALLOWED                   |

|                                |                              |                       |                             |                               |
|                                |                              |                       |                             |                               |

**12. Berthing Capability, continued**

**12.8** How much pier space is required to berth and support ancillary craft (tugs, barges, floating cranes, etc. currently at your facility? Indicate if certain piers are uniquely suited to support these craft.

The south end of the ammunition wharf at NOCPACDIV DET Port Hadlock has a mooring barge to accommodate tugs, barges or a floating crane.

**12.9** What is the average pier loading in ships per day due to visiting ships at your facility/piers or wharves under your cognizance? Indicate if this varies significantly by season.

35 ship evolutions per year. There are no seasonal affects on ship evolutions.

**12.10** Given no funding or manning limits, what modifications or improvements would you make to the waterfront infrastructure to increase the cold iron ship berthing capability of your installation/under your cognizance. Provide a description, cost estimates, and additional capability gained. **ORDNANCE**

Handling piers are not required to provide cold iron berthing capabilities.

**12.11** Describe any unique limits or enhancements on the berthing of ships at specific piers or wharves under your cognizance.

1. Private development in the surrounding areas will never affect NOCPACDIV Port Hadlock ESQD N.E.W on the ammunition wharf.
2. No dredging is required at NOCPACDIV Port Hadlock.
3. The ammunition pier is unencumbered by navigation hazards.
4. The ammunition pier is the only pier at a weapons station on the entire west coast designed to accommodate a rail mounted container crane.

**Features and Capabilities, continued****13. Physical Space for Industrial Support**

13.1 Identify in the table below the real estate resources which have the potential to facilitate future development and for which you are the plant account holder or into which, though a tenant, your activity could reasonably expect to expand. Complete a separate table for each individual site, i.e., main base, outlying airfields special off-site areas, etc. The unit of measure is acres. Developed area is defined as land currently with buildings, roads, and utilities where further development is not possible without demolition of existing improvements. Include in "Restricted" areas that are restricted for future development due to environmental constraints (e.g. wetlands, landfills, archaeological sites), operational restrictions (e.g. ESQD arcs, HERO, HERP HERF, AICUZ, ranges) or cultural resources restrictions. Identify the reason for the restriction when providing the acreage in the table. Specify any entry in "Other" (e.g. submerged lands).

Table 13.1: **Real Estate Resources**Site Location: NOCPACDIV DET PORT HADLOCK

| Land Use                           | Total Acres | Developed Acreage | Available for Development |              |
|------------------------------------|-------------|-------------------|---------------------------|--------------|
|                                    |             |                   | Restricted                | Unrestricted |

**Features and Capabilities, continued****14. Facility Measures**

**14.1** Identify the facility and equipment values for all activities under your cognizance in the Table below, as executed and budgeted for the period requested. As applied herein:

- Maintenance of Real Property (MRP) is the budgetary term gathering the expenses or budget requirements for facility work and includes recurring maintenance, major repairs and minor construction (non-MILCON) inclusive of all Major Claimant funded Special Projects. It is the amount of funds spent on or budgeted for maintenance and repair of real property assets to maintain the facility in satisfactory operating condition. For purposes of this Data Call, MRP includes all M1/R1 and M2/R2 expenditures.
- Current Plant Value (CPV) refer to incorporates Class 2 Real Property and is the hypothetical dollar amount required to replace a Class 2 facility in kind at today's dollars (e.g.: the cost today to replace an existing wood frame barracks with another barracks, also wood frame).
- Acquisition Cost of Equipment (ACE) reports the total cumulative acquisition cost of all "Personal Property equipment which includes the cost of installed equipments directly related to mission execution (such as lab test equipment). Class 2 installed capital equipment which is integral to the facility should not be reported as ACE.

Table 14.1: **Expenditures and Equipment Values**

| FY   | MRP (\$ K) | CPV (\$ K) | ACE (\$ K) |
|------|------------|------------|------------|
| 1986 | UNK        | 82311      | UNK        |
| 1987 | UNK        | 83265      | UNK        |
| 1988 | UNK        | 89178      | UNK        |
| 1989 | 1200       | 90514      | UNK        |
| 1990 | 1300       | 92326      | UNK        |
| 1991 | 1400       | 93692      | UNK        |
| 1992 | 1500       | 95378      | 10         |
| 1993 | 950        | 100751     | 97         |
| 1994 | 1052       | 103774     | 90         |
| 1995 | 1992       | 106887     | 86         |
| 1996 | 1200       | 110093     | 83         |
| 1997 | 1997       | 113396     | 72         |

**Features and Capabilities, continued**

**15. Personnel Support Facility Data**

**15.1 Housing and Messing.** Provide data on the BOQs and BEQs assigned to your current plant account. The unit of measure for this capability is number of people housed. Use CCN to differentiate between pay grades (i.e. E1-E4, E5-E6, E7-E9, CWO-O2, O3 and above).

**Table 15.1: Bachelor Housing Facilities**

| Facility Type,<br>Bldg. # & CCN | Total #<br>Beds | Total #<br>Rooms | Adequate |    | Substandard |     | Inadequate |      |
|---------------------------------|-----------------|------------------|----------|----|-------------|-----|------------|------|
|                                 |                 |                  | Beds     | SF | Beds        | SF  | Beds       | SF   |
| 721-11                          | 18              | 9                |          |    |             |     | 18         | 1620 |
| 721-12                          | 4               | 2                |          |    | 1           | 150 | 3          | 540  |
|                                 |                 |                  |          |    |             |     |            |      |
|                                 |                 |                  |          |    |             |     |            |      |

**15.2** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP? Yes.

(A) 721-11 and 721-12 (B) Does not meet UEPH standards for space, life safety building codes or Quality of Life standards. (C) Current use as BEQ. (D) BEQ Rehab cost = \$575K. (E) Alternate use as administrative headquarters = \$275K. (F) BEQ remodel of moderate scope to meet UEPH standards. \$255K FY97 programming. (G) FY93 BASEREP rating of C3.

**15. Personnel Support Facility Data, continued**

**15.3** Provide data on the BOQs and BEQs projected to be assigned to your plant account in FY 1997. The desired unit of measure for this capacity is people housed. Use CCN to differentiate between pay grades, i.e., E1-E4, E5-E6, E7-E9, CWO-O2, O3 and above.

**Table 15.3: Bachelor Housing Facilities**

| Facility Type, Bldg. # & CCN | Total # Beds | Total # Rooms | Adequate |      | Substandard |    | Inadequate |    |
|------------------------------|--------------|---------------|----------|------|-------------|----|------------|----|
|                              |              |               | Beds     | SF   | Beds        | SF | Beds       | SF |

| 721-12                       | 4            | 2             | 4        | 720  | 0           |    | 0          |    |
|                              |              |               |          |      |             |    |            |    |
|                              |              |               |          |      |             |    |            |    |

**15.4** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**15. Personnel Support Facility Data, continued**

**15.5** Provide data on the messing facilities assigned to your current plant account.

**Table 15.5: Messing Facilities**

| Facility Type, CC<br>and Bldg. # | Total<br>SF | Adequate |    | Substandard |    | Inadequate |    | Avg # Noon<br>Meals Served |
|----------------------------------|-------------|----------|----|-------------|----|------------|----|----------------------------|
|                                  |             | Seats    | SF | Seats       | SF | Seats      | SF |                            |
| None                             |             |          |    |             |    |            |    |                            |
|                                  |             |          |    |             |    |            |    |                            |
|                                  |             |          |    |             |    |            |    |                            |
|                                  |             |          |    |             |    |            |    |                            |

**15.6** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**15. Personnel Support Facility Data, continued**

**15.7** Provide data on the messing facilities projected to be assigned to your plant account in FY 1997.

**Table 15.7: Messing Facilities**

| Facility Type, CC<br>and Bldg. # | Total<br>SF | Adequate |    | Substandard |    | Inadequate |    | Avg # Noon<br>Meals Served |
|----------------------------------|-------------|----------|----|-------------|----|------------|----|----------------------------|
|                                  |             | Seats    | SF | Seats       | SF | Seats      | SF |                            |
| None                             |             |          |    |             |    |            |    |                            |
|                                  |             |          |    |             |    |            |    |                            |
|                                  |             |          |    |             |    |            |    |                            |
|                                  |             |          |    |             |    |            |    |                            |

**15.8** In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

**16. Training Facilities**

16.1. By Category Code Number (CCN) (5 digits), complete the following student throughput capacity table for all training facilities (adequate, substandard and inadequate) aboard the installation, including tenant activities. Include all 171-XX and 179-XX CCNs and any other applicable CCN. Following the table, describe how the reported Student Hours/Year capacity was derived. Personnel Capacity (PN) is the total number of seats available for students in spaces used instruction, based on the current configuration and use of the facilities.

*EX: A type of training facility in the category 171-10 is an academic instruction classroom. If you have 1 classrooms with a capacity of 25 students per room, the design capacity reported would be 250. If these classrooms are available 8 hours a day for 300 days in a year, the capacity would be 600,000 student hours per year.*

**Table 16.1: Training Facilities**

| Parent UIC | CCN    | Type of Training Facility | Total # this Type | Personnel Capacity (PN) | Capacity (Student Hours/Year) |
|------------|--------|---------------------------|-------------------|-------------------------|-------------------------------|
|            | 721-11 | CONF ROOM                 | 1                 | 15                      | 36,000                        |
|            | 721-11 | HALL, SOCIAL              | 1                 | 55                      | 132,000                       |

**16. Training Facilities, continued**

**16.2** By facility Category Code Number (CCN), provide the number of hours per year of classroom time require for each course of instruction taught at formal schools on your installation. Include all applicable 171-XX and 179-XX CCNs. For requirements, report in column "A" the number of students per requested year; report in "B" the number of hours each student spends in this training facility for each course; report in "C" the product (AxB) the number of hours of instruction per year.

