ENVIRONMENTAL DATA CALL

Responses to the following questions provide data that will allow an assessment of the potential environmental impact associated with the closure or realignment of a Navy shore activity. This criterion consists of:

- Endangered/Threatened Species and Biological Habitat
- Wetlands
- Cultural Resources
- Environmental Facilities
- Air Pollution
- Environmental Compliance
- Installation Restoration
- Land/Air/Water Use

As part of the answers to these questions, a *source citation* (e.g., 1993 base loading, 1993 base-wide Endangered Species Survey, 1993 letter from USFWS, 1993 Base Master Plan, 1993 Permit Application, 1993 PA/SI, etc.) must be included. It is probable that, at some point in the future, you will be asked to provide additional information detailing specifics of individual characteristics. In anticipation of this request, supporting documentation (e.g., maps, reports, letters, etc.) regarding answers to these questions should be retained. Information needed to answer these questions is available from the cognizant EFD Planning and Real Estate Divisions, and Environment, Safety, and Health Divisions; and from the activity Public Works Department, and activity Health Monitoring and Safety Offices.

For purposes of the questions associated with land use at your base is *defined as land* (acreage owned, withdrawn, leased, and controlled through easements); *air* (space controlled through agreements with the FAA, e.g., MOAs); *and water* (navigation channels and waters along a base shoreline) *under the control of the Navy*.

Provide a list of the tenant activities with UICs that are covered in this response.

NONE

1. ENDANGERED/THREATENED SPECIES AND BIOLOGICAL HABITAT

1a. For federal or state listed endangered, threatened, or category 1 plant and/or animal species on your base, complete the following table. Critical/sensitive habitats for these species are designated by the U. S. Fish and Wildlife Service (USFWS). A species is present on your base if some part of its life-cycle occurs on Navy controlled property (e.g., nesting, feeding, loafing). Important Habitat refers to that number of acres of habitat that is important to some life cycle stage of the threatened/endangered species that is not formally designated.

SPECIES (plant or animal)	Designation (Threatened/ Endangered)	Federal/ State	Critical / Designated Habitat (Acres)	Important Habitat (acres)
NONE	N/A	N/A	N/A	N/A

Source Citation: SRF ENVIRONMENTAL OFFICE

1b.

Have your base operations or development plans been constrained due to: - USFWS or National Marine Fisheries Service (NMFS)? - State required modifications or constraints? If so, identify below the impact of the constraints including any restrictions on land use.	NO
Are there any requirements resulting from species not residing on base, but which migrate or are present nearby? If so, summarize the impact of such constraints.	NO

1c. If the area of the habitat and the associated species have not been identified on base maps

provided in Data Call 1, submit this information on an updated version of Data Call 1 map.

N/A

1d.

Have any efforts been made to relocate any species and/or conduct any mitigation with regards to critical habitats or endangered/threatened species? Explain what has been done and why.	NO
--	----

1e.

Will any state or local laws and/or regulations applying to endangered/threatened species which have been enacted or promulgated but not yet effected, constrain base operations or development plans beyond those already identified? Explain.	NO
---	----

2. WETLANDS

Note: Jurisdictional wetlands are those areas that meet the wetland definitional criteria detailed in the Corps of Engineers (COE) Wetland Delineation Manual, 1987, Technical Report Y-87-1, U.S. Army Engineer Waterway Experiment Station, Vicksburg, MS or officially adapted state definitions.

2a.

Does your base possess federal jurisdictional wetlands?	YES
Has a wetlands survey in accordance with established standards been conducted for your base?	NO
When was the survey conducted or when will it be conducted? ____ / ____ / ____	N/A
What percent of the base has been surveyed?	N/A
What is the total acreage of jurisdictional wetlands present on your base?	10

Source Citation: _NAVAL STATION GUAM, NATURAL RESOURCE MANAGEMENT PLAN DATED SEPTEMBER 1990

2b. If the area of the wetlands has not been identified on base maps provided in Data Call 1, submit this on an updated version of Data Call 1 map.

2c. Has the EPA, COE or a state wetland regulatory agency required you to modify or constrain base operations or development plans in any way in order to accommodate a jurisdictional wetland? X NO _____ If YES, summarize the results of such modifications or constraints.

3. CULTURAL RESOURCES

3a.

Has a survey been conducted to determine historic sites, structures, districts or archaeological resources which are listed, or determined eligible for listing, on the National Register of Historic Places? If so, list the sites below.	NO
--	----

3b.

YES/NO

Has the President's Advisory Council on Historic Preservation or the cognizant State Historic Preservation Officer required you to mitigate or constrain base operations or development plans in any way in order to accommodate a National Register cultural resource? If YES, list the results of such modifications or constraints below.	NO
--	----

3c.

Are there any on base areas identified as sacred areas or burial sites by Native Americans or others? List below.	NO
---	----

4. ENVIRONMENTAL FACILITIES

Notes: If your facility is permitted for less than maximum capacity, state the maximum capacity and explain below the associated table why it is not permitted for maximum capacity. Under "Permit Status" state when the permit expires, and whether the facility is operating under a waiver. For permit violations, limit the list to the last 5 years.

4a.

Does your base have an operating landfill?					NO
ID/Location of Landfill	Permitted Capacity (CYD)		Maximum Capacity (CYD)	Contents ¹	Permit Status
	TOTAL	Remaining			
N/A	N/A	N/A	N/A	N/A	N/A

¹ Contents (e.g. building demolition, asbestos, sanitary debris, etc)

Are there any current or programmed projects to correct deficiencies or improve the facility.

N/A

4b. If there are any non-Navy users of the landfill, describe the user and conditions/agreements.

N/A

4c.

Does your base have any disposal, recycling, or incineration facilities for solid waste?					NO
Facility/Type of Operation	Permitted Capacity	Ave Daily Throughput	Maximum Capacity	Permit Status	Comments
N/A	N/A	N/A	N/A	N/A	N/A

List any permit violations and projects to correct deficiencies or improve the facility.

N/A

4d.

Does your base own/operate a Domestic Wastewater Treatment Plant (WWTP) ?					NO
ID/Location of WWTP	Permitted Capacity	Ave Daily Discharge Rate	Maximum Capacity	Permit Status	Level of Treatment/Year Built
N/A	N/A	N/A	N/A	N/A	N/A

List permit violations and discuss any projects to correct deficiencies.

N/A

4e. If you do not have a domestic WWTP, describe the average discharge rate of your base to the local sanitary sewer authority, discharge limits set by the sanitary sewer authority (flow and pollutants) and whether the base is in compliance with their permit. Discuss recurring discharge violations.

87000 GALLONS PER DAY. NO VIOLATIONS KNOWN.

4f.

Does your base operate an Industrial Waste Treatment Plant (IWTP)?					NO
ID/Location of IWTP	Type of Treatment	Permitted Capacity	Ave Daily Discharge Rate	Maximum Capacity	Permit Status
N/A	N/A	N/A	N/A	N/A	N/A

List any permit violations and projects to correct deficiencies or improve the facility.

N/A

4g. Are there other waste treatment flows not accounted for in the previous tables? Estimate capacity and describe the system.

NO

4h.

Does your base operate drinking Water Treatment Plants (WTP)?				NO	
ID/Location of WTP	Operating (GPD)		Method of Treatment	Maximum Capacity	Permit Status
	Permitted Capacity	Daily Rate			
N/A	N/A	N/A	N/A	N/A	N/A

List permit violations and projects/actions to correct deficiencies or improve the facility.

N/A

4i. If you do not operate a WTP, what is the source of the base potable water supply. State terms and limits on capacity in the agreement/contract, if applicable.

NAVY PUBLIC WORKS CENTER OPERATES THE DRINKING WATER TREATMENT PLANT AND SUPPLIES ALL OF SRF'S DRINKING WATER.

4j.

Does the presence of contaminants or lack of supply of water constrain base operations. Explain. POTABLE WATER TANKERS ARE DELIVERED DURING WATER OUTAGES	NO
--	----

4k.

Other than those described above does your base hold any NPDES or stormwater permits? If YES, describe permit conditions.	YES
If NO, why not and provide explanation of plan to achieve permitted status.	

AFDM-8 (DRYDOCK) NPDES PERMIT # GU0000035

- NO DISCHARGE FROM OUTFALL 001 EXCEPT DOCKING AND NATURAL RUNOFF
- ALL SANITARY WASTES MUST BE PUMPED INTO THE SANITARY SYSTEM
- ALL COOLING WATERS SHALL NOT COME IN CONTACT WITH ABRASIVES
- NO TRASH OR OIL SHALL BE DISCHARGE FROM THE DOCK
- ALL ABRASIVES AND OTHER PRODUCTS SHALL BE REMOVED PRIOR TO UNDOCKING.
- DISCHARGE OF BILGE OR OTHER OILY WASTES IS PROHIBITED

4l.

YES/NO

Does your base have bilge water discharge problem?	YES
Do you have a bilge water treatment facility?	NO

Explain: BILGEWATER IS CURRENTLY DISCHARGED TO FLOATING DONUTS. THESE ARE A PROBLEM. BILGEWATER TREATMENT SYSTEM IS CURRENTLY UNDER DESIGN.

4m.

Will any state or local laws and/or regulations applying to Environmental Facilities, which have been enacted or promulgated but not yet effected, constrain base operations or development plans beyond those already identified? Explain.	NO
---	----

4n. What expansion capacity is possible with these Environmental Facilities? Will any expansions/upgrades as a result of BRACON or projects programmed through the Presidents budget through FY1997 result in additional capacity? Explain.

N/A

4o. Do capacity limitations on any of the facilities discussed in question 4 pose a present or future limitation on base operations? Explain.

N/A

5. AIR POLLUTION

5a.

What is the name of the Air Quality Control Areas (AQCA) in which the base is located? <u>GUAM EPA</u>
Is the installation or any of its OLFs or non-contiguous base properties located in different AQCA's? <u>NO</u> . List site, location and name of AQCA.

5b. For each parcel in a separate AQCA fill in the following table. Identify with and "X" whether the status of each regulated pollutant is: attainment/nonattainment/maintenance. For those areas which are in non-attainment, state whether they are: Marginal, Moderate, Serious, Severe, or Extreme. State target attainment year.

Site: SRF AQCA: GUAM

Pollutant	Attainment	Non-Attainment	Maintenance	Target Attainment Year ¹	Comments ²
CO	X				
Ozone	X				
PM-10	X				
SO ₂	X				
NO ₂	X				
Pb	X				

¹ Based on national standard for Non-Attainment areas or SIP for Maintenance areas.
² Indicate if attainment is dependent upon BRACON, MILCON or Special Projects. Also indicate if the project is currently programmed within the Presidents FY1997 budget.

5c. For your base, identify the baseline level of emissions, established in accordance with the Clean Air Act. Baseline information is assumed to be 1990 data or other year as specified. Determine the total level of emissions (tons/yr) for CO, NO_x, VOC, PM₁₀ for the general sources listed. For all data provide a list of the sources and show your calculations. Use known emissions data, or emissions derived from use of state methodologies, or identify other sources used. "Other Mobile" sources include such items as ground support equipment.

Emission Sources (Tons/Year)					
Pollutant	Permitted Stationary	Personal Automobiles	Aircraft Emissions	Other Mobile	Total
CO	NOT SURVEYED				
NO _x	NOT SURVEYED				
VOC	NOT SURVEYED				
PM ₁₀	NOT SURVEYED				

Source Document: SRF ENVIRONMENTAL OFFICE

5d. For your base, determine the total FY1993 level of emissions (tons/yr) for CO, NO_x, VOC, PM₁₀ for the general sources listed. For all data provide a list of the sources and show your calculations. Use known emissions data, or emissions derived from use of state methodologies, or identify other sources used. "Other Mobile" sources include such items as ground support equipment.

Emissions Sources (Tons/Year)					
Pollutant	Permitted Stationary	Personal Automobiles	Aircraft Emissions	Other Mobile	Total
CO	NOT SURVEYED				
NO _x	NOT SURVEYED				
VOC	NOT SURVEYED				
PM ₁₀	NOT SURVEYED				

Source Document: SRF ENVIRONMENTAL OFFICE

5e. Provide estimated increases/decreases in air emissions (Tons/Year of CO, NOx, VOC, PM10) expected within the next six years (1995-2001). Either from previous BRAC realignments and/or previously planned downsizing shown in the Presidents FY1997 budget. Explain. **SRF DOES NOT SEE AN INCREASE IN AIR EMISSION WITHIN THE NEXT SIX YEARS. SRF ANTICIPATES A DECREASE DUE TO THE EFFECTS OF DOWNSIZING**

5f. Are there any critical air quality regions (i.e. non-attainment areas, national parks, etc.) within 100 miles of the base?

NO

5g. Have any base operations/mission/functions (i.e.: training, R&D, ship movement, aircraft movement, military operations, support functions, vehicle trips per day, etc.) been restricted or delayed due to air quality considerations. Explain the reason for the restriction and the "fix" implemented or planned to correct.

NO

5h. Does your base have Emission Reduction Credits (ERCs) or is it subject to any emission offset requirements? If yes, provide details of the sources affected and conditions of the ERCs and offsets. Is there any potential for getting ERCs?

NO

6. ENVIRONMENTAL COMPLIANCE

6a. Identify compliance costs, currently known or estimated that are required for permits or other actions required to bring existing practices into compliance with appropriate regulations. Do not include Installation Restoration costs that are covered in Section 7 or recurring costs included in question 6c. For the last two columns provide the two year totals for those FY's.

Program	Survey Completed?	Costs in \$K to correct deficiencies					
		FY1994	FY1995	FY1996	FY1997	FY98-99	FY00-01
Air	N	0	7	10	13	30	38
Hazardous Waste	Y	0					
Safe Drinking Water Act	Y	3					
PCBs	Y	0					
Other (non-PCB) Toxic Substance Control Act	N	0					
Lead Based Paint	N	0					
Radon	Y	0					
Clean Water Act	Y	0					
Solid Waste	Y	0					
Oil Pollution Act	Y	0					
USTs	Y	5	7	50	8	15	20
Other							
Total		8	14	60	21	45	58

Provide a separate list of compliance projects in progress or required, with associated cost and estimated start/completion date.

UST: FY-96, Tank Replacement (1 ea), and tank monitoring equipment (2 ea)

6b.

