Dear Commissioner James T. Hill,

I know you have received many letters from our community considering the potential closing of Cannon Air Force Base.

I really find it hard to write a letter concerning this because I guess I thought we would not be faced with this situation.

I am not going to go into all the details why Cannon should absolutely not be closed (such as perfect flying weather, no encroachments, bombing range, new super sonic easements, etc.) So I just want to add a couple of personal touches.

I have lived in Clovis since 1963 – I was ten when I moved from West Texas to Clovis. I attended school here and graduated from high school in 1971. Some of my fondest memories are from my friends who were children of military parents. Having the military friends brought our schools and community diversity, which small towns like ours needs.

In 1970, I met an airman stationed at Cannon and on June 24, 2005 the day of the BRAC hearing here in Clovis, we will celebrate our 33rd wedding anniversary. We have two children who attended the Clovis public schools both graduates of Clovis High and the University of New Mexico. Our son is a stockbroker and our daughter is a nurse practitioner who practices here in Clovis. We have three grandchildren which two of them live in Clovis. My hope is that they will be able to stay in this area if they choose. But if Cannon closes it is doubtful they could.

As I mentioned earlier, the Air Force brought my husband to Cannon Air Force Base. He joined the Air Force in 1969, the same year he and his family buried his brother who was killed in action in Vietnam in May 1969. My husband, Don is very proud of the fact that he was stationed at Cannon

Air Force Base and believes it is critical to our nation's defense. **BRAC Commission**
this because our country and our base means a lot to our family and **RECEIVED**
brother, Richard L. Brumfield paid the ultimate sacrifice.
6/23/2005

Some people may say that the main reason we all care so much is because of the economic impact the closing of Cannon will have on our area.

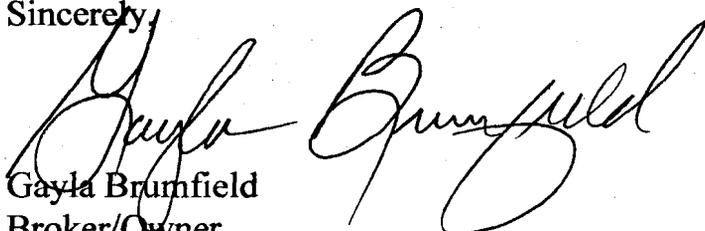

Of course I'm concerned about that as I've been in real estate here for 32 years and have owned my own company since 1985. I've worked hard in all kinds of markets to make Clovis a better place to live. And Cannon closing would have a huge impact on the real estate industry here. Many people would have to move out of town.

We've built up a solid company one based on integrity and professionalism. We work diligently to find suitable and affordable housing for our military members. Many of us serves on the community college board, hospital board, economic development board, military affairs committee, and most all Realtor committees. So I guess you could say that we try to give back to our community and to our military friends. We work side by side for United Way and Habitat for Humanity helping the less fortunate in our area.

The closing of the base would devastate our community not just economically but socially and culturally. I can not imagine Cannon not being here. The reason I don't want to lose the base is because I love hearing the jets fly it makes me proud, I like seeing our military people out eating, going to church, shopping at the mall, attending our chamber and community events – another words they're our friends and it would be heartbreaking to see them go.

Please reconsider Cannon's potential closing – I believe when you look at the facts you in your wisdom and logical thinking, will see the flaws in the BRAC process and Cannon and our community will WIN!

Sincerely,

Gayla Brumfield