**Table 16.2: Formal Classroom Training**

CCN: 721-11

| Type of Training Facility | School              | Type of Training         | FY 1993 Requirements |    |      | FY 2001 Requirements |    |       |
|---------------------------|---------------------|--------------------------|----------------------|----|------|----------------------|----|-------|
|                           |                     |                          | A                    | B  | C    | A                    | B  | C     |
| BEQ                       | PRIVATE CONTRACTORS | GEN'L MILITARY & SPECIAL | 180                  | 40 | 7200 | 360                  | 40 | 14400 |
|                           |                     |                          |                      |    |      |                      |    |       |
|                           |                     |                          |                      |    |      |                      |    |       |
|                           |                     |                          |                      |    |      |                      |    |       |

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**DATA CALL 63  
FAMILY HOUSING DATA**

Information on Family Housing is required for use in BRAC-95 return on investment calculations.

|  |                               |
|--|-------------------------------|
| <b>Installation Name:</b>              | NAVORDCEN PAC PORT HADLOCK WA |
| <b>Unit Identification Code (UIC):</b> | 33013                         |
| <b>Major Claimant:</b>                 | NAVSEA                        |

|  |   |
|--|---|
| <b>Percentage of Military Families Living On-Base:</b> | 0 |
| <b>Number of Vacant Officer Housing Units:</b>         | 0 |
| <b>Number of Vacant Enlisted Housing Units:</b>        | 0 |
| <b>FY 1996 Family Housing Budget (\$000):</b>          | 0 |
| <b>Total Number of Officer Housing Units:</b>          | 0 |
| <b>Total Number of Enlisted Housing Units:</b>         | 0 |

Line 4, Percentage of Military Families Living on Base, is taken from DD Form 1377. Lines 7-9, represents the activity's "fair share" of the complex total of the family housing budget and inventory of officer and enlisted units. This data was provided by COMNAVFACENGCOM.

**Note:** All data should reflect figures as of the beginning of FY 1996. If major DON installations share a family housing complex, figures should reflect an estimate of the installation's prorated share of the family housing complex.

## ENVIRONMENTAL DATA CALL

Responses to the following questions provide data that will allow an assessment of the potential environmental impact associated with the closure or realignment of a Navy shore activity. This criterion consists of:

- Endangered/Threatened Species and Biological Habitat
- Wetlands
- Cultural Resources
- Environmental Facilities
- Air Pollution
- Environmental Compliance
- Installation Restoration
- Land/Air/Water Use

As part of the answers to these questions, a *source citation* (e.g., 1993 base loading, 1993 base-wide Endangered Species Survey, 1993 letter from USFWS, 1993 Base Master Plan, 1993 Permit Application, 1993 PA/SI, etc.) must be included. It is probable that, at some point in the future, you will be asked to provide additional information detailing specifics of individual characteristics. In anticipation of this request, supporting documentation (e.g., maps, reports, letters, etc.) regarding answers to these questions should be retained. Information needed to answer these questions is available from the cognizant EFD Planning and Real Estate Divisions, and Environment, Safety, and Health Divisions; and from the activity Public Works Department, and activity Health Monitoring and Safety Offices.

For purposes of the questions associated with land use at your base is *defined as land* (acreage owned, withdrawn, leased, and controlled through easements); *air* (space controlled through agreements with the FAA, e.g., MOAs); *and water* (navigation channels and waters along a base shoreline) *under the control of the Navy*.

### 1. ENDANGERED/THREATENED SPECIES AND BIOLOGICAL HABITAT

**1a.** For federal or state listed endangered, threatened, or category 1 plant and/or animal species on your base, complete the following table. Critical/sensitive habitats for these species are designated by the U. S. Fish and Wildlife Service (USFWS). A species is present on your base if some part of its life-cycle occurs on Navy controlled property (e.g., nesting, feeding, loafing). Important Habitat refers to that number of acres of habitat that is important to some life cycle stage of the threatened/endangered species that is not formally designated.

| SPECIES<br>(plant or animal)                          | Designation<br>(Threatened/<br>Endangered) | Federal/<br>State | Critical /<br>Designated<br>Habitat<br>(Acres) | Importa<br>t<br>Habitat<br>(acres) |
|---|--|-------------------|--|------------------------------------|

**1b.**

|   |    |
|---|----|
| Have your base operations or development plans been constrained due to:<br>- USFWS or National Marine Fisheries Service (NMFS)?<br>- State required modifications or constraints?<br>If so, identify below the impact of the constraints including any restrictions on land | NO |
|---|----|

|   |    |
|---|----|
| use.  |    |
| Are there any requirements resulting from species not residing on base, but which migrate or are present nearby? If so, summarize the impact of such constraints. | NO |

1c. If the area of the habitat and the associated species have not been identified on base maps provided in Data Call 1, submit this information on an updated version of Data Call 1 map.

Maps previously provided.

1d.

|  |    |
|--|----|
| Have any efforts been made to relocate any species and/or conduct any mitigation with regards to critical habitats or endangered/threatened species? Explain what has been done and why. | NO |
|--|----|

1e.

|   |     |
|---|-----|
| Will any state or local laws and/or regulations applying to endangered/threatened species which have been enacted or promulgated but not yet effected, constrain base operations or development plans beyond those already identified? Explain. | YES |
|---|-----|

Will not effect current base operations but may effect future development plans. Construction windows and tree clearing limitations may exist.

## 2. WETLANDS

**Note:** Jurisdictional wetlands are those areas that meet the wetland definitional criteria detailed in the Corps of Engineers (COE) Wetland Delineation Manual, 1987, Technical Report Y-87-1, U.S. Army Engineer Waterway Experiment Station, Vicksburg, MS or officially adapted state definitions.

2a.

|  |      |
|--|------|
| Does your base possess federal jurisdictional wetlands?                                      | YES* |
| Has a wetlands survey in accordance with established standards been conducted for your base? | NO   |
| When was the survey conducted or when will it be conducted? <u>AUG / _____ / 94</u>          |      |
| What percent of the base has been surveyed?  | N/A  |
| What is the total acreage of jurisdictional wetlands present on your base?                   | N/A  |

\*Answer based on informal survey results indicating Port Hadlock Detachment has areas that meet the criteria established in COE manual. This informal survey did not establish boundaries or acreage.

Source Citation: CINDI KUNZ C6032CK ENVIRONMENTAL BRANCH

2b. If the area of the wetlands has not been identified on base maps provided in Data Call 1, submit this on an updated version of Data Call 1 map.

2c. Has the EPA, COE or a state wetland regulatory agency required you to modify or constrain base operations or development plans in any way in order to accommodate a jurisdictional wetland? NO If YES, summarize the results of such modifications or constraints.

## 3. CULTURAL RESOURCES

3a.

|   |     |
|---|-----|
| Has a survey been conducted to determine historic sites, structures, districts or archaeological resources which are listed, or determined eligible for listing, on the | YES |
|---|-----|

|  |  |
|--|--|
| National Register of Historic Places? If so, list the sites below. |  |
|--|--|

None were identified. In 1990, an Archaeological Assessment was conducted to identify primary, secondary and tertiary sites at Port Hadlock.

**3b.** YES/NO

|  |    |
|--|----|
| Has the President's Advisory Council on Historic Preservation or the cognizant State Historic Preservation Officer required you to mitigate or constrain base operations or development plans in any way in order to accommodate a National Register cultural resource? If YES, list the results of such modifications or constraints below. | NO |
|--|----|

**3c.**

|   |     |
|---|-----|
| Are there any on base areas identified as sacred areas or burial sites by Native Americans or others? List below. | YES |
|---|-----|

Walen Point near our ammunition loading pier has a native american burial ground beneath the asphalt parking area and extends out along Walen Point.

**4. ENVIRONMENTAL FACILITIES**

**Notes:** If your facility is permitted for less than maximum capacity, state the maximum capacity and explain below the associated table why it is not permitted for maximum capacity. Under "Permit Status" state when the permit expires, and whether the facility is operating under a waiver. For permit violations, limit the list to the last 5 years.

**4a.**

| Does your base have an operating landfill? ..... |                          |                        |                       | YES   |

|  |                    |                      |                  |               |                    |

List any permit violations and projects to correct deficiencies or improve the facility. NONE

4d.

| Does your base own/operate a Domestic Wastewater Treatment Plant (WWTP) ? |                    |                          |                  |               | YES                           |
|---|--------------------|--------------------------|------------------|---------------|-------------------------------|
| ID/Location of WWTP   | Permitted Capacity | Ave Daily Discharge Rate | Maximum Capacity | Permit Status | Level of Treatment/Year Built |
| EPA ID#WA-002199-7  | 36,000GPD          | 15000GPD                 | 36,000GPD        | EXPIRED       | SECONDARY TREATMENT 1977      |
|   |                    |                          |                  |               |                               |
|   |                    |                          |                  |               |                               |

List permit violations and discuss any projects to correct deficiencies.

Operating under letter from EPA dated Dec 6, 1990

**4e.** If you do not have a domestic WWTP, describe the average discharge rate of your base to the local sanitary sewer authority, discharge limits set by the sanitary sewer authority (flow and pollutants) and whether the base is in compliance with their permit. Discuss recurring discharge violations.

4f.

| Does your base operate an Industrial Waste Treatment Plant (IWTP)? |                   |                    |                          |                  | NO            |
|--|-------------------|--------------------|--------------------------|------------------|---------------|
| ID/Location of IWTP  | Type of Treatment | Permitted Capacity | Ave Daily Discharge Rate | Maximum Capacity | Permit Status |
|  |                   |                    |                          |                  |               |
|  |                   |                    |                          |                  |               |
|  |                   |                    |                          |                  |               |

List any permit violations and projects to correct deficiencies or improve the facility.

4g. Are there other waste treatment flows not accounted for in the previous tables? Estimate capacity and describe the system.

4h.

| Does your base operate drinking Water Treatment Plants (WTP)? |                    |            |                     | NO               |               |
|---|--------------------|------------|---------------------|------------------|---------------|
| ID/Location of WTP  | Operating (GPD)    |            | Method of Treatment | Maximum Capacity | Permit Status |
|   | Permitted Capacity | Daily Rate |                     |                  |               |
|   |                    |            |                     |                  |               |
|   |                    |            |                     |                  |               |
|   |                    |            |                     |                  |               |

List permit violations and projects/actions to correct deficiencies or improve the facility.