Does your base have structures containing asbestos? YES What % of your base has been surveyed for asbestos? 100 Are additional surveys planned? NO What is the estimated cost to remediate asbestos (\$K) 1,000. Are asbestos survey costs based on encapsulation, removal or a combination of both? **REMOVAL**

113

R

6c. Provide detailed cost of recurring operational (environmental) compliance costs, with funding source. \$ (000)

Funding Source	FY1992	FY1993	FY1994	FY1995	FY1996	FY1997	FY98-99	FY00-01
O&MN								
HA	507	550	605	697	925	952	1600	1600
PA	0	30						<i>reduction</i>
Other O&MN (specify)							<i>reduction</i>	<i>reduction</i>
Other (specify)								
TOTAL:	507	580	605	697	925	952	1600	1600

PA FUNDS ARE CONTROLLED AND PLANNED BY THE MAJOR CLAIMANT

6d. Are there any compliance issues/requirements that have impacted operations and/or development plans at your base. *No*

7. INSTALLATION RESTORATION

7a.

Does your base have any sites that are contaminated with hazardous substances or petroleum products?	YES
Is your base an NPL site or proposed NPL site?	NO

R
28 Oct 94
vls

7b. Provide the following information about your Installation Restoration (IR) program. Project list may be provided in separate table format. Note: List only projects eligible for funding under the Defense Environmental Restoration Account (DERA). Do not include UST compliance projects properly listed in section VI.

Site # or name	Type site ¹	Groundwater Contaminated?	Extends off base?	Drinking Water Source?	Cost to Complete (\$M)/Est. Compl. Date	Status ² /Comments
BATTERY PLATING SHOP LEACH FIELD	CERCLA	AWAIT RESULTS	N	N	AWAIT TEST RESULTS	SI
AREA BEHIND THE GENERAL PARKING LOT FENCE LINE	CERCLA	AWAIT RESULTS	N	N	AWAIT TEST RESULTS	SI

¹ Type site: CERCLA, RCRA corrective action (CA), UST or other (explain)

² Status = PA, SI, RI, RD, RA, long term monitoring, etc.

6c. Provide detailed cost of recurring operational (environmental) compliance costs, with funding source.

Funding Source	FY1992	FY1993	FY1994	FY1995	FY1996	FY1997	FY98-99	FY00-01
O&MN

JUL 94

6d. Are there any compliance issues/requirements that have impacted operations and/or development plans at your base.

7. INSTALLATION RESTORATION

7a.

Does your base have any sites that are contaminated with hazardous substances or petroleum products?	YES
Is your base an NPL site or proposed NPL site?	NO

7b. Provide the following information about your Installation Restoration (IR) program. Project list may be provided in separate table format. Note: List only projects eligible for funding under the Defense Environmental Restoration Account (DERA). Do not include UST compliance projects properly listed in section VI.

Site # or name	Type site ¹	Groundwater Contaminated?	Extends off base?	Drinking Water Source?	Cost to Complete (\$M)/Est. Compl. Date	Status ² /Comments
BATTERY PLATING SHOP LEACH FIELD	CERCLA	AWAIT RESULTS	N	N	AWAIT TEST RESULTS	SI
AREA BEHIND THE GENERAL PARKING LOT FENCE LINE	CERCLA	AWAIT RESULTS	N	N	AWAIT TEST RESULTS	SI

¹ Type site: CERCLA, RCRA corrective action (CA), UST or other (explain)

² Status = PA, SI, RI, RD, RA, long term monitoring, etc.

7c. Have any contamination sites been identified for which there is no recognized/accepted remediation process available? List.

NO

7d.

Is there a groundwater treatment system in place?	NO
Is there a groundwater treatment system planned?	NO

State scope and expected length of pump and treat operation.

N/A

7e.

Has a RCRA Facilities Assessment been performed for your base?	NO
--	----

7f. Does your base operate any conforming storage facilities for handling **hazardous materials**? If YES, describe facility, capacity, restrictions, and permit conditions.

NO

7g. Does your base operate any conforming storage facilities for handling **hazardous waste**? If YES, describe facility, capacity, restrictions, and permit conditions.

NO

7h. Is your base responsible for any non-appropriated fund facilities (exchange, gas station) that require cleanup? If so, describe facility/location and cleanup required/status.

NO

7i.

Do the results of any radiological surveys conducted indicate limitations on future land use? Explain below.	NO
--	----

7j. Have any base operations or development plans been restricted due to Installation Restoration considerations?

NO

7k. List any other hazardous waste treatment or disposal facilities not included in question 7b. above. Include capacity, restrictions and permit conditions.

NONE

8. LAND / AIR / WATER USE

8a. List the acreage of each real estate component controlled or managed by your base (e.g., Main Base - 1,200 acres, Outlying Field - 200 acres, Remote Range - 1,000 acres, remote antenna site - 5 acres, Off-Base Housing Area - 25 acres).

Parcel Descriptor	Acres	Location
MAIN BASE	127	SRF
WETLANDS	42	OUTSIDE SRF FENCE LINE
RCB	62	DRYDOCK ISLAND
GARF	.2	OROTE POINT
CALIBRATION LAB	.2	PWC COMPLEX

8b. Provide the acreage of the land use categories listed in the table below:

LAND USE CATEGORY		ACRES
Total Developed: (administration, operational, housing, recreational, training, etc.)		63.4
Total Undeveloped (areas that are left in their natural state but are under specific environmental development constraints, i.e.: wetlands, endangered species, etc.)		Wetlands: 10
		All Others: 32
Total Undeveloped land considered to be without development constraints, but which may have operational/man caused constraints (i.e.: HERO, HERF, HERP, ESQD, AICUZ, etc.) TOTAL		0
Total Undeveloped land considered to be without development constraints		126
Total Off-base lands held for easements/lease for specific purposes		0
Breakout of undeveloped, restricted areas. Some restricted areas may overlap:	ESQD	N/A
	HERF	N/A
	HERP	N/A
	HERO	N/A
	AICUZ	N/A
	Airfield Safety Criteria	N/A
	Other	N/A

8c. How many acres on your base (includes off base sites) are dedicated for training purposes (e.g., vehicular, earth moving, mobilization)? This does not include buildings or interior small arms ranges used for training purposes. NONE

8d. What is the date of your last AICUZ update? / / Are any waivers of airfield safety criteria in effect on your base? Y/N Summarize the conditions of the waivers below.

N/A

8e. List the off-base land use *types* (e.g, residential, industrial, agricultural) and *acreage* within Noise Zones 2 & 3 generated by your flight operations and whether it is compatible/incompatible with AICUZ guidelines on land use.

Acreage/Location/ID	Zones 2 or 3	Land Use	Compatible/ Incompatible
NOT APPLICABLE	N/A	N/A	N/A

8f. List the navigational channels and berthing areas controlled by your base which require maintenance dredging? Include the frequency, volume, current project depth, and costs of the maintenance requirement. **MAINTENANCE DREDGING IS NOT PERFORMED ALONG WATERFRONT ASSETS.**

Navigational Channels/ Berthing Areas	Location / Description	Maintenance Dredging Requirement			
		Frequency	Volume (MCY)	Current Project Depth (FT)	Cost (\$M)
N/A	N/A	N/A	N/A	N/A	N/A

8g. Summarize planned projects through FY 1997 requiring **new channel or berthing area** dredged depths, include location, volume and depth.

NONE

8h.

Are there available designated dredge disposal areas for maintenance dredging material? List location, remaining capacity, and future limitations.	NO
Are there available designated dredge disposal areas for new dredge material? List location, remaining capacity, and future limitations.	NO
Are the dredged materials considered contaminated? List known contaminants.	NO

8.i. List any requirements or constraints resulting from consistency with **State Coastal Zone Management Plans**. N/A

8j. Describe any **non-point source pollution problems affecting water quality** ,e.g.: coastal erosion.

N/A

8k.

If the base has a cooperative agreement with the US Fish and Wildlife Service and/or the State Fish and Game Department for conducting a hunting and fishing program, does the agreement or these resources constrain either current or future operations or activities? Explain the nature and extent of restrictions.	N/A
---	-----

81. List any other areas on your base which are indicated as protected or preserved habitat other than threatened/endangered species that have been listed in Section 1. List the species, whether or not treated, and the acres protected/preserved. **NONE**

9. WRAPUP

9a. Are there **existing or potential environmental showstoppers** that have affected or will affect the accomplishment of the installation mission that have not been covered in the previous 8 questions?

NO

9b. Are there any **other environmental permits** required for base operations, include any relating to industrial operations.

AIR PERMITS FOR SANDBLAST & PAINTING, FOUNDRY, CORROSION CONTROL SHOP, AND BATTERY/PLATING SHOP

9c. Describe any **other environmental or encroachment restrictions** on base property not covered in the previous 8 sections.

NONE

9d. List any **future/proposed laws/regulations or any proposed laws/regulations** which will constrain base operations or development plans in any way. Explain.

NONE

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

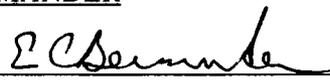

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

Questions for the Activities

Primary Activity UIC: 62586

(Use this number as the Activity identification at the top of each page.)

Mission Area

1. Production Workload

1.1 Workload Breakout by Availability. Using the Table of Availability Types, identify the work package and number of availabilities (Avlb) for the types/classes of ships which have been or will be maintained, modernized, or converted at your activity. Include all CNO and non-CNO scheduled shipwork, off-site work, and Other Production Work (OPW). Account for availabilities whose durations exceed one fiscal year by including them in all fiscal years with scheduled work from that availability. Do not include potential guarantee work in your submission.

Example: NSYD Sample executed:

- two 12-month duration SSN 688 class DMPs, beginning in September 1990 and in August 1991 respectively;
- two SSN 688 class DSRAs (each of 2 month duration) beginning in December 1991 and March 1992 respectively;
- an SSN 688 class ERO of 22 month duration, beginning in June 1993; and
- two AOE1 class DPMA's, each of 6 month duration, begun in September 1990 and January 1991 respectively.

This workload would be represented as:

Class of Vessel	FY 1990		FY 1991		FY 1992		FY 1993	
	Avlb (#)							
SSN 688	DMP (1)		DMP (2)		DMP (1)	SR (2)	ERO (1)	
AOE 1	DPMA (1)		DPMA (2)

Table 1.2.d Total		381	383.7	360.4	301.4
Table 1.2.c Total		0	0	0	0
Annual Total		381	383.7	360.4	301.4

1. Production Workload, continued

1.3 Emergent Repair. Identify the total Direct Labor Man Year. (DLMYs) expended by your activity in providing emergent repair of operational ships. Breakout the annual totals by type of work performed, (not by propulsion system of the originating platform). [For this question, and this question only, nuclear work is to be construed as repair on the reactor plant, including its associated primary systems and those portions of secondary systems whose maintenance is under the technical cognizance of NAVSEA 08.]

Table 1.3: Emergent Repairs

Type of Work	FY 1989	FY 1990	FY 1991	FY 1992	FY 1993	FY 1994 (01 Oct-31 Mar)
Nuclear	0	0	0	0	0	0
Conventional	52.6	90.2	53.9	32.8	93.5	52.2
Total	52.6	90.2	53.9	32.8	93.5	52.2

1.4 Other Shipboard Work. List and describe any other nuclear and conventional ship work not reported in question 1.2 above.

NONE

2. Operating Factors

2.1 **Special Equipment and Skills.** Identify any specialized, unique, or peculiar characteristics about the facilities, equipment, or skills at this activity. Highlight those capabilities that are one of a kind within the DON/DoD.

<u>Special Equipment/Skill</u>	<u>Describe Why Special</u>
Battery/Plating Shop	Sole region asset
Foundry	Sole region asset
Recompression Chamber	Sole region asset
Corrosion Control Facility	Sole region asset
Floating Cranes	Sole region asset
Floating Drydock	Sole region asset
Apprentice Program	The only program to provide a complete apprentice curriculum (all industrial trade skills in region).
Calibration Lab	Only facility on island
Industrial Lab	Only lab on island to provide one stop shopping

2.2 **Planning Yard Mission.** Identify the classes of ships (include one-of-a-kind) for which your activity serves as the planning yard.

SRF, Guam is not a Planning Yard.

2.3 **Reactor Compartment Disposal.** Does your activity remove reactor compartments from inactive nuclear powered vessels?

Yes / **No**

2.4 **Non-Shipwork.** Identify the work, in total Direct Labor Man Years (DLMYs), performed by your activity during FY 1993 in support of other DON industrial facilities (e.g. Naval Aviation Depots (NADEPs), Aviation Intermediate Maintenance Departments (AIMDs), Marine Corps Logistics Bases (MCLBs), Shore Intermediate Maintenance Activities (SIMAs), Fleet and Industrial Support Centers (FISCs), etc.).

Non-Shipwork DON Industrial support = 9.9 DLMYs

2.5 Interservice Workload. Identify the productive work your activity provides to customers other than USN vessels (e.g. nonship work, such as repairables, calibration; non-DON vessels, such as MSC or USCG ships; work for other DoD elements, other agencies of the Federal government or the commercial sector). Specify any related specialized, unique or peculiar capabilities of your activity which support such workload. Highlight those areas where your activity is the only DON/DoD source for that workload.

<u>Non-USN Customer</u>	<u>Type of Productive Work</u>
Military Sealift Command	Provide the capability to overhaul and make voyage repairs to MSC homeported ships (e.g. T-AFS 1, 7, 9; T-AE 26, T-ATF 167, 168, 171). SRF is the sole regional source for this type of work.
Coast Guard	Performs periodic depot level maintenance/inspections required for certification and continued operation of their vessels (i.e. dry dockings for hull inspections). SRF is the sole regional source for this type of work
ANDERSON AFB	Performs corrosion control repairs to mobile power generators, oil sample analysis, calibration/repair for test equipment and other repairs beyond the capability of local Air Force personnel. SRF is the sole regional source for this type of work.
Naval In-Service Engineering (NISE) Government of Guam	Provides electronic/electrical labor support for NISE West Facility, Guam. Install/remove HF radio transmitters, power, signal, and antenna cables. Performs infrastructure repairs not available through other local sources.
Navy Ships Parts Control Center	Disassemble, inspect, repair, test, and package material.
Public Works Center	Test/repair/balance rotating equipment. Calibration services.
Blount Island Command	Calibrate/repair Marine Corp equipment onboard MPS-3 ships.
U.S. Naval Air Pacific Repair Activity	Manufacture parts, tools, and testing of aircraft components.
Commercial, Private Parties	Provides repairs and industrial services to local commercial/private companies if the capability is not available through local businesses. Services include parts manufacturing, crane and rigging support, marine machinery repair, etc.