**4i.** If you do not operate a WTP, what is the source of the base potable water supply. State terms and limits on capacity in the agreement/contract, if applicable.

PORT TOWNSEND WATER DISTRICT - 100,000 GPD BY CONTRACT.

4j.

|  |   |
|--|---|
| Does the presence of contaminants or lack of supply of water constrain base operations. Explain. | N |
|--|---|

4k.

|   |    |
|---|----|
| Other than those described above does your base hold any NPDES or stormwater permits? If YES, describe permit conditions.   | NO |
| If NO, why not and provide explanation of plan to achieve permitted status.<br><br>We have submitted a NOI to EPA and have developed a SWPP. Implementation of the SWPP is pending completion of DYE studies currently in progress. |    |

4l.

YES/NO

|  |     |
|--|-----|
| Does your base have bilge water discharge problem? | Yes |
| Do you have a bilge water treatment facility?      | NO  |

\* Our facility does not have bilge collection facilities. However, some vessels have requested tanker trucks and/or barges be provided to offload bilge water. The State Department of Ecology is currently requesting all bilge water be sampled to ensure it is not hazardous waste.

4m.

|   |   |
|---|---|
| Will any state or local laws and/or regulations applying to Environmental Facilities, which have been | N |
|---|---|

enacted or promulgated but not yet effected, constrain base operations or development plans beyond those already identified? Explain.

**4n.** What expansion capacity is possible with these Environmental Facilities? Will any expansions/upgrades as a result of BRACON or projects programmed through the Presidents budget through FY1997 result in additional capacity? Explain.

Wastewater treatment facility can be expanded to allow for additional storage. Portable hazardous material storage area can be obtained to increase storage capacity. No expansion/upgrades from BRACON or President's budget are planned.

**4o.** Do capacity limitations on any of the facilities discussed in question 4 pose a present or future limitation on base operations? Explain. POSSIBLE POTABLE WATER LIMITATION. EXPANSION MAY BE LIMITED UNLESS WELLS ARE ACTIVATED TO PROVIDE ADDITIONAL CAPACITY. IN ADDITION, DOMESTIC SEWAGE TREATMENT CAPABILITIES MAY LIMIT FUTURE EXPANSION.

## **5. AIR POLLUTION**

**5a.**

What is the name of the Air Quality Control Areas (AQCA's) in which the base is located?  
\_ OLYMPIC AIR POLLUTION CONTROL AUTHORITY \_\_\_\_\_

Is the installation or any of its OLFs or non-contiguous base properties located in different AQCA's? \_ NO \_  
. List site, location and name of AQCA. N/A

**5b.** For each parcel in a separate AQCA fill in the following table. Identify with and "X" whether the status of each regulated pollutant is: attainment/nonattainment/maintenance. For those areas which are in non-attainment, state whether they are: Marginal, Moderate, Serious, Severe, or Extreme. State target attainment year. N/A

| Pollutant       | Attainment | Non-Attainment | Maintenance | Target Attainment Year <sup>1</sup> | Comments <sup>2</sup> |
|-----------------|------------|----------------|-------------|-------------------------------------|-----------------------|
| CO              | X          |                |             |                                     |                       |
| Ozone           | X          |                |             |                                     |                       |
| PM-10           | X          |                |             |                                     |                       |
| SO <sub>2</sub> | X          |                |             |                                     |                       |
| NO <sub>2</sub> | X          |                |             |                                     |                       |
| Pb              | X          |                |             |                                     |                       |

<sup>1</sup> Based on national standard for Non-Attainment areas or SIP for Maintenance areas.

<sup>2</sup> Indicate if attainment is dependent upon BRACON, MILCON or Special Projects. Also indicate if the project is currently programmed within the Presidents FY1997 budget.

**5c.** For your base, identify the baseline level of emissions, established in accordance with the Clean Air Act. Baseline information is assumed to be 1990 data or other year as specified. Determine the total level of emissions (tons/yr) for CO, NOx, VOC, PM10 for the general sources listed. For all data provide a list of the sources and show your calculations. Use known emissions data, or emissions derived from use of state methodologies, or identify other sources used. "Other Mobile" sources include such items as ground support equipment.

| Emission Sources (Tons/Year) |                      |                      |                    |              |       |
|------------------------------|----------------------|----------------------|--------------------|--------------|-------|
| Pollutant                    | Permitted Stationary | Personal Automobiles | Aircraft Emissions | Other Mobile | Total |
| CO                           | SAME                 | N/A                  | N/A                | SAME         | Same  |
| NOx                          | SAME                 | N/A                  | N/A                | SAME         | Same  |
| VOC                          | SAME                 | N/A                  | N/A                | SAME         | Same  |
| PM10                         | SAME                 | N/A                  | N/A                | SAME         | Same  |

Baseline data is the same as 1993 data.

Source Document: OLYMPIC AIR POLLUTION CONTROL AUTHORITY REGULATION

**5d.** For your base, determine the total FY1993 level of emissions (tons/yr) for CO, NOx, VOC, PM10 for the general sources listed. For all data provide a list of the sources and show your calculations. Use known emissions data, or emissions derived from use of state methodologies, or identify other sources used. "Other Mobile" sources include such items as ground support equipment.

**PUBLICATION AP-42 FOR INDUSTRIAL/COMMERCIAL VEHICLES:**

|        |                                  |
|--------|----------------------------------|
| PM-10: | 6.2 LBS/1,000 GALLONS OF FUEL    |
| NOX:   | 102.0 LBS/1,000 GALLONS OF FUEL  |
| VOC:   | 148.0 LBS/1,000 GALLONS OF FUEL  |
| CO:    | 3940.0 LBS/1,000 GALLONS OF FUEL |

DETACHMENT PORT HADLOCK CONSUMED THE FOLLOWING AMOUNT OF FUEL DURING FY 93:

|          |                          |
|----------|--------------------------|
| UNLEADED | 35,756 GALLONS/YR        |
| DIESEL   | <u>20,288 GALLONS/YR</u> |
| TOTAL    | 56,044                   |

BASED ON THESE FIGURES, THE FOLOWING WAS EMITTED FROM SUPPORT EQUIPMENT DURING FY 93:

|        |                                     |
|--------|-------------------------------------|
| PM-10: | 347.47 LBS/YR = 0.174 TONS/YR       |
| NOX:   | 5,716.50 LBS/YR = 2.858 TONS/YR     |
| VOC:   | 8,294.51 LBS/YR = 4.147 TONS/YR     |
| CO:    | 220,813.36 LBS/YR = 110.407 TONS/YR |

**5e.** Provide estimated increases/decreases in air emissions (Tons/Year of CO, NOx, VOC, PM10) expected within the next six years (1995-2001). Either from previous BRAC realignments and/or previously planned downsizing shown in the Presidents FY1997 budget. Explain. NONE

**5f.** Are there any critical air quality regions (i.e. non-attainment areas, national parks, etc.) within 100 miles of the base? Yes. North Cascade National Parks; Olympic National Park; King County (non-attainment for CO); Pierce County (non-attainment for CO).

**5g.** Have any base operations/mission/functions (i.e.: training, R&D, ship movement, aircraft movement, military operations, support functions, vehicle trips per day, etc.) been restricted or delayed due to air quality considerations. Explain the reason for the restriction and the "fix" implemented or planned to correct. NO

**5h.** Does your base have Emission Reduction Credits (ERCs) or is it subject to any emission offset requirements? If yes, provide details of the sources affected and conditions of the ERCs and offsets. Is there any potential for getting ERCs?

\*There are no requirements for ERC's currently and there is no potential for ERC's in the future.

## 6. ENVIRONMENTAL COMPLIANCE

- 6a. Identify compliance costs, currently known or estimated that are required for permits or other actions required to bring existing practices into compliance with appropriate regulations. Do not include Installation Restoration costs that are covered in Section 7 or recurring costs included in question 6c. For the last two columns provide the two year totals for those FY's.

| Program                                     | Survey Completed? | Costs in \$K to correct deficiencies |      |      |      |         |         |
|---|-------------------|--------------------------------------|------|------|------|---------|---------|
|   |                   | FY94                                 | FY95 | FY96 | FY97 | FY98-99 | FY00-01 |
| Air   | YES               | 7.5                                  | 5    | 5    | 40   | 20      | 0       |
| Hazardous Waste                             | NO                | 0                                    | 200  | 0    | 0    | 0       | 0       |
| Safe Drinking Water Act                     | YES               | 0                                    | 0    | 0    | 0    | 0       | 0       |
| PCBs  | YES               | 8.0                                  | 0    | 0    | 0    | 0       | 0       |
| Other (non-PCB) Toxic Substance Control Act | NO                | 0                                    | 0    | 0    | 0    | 0       | 0       |

| Radon                                       | YES               | 0                                    | 0    | 0    | 0    | 0       | 0       |
| Clean Water Act                             | NO                | 20                                   | 50   | 0    | 0    | 0       | 0       |
| Solid Waste                                 | NO                | 0                                    | 10   | 0    | 0    | 0       | 0       |
| Oil Pollution Act<br>Exempt F/OPA 90        | N/A               | 0                                    | 0    | 0    | 0    | 0       | 0       |
| USTs  | YES               | 0                                    | 25   | 0    | 0    | 0       | 0       |
| Other                                       |                   |                                      |      |      |      |         |         |
| <b>Total</b>                                |                   | 35.5                                 | 290  | 5    | 40   | 20      | 0       |

Provide a separate list of compliance projects in progress or required, with associated cost and estimated start/completion date. CASCADE PAINT BOOTH CONVERSION TO DRY FILTER 7.5K. BEGIN 15 JUL 94 - COMPLETED 29 JUL 94.