Features and Facilities

3. Facility Measures

3.1 Identify, by three digit Category Code Number (CCN), *all facilities* at this activity, and their current condition and area in thousands of square feet (KSF). Duplicate the table as necessary to report all facilities of any tenants for whom your activity serves as host.

Table 3.1: Facility Conditions

CCN	Shop Type / Work Stations	Condition			Comments
		Adequate	Substandard	Inadequate	
213-41	Central Tool (06)	5,684	10,750	0	Figures are based upon AIS and BASEREP and do not reflect impending reduction of personnel from 950 to 750
213-42	Shipfitting Shop (11)	15,020	1,200	0

3. Facility Measures, continued

3.2 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories in Table 3.1, above, where inadequate facilities are identified provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

1. Sail Loft/ 213-62

3. Facility Measures, continued

3.4 IPE Age. Identify the average age of Industrial Plant Equipment (IPE) at the activity as of 30 September 1994.

IPE Average Age = 16

3.5 AIS Backlog. Identify the Annual Inspection Summary (AIS) backlog at the activity in thousands of dollars (\$ K) and percent of total backlog, for the period requested.

Table 3.5: AIS Backlog

	FY 1990	FY 1991	FY 1992	FY 1993	FY 1994	Average
Backlog (\$ K)	3,069	3,393	1,226	1,964	N/A	2,413
% Backlog Retired	19%	77%	28%	8%	N/A	33%

Features and Facilities

4. Support Services

4.1 Identify the support (police, fire protection, etc.) now provided by the host Naval or Marine Corps activity or other source. Add any additional applicable factors. Identify what factors would be needed by your activity if the host facility is closed.

Table 4.1: Support Facilities

Support	Currently Obtained from:	Needed if Host Closes?
Police	NAVAL STATION	YES
Security	NAVAL STATION	YES
Fire	NAVAL STATION	YES
Cafeteria	NAVY EXCHANGE	YES
Parking	SRF OWNED	N/A
Utilities	PWC	YES
Child Care *	NAVSTA, GUAM (CHILD DEVELOPMENT CENTER, LITTLE RED SCHOOL HOUSE & HOMECARE PROVIDERS)	YES
CCPO *	NAVSTA, GUAM HUMAN RESOURCES OFFICE (HRO)	YES

* **CHILD CARE:** IF HOST COMMAND CHILD CARE FACILITIES WERE TO CLOSE, THE SRF, GUAM, WOULD HAVE TO ESTABLISH ITS OWN CHILD CARE PROGRAM WHICH INCLUDES A CHILD CARE BUILDING/SPACE, EMPLOY PERSONNEL, AND OTHER TYPES OF ACCOMMODATIONS/SPECS REQUIRED TO MEET THE CHILD CARE NEEDS FOR COMMAND PERSONNEL WHO CURRENTLY UTILIZE HOST COMMAND SERVICE.

* **CCPO:** THE HRO, GUAM IS THE ONLY CIVILIAN PERSONNEL SERVICING ACTIVITY ON GUAM FOR ALL NAVAL COMMANDS/AGENCIES, INCLUDING NON-APPROPRIATED FUND ACTIVITIES. CLOSURE WILL SIGNIFICANTLY IMPACT PERSONNEL ADMINISTRATION AND OTHER RELATED SERVICES TO THEIR CUSTOMER COMMANDS.

ACTIVITY: 62586

4.2 If your activity is relocated, what new location(s) (for your activity) most efficiently provides adequate oversight of this support?

THERE IS NO OTHER LOCATION ON GUAM THAT WOULD BE A SUITABLE SITE FOR SRF.

4.3 Other Support. Identify any services or support your activity provides to the community or to other DON/DoD activities. (Include only services to activities which employ 300 or more personnel.)

THE SRF, GUAM DOES NOT PROVIDE SUPPORT SERVICES FOR ITEMS LISTED ON #4.

5. Waterfront Support Services

5.1 Identify the source(s) of your activity's tugs and pilots, barges, and other harbor services.
TUG BOATS AND PILOTS ARE PROVIDED BY THE NAVAL STATION AND ON OCCASION BY THE PORT AUTHORITY OF GUAM.

5.2 Does your activity provide tugs and pilots, barges, and other harbor services to other (non-NSYD/SRF) activities?
YES.

Yes / No

If so, please specify what services and to what activities.

SRF CAN PROVIDE PUSHER BOATS, FLOATING CRANES, AND A BARGE TO NAVAL STATION AND CUSTOMERS.

5.3 If the naval station, base, or other supporting activity in closest proximity is closed, identify all additional annual costs that would accrue to your activity for tugs and pilots, barges, or any other harbor services.

\$10,000, for SRF craft only. Other harbor service cost is charged to the customer.

*WR N431E
7/10/94*

ACTIVITY: 62586

Features and Facilities

6. Personnel Experience

6.1 What is the total number of apprentices trained at this activity over the period FY 1990 through FY 1994?

Total # of apprentices = 227

What percentage of those apprentices are still employed at your activity? % = 77%

How many apprentices are currently being trained at this activity?

Current # apprentices = 93

6.2 Using the following table, identify the average experience of personnel in the functional areas and their total longevity at your activity.

Table 6.2: Workforce Longevity and Experience

Functional Area	Years	
	Experience in this Position	Total Longevity
Nuclear Engineers	N/A	N/A
Conventional Engineers (21)	18	385
Journeyman/Mechanics (343)	16	5,395
RADCON Technicians (1)	27	27
Quality Assurance Inspector (5)	23	115
**Total Shipyard	16 (Average)	5,922

** NOTE: 81 EMPLOYEES VOLUNTARILY SEPARATED WITH INCENTIVES (JUN 94)
11 OF THE 81 EMPLOYEES WERE JOURNEYPersons WITH AN AVERAGE
OF 31 YEARS EXPERIENCE AND TOTAL LONGEVITY OF 310.

Costs

7. Investments

7.1 List the project number, description, funding year, and value of the *capital improvements at your base completed (beneficial occupancy) during FY 1988 to FY 1994*. Indicate if the capital improvement is a result of BRAC realignments or closures.

Table 7.1: Capital Improvement Expenditure

Project	Description	Fund Year	Value (\$K)
R9-88	REPAIR FINGER PIER	1990	1,917
C8-84	MODIFY CHEMICAL STORAGE RM, B-2074	1992	35.5
C1-92	CONSTRUCT AFDL SUPPORT FAC (PHILLIPINE ROLLBACK)	1992	220
C2-92	CONSTRUCT OPERATIONAL STORAGE (PHILLIPINE ROLLBACK)	1992	327
C3-92	CONSTRUCT TEMP. SHIP/SPARE STORAGE (PHILLIPINE ROLLBACK)	1992	490
C1-91	CONSTRUCT INTERIM STORAGE	1991	106.45
R8-88A	REPAIR SEAWALLS 1 & 2	1989	445.81
R8-88B	REPAIR DRYDOCK SEAWALL	1989	436.32
R9-16/88	INSTALL CATHODIC PROTECTION SRF WHARVES	1990	954.3
P-149	SAND SILO	1985	1,168.4
P-152	HAZARDOUS MATERIALS STORAGE	1984	811.3
C10-85	PASS & ID BUILDING	1986	91
C5-86	HAZARDOUS WASTE STORAGE FACILITY	1989	107.4
C2-82	SHIP MAINTENANCE SUP FACILITY (DRYDOCK)	1990	132.5
P-002	EXTEND PORTAL CRANE TRACK	1990	4,306.9

7.2. List the project number, description, funding year, and value of the *non-BRAC related capital improvements planned* for years FY 1995 through FY 1997.

Table 7.2: **Planned Capital improvements**

Project	Description	Fund Year	Value (\$K)
P-168	SHIP SPARE STORAGE FACILITY (PHILLIPINE ROLLBACK)	1994	4,144
P-998C	AFDM-8 MOORING (TYPHOON OMAR FUNDING)	1993	1,900
P-998D	AFDM-8 CAUSEWAY (TYPHOON OMAR FUNDING)	1993	1,150

7. Investment, continued

7.3 List the project number, description, funding year, and value of the *BRAC related capital improvements planned* for FY 1995 through FY 1999.

Table 7.3: Planned BRAC Capital improvements

Project	Description	Fund Year	Value
NONE			

7. Investment, continued

7.4 Identify by Investment Category Code and Name (e.g. 05-Training Facilities; 14-Administration) the actual investment at your activity, to include all MCON, maintenance and repair, installed equipment, and minor construction, in thousands of dollars (\$ K) over the period FY 1990 through FY 1994 for all your facilities. Report separately all other Class 2 equipment investments. The following table should include your responses to questions 7.1-7.3 above.

Table 7.4: **Historic Investment Summary**

Investment Category	\$ K
03-General Purpose Berthing Pier	7,178
04-Operational Storage (Ready Issue, Shop Stores, Misc.)	818
05-Academic Instruction Building	229
04-Operational Storage (Ready Issue, Shop Stores, Misc.)	
14-Admin Office	
07-Electrical Shop-(51)	275
Other (specify)	
Equipment (other than Class 2)	
Activity TOTAL	8,500

7.5 What is the total planned investment, in thousands of dollars (\$ K), over the period FY 1995 through FY 2001?

Total planned Investments = \$ 23,800 K

7. Investments, continued

7.6 Provide a list of all other documented major facility deficiencies not addressed in 7.1-7.3 (e.g. major repairs) and the estimated cost to rectify each at this activity. Identify the reduction in operating costs anticipated in relation to each deficiency correction.

Table 7.6: Facility Deficiencies

Deficiency	Cost to Correct (\$ K)	Result of Corrections
EARTHQUAKE REPAIRS TO WATERFRONT LIMA-ROMEO	750	PRESERVATION OF EXISTING WATERFRONT MINIMIZING LONG- TERM DEGRADATION
TYPHOON REPAIRS TO WATERFRONT LIMA- ROMEO	4,000	RESTORE TO 100% CAPABILITY

Costs

8. Labor Rates

8.1 Provide the following actual rates per hour, less direct materials, for your activity for the period requested. Reproduce the table as necessary to report different rate structures for different functional areas, specifying the functional areas represented in each table.

Table 8.1: Labor Rates
Functional Area: ACTIVITY MISSION & FUNCTION SUPPORT

	Rate (\$/Hour)**	
	FY 1993	FY 1994
Direct Labor Rate	18.52	21.27
Production Expense	16.69	16.84
Overhead (G&A)	20.08	19.77
Fully Burdened Rate	55.29	57.88

Fully Burdened Rate	\$ 40.86

Note: As reported in table 8.1, SRF Guam is mission funded by CINCPACFLT.

452

Strategic Concerns

9. Location Factors

9.1 Strategic Location. Specify any special strategic importance or military value consideration of your activity accruing from its geographical location. Include the number of major customer activities located within a 100 mile radius.

A. Strategic Importance:

1. Guam is on the transit lane for ships deploying to the Western Pacific.
2. SRF, Guam is the only maintenance facility based on U.S. soil *in the Western Pacific Area.*

B. Major Customer Activities:

1. Military Sealift Command
2. Naval Station Guam
3. U.S Coast Guard
4. Naval Special Warfare Unit 1
5. Explosive Ordnance Disposal Mobile Unit 5
6. ANDERSON AFB

9.2 Transportation. List and indicate the distance in road-miles from your activity all Interstate Highways, airports of embarkation, seaports of embarkation, and cargo rail terminals serving your activity.

- Interstate highways = N/A (none on Guam)
Guam International Airport = 18 miles
Anderson Air Force Base = 30 miles
Seaport = 1 mile

9.3 Rail Network. Is your activity serviced by rail trackage providing direct access to commercial rail network?

Yes / No

If not, identify the road miles separating your facility from the nearest railhead access.

The nearest rail network is off-island. Question is N/A Distance = N/A Miles

9.4 Regional Maintenance Concept. Has your activity been chosen to be a part of the Navy's Regional Maintenance Concept? If so, provide the details as currently known, and list other DON industrial activities (both intermediate and depot level) that are located within a 25 mile range of your activity.

N/A

Strategic Concerns

10. Natural Inhibitors to Operations

10.1 Identify the percent of the planned work schedule at this facility (averaged by month) that was interrupted by local weather or climatic conditions for the period FY 1990-1993 (i.e. what percent of man-days were lost annually, by month, because of hurricanes, tornado, earthquake, blizzard, below freezing temperatures, or other performance-impinging natural conditions?).

Table 10.1.a: Impact on Operations (%)

	January	February	March	April	May	June
Average % Schedule Interrupted	0	0	3	0	3	0

Table 10.1.b: Impact on Operations (%)

	July	August	September	October	November	December
Average % Schedule Interrupted	0	27	0	3	23	0

10.2 Identify the total number of Direct Labor Man Years (DLMYs) of planned work lost at your facility due to hurricanes, tornadoes, earthquakes, blizzards, below freezing temperatures, or other performance-impinging natural conditions.

Table 10.2: Impact on Operations (DLMYs)

	FY 1991	FY 1992	FY 1993	FY 1994 (01 Oct-31 Mar)
DLMYs Lost	18.6	35.5	65.8	10.3

Strategic Concerns

11. Contingency and Mobilization Features

11.1 Identify the covered and uncovered, storage and industrial space at your activity which is currently surplus to the planned need (your current requirement), expressed in thousands of square feet (K SF).

Table 11.1: Surplus Storage

K SF	Covered	Uncovered
Storage	NONE	873
Industrial	NONE	1,900

11.2 Identify any additional space in these categories programmed to be available by FY 2001.

If workload remains constant and supports a workforce of 750 personnel, the construction of MILCON P-168 Ship/Spares Warehouse will open up additional covered storage space in smaller buildings. Some of these buildings will eventually be demolished as they aging and are not considered typhoon resistant.

11.3 Identify the amount of the potentially available other DoD or commercial activity, industrial, space within a one-hour drive of your activity. Include any physical restrictions (e.g. road limitations) that might apply should those facilities be used for facility augmentation or in an emergency.

SRF is the only Industrial activity on the island. Adjacent FISC and Naval Station provide the most practical regions for use.

Environment and Encroachment

12. Environmental Considerations

12.1 Identify all environmental restrictions to expansion at your activity.

SRF consists of 78 acres of lightly developed industrial area. SRF has no restriction on further development of this acreage. In the unlikely event that 78 acres is developed, future development will be constrained by surrounding wetlands.

12.2 Describe the undeveloped acreage or waterfront that are available to this activity, including its size, current state, and the amount of development required to make it usable to the industrial facility. Specify any undeveloped acreage that is unique to this activity.

SRF's 78 acres is lightly developed and has potential for additional waterfront, industrial, and industrial support facilities. SRF also owns 48 acres which is known as RCB or Drydock Island. This area has the potential for development due to its naturally sheltered location and deep draft mooring capability.

47 Acres of Wetlands are currently included in the Installation Restoration program due to heavy metal contamination as a result of sandblast grit.

12.3 Identify any specific facilities, programs, or capabilities in regard to the handling and disposal of hazardous materials / wastes at this activity.

SRF has a 90-day Hazardous Waste storage facility. All HW is packaged by PWC and shipped off-island through DRMO.

13. Encroachment Considerations

13.1 Identify any ground, industrial noise, approach channel, waterway, harbor, bridge height, turning basin, ESQD, HERO, airspace or other encroachments of record at your activity.

Table 13.1: Encroachments of Record

Encroachments	Date Recorded	Current Status
NONE related to SRF mission	N/A	
LIMA, MIKE, NOV WHARVES bounded by 60,000# ESQD arc	N/A	

Customer Support

14. Customer Support

14.1 Homeport Proximity. Identify the distance, by road-miles and by water, to the two closest fleet homeport concentrations.

Table 14.1: Homeport Proximity

Homeport	Distance	
	Road (Miles)	Water (NM)
NAVAL STATION, GUAM	0.5	N/A
NAVAL ACTIVITY YOKOSUKA, JAPAN	N/A	1,460

14.2 Billeting. Identify the billeting support provided to the crews of ships undergoing work at your activity. Provide the total number of individuals within each category for the period requested.

Table 14.2: Billeting Support

	FY 1991	FY 1992	FY 1993	FY 1994 (01 Oct-31 Mar)
Berthed on Barges	0	125	0	0
Retained onboard own vessel	80	80	1400	440
Billeted ashore (Homeport/own quarters)	0	235	200	40
Billeted ashore (BQs maintained by your activity)	0	0	0	0
Total	80	440	1600	480

Quality of Life

15. Military Housing - Family Housing

15.1 Do you have mandatory assignment to on-base housing? (circle) yes **NO**

15.2 For military family housing in your locale provide the following information:

Table 15.2: Available Military Family Housing

Type of Quarters	Number of Bedrooms	Total number of units	Number Adequate	Number Substandard	Number Inadequate
Officer	4+	70	70	0	0
Officer	3	109	109	0	0
Officer	1 or 2	50	50	0	0
Enlisted	4+	226	226	0	0
Enlisted	3	450	450	0	0
Enlisted	1 or 2	624	624	0	0
Mobile Homes		0	0	0	0
Mobile Home lots		0	0	0	0

15.3 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information: N/A

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

15. Military housing - Family Housing, continued

15.4 Complete the following table for the military housing waiting list. Report Number on list as of 31 March 1994.

Table 15.4: Military Housing Waiting List

Pay Grade	Number of Bedrooms	Number on List ¹	Average Wait

15. Military housing - Family Housing, continued

15.5 What do you consider to be the top five factors driving the demand for base housing? Does it vary by grade category? NO. If so provide details.

Table 15.5: Housing Demand Factors

Top Five Factors Driving the Demand for Base Housing	
1	COST
2	CONVENIENCE
3	NAVY HOUSING OVERALL SUPERIOR TO HOUSING IN COMMUNITY
4	UTILITIES INCLUDED
5	UTILITIES AND MAINTENANCE SUPERIOR TO COMMUNITY

15.6 What percent of your family housing units have all the amenities required by "The Facility Planning & Design Guide" (Military Handbook 1190 & Military Handbook 1035-Family Housing)? 100%

15.7 Provide the utilization rate for family housing for FY 1993.

Table 15.7: Family Housing Utilization

Type of Quarters	Utilization Rate
Adequate	98%
Substandard	0
Inadequate	0

15.8 As of 31 March 1994, have you experienced much of a change since FY 1993? **NO.** If so, why? If occupancy is under 98% (or vacancy over 2%), is there a reason? N/A

Quality of Life

16. Military Housing - Bachelor Quarters

16.1 Provide the utilization rate for BEQs for FY 1993.

Table 16.1: BEQ Utilization

Type of Quarters	Utilization Rate
Adequate	100%
Substandard	N/A
Inadequate	N/A

16.2 As of 31 March 1994, have you experienced much of a change since FY 1993? If so, why? If occupancy is under 95% (or vacancy over 5%), is there a reason?

AS OF MARCH 31, 1994 FY 94 AVERAGE OCCUPANCY IS 86%. DECOMMISSIONING OF 2 USN SHIPS IN FY 93 PLACED UTILIZATION AT 100%. LESS THAN 95% UTILIZATION IN FY 94 ALSO ATTRIBUTED TO LESS PERSONNEL ASSIGNED TO TPU.

16.3 Calculate the Average on Board (AOB) for geographic bachelors as follows: N/A*

$$\text{AOB} = \frac{(\# \text{ Geographic Bachelors} \times \text{average number of days in barracks})}{\text{AOB} = 365}$$

16.4 Indicate in the following chart the percentage of geographic bachelors (GB) by category of reasons for family separation. Provide comments as necessary. N/A*

Table 16.4: Reasons for Geographic Separation (BEQ)

Reason for Separation from Family	Number of GB	Percent of GB	Comments
Family Commitments (children in school, financial, etc.)	N/A	N/A	N/A*
Spouse Employment (non-military)	N/A	N/A	N/A*
Other	N/A	N/A	N/A*
TOTAL	N/A	N/A	

16.5 How many geographic bachelors do not live on base? N/A*

***47b(3)(4)(5) PER PARAGRAPH 1105 OF NAVPERS 15606 GUAM DOES NOT MEET THE CRITERIA FOR GEOGRAPHIC BACHELOR STATUS. ACCORDINGLY THIS INFORMATION IS UNAVAILABLE.**

16. Military Housing - Bachelor Quarters, continued

16.6 Provide the utilization rate for BOQs for FY 1993.

Table 16.6: BOQ Utilization

Type of Quarters	Utilization Rate
Adequate	100%
Substandard	N/A
Inadequate	N/A

16.7 As of 31 March 1994, have you experienced much of a change since FY 1993? If so, why? If occupancy is under 95% (or vacancy over 5%), is there a reason?

**AS OF MARCH 31, 1994 FY 94 AVERAGE OCCUPANCY IS 76%.
DECOMMISSIONING OF 2 USN SHIPS IN FY 93 PLACED UTILIZATION AT 100%.**

16.8 Calculate the Average on Board (AOB) for geographic bachelors as follows: N/A*

AOB = (# Geographic Bachelors x average number of days in barracks)

AOB = 365

16.9 Indicate in the following chart the percentage of geographic bachelors (GB) by category of reasons for family separation. Provide comments as necessary. N/A*

Table 16.9: Reasons for Geographic Separation (BOQ)

Reason for Separation from Family	Number of GB	Percent of GB	Comments
Family Commitments (children in school, financial, etc.)	N/A	N/A	N/A*
Spouse Employment (non-military)	N/A	N/A	N/A*
Other	N/A	N/A	N/A*
TOTAL	N/A	N/A	

16.10 How many geographic bachelors do not live on base? N/A*

47c(3)(4)(5) PER PARAGRAPH 1105 OF NAVPERS 15606 GUAM DOES NOT MEET THE CRITERIA FOR GEOGRAPHIC BACHELOR STATUS. ACCORDINGLY THIS INFORMATION IS UNAVAILABLE.

Quality of Life

17. MWR Facilities

17.1 For on-base MWR facilities¹ available, complete the following table for each separate location. For off-base government owned or leased recreation facilities indicate distance from base. If there are any facilities not listed, include them at the bottom of the table.

LOCATION NONE DISTANCE NONE

Table 17.1.a: MWR Facilities Summary

Facility	Unit of Measure	Total	Profitable (Y,N,N/A)

17.2 Is your library part of a regional interlibrary loan program? **YES. NETWORKED WITH TWO NAVY GENERAL LIBRARIES ON ISLAND AND ANDERSEN AFB IN ADDITION TO LOCAL CIVILIAN AND UNIVERSITY LIBRARIES.**

Quality of Life

18. Base Family Support Facilities and Programs

18.1 Complete the following table on the availability of child care in a child care center on your base.

Table 18.1: Child Care Availability

Age Category	Capacity (Children)	SF			Number on Wait List	Average Wait (Days)
		Adequate	Substandard	Inadequate		
0-6 Mos	7 FOR 0-12 MONS	YES			26	180
6-12 Mos	SEE ABOVE	SEE ABOVE			SEE ABOVE	SEE ABOVE
12-24 Mos	10	YES			47	240
24-36 Mos	27	YES			12	60
3-5 Yrs	52	YES			99	150

18.2 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means." For all the categories above where inadequate facilities are identified provide the following information:

Facility type/code:

What makes it inadequate?

What use is being made of the facility?

What is the cost to upgrade the facility to substandard?

What other use could be made of the facility and at what cost?

Current improvement plans and programmed funding:

Has this facility condition resulted in C3 or C4 designation on your BASEREP?

Quality of Life

18. Base Family Support Facilities and Programs, continued

18.3 If you have a waiting list, describe what programs or facilities other than those sponsored by your command are available to accommodate those on the list. **A LISTING IS PROVIDED CONTAINING DAYCARE FACILITIES AVAILABLE ON GUAM. THE LIST IS ATTACHED TO BRAC DATA CALL 37 HARDCOPY.**

18.4 How many "certified home care providers" are registered at your base? **46**

18.5 Are there other military child care facilities within 30 minutes of the base? State owner and capacity (i.e., 60 children, 0-5 yrs). **NAVAL HOSPITAL GUAM. CAPACITY IS 54 CHILDREN, 0-5 YEARS.**

18. Base Family Support Facilities and Programs, continued

18.6 Complete the following table for services available on your base. If you have any services not listed, include them at the bottom.

Table 18.6: Available Services

Service	Unit of Measure	Qty
Exchange	249395 SF	1
Gas Station	1456 SF	1
Auto Repair	39720 SF	1
Auto Parts Store	2940 SF	1
Commissary	31825 SF	1

* GUAM DOES NOT HAVE VHA BUT OHA INSTEAD. OHA IS COMPUTED AS FOLLOWS:

MONTHLY RENT/RENTAL CEILING(WHICHEVER IS LESS)

ADD AVERAGE UTIL/RECURRING MAINT ALLOW

=GROSS TOTAL

LESS BAQ

=MONTHLY OHA

AS ILLUSTRATED, OHA IS DERIVED FROM COMPUTATIONS BASED ON # OF FAMILY MEMBERS, YEARS OF SERVICE AND PAYGRADE. INDEX RATE 122 IS PROVIDED ON HARD COPY VERSION OF BRAC DATA CALL 37.

Quality of Life

21. Off-base Housing Rental and Purchase

21.1 Fill in the following table for average rental costs in the area for the period 1 April 1993 through 31 March 1994.

Table 21.1: Recent Rental Rates

Type Rental	Average Monthly Rent		Average Monthly Utilities Cost
	Annual High	Annual Low	
Efficiency	1200	830	150-200
Apartment (1-2 Bedroom)	1300	750	175-250
Apartment (3+ Bedroom)	1400	1150	200-250
Single Family Home (3 Bedroom)	1500	1300	250-300
Single Family Home (4+ Bedroom)	2000	1600	300-400
Town House (2 Bedroom)	1300	1100	200-250
Town House (3+ Bedroom)	1600	1200	250-300
Condominium (2 Bedroom)	1300	1100	200-250
Condominium (3+ Bedroom)	2000	1750	250-300

21.2 What was the rental occupancy rate in the community as of 31 March 1994?

Table 21.2: Rental Occupancy Rate

Type Rental	Percent Occupancy Rate
Efficiency	20%
Apartment (1-2 Bedroom)	60%
Apartment (3+ Bedroom)	30%
Single Family Home (3 Bedroom)	20%
Single Family Home (4+ Bedroom)	5%
Town House (2 Bedroom)	20%

ACTIVITY: 62586

Town House (3+ Bedroom)	10%
Condominium (2 Bedroom)	10%
Condominium (3+ Bedroom)	20%

NOTE: TABLE REFLECTS POSITION OF MILITARY OCCUPANTS WHICH SHARE THESE RENTALS WITH OTHERS IN THE COMMUNITY.

21. Off- base Housing Rental and Purchase, continued

21.3 What are the median costs for homes in the area?

Table 21.3: Regional Home Costs

Type of Home	Median Cost
Single Family Home (3 Bedroom)	\$228,800
Single Family Home (4+ Bedroom)	\$254,700
Town House (2 Bedroom)	\$211,700
Town House (3+ Bedroom)	\$250,000
Condominium (2 Bedroom)	\$177,000
Condominium (3+ Bedroom)	\$275,000

21.4 For calendar year 1993, from the local MLS listings provide the number of 2, 3, and 4 bedroom homes available for purchase. Use only homes for which monthly payments would be within 90 to 110 percent of the E5 BAQ and VHA for your area.

Table 21.4: Housing Availability

Month	Number of Bedrooms		
	2	3	4+

25. Spousal Employment Opportunities

25.1 Provide the following data on spousal employment opportunities.

Table 25.1: Spouse Employment

Skill Level	Number of Military Spouses Serviced by Family Service Center Spouse Employment Assistance			Local Community Unemployment Rate
	1991	1992	1993	
Professional	*	*	106	**
Manufacturing	*	*	3	**
Clerical	*	*	228	**
Service	*	*	59	**
Other	*	*	71	**

*INFORMATION FOR 1991 AND 1992 IS NO LONGER AVAILABLE. DATA FOR 1993 REPRESENTS ALL SEAP CLIENTS ISLAND-WIDE. STATISTICAL RECORDS FOR SEAP CLIENTS DO NOT INCLUDE INFORMATION ON COMMAND. THEREFORE, DATA SPECIFIC TO NAVAL STATION CLIENTS IS NOT AVAILABLE.