6b. Does your base have structures containing asbestos? YES What % of your base has been surveyed for asbestos? 100% Are additional surveys planned? YES. AN O&MN PLAN WILL BE USED TO ESTIMATE COST TO REMEDIATE ASBESTOS (\$K) What is the estimated cost to remediate asbestos (\$K) UNK. Are asbestos survey costs based on encapsulation, removal or a combination of both? COMBINATION

6c. Provide detailed cost of recurring operational (environmental) compliance costs, with funding source.

| Funding Source         | FY1992 | FY1993 | FY1994 | FY1995 | FY1996 | FY1997 | FY98-99 | FY00-01 |
|------------------------|--------|--------|--------|--------|--------|--------|---------|---------|
| <b>O&amp;MN</b>        |        |        |        |        |        |        |         |         |
| HA                     |        |        |        |        |        |        |         |         |
| PA                     |        |        |        |        |        |        |         |         |
| Other O&MN (specify)   |        |        |        |        |        |        |         |         |
| <b>Other (specify)</b> |        |        | 20.9K  | 23.9K  | 23.9K  | 23.9K  | 23.9K   | 23.9K   |
| <b>TOTAL:</b>          |        |        | 20.9K  | 23.9K  | 23.9K  | 23.9K  | 23.9K   | 23.9K   |

6C. \*Breakdown of Cost Per Year:

- Air Permits - \$1,272.00
- Solid Waste Permits - \$150.00
- Pollution Prevention Plan Permits - \$5,000.00
- NPDES Sampling - \$2,000.00
- Stormwater Sampling (95-2001) - \$3,000.00
- RCRA Water Sampling - \$9,700.00
- UST Permitting - \$150.00
- RCRA Permit Fee - \$2,500.00
- Soil Land Farm - \$150.00
- Drinking Water - \$25.00

6d. Are there any compliance issues/requirements that have impacted operations and/or development plans at your base. NO

**7. INSTALLATION RESTORATION**

7a.

|  |     |
|--|-----|
| Does your base have any sites that are contaminated with hazardous substances or petroleum products? | YES |
| Is your base an NPL site or proposed NPL site?   | YES |

7b. Provide the following information about your Installation Restoration (IR) program. Project list may be provided in separate table format. Note: List only projects eligible for funding under the Defense Environmental Restoration Account (DERA). Do not include UST compliance projects properly listed in section VI.

| Site # or name | Type site <sup>1</sup> | Groundwater Contaminated? | Extends off base? | Drinking Water Source? | Cost to Complete (\$M)/Est. Compl. Date | Status <sup>2</sup> /Comments           |
|----------------|------------------------|---------------------------|-------------------|------------------------|---|---|
| SITE 10        | CERCLA                 | INDICATOR CHEMICALS       | NO                | NO                     |   | DRAFT REMEDIAL INVEST/FEASIBILITY STUDY |
| SITE 21        | CERCLA                 | INDICATOR CHEMICALS       | NO                | NO                     |   | DRAFT REMEDIAL INVEST/FEASIBILITY STUDY |
| SITE 11        | CERCLA                 | CADMIUM DETECTED          | NO                | NO                     |   | REMOVAL ACTION                          |
| SITE 12        | CERCLA                 | ARSENIC, CADMIUM          | NO                | NO                     |   | REMOVAL ACTION                          |
| SITE 18        | CERCLA                 | NO                        | NO                | NO                     |   | CONFIRMATION SAMPLING                   |

|         |        |    |    |    |  |                   |
|---------|--------|----|----|----|--|-------------------|
| SITE 15 | CERCLA | NO |    |    |  | NO FURTHER ACTION |
| SITE 19 | CERCLA | NO | NO | NO |  | NO FURTHER ACTION |
| SITE 20 | CERCLA | NO | NO | NO |  | NO FURTHER ACTION |
| SITE 22 | CERCLA | NO | NO | NO |  | NO FURTHER ACTION |

<sup>1</sup> Type site: CERCLA, RCRA corrective action (CA), UST or other (explain)

<sup>2</sup> Status = PA, SI, RI, RD, RA, long term monitoring, etc.

7c. Have any contamination sites been identified for which there is no recognized/accepted remediation process available? List. NO

7d.

|   |    |
|---|----|
| Is there a groundwater treatment system in place? | NO |
| Is there a groundwater treatment system planned?  | NO |

State scope and expected length of pump and treat operation.

7e.

|  |    |
|--|----|
| Has a RCRA Facilities Assessment been performed for your base? | NO |
|--|----|

7f. Does your base operate any "Conforming Storage" facilities for handling **hazardous materials**? If YES, describe facility, capacity, restrictions, and permit conditions.

PORT HADLOCK DETACHMENT DOES NOT CURRENTLY HAVE ANY "CONFORMING HAZARDOUS MATERIAL STORAGE" FACILITIES. THE DETACHMENT IS IN THE PROCESS OF WORKING WITH THE FLEET INDUSTRIAL CENTER (FISC) TO OBTAIN TWO UNITS WHICH WILL BE USED FOR THE STORAGE AND DISPENSING OF HAZARDOUS MATERIAL.

7g. Does your base operate any "Conforming Storage" facilities for handling **hazardous waste**? If YES, describe facility, capacity, restrictions, and permit conditions.

1. TSD FACILITY, 325 SF COVERED STORAGE UNIT. INTERIM STATUS.
2. LESS THAN NINETY DAY ACCUMULATION SITE, 2,496 SF.

7h. Is your base responsible for any non-appropriated fund facilities (exchange, gas station) that require cleanup? If so, describe facility/location and cleanup required/status. *None*

7i.

|  |    |
|--|----|
| Do the results of any radiological surveys conducted indicate limitations on future land use? Explain below. | NO |
|--|----|

**7j.** Have any base operations or development plans been restricted due to Installation Restoration considerations?

No, there have been no restrictions on base operations or development.

**7k.** List any other hazardous waste treatment or disposal facilities not included in question 7b. above. Include capacity, restrictions and permit conditions.

NONE

**8. LAND / AIR / WATER USE**

**8a.** List the acreage of each real estate component controlled or managed by your base (e.g., Main Base - 1,200 acres, Outlying Field - 200 acres, Remote Range - 1,000 acres, remote antenna site - 5 acres, Off-Base Housing Area - 25 acres).

| <b>Parcel Descriptor</b> | <b>Acres</b> | <b>Location</b> |
|--------------------------|--------------|-----------------|
| PORT HADLOCK MAIN BASE   | 2716         | INDIAN ISLAND   |

**8b.** Provide the acreage of the land use categories listed in the table below:

| <b>LAND USE CATEGORY</b> | <b>ACRES</b> |
|--------------------------|--------------|
|--------------------------|--------------|

|  |                          |                       |
|--|--------------------------|-----------------------|
| Total Developed: (administration, operational, housing, recreational, training, etc.)  |                          | 988 ACRES             |
| Total Undeveloped (areas that are left in their natural state but are under specific environmental development constraints, i.e.: wetlands, endangered species, etc.)            |                          | Wetlands: 59 ACRES    |
|  |                          | All Others: 584 ACRES |
| Total Undeveloped land considered to be without development constraints, but which may have operational/man caused constraints (i.e.: HERO, HERF, HERP, ESQD, AICUZ, etc.) TOTAL |                          | 713 ACRES             |
| Total Undeveloped land considered to be without development constraints  |                          | 372 ACRES             |
| Total Off-base lands held for easements/lease for specific purposes  |                          | NONE                  |
| Breakout of undeveloped, restricted areas. Some restricted areas may overlap:  | ESQD                     | 713 ACRES             |
|  | HERF                     | NONE                  |
|  | HERP                     | NONE                  |
|  | HERO                     | NONE                  |
|  | AICUZ                    | NONE                  |
|  | Airfield Safety Criteria | NONE                  |
|  | Other                    | 643                   |

**8c.** How many acres on your base (includes off base sites) are dedicated for training purposes (e.g., vehicular, earth moving, mobilization)? This does not include buildings or interior small arms ranges used for training purposes. NONE

**8d.** What is the date of your last AICUZ update? N/A \_\_\_/\_\_\_/\_\_\_ Are any waivers of airfield safety criteria in effect on your base? N Summarize the conditions of the waivers below.

**8e.** List the off-base land use *types* (e.g, residential, industrial, agricultural) and *acreage* within Noise Zones 2 & 3 generated by your flight operations and whether it is compatible/incompatible with AICUZ guidelines on land use. NO OFF BASE LAND USE.

| Acreage/Location/ID | Zones 2 or 3 | Land Use | Compatible/<br>Incompatible |
|---------------------|--------------|----------|-----------------------------|
|                     |              |          |                             |
|                     |              |          |                             |
|                     |              |          |                             |
|                     |              |          |                             |
|                     |              |          |                             |

**8f.** List the navigational channels and berthing areas controlled by your base which require maintenance dredging? Include the frequency, volume, current project depth, and costs of the maintenance requirement. NO MAINTENANCE DREDGING REQUIRED.

| Navigational<br>Channels/<br>Berthing Areas | Location /<br>Description | Maintenance Dredging Requirement |                 |                                  |               |
|---|---------------------------|----------------------------------|-----------------|----------------------------------|---------------|
|   |                           | Frequency                        | Volume<br>(MCY) | Current Project<br>Depth<br>(FT) | Cost<br>(\$M) |
|   |                           |                                  |                 |                                  |               |
|   |                           |                                  |                 |                                  |               |
|   |                           |                                  |                 |                                  |               |
|   |                           |                                  |                 |                                  |               |
|   |                           |                                  |                 |                                  |               |

8g. Summarize planned projects through FY 1997 requiring **new channel or berthing area** dredged depths, include location, volume and depth. N/A

8h.

|   |     |
|---|-----|
| Are there available <b>designated dredge disposal areas</b> for maintenance dredging material? List location, remaining capacity, and future limitations. | N/A |
| Are there available <b>designated dredge disposal areas</b> for new dredge material? List location, remaining capacity, and future limitations.           | N/A |
| Are the dredged materials considered contaminated? List known contaminants.   | N/A |

8.i. List any requirements or constraints resulting from consistency with **State Coastal Zone Management Plans**. N/A

8j. Describe any **non-point source pollution problems affecting water quality** ,e.g.: coastal erosion.  
NONE

8k.

|   |    |
|---|----|
| If the base has a cooperative agreement with the US Fish and Wildlife Service and/or the State Fish and Game Department for conducting a hunting and fishing program, does the agreement or these resources constrain either current or future operations or activities? Explain the nature and extent of restrictions. | NO |
|---|----|

8l. List any other areas on your base which are indicated as protected or preserved habitat other than threatened/endangered species that have been listed in Section 1. List the species, whether or not treated, and the acres protected/preserved.