**LOCAL COMMUNITY UNEMPLOYMENT RATES ARE NOT KEPT BY SKILL LEVEL. THE YEARLY RATES WERE:

1991:3.5%;1992:3.9%;1993:5.5%.

26. Medical / Dental Care

26.1 Do your active duty personnel have any difficulty with access to medical or dental care, in either the military or civilian health care system? Develop the why of your response.

NO. NAVHOSP GUAM PROVIDES ALL ROUTINE CARE. CERTAIN SPECIALIZED CARE IS REFERRED TO TRIPLER ARMY HOSPITAL. ALL SERVICE MEMBERS ARE TREATED THROUGH THE MILITARY HEALTH CARE SYSTEM ON GUAM.

26.2 Do your military dependents have any difficulty with access to medical or dental care, in either the military or civilian health care system? Develop the why of your response.

NO. ACCESS TO MEDICAL CARE IS THE SAME FOR DEPENDENTS AS FOR ACTIVE DUTY SERVICE MEMBERS. DEPENDENTS RECEIVE DENTAL CARE THROUGH CIVILIAN HEALTH CARE PROVIDERS UNDER THE DELTA DENTAL PROGRAM (DDP) SYSTEM.

Quality of Life

27. Crime Rate

27.1 Complete the table below to indicate the crime rate for your activity for the last three fiscal years. The source for case category definitions to be used in responding to this question are found in the NCIS Manual, dated 23 February 1989, at Appendix A, entitled "Case Category Definitions." Note: the crimes reported in this table should *include* (a) all reported criminal activity which occurred on base regardless of whether the subject or the victim of that activity was assigned to or worked at the base; *and* (b) all reported criminal activity off base.

TAB A: TECHNICAL OPERATIONS

FUNCTIONAL SUPPORT AREA - LIFE CYCLE WORK AREA FORM

TAB B: SPECIAL FACILITIES AND EQUIPMENT

FACILITIES/EQUIPMENT CAPABILITY FORM

APPENDIX A:

- I. FUNCTIONAL SUPPORT AREAS (PRODUCTS)
- II. LIFE-CYCLE WORK AREAS

APPENDIX B:

- I. FUNCTIONAL SUPPORT AREA DEFINITIONS
- II. LIFE-CYCLE WORK AREA DEFINITIONS

**TAB A: TECHNICAL OPERATIONS
FUNCTIONAL SUPPORT AREA - LIFE CYCLE WORK AREA FORM**

INSTRUCTIONS FOR TAB A

1. Use Tables 1.a-1.h to identify the Functional Areas in which your facility performs work for the listed functional support areas (products). Appendices A and B define/describe the products and functional areas used in these Tables.
2. Complete the Tables for all categories and all products provided in this Tab.
3. In completing Tab A, provide Direct Labor Man Years of "work years" for DBOF activities.
NOT APPLICABLE - SRF IS MISSION FUNDED, NOT A DBOF ACTIVITY

TAB A: Table 1.a: TECHNICAL WORKLOAD MATRIX / FUNCTIONAL AREAS

**TAB A: TECHNICAL FUNCTIONS
FUNCTIONAL SUPPORT AREA - LIFE CYCLE WORK AREA FORM**

Activity Name	Naval Ship Repair Facility, Guam
Functional Support Area	N/A
Life Cycle Work Area	N/A

Note: An example of a functional support area - life cycle work area is:
"1. Platform, 1.1 Undersea, - 10. Program Support".

Note:

In-House Expenditures are comprised of the Total Obligation Authority (TOA) for direct labor, direct material, direct travel, direct equipment, direct computer support, other direct support services and all overhead.

Out-of-House Expenditures are comprised of TOA for direct work (customer funded, mission oriented) performed or to be performed by other than the organizational entity. Out-of-house performers may include other departmental or DoD organizational entities, industrial firms, educational institutions, not-for-profit institutions and private individuals.

1. **In-House Work Years.** Provide the total number of in-house government employee (civilian and military) Work Years (WYs) for FY 1993 that were performed by your activity in this functional support area - life cycle work area. Work Years are to be consistent with those used in the preparation of inputs to the President's Budget.

N/A WYs

2. **Expenditures.**

a. **In-House Expenditures.** Provide the total in-house cost, in thousands of dollars (\$ K), in FY 1993 for this functional support area - life cycle work area.

\$ N/A K

b. **Out-of-House Expenditures.** Provide the total funds expended, in thousands of dollars (\$ K), during FY 1993 for this functional support area - life cycle work area. **Do not** include direct cite funding.

\$ N/A K

c. **Direct Cites.** Provide total direct cite funds, in thousands of dollars (\$ K), expended on contract during FY 1993 for this functional support area - life cycle work area.

\$ N/A K

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

INSTRUCTIONS FOR TAB B

A. Definitions

Special Facilities/Equipment Resources. Include a copy of the form provided at Tab B of this data call for each conventional (non-nuclear) facility and "major" piece of equipment located at this activity. *Include* information on separate detachments. The following definitions will apply:

Facilities will include such things as rocket firing bays, towing tanks, anechoic chambers, hypervelocity gun ranges, hyperbaric chambers, wind tunnels, simulation/emulation laboratories, etc. Include buildings that are integral to the facility/equipment. Do not include major outdoor ranges or land.

Additionally, describe modeling and simulation capabilities, hardware in-the-loop facilities and analysis or wargaming capabilities, as appropriate.

Equipment includes resources used to support the operation of the site with a replacement value of \$500,000 or greater. Do not include land or buildings in this category. In reporting equipment, provide information to indicate the degree of portability of the equipment. Class 3 Personal Property items ("plant equipment" or "equipment in place") by definition are highly portable and can be moved easily. Some Class 2 Installed Equipment, such as Main-frame computers, test stands and small hyperbaric chambers, require more extensive utilities support and assembly of components, but can be relocated without damage to the facility or equipment, and therefore are considered "moveable" assets. Other Class 2 items are so large and/or integral to the facility that houses them that major demolition and construction would be required to relocate them, and therefore are considered "fixed" assets.

B. Instructions

1. Complete Tab B for each piece of identified conventional facilities and equipment (as defined above) supporting all Functional Support Areas (products) marked in the matrix (Tab A, Tables 1.a-1.h).
2. Where appropriate, pieces of equipment may be aggregated for the purposes of completing Tab B. For example, inside shop equipment may be consolidated as a shop facility; cranes, special hull treatment enclosures, portable test equipment, etc.
3. Do not list drydocks as a facility or an equipment.

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	SRF, GUAM
Facility or Equipment Nomenclature or Title	RECOMPRESSION CHAMBER

1. State the primary purpose(s) of the facility/equipment.

PROVIDE REGIONAL RECOMPRESSION SERVICES BOTH HUMANITARIAN AND MILITARY SERVICE FOR DECOMPRESSION RELATED SICKNESSES. CHAMBER IS THE ONLY MANNED, CERTIFIED CHAMBER MILITARY & CIVILIAN IN THE WESTERN PACIFIC REGION.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.

MOVEABLE ASSET

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 250,000.00

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 4 TONS Cube = 1000.

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.

COMPRESSED AIR.

6. Indicate any special budget requirements for the facility/ quipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.). **NONE**

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing). **NONE**

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

THE OPERATION OF THE CHAMBER COULD BE FUNCTIONALLY TRANSFERRED TO NAVAL HOSPITAL. CHAMBER COULD BE RELOCATED TO THE HOSPITAL, BUT WOULD REQUIRE APPROXIMATELY 0.5 MIL IN RELOCATON COSTS. IF THIS FACILITY WERE LOST, THE CLOSEST TREATMENT FACILITY WOULD BE IN NAVAL ACTIVITY, YOKOSUKA JA.

(continued next page)

Facility or Equipment Nomenclature or Title: RECOMPRESSION CHAMBER ,
continued

9. Indicate how and when the facility/equipment was transported and or constructed at the site. **THE RECOMPRESSION CHAMBER WAS CONSTRUCTED ON-SITE IN 1951 (APPROX DATE) BY PATTERSON KELLY CO.**

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]
10.4 DIVING/SALVAGE AND OCEAN ENGINEERING

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.
34 TREATMENTS PER YEAR

12. Provide the projected utilization data out to FY 1997.
30 TREATMENTS PER YEAR

13. What is the approximate number of personnel used to operate the facility/equipment?
NINE MILITARY DIVER POSITIONS

14. What is the approximate number of personnel needed to maintain the equipment?
NINE DIVER POSITIONS ALSO PERFORM THE MAINTENANCE

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

ENCLOSED

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	SHIP REPAIR FACILITY, GUAM
Facility or Equipment Nomenclature or Title	LATHE, ENGINE, BORING AND TURNING, 720"CC

1. State the primary purpose(s) of the facility/equipment.
THIS EQUIPMENT IS USED TO RESURFACE OR REPAIR SHAFTS.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.
MOVEABLE

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 900,000

4. Provide the gross weight and cube of the facility/equipment.
Gross Weight = 205,000 Cube = 8832

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.
NONE

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).
REQUIRES AN ISOLATED, EXTRA THICK CONCRETE FOUNDATION DUE TO WEIGHT OF MACHINE. THE ELECTRICAL CONTROL BOX HAS AN INSTALLED AIR-CONDITIONING SYSTEM.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).
NONE

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.
THE NAVY WOULD LOSE THE ABILITY TO REPAIR SHAFTS OF UP TO 60' IN LENGTH & 5' DIAMETER. THIS IS THE ONLY ONE WITHIN AT LEAST A 2500 MILE RADIUS.

(continued next page)

Facility or Equipment Nomenclature or Title: LATHE, ENGINE BORING AND TURNING , continued

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

THIS EQUIPMENT WAS RECEIVED 3/17/93. THIS MACHINE WAS MANUFACTURED IN 1945 BUT WAS TRANSPORTED BY SHIP TO SRF, GUAM AFTER BEING REBUILT.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

10.9--ACTIVITY MISSION AND FUNCTION SUPPORT.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

10% BASED ON 24 HOUR/365 DAYS PER YEAR.

12. Provide the projected utilization data out to FY 1997.

NO CHANGE

13. What is the approximate number of personnel used to operate the facility/equipment?

TWO

14. What is the approximate number of personnel needed to maintain the equipment?

TWO

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

ENCLOSED

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	SHIP REPAIR FACILITY, GUAM
Facility or Equipment Nomenclature or Title	PORTAL CRANE (#2)

1. State the primary purpose(s) of the facility/equipment.
PROVIDES HEAVY LIFT CAPABILITY FOR REPAIR AND OVERHAUL OF SHIPS AND SHIPS' SYSTEMS.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.
MOVEABLE

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 2.2 MILLION

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 362,000 Cube = 85,033.8

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.
DIESEL-ENGINE POWERED.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).
NONE

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).
NONE

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.
LOSS OF THIS CRANE WOULD GREATLY IMPACT ON SRF, GUAM'S CAPABILITY TO REPAIR AND OVERHAUL SHIPS.

(continued next page)

Facility or Equipment Nomenclature or Title: PORTAL CRANE (#2) ,
continued

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

THIS CRANE WAS MANUFACTURED IN 1941. IT HAS BEEN ESTABLISHED THAT THE CRANE WAS AT SRF, GUAM, BY 1956 BUT RECORDS DO NOT INDICATE EXACT DATE. CRANE WOULD HAVE BEEN TRANSPORTED BY SHIP.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

10.9--ACTIVITY MISSION AND FUNCTION SUPPORT.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

35% BASED ON 24 HOUR/365 DAYS PER YEAR.

12. Provide the projected utilization data out to FY 1997.

THE SAME. THIS CRANE IS DUE FOR OVERHAUL, BUT IT HAS NOT BEEN SCHEDULED.

13. What is the approximate number of personnel used to operate the facility/equipment?

TWO

14. What is the approximate number of personnel needed to maintain the equipment?

TWO

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

ENCLOSED

35% BASED ON 24 HOUR/365 DAYS PER YEAR. THIS CRANE WAS OVERHAULED APPROXIMATELY FOUR YEARS AGO.

12. Provide the projected utilization data out to FY 1997.

SAME

13. What is the approximate number of personnel used to operate the facility/equipment?

TWO

14. What is the approximate number of personnel needed to maintain the equipment?

TWO

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

ENCLOSED

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	SHIP REPAIR FACILITY, GUAM
Facility or Equipment Nomenclature or Title	PORTAL CRANE (PC-22)

1. State the primary purpose(s) of the facility/equipment.
PROVIDES HEAVY LIFT CAPABILITY FOR REPAIR AND OVERHAUL OF SHIPS AND SHIPS' SYSTEMS.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.
MOVEABLE

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 2.1 MILLION

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 390,800 Cube = 275,781'

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.
DIESEL-ENGINE POWERED.

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).
NONE

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).
NONE

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.

THIS CRANE IS NOT YET OPERATIONAL (SEE ITEM #9). HOWEVER, SRF, GUAM'S TWO ADDITIONAL CRANES ARE OLD AND ARE HEAVILY USED. COMPLETION OF THIS CRANE WILL ALLOW "SLACK" IN SYSTEM FOR HEAVY MAINTENANCE AND OVERHAUL OF OTHER CRANES.

Facility or Equipment Nomenclature or Title: PORTAL CRANE (PC-22) ,
continued

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

THIS CRANE WAS TRANSFERRED FROM LONG BEACH IN PIECES IN 1989. IT REQUIRED DRASTIC MODIFICATIONS AND RECONSTRUCTION WAS NOT BEGUN UNTIL EARLY 1994. IT SHOULD BE COMPLETED IN SEPT. 1995.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

10.9--ACTIVITY MISSION AND FUNCTION SUPPORT.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

N/A

12. Provide the projected utilization data out to FY 1997.

35% BASED ON 24 HOUR/365 DAYS PER YEAR. THIS CRANE IS CURRENTLY IN OVERHAUL.

13. What is the approximate number of personnel used to operate the facility/equipment?

TWO

14. What is the approximate number of personnel needed to maintain the equipment?

TWO

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

*As per phone conversation with LT Bergum CincPACFLT BEAC
on 22JUL, NO photo of PC-22 is not available since it
is disassembled for overhaul. M70C = N441C 7/22/94*

**TAB B: SPECIAL FACILITIES AND EQUIPMENT
FACILITIES/EQUIPMENT CAPABILITY FORM**

Activity Name:	SHIP REPAIR FACILITY, GUAM
Facility or Equipment Nomenclature or Title	BORING AND TURNING MACHINE

1. State the primary purpose(s) of the facility/equipment.
PROVIDES A VERTICAL BORING MILL OR VERTICAL TURNING LATHE FOR CYLINDRICAL, FACING, TAPER TURNING AND THREADING OF WORK PIECES OF SIZES UP TO 120" IN DIAMETER AND 72" IN HEIGHT.

2. Indicate whether the facility/equipment is portable, moveable or fixed as defined by the definitions provided on the first page of this Tab.
MOVEABLE

3. Provide the replacement value of the facility/equipment. Report the facility/equipment cost separate from any building and utilities that may be integral to the facility/equipment.

Replacement Value = \$ 600,000

4. Provide the gross weight and cube of the facility/equipment.

Gross Weight = 176,500 Cube = 1320'

5. Indicate any "special" utility support required by this facility/equipment other than normal electrical power.
NONE

6. Indicate any special budget requirements for the facility/equipment (i.e., special foundations, non-ferrous materials, shielding, hardening, etc.).
AN ISOLATED, EXTRA THICK CONCRETE FOUNDATION IS REQUIRED DUE TO WEIGHT OF MACHINE.

7. State any environmental control requirements for the facility/equipment (i.e., temperature, humidity, air scrubbing).
NONE

8. Indicate if this facility/equipment would be extremely difficult or impossible to replicate or relocate at another site and the impact to the Department of the Navy if this facility/equipment were lost. Consider existing Government-wide and commercial capabilities as the replication and impact statements are formulated.
NO

(continued next page)

Facility or Equipment Nomenclature or Title: BORING AND TURNING MACHINE
, continued

9. Indicate how and when the facility/equipment was transported and or constructed at the site.

RECD. SRF, GUAM 9/1/73. THIS MACHINE WAS MANUFACTURED IN 1954 BUT WAS REBUILT BEFORE BEING TRANSPORTED TO GUAM VIA SHIP.

10. List the functional support areas (previously provided in Tab A) that this facility/equipment support. [Refer to Appendix A for the list of functional support areas.]

10.9--ACTIVITY MISSION AND FUNCTION SUPPORT.

11. Provide the historical utilization average for the past five fiscal years (FY 1989-1993). Define the unit of measure used.

5% BASED ON 24 HOUR/365 DAYS PER YEAR.

12. Provide the projected utilization data out to FY 1997.

NO CHANGE.

13. What is the approximate number of personnel used to operate the facility/equipment?

TWO

14. What is the approximate number of personnel needed to maintain the equipment?

TWO

15. Provide one 8 1/2 x 11 black and white photo of the facility/equipment.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS

1. **PLATFORMS.** Those self-propelled, boosted or towed conveyances used for the strategic and tactical deployment of forces, weapons, materials and supplies in support of naval warfare. Projects within this area are limited to those in which the principal objective is to provide technological wherewithal to develop Navy aerospace craft, ships, submarines, boats, and amphibians.

1.1 *Undersea.* Self-propelled, boosted, or towed conveyances for transporting a burden under the sea. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, transmissions and propulsors, fuels and lubricants, energy conservation and pollution abatement equipment, control systems, and silencing inherent in its construction and operation, but excluding mission oriented systems. Included are submarines and other submersibles including their application as unmanned autonomous vehicles (UAV) and targets.

1.2 *Aircraft.* Self-propelled, boosted, or towed conveyances for transporting a burden through the air. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, transmissions and propulsors, fuels and control systems and silencing inherent in its construction and operation, but excluding mission oriented systems. Included are all air vehicles including their application as UAVs and targets.

1.3 *Surface Ship.* Self-propelled, boosted, or towed conveyances for transporting a burden on land or sea. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, transmissions and propulsors, fuels and lubricants, energy conservation and pollution abatement equipment, control systems, and silencing inherent in its construction and operation, but excluding mission oriented systems. Included are ships and craft including their application as UAVs and targets.

1.4 *Space Satellites.* A device or spacecraft in orbit. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, and control systems, inherent in its construction and operation.

1.5 *Ground Vehicles.* Self-propelled, boosted, or towed conveyances for transporting a burden on land. The vehicle package includes the design, structures, materials, non-nuclear propulsion, power and auxiliary equipment, transmissions and propulsors, fuels and lubricants, energy conservation and pollution abatement equipment, control systems, and silencing inherent in its construction and operation, but excluding mission oriented systems.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

2. **WEAPONS SYSTEMS.** A system that provides the capability to defeat naval and military targets by destructive means. Included are counter-countermeasures and other design features to reduce the susceptibility of the weapon to counter actions, but excluded are those projects in which the principal objective is to counter a weapons system or those efforts to make a system (other than weapons) less vulnerable to enemy weapons.

2.1 *Gun Systems.* Ordnance which fires projectiles; includes related ammunition (guided projectiles are included in "guided missiles". Included are gun systems aboard aircraft and ships, and gun systems used by personnel.

2.2 *Guided Missiles.* Weapons, either self-propelled, (i.e., reaction launched) or impulse driven (i.e. gun/tube impulse launched) capable of homing on, or following a beam or command signals through the air to a target (includes guided projectiles). Included are missiles that are launched by submarine, aircraft, and ship.

2.3 *Free Fall Weapons and Rockets.* Free fall weapons are those air-delivered weapons, including components and subsystems, which follow a ballistic trajectory after gravity launch without any guidance other than that from the initial orientation and velocity of the launching aircraft. A rocket is a self-propelled airborne vehicle whose trajectory or course, while in flight, cannot be controlled.

2.4 *Torpedoes.* Self-propelled, guided or unguided underwater weapons. Included are torpedoes launched by submarine, aircraft, and ship.

2.5 *Mines.* Self-activating standoff or contact explosive devices that are designed to destroy or damage ground vehicles, boats, ships, or aircraft, or designed to wound, kill, or otherwise incapacitate personnel.

2.6 *Directed Energy Systems.* Devices and techniques for generating and focusing high-intensity beams of electromagnetic energy or charged particles upon targets with lethal effects.

2.7 *Explosives.* Metastable compounds which can rapidly release large quantities of energy mostly in the form of hot, high-pressure gases. Explosives are used in naval munitions such as mines, torpedoes, missiles, etc., and also in other Navy products such as aircraft escape systems, fuse trains, etc.

2.8 *Launchers.* That group of devices, components, or subsystems needed to support, hold, and launch expendable weapons, countermeasure devices, or other stores; the control systems for managing these systems and the stores they carry.

2.9 *Fire Control.* Those platform-based systems which provide data for and/or control the launch platform/weapon/weapon-target interaction in all phases required by a weapons system (e.g., acquisition, track, commit-to-fire-pre-launch, post-launch, mid-course, terminal intercept, and assessment). Included are systems that are based undersea, aboard aircraft, shipboard, and on land.

2.10 *Weapons Data Links.* Efforts include the data links that are part of the weapon's command, control and communications systems.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

2.11 *Weapons Fuzing*. Efforts leading to the design of systems to sense a target or the result of other prescribed conditions such as time, barometric pressure, command, etc., and initiate a train of fire. Safing and arming are primary functions performed by a fuse to preclude initiation of the ammunition before the desired position or time.

2.12 *Weapons Propulsion*. Included are propellants, subsystems and systems that comprise the means by which a weapons system moves through the air or sea.

2.13 *Other Ordnance*. Includes efforts that do not fit in the above categories (e.g., pyrotechnics, gas generators, CAD/PAD/AEPS).

2.14 *Explosive Ordnance Disposal*. Efforts relating to the technical support of explosive ordnance disposal technology and training.

3. COMBAT SYSTEM INTEGRATION. That effort required to introduce a new system into the operating forces. It involves the integration and evaluation of a new hardware or software subsystem installed in a Navy platform. It includes the mating, installation, and operational support of the resulting higher level system to ensure optimum operating performance.

3.1 *Subsurface*. The integration and evaluation of the various hardware and software subsystems that make up a higher level system, and the mating, installation, and operational support of this higher level system, including its operational software and training systems into undersea platforms.

3.2 *Air*. The integration and evaluation of the various hardware and software subsystems that make up a higher level system, and the mating, installation, and operational support of this higher level system, including its operational software and training systems into air platforms.

3.3 *Surface*. The integration and evaluation of the various hardware and software subsystems that make up a higher level system, and the mating, installation, and operational support of this higher level system, including its operational software and training systems into surface platforms.

3.4 *Multiplatform*. The integration of multiplatform hardware and software subsystems to make up a higher level system, including the mating, installation, and operational support (including training systems) of this higher level system.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

4. SPECIAL OPERATIONS SUPPORT. Those efforts which are in support of amphibious landing, Marine Corps operations, special warfare and other unique operations. It includes weapons, countermeasures, surveillance and a command support which are developed specifically for the projection of forces ashore and that do not have an application by the Navy general forces in the role of sea control.

4.1 *Landing Force Equipment and Systems.* Involved is that RDT&E effort which is not functionally a part of the amphibious platform. Specifically, this includes reconnaissance of amphibious objective areas, environmental support of amphibious operations, amphibious logistics and the integration of the amphibious and Marine Corps systems required to land amphibious forces on a hostile shore and establish a beachhead. (Contingency facilities in support of forces ashore are included in "facilities".)

4.2 *Coastal/Special Warfare Support.* Techniques and systems required to defend coastal, inshore and harbor facilities as well as those needed to conduct operations such as reconnaissance, deception, coastal or offshore interdiction and assault, counterinsurgency, intelligence gathering, remote sensor operation and waterborne intrusion detection. Special warfare systems include systems, techniques, and concepts utilized by specifically cross-trained personnel in unconventional warfare and coastal/riverine operations.

5. SENSORS & SURVEILLANCE SYSTEMS. Those systems used to systematically observe air, space, surface and subsurface areas to detect, classify, localize and identify real or potential military targets. Excluded are those projects in which the principal objective is navigation, weapon fire control or broadbased investigation of the properties of the media or the propagation of energy therein.

5.1 *Sonar Systems.* Those sonar systems and devices used to conduct search, reconnaissance, and surveillance operations to detect, classify, locate, and/or track targets. Included are those systems and devices that are mobile aboard undersea, air, and surface platforms, and those that are fixed.

5.2 *Radar Systems.* Those radar systems and devices used to conduct search, reconnaissance, or surveillance operations to detect, classify, locate, and/or track targets. Included are those systems and devices that are mobile aboard undersea, air, and surface platforms, and those that are fixed.

5.3 *Special Sensors.* Those systems and devices which utilize unique phenomena or methods or combinations of methods to conduct search, reconnaissance, or surveillance operations to detect, classify, locate, and/or track targets. Included are active sensors, passive sensors (e.g., thermal imagers, low light level TV, and infrared search and track systems), and the associated signal and image processing.

5.4 *Space Sensor/Surveillance Systems.* Those devices and systems in Earth orbit that are used to conduct search, reconnaissance, or surveillance operations to detect, classify, locate and/or track targets.

5.5 *Ocean Surveillance.* Systems and equipment for systematic observation of ocean areas for identification and localization of ships, submarines, and aircraft from fixed and mobile platforms including operational software development, and integration of multi-sensor, coordinated detection data and its display at appropriate sites.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

6. NAVIGATION. Those systems which utilize electromagnetic, acoustic, or inertial means to guide or navigate surface, subsurface, or aerospace platforms. Included are those systems deployed aboard submarines, aircraft, surface ships and satellites, as well as those used in weapons systems.

6.1 *Submarine Navigation Systems.* Navigation systems deployed aboard submarines, or other undersea vehicles.

6.2 *Aircraft Navigation Systems.* Navigation systems deployed aboard aircraft.

6.3 *Surface Ship Navigation Systems.* Navigation systems deployed aboard surface ships.

6.4 *Weapons Navigation Systems.* Navigation systems installed within weapon systems, such as guided missiles.

6.5 *Satellite Navigation Systems.* Navigation systems deployed aboard satellites.

7. COMMAND, CONTROL, COMMUNICATIONS AND INTELLIGENCE (C³I). The acquisition, processing and dissemination of information required to plan, direct, and control operations. Included are those projects in command and control, communications and intelligence. Excluded are surveillance systems, and guidance and control of vehicles and weapons. These C³ systems may be internal or external to submarine, airborne, surface, and land-based platforms.

7.1 *Submarine.* C3 systems deployed aboard submarines, or other undersea vehicles.

7.2 *Airborne.* C3 systems deployed aboard aircraft.

7.3 *Shipboard.* C3 systems deployed aboard surface ships.

7.4 *Land-Based.* C3 systems deployed at shore facilities.

7.5 *Space Communications.* Communications systems in Earth orbit used to convey information.

7.6 *Non-Tactical Data Systems.* Data systems utilized aboard the Navy's operating forces and at shore sites that support ship, submarine and aircraft maintenance, configuration and asset management, supply, inventory, finance, medical, dental, manpower management, administration, food services (ship's mess), and resale operations (ship's stores).

7.7 *Air Traffic Control Systems.* Systems used to promote the safe, orderly, and expeditious movement of air traffic.

7.8 *Intelligence Information Systems.* The systems necessary to conduct the naval warfare task of intelligence. This task involves the assessment and management of information obtained via surveillance, reconnaissance, and other means to produce timely indications and warning, location, identification, intentions, technical capabilities, and tactics of potential enemies and other countries of interest.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

8. DEFENSE SYSTEMS. Those systems that are principally designed to defeat a particular weapon system; those systems that are designed to reduce the effectiveness of an enemy's surveillance, communications, navigation and command and control; as well as those efforts directed toward gathering information on the emissions of enemy systems. It does not include those projects in which the principal objective is to incorporate design features in vehicles, surveillance, communication, navigation and other support systems which reduce their vulnerability to enemy action. It also does not include chemical/biological defense for personnel.

8.1 *Ballistic Missile Defense.* Systems designed to protect civilian population centers, military forces, and territory from ballistic missile attack.

8.2 *Countermeasures (CM).* Those systems that are principally designed to defeat a particular weapon system; reduce the effectiveness of an enemy's surveillance, communications, navigation and command and control; as well as gather information on the emissions of enemy systems. Included are those projects to develop systems deployed aboard submarine, aircraft, and surface ship, and those for countering enemy mine warfare through the destruction or neutralization of minefields.