COMMERCIAL AND RECREATIONAL CLAM AND OYSTER BEACHES  
THREE GREAT BLUE HERON ROOKERIES. 40 ACRES.

**9. WRAPUP**

9a. Are there **existing or potential environmental showstoppers** that have affected or will affect the accomplishment of the installation mission that have not been covered in the previous 8 questions?  
NONE

9b. Are there any **other environmental permits** required for base operations, include any relating to industrial operations. NOT AT THIS TIME.

**9c. Describe any other environmental or encroachment restrictions on base property not covered in the previous 8 sections. NONE**

**9d. List any future/proposed laws/regulations or any proposed laws/regulations which will constrain base operations or development plans in any way. Explain.**

**NO KNOWN FUTURE OR PROPOSED LAWS/REGULATIONS ARE FORESEEN TO CONSTRAIN BASE OPERATIONS OR DEVELOPMENT PLANS.**

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**Activity Identification:** Please complete the following table, identifying the activity for which this response is being submitted.

|                        |   |
|------------------------|---|
| <b>Activity Name:</b>  | Naval Ordnance Center Pacific Division<br>Detachment Port Hadlock |
| <b>UIC:</b>            | N32013  |
| <b>Major Claimant:</b> | NAVSEASYSKOM  |

**General Instructions/Background:**

Information requested in this data call is required for use by the Base Structure Evaluation Committee (BSEC), in concert with information from other data calls, to analyze both the impact that potential closure or realignment actions would have on a local community and the impact that relocations of personnel would have on communities surrounding receiving activities. In addition to Cost of Base Realignment Actions (COBRA) analyses which incorporate standard Department of the Navy (DON) average cost factors, the BSEC will also be conducting more sophisticated economic and community infrastructure analyses requiring more precise, activity-specific data. For example, activity-specific salary rates are required to reflect differences in salary costs for activities with large concentrations of scientists and engineers and to address geographic differences in wage grade salary rates.

Questions relating to "Community Infrastructure" are required to assist the BSEC in evaluating the ability of a community to absorb additional employees and functions as the result of relocation from a closing or realigning DON activity.

**Due to the varied nature of potential sources which could be used to respond to the questions contained in this data call, a block appears after each question, requesting the identification of the source of data used to respond to the question. To complete this block, identify the source of the data provided, including the appropriate references for source documents, names and organizational titles of individuals providing information, etc. Completion of this "Source of Data" block is critical since some of the information requested may be available from a non-DoD source such as a published document from the local chamber of commerce, school board, etc. Certification of data obtained from a non-DoD source is then limited to certifying that the information contained in the data call response is an accurate and complete representation of the information obtained from the source. Records must be retained by the certifying official to clearly document the source of any non-DoD information submitted for this data call.**

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**General Instructions/Background (Continued):**

**The following notes are provided to further define terms and methodologies used in this data call. Please ensure that responses consistently follow this guidance:**

**Note 1:** Throughout this data call, the term "activity" is used to refer to the DON installation that is the addressee for the data call.

**Note 2:** Periodically throughout this data call, questions will include the statement that the response should refer to the "area defined in response to question 1.b., (page 3)". Recognizing that in some large metropolitan areas employee residences may be scattered among many counties or states, **the scope of the "area defined" may be limited to the sum of:**

- **those counties that contain government (DoD) housing units (as identified in 1.b.2)), and,**
- **those counties closest to the activity which, in the aggregate, include the residences of 80% or more of the activity's employees.**

**Note 3:** Responses to questions referring to "civilians" in this data call should reflect **federal civil service appropriated fund employees.**

**1. Workforce Data**

**a. Average Federal Civilian Salary Rate.** Provide the projected FY 1996 average gross annual appropriated fund **civil service** salary rate for the activity identified as the addressee in this data call. This rate should include all cash payments to employees, and exclude non-cash personnel benefits such as employer retirement contributions, payments to former employees, etc.

|  |                    |
|--|--------------------|
| <b>Average Appropriated Fund Civilian Salary Rate:</b> | <b>\$36,223.00</b> |
|--|--------------------|

|  |
|--|
| <b>Source of Data (1.a. Salary Rate): Defense Civilian Personnel Data System (as of 7/13/94)</b> |
|--|

**DATA CALL 65**  
**ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**b. Location of Residence.** Complete the following table to identify where employees live. Data should reflect current workforce.

**1) Residency Table.** Identify residency data, by county, for both military and civilian (civil service) employees working at the installation (including, for example, operational units that are homeported or stationed at the installation). For each county listed, also provide the estimated average distance from the activity, in miles, of employee residences and the estimated average length of time to commute one-way to work. For the purposes of displaying data in the table, any county(s) in which 1% or fewer of the activity's employees reside may be consolidated as a single line entry in the table, titled "Other".

| County of Residence | State | No. of Employees Residing in County |          | Percentage of Total Employees | Average Distance From Base (Miles) | Average Duration of Commute (Minutes) |
|---------------------|-------|-------------------------------------|----------|-------------------------------|------------------------------------|---------------------------------------|
|                     |       | Military                            | Civilian |                               |                                    |                                       |
| Jefferson           | Wa    | 33                                  | 69       | 82%                           | 7                                  | 15                                    |
| Kitsap              | Wa    | 2                                   | 19       | 17%                           | 35                                 | 45                                    |
| Clallam             | Wa    |                                     | 2        | 1%                            | 40                                 | 55                                    |
|                     |       |                                     |          |                               |                                    |                                       |
|                     |       |                                     |          |                               |                                    |                                       |
|                     |       |                                     |          |                               |                                    |                                       |
|                     |       |                                     |          |                               |                                    |                                       |
|                     |       |                                     |          |                               |                                    |                                       |

= 100%

As discussed in Note 2 on Page 2, subsequent questions in the data call refer to the "area defined in response to question 1.b., (page 3)". In responding to these questions, the scope of the "area defined" may be limited to the sum of: a) those counties that contain government (DoD) housing units (as identified below), and, b) those counties closest to the activity which, in the aggregate, include the residences of 80% or more of the activity's employees.

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**2) Location of Government (DoD) Housing.** If some employees of the base live in government housing, identify the county(s) where government housing is located:

JEFFERSON, COUNTY

**Source of Data (1.b. 1) & 2) Residence Data): Det PH Personnel Records. Dick Barrows Code 6031DB**

**c. Nearest Metropolitan Area(s).** Identify all major metropolitan area(s) (i.e., population concentrations of 100,000 or more people) which are within 50 miles of the installation. If no major metropolitan area is within 50 miles of the base, then identify the nearest major metropolitan area(s) (100,000 or more people) and its distance(s) from the base.

| City    | County | Distance from base<br>(miles) |
|---------|--------|-------------------------------|
| Seattle | King   | 45 Miles                      |
|         |        |                               |
|         |        |                               |
|         |        |                               |
|         |        |                               |

**Source of Data (1.c. Metro Areas): Dick Barrows Code 6031DB**

**DATA CALL 65**  
**ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**d. Age of Civilian Workforce.** Complete the following table, identifying the age of the activity's **civil service** workforce.

| <b>Age Category</b>  | <b>Number of Employees</b> | <b>Percentage of Employees</b> |
|----------------------|----------------------------|--------------------------------|
| <b>16 - 19 Years</b> | 0                          | 0                              |
| <b>20 - 24 Years</b> | 0                          | 0                              |
| <b>25 - 34 Years</b> | 5                          | 5.5                            |
| <b>35 - 44 Years</b> | 35                         | 38.9                           |
| <b>45 - 54 Years</b> | 43                         | 47.8                           |
| <b>55 - 64 Years</b> | 6                          | 6.7                            |
| <b>65 or Older</b>   | 1                          | 1.1                            |
| <b>TOTAL</b>         | 90                         | 100 %                          |

**Source of Data (1.d.) Age Data): Defense Civilian Personnel Data System (as of 7/13/94)**

**DATA CALL 65**  
**ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**e. Education Level of Civilian Workforce**

**1) Education Level Table.** Complete the following table, identifying the education level of the activity's civil service workforce.

| Last School Year Completed                 | Number of Employees | Percentage of Employees |
|--|---------------------|-------------------------|
| 8th Grade or less                          | 1                   | 1.1                     |
| 9th through 11th Grade                     | 3                   | 3.3                     |
| 12th Grade or High School Equivalency      | 65                  | 72.2                    |
| 1-3 Years of College                       | 9                   | 10.0                    |
| 4 Years of College (Bachelors Degree)      | 7                   | 7.8                     |
| 5 or More Years of College (Graduate Work) | 5                   | 5.6                     |
| <b>TOTAL</b>                               | 90                  | 100 %                   |

**2) Degrees Achieved.** Complete the following table for the activity's civil service workforce. Identify the number of employees with each of the following degrees, etc. To avoid double counting, only identify the highest degree obtained by a worker (e.g., if an employee has both a Master's Degree and a Doctorate, only include the employee under the category "Doctorate").

| Degree   | Number of Civilian Employees |
|--|------------------------------|
| Terminal Occupation Program - Certificate of Completion, Diploma or Equivalent (for areas such as technicians, craftsmen, artisans, skilled operators, etc.) |                              |
| Associate Degree   | 4                            |
| Bachelor Degree  | 7                            |
| Masters Degree   | 4                            |
| Doctorate  | 0                            |

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**Source of Data (1.e.1) and 2) Education Level Data): Defense Civilian Personnel Data System  
(as of 7/13/94)**

**f. Civilian Employment By Industry.** Complete the following table to identify by "industry" the type of work performed by civil service employees at the activity. The intent of this table is to attempt to stratify the activity civilian workforce using the same categories of industries used to identify private sector employment. Employees should be categorized based on their primary duties. Additional information on categorization of private sector employment by industry can be found in the Office of Management and Budget Standard Industrial Classification (SIC) Manual. However, you do not need to obtain a copy of this publication to provide the data requested in this table.

Note the following specific guidance regarding the "Industry Type" codes in the first column of the table: Even though categories listed may not perfectly match the type of work performed by civilian employees, please attempt to assign each civilian employee to one of the "Industry Types" identified in the table. However, only use the Category 6, "Public Administration" sub-categories when none of the other categories apply. Retain supporting data used to construct this table at the activity-level, in case questions arise or additional information is required at some future time. **Leave shaded areas blank.**

| Industry  | SIC Codes  | No. of Civilians | % of Civilians |
|---|------------|------------------|----------------|
| <b>1. Agriculture, Forestry &amp; Fishing</b>                               | 01-09      | 1                | 1              |
| <b>2. Construction</b> (includes facility maintenance and repair)           | 15-17      | 1                | 1              |
| <b>3. Manufacturing</b> (includes Intermediate and Depot level maintenance) | 20-39      |                  |                |
| 3a. Fabricated Metal Products (include ordnance, ammo, etc.)                | 34         | 9                | 10             |
| 3b. Aircraft (includes engines and missiles)                                | 3721 et al |                  |                |
| 3c. Ships   | 3731       |                  |                |
| 3d. Other Transportation (includes ground vehicles)                         | various    |                  |                |
| 3e. Other Manufacturing not included in 3a. through 3d.                     | various    |                  |                |

**g. Civilian Employment by Occupation.** Complete the following table to identify the types of "occupations" performed by **civil service** employees at the activity. Employees should be categorized based on their primary duties. Additional information on categorization of employment by occupation can be found in the Department of Labor Occupational Outlook Handbook. However, you do not need to obtain a copy of this publication to provide the data requested in this table.

Note the following specific guidance regarding the "Occupation Type" codes in the first column of the table: Even though categories listed may not perfectly match the type of work performed by civilian employees, please attempt to assign each civilian employee to one of the "Occupation Types" identified in the table. Refer to the descriptions immediately following this table for more information on the various occupational categories. Retain supporting data used to construct this table at the activity-level, in case questions arise or additional information is required at some future time. Leave shaded areas blank.

Description of Occupational Categories used in Table 1.g. The following list identifies public and private sector occupations included in each of the major occupational categories used in the table. Refer to these examples as a guide in determining where to allocate appropriated fund civil service jobs at the activity.

1. **Executive, Administrative and Management.** Accountants and auditors; administrative services managers; budget analysts; construction and building inspectors; construction contractors and managers; cost estimators; education administrators; employment interviewers; engineering, science and data processing managers; financial managers; general managers and top executives; chief executives and legislators; health services managers; hotel managers and assistants; industrial production managers; inspectors and compliance officers, except construction; management analysts and consultants; marketing, advertising and public relations managers; personnel, training and labor relations specialists and managers; property and real estate managers; purchasing agents and managers; restaurant and food service managers; underwriters; wholesale and retail buyers and merchandise managers.
2. **Professional Specialty.** Use sub-headings provided.
3. **Technicians and Related Support.** Health Technologists and Technicians sub-category - self-explanatory. Other Technologists sub-category includes aircraft pilots; air traffic controllers; broadcast technicians; computer programmers; drafters; engineering technicians; library technicians; paralegals; science technicians; numerical control tool programmers.
4. **Administrative Support & Clerical.** Adjusters, investigators and collectors; bank tellers; clerical supervisors and managers; computer and peripheral equipment operators; credit clerks and authorizers; general office clerks; information clerks; mail clerks and messengers; material recording, scheduling, dispatching and distributing; postal clerks and mail carriers; records clerks; secretaries; stenographers and court reporters; teacher aides; telephone, telegraph and teletype operators; typists, word processors and data entry keyers.
5. **Services.** Use sub-headings provided.
6. **Agricultural, Forestry & Fishing.** Self explanatory.
7. **Mechanics, Installers and Repairers.** Aircraft mechanics and engine specialists; automotive body repairers; automotive mechanics; diesel mechanics; electronic equipment repairers; elevator installers and repairers; farm equipment mechanics; general maintenance mechanics; heating, air conditioning and refrigeration technicians; home appliance and power tool repairers, industrial machinery repairers; line installers and cable splicers; millwrights; mobile heavy equipment mechanics; motorcycle, boat and small engine mechanics; musical instrument repairers and tuners; vending machine servicers and repairers.
8. **Construction Trades.** Bricklayers and stonemasons; carpenters; carpet installers; concrete masons and terrazzo workers; drywall workers and lathers; electricians; glaziers; highway maintenance; insulation workers; painters and paperhangers; plasterers; plumbers and pipefitters; roofers; sheet metal workers; structural and reinforcing ironworkers; tilesetters.

**h. Employment of Military Spouses.** Complete the following table to provide estimated information concerning **military spouses** who are also employed in the area defined in response to question 1.b., above. **Do not fill in shaded area.**

|   |       |
|---|-------|
| 1. Percentage of Military Employees Who Are Married:  | 36.4% |
| 2. Percentage of Military Spouses Who Work Outside of the Home:   | 67%   |
| 3. Break out of Spouses' Location of Employment (Total of rows 3a. through 3d. should equal 100% and reflect the number of spouses used in the calculation of the "Percentage of Spouses Who Work Outside of the Home". |       |
| 3a. Employed "On-Base" - Appropriated Fund:   | 12.5  |
| 3b. Employed "On-Base" - Non-Appropriated Fund:   | 12.5  |
| 3c. Employed "Off-Base" - Federal Employment:   | 12.5  |
| 3d. Employed "Off-Base" - Other Than Federal Employment   | 62.5  |

**ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**2. Infrastructure Data.** For each element of community infrastructure identified in the two tables below, rate the community's ability to accommodate the relocation of additional functions and personnel to your activity. Please complete each of the three columns listed in the table, reflecting the impact of various levels of increase (20%, 50% and 100%) in the number of personnel working at the activity (and their associated families). In ranking each category, use one of the following three ratings:

- A - Growth can be accommodated with little or no adverse impact to existing community infrastructure and at little or no additional expense.
- B - Growth can be accommodated, but will require some investment to improve and/or expand existing community infrastructure.
- C - Growth either cannot be accommodated due to physical/environmental limitations or would require substantial investment in community infrastructure improvements.

**Table 2.a., "Local Communities":** This first table refers to the local community (i.e., the community in which the base is located) and its ability to meet the increased requirements of the installation.

**Table 2.b., "Economic Region":** This second table asks for an assessment of the infrastructure of the economic region (those counties identified in response to question 1.b., (page 3) - taken in the aggregate) and its ability to meet the needs of additional employees and their families moving into the area.

**For both tables, annotate with an asterisk (\*) any categories which are wholly supported on-base, i.e., are not provided by the local community. These categories should also receive an A-B-C rating. Answers for these "wholly supported on-base" categories should refer to base infrastructure rather than community infrastructure.**

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

2) For each rating of "C" identified in the table on the preceding page, attach a brief narrative explanation of the types and magnitude of improvements required and/or the nature of any barriers that preclude expansion.

Although the area surrounding the Detachment is primarily rural and vacant land is plentiful, there is a shortage of available housing. Jefferson County is one of the fastest growing counties in western Washington, primarily driven by the attractiveness of the area to retired persons. New single family residences are being built to accommodate this trend, together with hotel and condominium development. A scarcity of affordable rental housing characterises the off-base housing market.

The local school system is at capacity. For each additional 25 students one classroom will have to be built.

ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

2) For each rating of "C" identified in the table on the preceding page, attach a brief narrative explanation of the types and magnitude of improvements required and/or the nature of any barriers that preclude expansion.

Although the area surrounding the Detachment is rural and vacant land is plentiful, availability of affordable off-base housing is limited. Moreover, the local school system is already full. A new classroom will have to be built for each additional 25 students. There are no barriers that would preclude expansion and market forces would respond to demand for additional rental and purchase units.

**Source of Data (2.b. 1) & 2) - Regional Table): Dick Barrows Det PH Code 6031DB**

**DATA CALL 65**

Activity: N32013

**3. Public Facilities Data:**

- a. **Off-Base Housing Availability.** For the counties identified in the response to question 1.b. (page 3), in the aggregate, estimate the current average vacancy rate for community housing. Use current data or information identified on the latest family housing market analysis. For each of the categories listed (rental units and units for sale), combine single family homes, condominiums, townhouses, mobile homes, etc., into a single rate:

**Rental Units:**

Jefferson, County - 5% 2400 total rental units in county of which 35-50 units are advertised as available on a weekly average. An unknown percentage of the 2400 total units are summer rentals only. The largest property management realtor in the area reports a current inventory of 165 rental properties of which 8 are vacant and available for rental. This latter figure is taken to characterise the whole county.

**Units for Sale:**

Jefferson, County - 4% Approximately 8000 housing units are found in Jefferson County. 400 sale units total are available. Assumption is made that 1% of units exceeds affordability of average employees wage rate.

NOTE: Vacancy rate of 5% or lower is considered "scarce" by the Jefferson County Planning Department

**Source of Data (3.a. Off-Base Housing): Suzanna Inman, Century 21; John Doney ,  
Coldwell Banker, John Morgansen Jefferson County Planning Department**

**c. Transportation.**

1) Is the activity served by public transportation?

|         | <u>Yes</u> | <u>No</u> |
|---------|------------|-----------|
| Bus:    | —          | <u>X</u>  |
| Rail:   | —          | <u>X</u>  |
| Subway: | —          | <u>X</u>  |
| Ferry:  | —          | <u>X</u>  |

**Source of Data (3.c.1) Transportation): Dick Barrows Det PH C/6031DB**

2) Identify the location of the nearest passenger railroad station (long distance rail service, not commuter service within a city) and the distance from the activity to the station.