8.3 *Electronic Warfare (EW) Systems.* Those systems, techniques, and devices utilized to determine, exploit, reduce, or prevent hostile use of the electromagnetic spectrum. Included are those projects to develop systems deployed aboard submarine, aircraft, and surface ship, as well as those to develop EW simulators.

9. STRATEGIC PROGRAMS. Programs conducted to support the deployment and use of the Navy's strategic deterrence force, as well as those programs conducted on nuclear weapons and effects.

9.1 *Navy Strategic Systems.* Those ships and weapon systems, subsystems, devices, techniques, trainers and facilities required specifically for the deployment and use of the Navy's strategic deterrence force.

9.2 *Nuclear Weapons and Effects.* Nuclear weapons effects and countermeasures, including thermal and nuclear radiation effects and the hardening of components and of weapons systems both nuclear and non-nuclear.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

10. GENERAL MISSION SUPPORT. Those major areas of support required by Navy general forces that are not included under platforms, weapons systems, combat system integration, special operations support, sensors and surveillance systems, navigation, C^aWE, defense systems, strategic programs, and technology base programs.

10.1 *Personnel and Training.* Human resources research and development for the areas of manpower, personnel, education, and training and its support and service functions for human factors effort in system design, development and acquisition. Included are those systems related to submarine, aircraft, surface ship and weapons training, as well as human resources research.

- 10.1.1 Submarine-Related Training Systems
- 10.1.2 Aircraft-Related Training Systems
- 10.1.3 Surface Ship-Related Training Systems
- 10.1.4 Weapons-Related Training Systems
- 10.1.5 Human Resources Research and Development

10.2 *Logistics Planning and Implementation.* Projects for those aspects of military operations which deal with the movement, maintenance, supply, and support of Naval forces afloat and ashore, including underway replenishment, warehousing and mobile logistics maintenance and repair activities; material acquisition, control, handling, distribution and disposal processes; and logistics planning, control, and information processing functions.

10.3 *Facilities Engineering.* Products for (a) ocean facilities including the siting, design, construction/implant, and maintenance of facilities attached to the sea floor such as cable structures, pipelines, communications/power cables and Fleet moorings; (b) contingency facilities and equipment to support Navy and Marine Corps forces ashore in amphibious objective areas and at advanced naval bases; (c) permanent shore facilities such as buildings, piers, drydocks, airfields, POL and weapons storage, and utilities; (d) energy systems ashore including conservation, synthetic fuels, energy self-sufficiency; and (e) environmental protection systems ashore such as industrial wastewater treatment plants, air and noise pollution control devices, and solid waste management systems.

10.4 *Diving, Salvage and Ocean Engineering.* Those support systems and equipment that are required by the Navy in the performance of ocean bottom search, diving, rescue, recovery, salvage operations, and siting, design, construction/implantment, inspection, maintenance and recovery of underwater facilities and associated systems.

10.5 *Environmental Description, Prediction, and Effects.* The study, modeling, and simulation of atmospheric, oceanic, terrestrial, and space environmental effects, both natural and man-made, including the interaction of a weapon system with its operating medium and man-produced phenomena such as obscurants found on the battlefield.

10.6 *Crew Equipment and Life Support.* Techniques, equipment and devices to provide protection for and support of Navy operating personnel, including chemical/biological defense. Included are systems aboard submarines, aircraft, and surface ships, as well as medical research and combat casualty care, and clothing and textiles.

- 10.6.1 Submarine
- 10.6.2 Aircraft
- 10.6.3 Surface Ship
- 10.6.4 Medical Research and Combat Casualty Care
- 10.6.5 Clothing and Textiles

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

10. GENERAL MISSION SUPPORT, continued

10.7 *Major Range Development and Operation.* The design, equipping, and operation of ranges offering diverse and accurate measurement and reconstruction capabilities to establish performance profile data on newly designed, as well as existing, naval vehicles and systems operating in a realistic environment.

10.8 *Other Subsidiary Systems or Components.* Subsidiary systems or components that do not fit within the above product areas (e.g., batteries).

10.9 *Activity Mission and Function Support.* Efforts that clearly support the Activity's responsibilities but which cannot be uniquely assigned to a specific functional area.

11. GENERIC TECHNOLOGY BASE. Includes basic research and exploratory development (Budget Categories 6.1 & 6.2) projects that do not fit under the more warfare-focused functional support areas. These areas include computers, software, communications networking, electronic devices, materials and processes, energy storage, propulsion and energy conversion, design automation, human-system interfaces, and other technology base areas.

11.1 *Computers.* High performance computing systems (and their software operating systems) providing orders-of-magnitude improvements in computational and communications capabilities as a result of improvements in hardware, architectural designs, networking, and computational methods.

11.2 *Software.* The tools and techniques that facilitate the timely generation, maintenance, and enhancement of affordable and reliable applications software, including software for distributed systems, data base software, artificial intelligence, and neural nets.

11.3 *Communications Networking.* The timely, reliable, and secure production and worldwide dissemination of information, using shared communications media and common hardware and applications software from originators to DoD consumers, in support of joint-Service mission planning, simulation, rehearsal, and execution.

11.4 *Electronic Devices.* Ultra-small (nanoscale) electronic and optoelectronic devices, combined with electronic packaging and photonics, for high speed computers, data storage modules, communications systems, advanced sensors, signal processing, radar, imaging systems, and automatic control.

11.5 *Materials and Processes.* Development of man-made materials (e.g., composites, electronic and photonic materials, smart materials) for improved structures, higher temperature engines, signature reduction, and electronics, and the synthesis and processing required for their application.

11.6 *Energy Storage.* The safe, compact storage of electrical or chemical energy, including energetic materials for military systems.

11.7 *Propulsion and Energy Conversion.* The efficient conversion of stored energy into usable forms, as in fuel efficient aircraft turbine engines and hypersonic systems.

APPENDIX B

I. FUNCTIONAL SUPPORT AREA DEFINITIONS, continued

11. GENERIC TECHNOLOGY BASE, continued.

11.8 *Design Automation.* Computer-aided design, concurrent engineering, simulation, and modeling; including the computational aspects of fluid dynamics, electromagnetics, advanced structures, structural dynamics, and other automated design processes.

11.9 *Human-System Interfaces.* The machine integration and interpretation of data and its presentation in a form convenient to the human operator; displays; human intelligence emulated in computational devices; and simulation and synthetic environments.

11.10 *Other Technology Base Programs.* All technology base programs (Budget Categories 6.1 and 6.2 only) that do not fit into the above warfare-focused functional support areas (#1 - #10), or within the above generic technology base areas (#11.1 - #11.9).

II. LIFE-CYCLE WORK AREA DEFINITIONS

RDT&E

1. **BASIC RESEARCH.** (Budget Category 6.1 only) This area includes scientific study and experimentation to increase knowledge and understanding in the physical, engineering, environmental and life sciences related to long-term national security needs.

2. **EXPLORATORY DEVELOPMENT.** (Budget Category 6.2 only) This area includes efforts to solve specific military problems, short of major development. Exploratory development may vary from fairly fundamental applied research to sophisticated breadboard hardware, study programming and planning efforts.

3. **ADVANCED DEVELOPMENT.** (Budget Category 6.3 only) This area includes efforts on projects which have moved into the development of hardware for test. The prime objective is proof of design concept rather than the development of hardware for service use.

4. **ENGINEERING AND MANUFACTURING DEVELOPMENT.** (Budget Category 6.4 only) This area includes programs in full scale development, but which have not received approval for production or had production funds included in the DoD budget submission for the budget or subsequent fiscal year.

5. **RDT&E MANAGEMENT SUPPORT.** (Budget Category 6.5 only) This area includes support of installations or operations required for general research and development use. Included would be test ranges, military construction, maintenance support of laboratories, operations and maintenance of test aircraft and ships, and studies and analyses in support of the R&D program.

6. **OPERATIONAL SYSTEMS DEVELOPMENT.** (Budget Category 6.6 only) This area includes projects still in full-scale development, but which have received approval for production through Defense Acquisition Board or other action, or for which production funds have been included in the DoD budget submission for the budget or subsequent fiscal year. All work in this area is identified by major line item projects that appear as "RDT&E Costs of Weapon System Elements" in other programs.

APPENDIX B

II. LIFE-CYCLE WORK AREA DEFINITIONS, continued

ACQUISITION

7. **PRODUCTION.** During this phase, the system, including training equipment, spares, etc., is produced for operational use.
8. **ACCEPTANCE TESTING.** This phase involves the test and evaluation of production items to demonstrate that the items procured fulfill the requirements and specifications of the procuring contract on agreement
9. **MODERNIZATION.** This phase of the work involves the modification, upgrade, or improvement of a system or subsystem.
10. **PROGRAM SUPPORT.** This phase involves al work not fully under the category of production (#7), acceptance testing (#8), or modernization (#9), that occurs during the acquisition of new systems or subsystems.

LIFE-TIME SUPPORT

11. **MAINTENANCE.** This phase of work involves the maintenance of systems and subsystems.
12. **REPAIR.** This phase of work involves the repair of systems or subsystems.
13. **TESTING.** This phase is typically funded from Budget Category 6.5 or procurement program elements. Work in this area supports developmental and/or operational testing and focuses on the evaluation od system safety, technical performance, environmental (climatic, electromagnetic, etc.) effects, sustainability and operational suitability, maturity of production processes, and compliance with the specifications and quality standards.
14. **IN-SERVICE ENGINEERING.** This phase is typically funded from Budget Category 6.6 or operations and maintenance (O&M) program elements. In-service engineering tends to focus on system peculiar capabilities in order to conduct check-out of the system and/or subsystem after they have undergone a modification, upgrade or improvement.
15. **PROGRAM SUPPORT.** This phase involves all work ant falling under the categories of maintenance (#11), repair (#12), testing (#13), in-service engineering (#14) and retirement (#16) that occur during the life-time support of new systems and/or subsystems.
16. **RETIREMENT.** This phase includes the retirement and disposal of obsolete systems and/or subsystems.