Union Station, 303 S. Jackson Street in downtown Seattle is accessible by highway (46 miles) plus thirty minute ferry crossing.

**Source of Data (3.c.2) Transportation): AAA Auto Club Insurance Agcy.**

3) Identify the name and location of the nearest commercial airport (with public carriers, e.g., USAIR, United, etc.) and the distance from the activity to the airport.

SEATAC (Seattle Tacoma) International Airport - 95 highway miles via Tacoma.  
Bremerton National Airport - 7 miles southwest of Bremerton.

**Source of Data (3.c.3) Transportation): AAA Auto Club and Summary Report for Master Plan NAVORDCENPACDIV Det Port Hadlock**

4) How many carriers are available at this airport?

SEATAC is serviced by all major domestic and international carriers.

Jefferson County International - 8 miles west on State Route 19. Serves private corporate and charter aircraft with demand charter connecting flights to the areas major airports.

Bremerton National Airport is serviced by Federal Express and United Parcel Service flights and offers demand charter service flights to SeaTac for connecting flights by all major carriers.

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

5) What is the Interstate route number and distance, in miles, from the activity to the nearest Interstate highway?

Interstate #5 is most commonly accessed by combining 40 driving miles and a thirty minute ferry crossing from Kingston to Edmonds north of Seattle or alternately from Winslow on Bainbridge Island to downtown Seattle. The overland route via Tacoma is 79 miles.

**Source of Data (3.c.5) Transportation): Dick Barrows Det PH C/6031DB**

6) Access to Base:

a) Describe the quality and capacity of the road systems providing access to the base, specifically during peak periods. (Include both information on the area surrounding the base and information on access to the base, e.g., numbers of gates, congestion problems, etc.)

State Route 116 is a two lane road crossing Portage Canal and branching at the Island security gate to serve Marrowstone Island. There is adequate passage for material transport and for personnel at present and expected future levels of station activity. The explosive truck route to the Naval Undersea Warfare Center Bangor Annex is over State Route 19 through Port Hadlock. This route is an asphalt-concrete paved road in good condition having driving lanes no less than 11 feet. An alternate route for personnel and inert material transport is along Oak Bay Road which has a chip seal surface in good condition and driving lanes of at least 11 feet.

b) Do access roads transit residential neighborhoods?

No access roads transit residential neighborhoods.

c) Are there any easements that preclude expansion of the access road system?

In all cases access roads to the base are older State roads with 60 foot easements. No other easements preclude expansion of these roads.

d) Are there any man-made barriers that inhibit traffic flow (e.g., draw bridges, etc.)?

There is a single bridge access to the base across the Portage Canal which could isolate the base should the bridge be rendered unuseable for any reason. The Hood Canal bridge on Route 104 has a draw span for passing ship traffic which can delay, though not normally inhibit traffic flow. Occasional bridge closures occur for short periods during severe wind storms.

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

**Source of Data (3.c.6) Transportation): Bob Henderson, Jefferson County Dept. of Public Works. Dick Barrows Det PH C/6031DB**

- d. **Fire Protection/Hazardous Materials Incidents.** Does the activity have an agreement with the local community for fire protection or hazardous materials incidents? Explain the nature of the agreement and identify the provider of the service.

Though the Detachment is served by its own Fire Department, there is a reciprocal mutual aid agreement in effect with Jefferson County Fire District No. 1 (Chimacum Fire Dept.). For HAZ-MAT incidents Fire District No. 1 will respond with coordination through the Jefferson County Sheriffs Office.

**Source of Data (3.d. Fire/Hazmat): Don Gillis Det PH C/6034**

- e. **Police Protection.**

- 1) What is the level of legislative jurisdiction held by the installation?

Concurrent

- 2) If there is more than one level of legislative jurisdiction for installation property, provide a brief narrative description of the areas covered by each level of legislative jurisdiction and whether there are separate agreements for local law enforcement protection.

The Jefferson County Sheriff's office may pursue suspects onto installation property though no written agreement exists. The Sheriff's Office will also pick-up and detain subjects upon request from activity security officer. Under cooperative agreement with Washington State Department of Wildlife, State Fisheries and Game officers will respond for game law enforcement.

- 3) Does the activity have a specific written agreement with local law enforcement concerning the provision of local police protection?

No agreement currently exists.

- 4) If agreements exist with more than one local law enforcement entity, provide a brief narrative description of whom the agreement is with and what services are covered.

None

**DATA CALL 65**  
**ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

5) If military law enforcement officials are routinely augmented by officials of other federal agencies (BLM, Forest Service, etc.), identify any written agreements covering such services and briefly describe the level of support received.

The US Coast Guard has jurisdictional authority of the waters surrounding the Detachment. A written agreement exists with the Coast Guard wherein the Detachment provides storage for Coast Guard regional spill response materials.

|   |
|---|

|---|

f. **Utilities.**

1) Does the activity have an agreement with the local community for water, refuse disposal, power or any other utility requirements? Explain the nature of the agreement and identify the provider of the service.

Water for the base is provided by agreement with Port Townsend Water District. In addition to the 100,000 GPD contracted by the Detachment, 70,000 GPD is delivered to the Detachment water system as backup capacity under agreement between the City of Port Townsend and the Washington State Department of Parks. A pipeline crossing the Detachment delivers demand quantities to the parks on Marrowstone Island and the National Marine Fisheries Laboratory on Marrowstone Island.

The Detachment operates a primary and secondary sewage treatment plant and is permitted to discharge 35,000 GPD.

Electrical service is provided by Puget Sound Power and Light Company.

Telephone service is provided by U.S. West.

Solid Waste is collected by the Base Operating Services Contractor and delivered to the Jefferson County Landfill. Current volume is 160 Cubic Yards every two weeks. No limits are imposed for solid wastes originating in Jefferson County. A new transfer station is under construction which will increase disposal capabilities in Jefferson County by 50%.

2) Has the activity been subject to water rationing or interruption of delivery during the last five years? If so, identify time period during which rationing existed and the restrictions imposed. Were activity operations affected by these situations? If so, explain extent of impact.

No

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity: N32013

3) Has the activity been subject to any other significant disruptions in utility service, e.g., electrical "brown outs", "rolling black outs", etc., during the last five years? If so, identify time period(s) covered and extent/nature of restrictions/disruption. Were activity operations affected by these situations? If so, explain extent of impact.

The most significant disruption of utility service occurring in the last five years was during December 1990. During this storm winds in excess of fifty mile per hour knocked out electrical service at the Detachment for a period of four days. A number of portable generators were rotated between buildings to operate boilers and keep pipes from bursting. Some freeze damage was experienced. Occupants of family housing without fireplaces were temporarily relocated to the BEQ. Productive work on the Island was effectively suspended for the four days. On average about one significant outage (lasting more than eight hours) per year can be expected. The Detachment has acquired additional emergency generators and is developing an emergency power plan.

|---|

**5. Other Socio-Economic Impacts.** For each of the following areas, describe other recent (past 5 years), on-going or projected economic impacts (both positive and negative) on the geographic region defined by your response to question 1.b. (page 3), in the aggregate:

a. Loss of Major Employers:

Jefferson County has experienced a 2% increase in unemployment from 1991 to 1992, with an overall flat unemployment rate of about 6.5% for the latest five year period for which data is available. The greatest sector loss of employment in Jefferson County has been in the resource-based industries, primarily logging and small mill operations and fishing. Tourism has been recognized as one of Washington States top revenue producing industries and in Jefferson County the growth of tourism based industry has far outpaced population growth. Though Jefferson County has experienced the fourth fastest rate of population growth in the state, 27% from 1980-1990, 16% of new residents were below the poverty level and overall 13% of county residents live below the poverty level.

b. Introduction of New Businesses/Technologies:

New Business Starts (1992) in Jefferson County:

- Construction - 50 jobs
- Manufacturing - 15 jobs
- Wholesale Trade - 14 jobs
- Retail Trade - 89 jobs
- Services - 96 jobs
- All Other - 39 jobs

Note: Numbers reported are new business licenses issued in 1992.

c. Natural Disasters:

No significant natural disasters in Jefferson County in the last five years

d. Overall Economic Trends:

Jefferson County's retail trade industry has benefited from the increase in resident population and the growth of tourism. A significant contribution to the economy of Jefferson County has been growth in marine trade primary service for both commercial and recreational vessels. Residential construction

**DATA CALL 65  
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

in the county will continue to benefit from the availability of modestly priced vacant land and the attractiveness of the area to retired persons relocating from urban areas both within and outside the state.

**Source of Data (5. Other Socio/Econ): Donna Marvin, Economic Development Council of Jefferson County - Dick Barrows Det PH C/6031DB**

**6. Other.** Identify any contributions of your activity to the local community not discussed elsewhere in this response.

Detachment Port Hadlock's stable workforce are long term contributors to the economy and cultural life of this small rural community. Important roles are played by Detachment military and civilian personnel in the schools systems, the Chamber of Commerce of Port Hadlock and within local government. Activity civil and military personnel participate in tutor and mentor programs with local schools. The Detachment organizes and hosts the annual Navy Anniversary Ball, the Port Hadlock Days and July Fourth celebrations and visits by area schools and community groups.

The Detachment has pursued a good neighbor policy with the local community through discussion and involvement of community leaders in review committees touching sensitive environmental issues affecting the Detachment, i.e Installation Restoration Planning. In 1991 the Detachment received the Secretary of the Navy Environmental Quality Award in recognition of outstanding efforts in environmental protection.

The outstanding recreational resources at the Detachment are made available to other activity military and civil service employees and retired military persons in the local area. Detachment facilities include a small exchange, recreational equipment, camp sites and hunting and fishing resources. By Federal and State agreement, Indian Tribes are permitted to harvest up to 150,000 pounds of shellfish each year at the Detachment.

Port Hadlock provides an important small boat emergency response capability that has supported local efforts to contain and clean-up hazardous waste spills at the port of Port Townsend. The Detachment maintains a storage facility for Coast Guard regional area spill response equipment. Activity personnel involved in waterfront security have rescued boaters and property during storms and at other times.

The induced economic impact to the local community of payrolls and secondary services and materials purchases by the Detachment can be estimated to exceed 6 million dollars annually.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**DATA CALL 66  
INSTALLATION RESOURCES**

ACTIVITY: N32013

**Activity Information:**

|  |                                   |
|--|-----------------------------------|
| Activity Name:   | NAVORDCEN PACDIV PORT HADLOCK DET |
| UIC:   | N32013                            |
| Host Activity Name (if response is for a tenant activity): | N/A                               |
| Host Activity UIC:   | N/A                               |

**General Instructions/Background.** A separate response to this data call must be completed for each Department of the Navy (DON) host, independent and tenant activity which separately budgets BOS costs (regardless of appropriation), and, is located in the United States, its territories or possessions.

**1. Base Operating Support (BOS) Cost Data.** Data is required which captures the total annual cost of operating and maintaining Department of the Navy (DON) shore installations. Information must reflect FY 1996 budget data supporting the FY 1996 NAVCOMPT Budget Submit. Two tables are provided. Table 1A identifies "Other than DBOF Overhead" BOS costs and Table 1B identifies "DBOF Overhead" BOS costs. These tables must be completed, as appropriate, for all DON host, independent or tenant activities which separately budget BOS costs (regardless of appropriation), and, are located in the United States, its territories or possessions. Responses for DBOF activities may need to include both Table 1A and 1B to ensure that all BOS costs, including those incurred by the activity in support of tenants, are identified. If both table 1A and 1B are submitted for a single DON activity, please ensure that no data is double counted (that is, included on both Table 1A and 1B). The following tables are designed to collect all BOS costs currently budgeted, regardless of appropriation, e.g., Operations and Maintenance, Research and Development, Military Personnel, etc. Data must reflect FY 1996 and should be reported in thousands of dollars.

**DATA CALL 66  
INSTALLATION RESOURCES**

ACTIVITY: N32013

**a. Table 1A - Base Operating Support Costs (Other Than DBOF Overhead).** This Table should be completed to identify "Other Than DBOF Overhead" Costs. Display, in the format shown on the table, the O&M, R&D and MPN resources currently budgeted for BOS services. O&M cost data must be consistent with data provided on the BS-1 exhibit. Report only direct funding for the activity. Host activities should not include reimbursable support provided to tenants, since tenants will be separately reporting these costs. Military personnel costs should be included on the appropriate lines of the table. Please ensure that individual lines of the table do not include duplicate costs. Add additional lines to the table (following line 2j., as necessary, to identify any additional cost elements not currently shown). **Leave shaded areas of table blank.**

| <b>Table 1A - Base Operating Support Costs (Other Than DBOF Overhead)</b> |                           |                    |       |

| 2i. Administration                          | 18    | 79  | 97    |
| 2j. Other (Security)                        | 1,460 | 0   | 1,460 |
| 2k. Other (Service Wide Supply)             | 0     | 0   | 0     |
| 2l. Other (Engineering Support)             | 0     | 0   | 0     |
| 2m. Other (Disaster Prep)                   | 0     | 0   | 0     |
| 2n. Other (Food Service - Galley)           | 0     | 0   | 0     |
| <b>2o. Sub-total 2a. through 2n:</b>        | 1,561 | 115 | 1,676 |
| <b>3. Grand Total (sum of 1c. and 2o.):</b> | 1,622 | 115 | 1,737 |

**b. Funding Source.** If data shown on Table 1A reflects more than one appropriation, then please provide a break out of the total shown for the "3. Grand-Total" line, by appropriation:

| <u>Appropriation</u> | <u>Amount (\$000)</u> |
|----------------------|-----------------------|
| O&M,N                | \$1,737               |

**c. Table 1B - Base Operating Support Costs (DBOF Overhead).** This Table should be submitted for all current DBOF activities. Costs reported should reflect BOS costs supporting the DBOF activity itself (usually included in the G&A cost of the activity). For DBOF activities which are tenants on another installation, total cost of BOS incurred by the tenant activity for itself should be shown on this table. It is recognized that differences exist among DBOF activity groups regarding the costing of base operating support: some groups reflect all such costs only in general and administrative (G&A), while others spread them between G&A and production overhead. Regardless of the costing process, all such costs should be included on Table 1B. The

**DATA CALL 66  
INSTALLATION RESOURCES**

ACTIVITY: N32013

Minor Construction portion of the FY 1996 capital budget should be included on the appropriate line. Military personnel costs (at civilian equivalency rates) should also be included on the appropriate lines of the table. Please ensure that individual lines of the table do not include duplicate costs. Also ensure that there is no duplication between data provided on Table 1A. and 1B. These two tables must be mutually exclusive, since in those cases where both tables are submitted for an activity, the two tables will be added together to estimate total BOS costs at the activity. Add additional lines to the table (following line 2l., as necessary, to identify any additional cost elements not currently shown). **Leave shaded areas of table blank.**

Other Notes: All costs of operating the five Major Range Test Facility Bases at DBOF activities (even if direct RDT&E funded) should be included on Table 1B. Weapon Stations should include underutilized plant capacity costs as a DBOF overhead "BOS expense" on Table 1B.

ACTIVITY: N32013

**2. Services/Supplies Cost Data.** The purpose of Table 2 is to provide information about projected FY 1996 costs for the purchase of services and supplies by the activity. **(Note: Unlike Question 1 and Tables 1A and 1B, above, this question is not limited to overhead costs.)** The source for this information, where possible, should be either the NAVCOMPT OP-32 Budget Exhibit for O&M activities or the NAVCOMPT UC/FUND-1/IF-4 exhibit for DBOF activities. Information must reflect FY 1996 budget data supporting the FY 1996 NAVCOMPT Budget Submit. Break out cost data by the major sub-headings identified on the OP-32 or UC/FUND-1/IF-4 exhibit, disregarding the sub-headings on the exhibit which apply to civilian and military salary costs and depreciation. Please note that while the OP-32 exhibit aggregates information by budget activity, this data call requests OP-32 data for the activity responding to the data call. Refer to NAVCOMPTINST 7102.2B of 23 April 1990, Subj: Guidance for the Preparation, Submission and Review of the Department of the Navy (DON) Budget Estimates (DON Budget Guidance Manual) with Changes 1 and 2 for more information on categories of costs identified. Any rows that do not apply to your activity may be left blank. However, totals reported should reflect all costs, exclusive of salary and depreciation.

| <b>Table 2 - Services/Supplies Cost Data</b>             |                                       |

**3. Contractor Workyears.**

**a. On-Base Contract Workyear Table.** Provide a projected estimate of the number of contract workyears expected to be **performed "on base"** in support of the installation during FY 1996. Information should represent an annual estimate on a full-time equivalency basis. Several categories of contract support have been identified in the table below. While some of the categories are self-explanatory, please note that the category "mission support" entails management support, labor service and other mission support contracting efforts, e.g., aircraft maintenance, RDT&E support, technical services in support of aircraft and ships, etc.

| <b>Table 3 - Contract Workyears</b>                     |   |
|---|---|

INSTALLATION RESOURCES**

ACTIVITY: N32013

**b. Potential Disposition of On-Base Contract Workyears.** If the mission/functions of your activity were relocated to another site, what would be the anticipated disposition of the **on-base contract workyears** identified in Table 3.?

1) Estimated number of contract workyears which would be transferred to the receiving site (This number should reflect the number of jobs which would in the future be contracted for at the receiving site, not an estimate of the number of people who would move or an indication that work would necessarily be done by the same contractor(s)):

**81** Workyears

2) Estimated number of workyears which would be eliminated:

**43** Workyears

3) Estimated number of contract workyears which would remain in place (i.e., contract would remain in place in current location even if activity were relocated outside of the local area):

**0** Workyears

**DATA CALL 66  
INSTALLATION RESOURCES**

ACTIVITY: N32013

**c. "Off-Base" Contract Workyear Data.** Are there any contract workyears located in the local community, but not on-base, which would either be eliminated or relocated if your activity were to be closed or relocated? If so, then provide the following information (**ensure that numbers reported below do not double count numbers included in 3.a. and 3.b., above**):

| No. of Additional Contract Workyears Which Would Be Eliminated | General Type of Work Performed on Contract (e.g., engineering support, technical services, etc.) |
|--|--|
| 0  |  |

| No. of Additional Contract Workyears Which Would Be Relocated | General Type of Work Performed on Contract (e.g., engineering support, technical services, etc.) |
|---|--|
| 0   |  |

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

BRAC DATA CALL NUMBER 64  
CONSTRUCTION COST AVOIDANCE

Information on cost avoidance which could be realized as the result of cancellation of on-going or programmed construction projects is provided in Tables 1 (MILCON) and 2 (FAMILY HOUSING). These tables list MILCON/FAMILY HOUSING projects which fall within the following categories:

1. all programmed construction projects included in the FY1996 - 2001 MILCON/FAMILY HOUSING Project List,
2. all programmed projects from FY1995 or earlier for which cost avoidance could still be obtained if the project were to be canceled by 1 OCT 1995, and,
3. all programmed BRAC MILCON/FAMILY HOUSING projects for which cost avoidance could still be obtained if the project were to be canceled by 1 OCT 1995.

Projects listed in Tables 1 and 2 with potential cost avoidance were determined as meeting any one of the following criteria:

Projects with projected Work in Place (WIP) less than 75% of the Current Working Estimate (CWE) as of 1 OCT 1995 .

Projects with projected completion dates or Beneficial Occupancy Dates subsequent to 31 March 1996.

Projects with projected CWE amount greater than \$15M.

The estimated cost avoidance for projects terminated after construction award would be approximately one-half of the CWE for the remaining work. Close-out, claims and other termination costs can consume the other half.