APPENDIX B

II. LIFE-CYCLE WORK AREA DEFINITIONS, continued

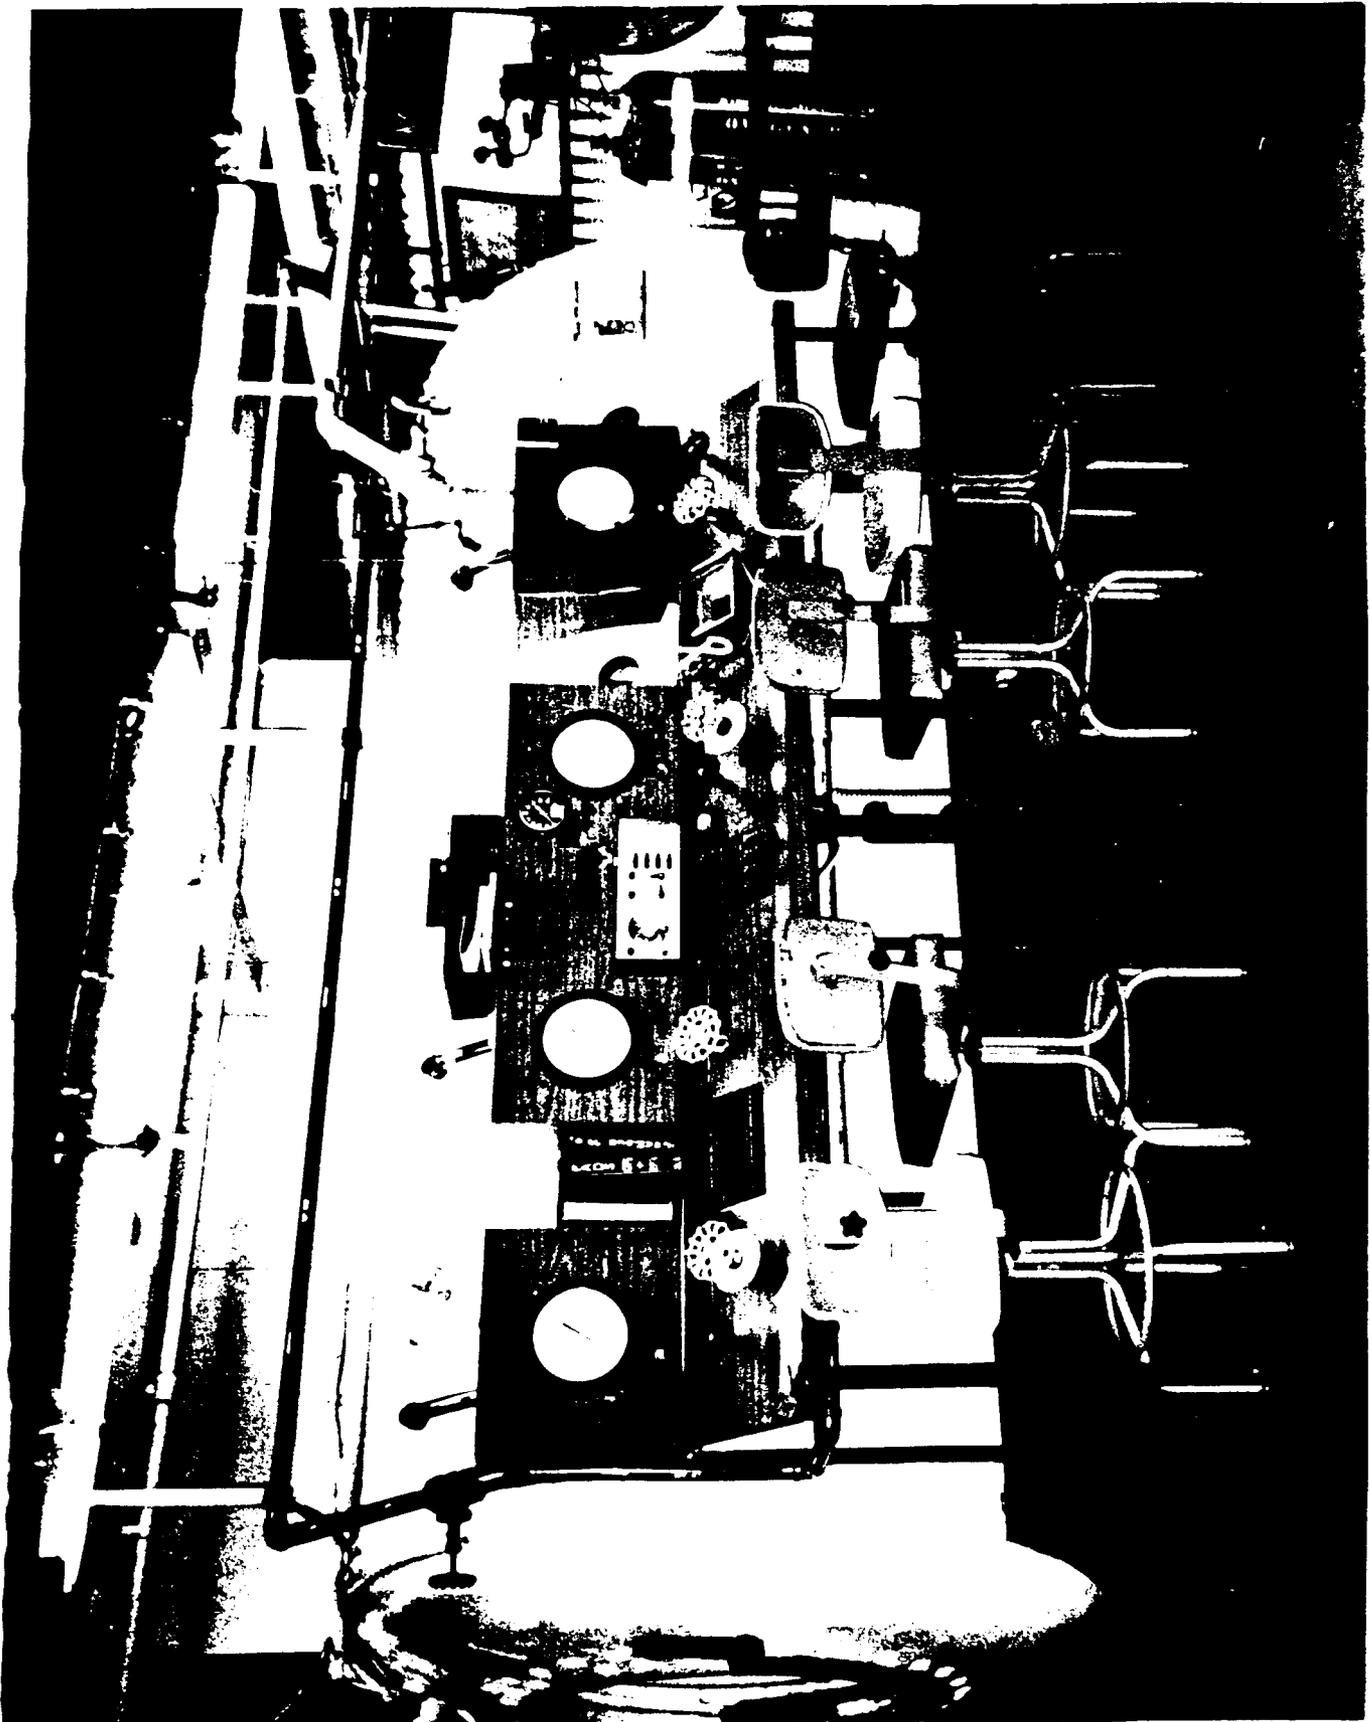

GENERAL

17. **TRAINING/OPERATIONAL SUPPORT.** Efforts in this area, involve the training of operational forces in the use of new techniques, equipment and systems, tactics or doctrine. Training and operational support is typically funded from O&M program elements.

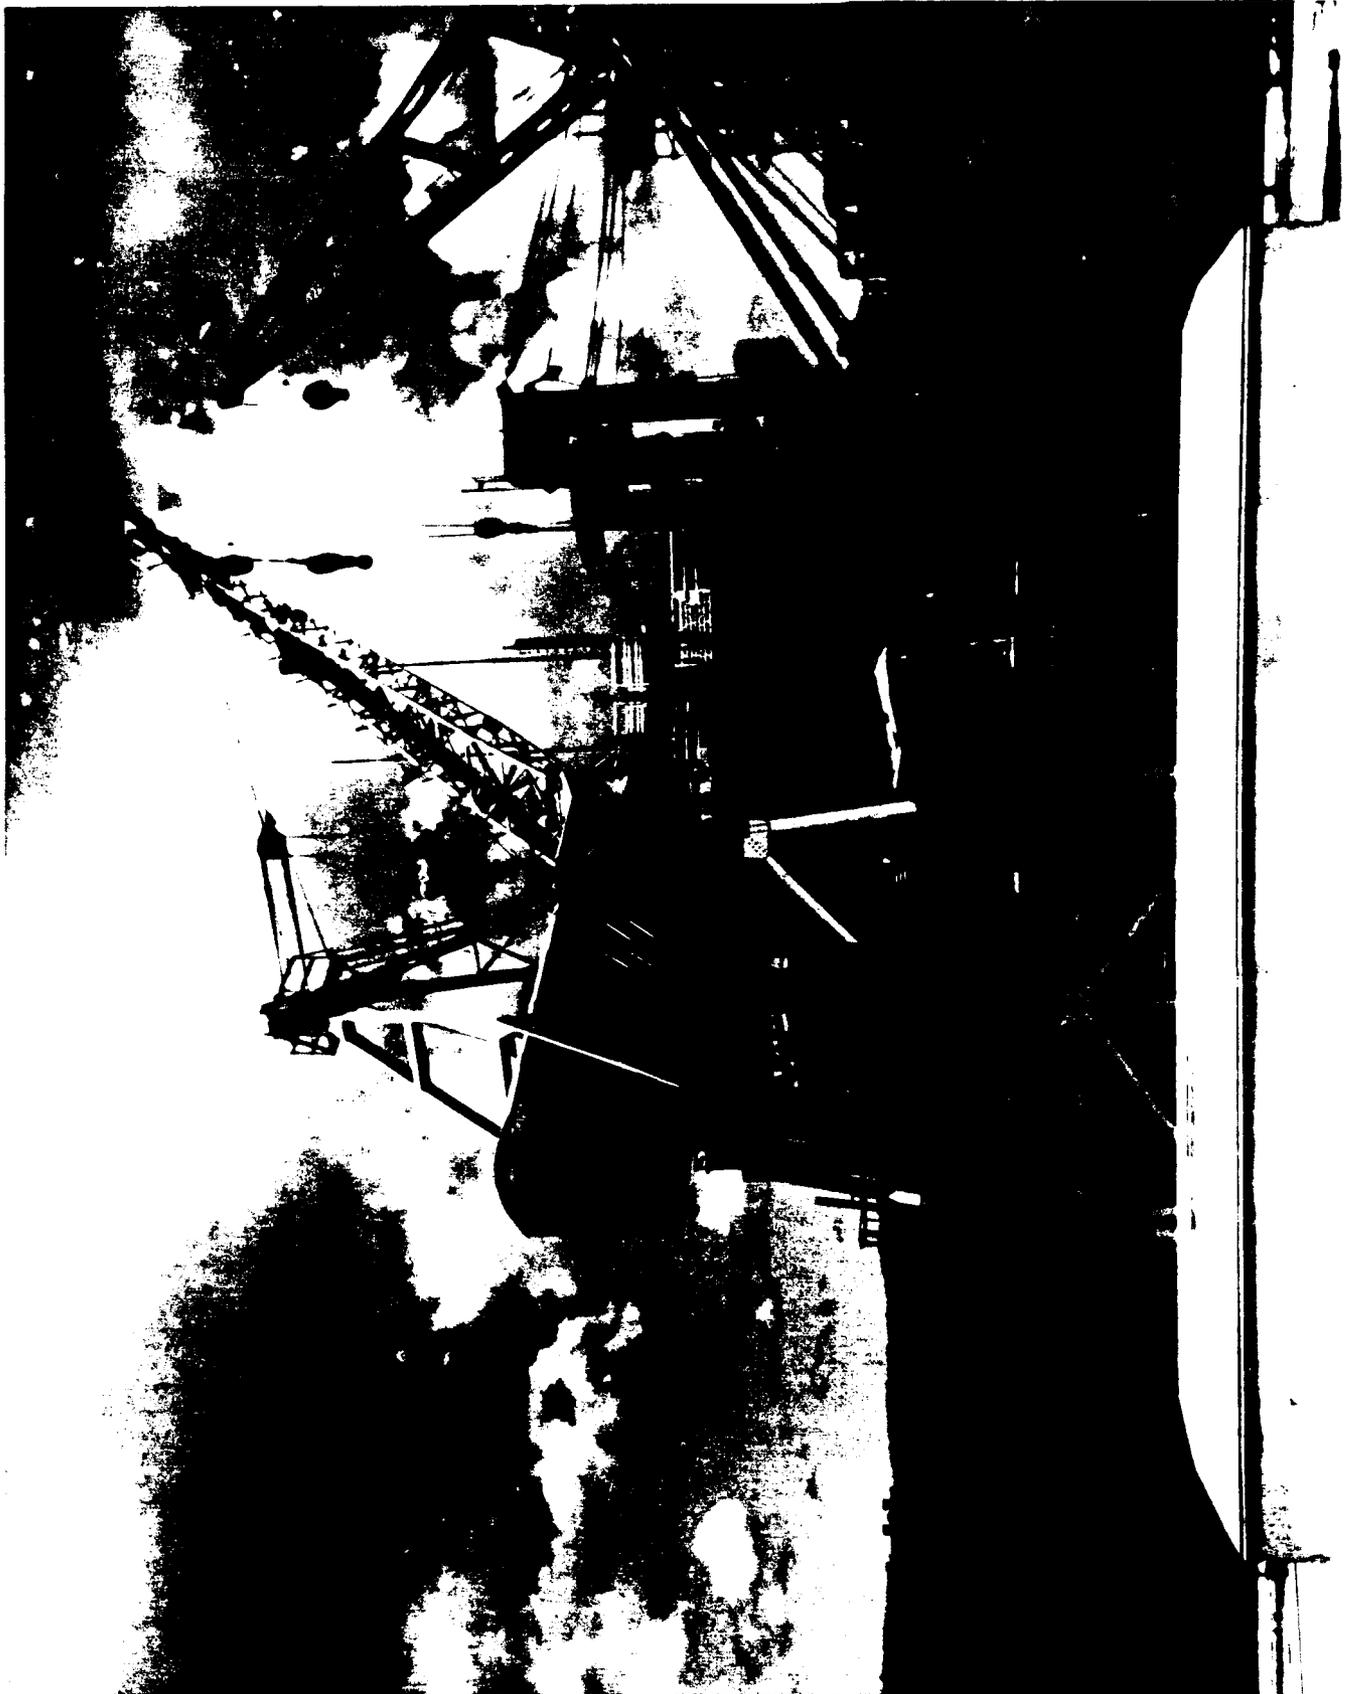

18. **SIMULATION, MODELING AND ANALYSIS.** This phase of work provides a simulated test environment or representation of systems, components and platforms. This work can be carried out throughout the development and test process as analytical tools, as well as tools to drive or control electronic and other environmental stimuli.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

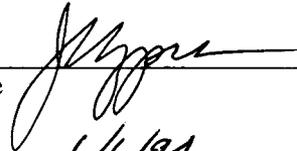

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**DATA CALL WORK SHEET FOR MILITARY VALUE:
NAVAL SHIPYARDS
and
NAVAL SHIP REPAIR FACILITY**

Category	Industrial Activities
Type	NAVAL SHIPYARDS
	NAVAL SHIP REPAIR FACILITY
Claimant	COMNAVSEASYSKOM (Naval Shipyards)
	CINCPACFLT (Naval Ship Repair Facility)

Notes:

In the context of this Data Call:

1. Base your responses for FY 1994 and previous years on executed workload, and for FY 1995 and subsequent years on workload as programmed. Use the workload as programmed in the FY 1995 Budget Submission and POM-96. Unless otherwise specified, use workload mixes as programmed. In estimating projected workload capabilities, use the activity configuration as of completion of all BRAC-88/91/93 actions.
2. "Production" equates to the number of items processed per Fiscal Year (FY), unless otherwise specified.
3. Unless otherwise specified, base your responses single shift operations of an eight hour day/five day notional normal work week (1-8-5). Report Direct Labor Man Years (DLMYs) in thousands of Man Years, to the nearest tenth, e.g. 32.2 K DLMYs.
4. Report workload performed on non-DON vessels (e.g. USCG, MSC) within the workload mission area most consistent with the work performed. Ensure that all workload performed/projected to be performed is reported.

If any responses are classified, so annotate the applicable question and include those responses in a separate classified annex.

This document has been prepared in WordPerfect 5.1/5.2.

Claimants	COMNAVSEASCOM (Shipyards)
.	CINCPACFLT (Ship Repair Facility)

Notes: In the context of this Data Call:

1. Base your responses for FY 1994 and previous years on executed workload, and for FY 1995 and subsequent years on workload as programmed. Use the workload as programmed in the FY 1995 Budget Submission and POM-96. Unless otherwise specified, use workload mixes as programmed. In estimating projected workload capabilities, use the activity configuration as of completion of all BRAC-88/91/93 actions.
2. Unless otherwise specified, for questions addressing maximum workload within the Mission Area of the Data Call, base your response on an eight hour day/five day notional normal work week (1-8-5). Please identify any processes which, under normal operations, operate on a different schedule in item 40.
3. Report Direct Labor Man Years (DLMYs) in thousands of Man Years, to the nearest tenth, e.g. 32.2 K DLMYs.
4. Core workloads are to be calculated in accordance with the Office of the Under Secretary of Defense (Logistics) (OUSD(L)) Memorandum dated 15 November 1993 (subject: "Policy for Maintaining Core Depot Maintenance Capability"). Core workload includes all Core work performed for other Military Departments.
5. Report workload performed on non-DON vessels (e.g. MSC, USCG) within the workload mission area most consistent with the work performed, specifying the vessel type in the first column. Ensure that all workload performed and projected to be performed is reported.

If any responses are classified, so annotate the applicable question and include those responses in a separate classified annex.

This document has been prepared in WordPerfect 5.1/5.2.

Note: The Box below breaks out Defense Department Depot Maintenance and Industrial activities by Commodity Groups for further assessment. The highlighted items have been incorporated into this Data Call. If your activity performs work in any other area, please include such workload and so annotate your Data Call response.

Mission Area

1. Shipwork (Nuclear - CVN COH)

1.1. Given the current configuration of the shipyard, provide the Direct Labor Man Years (DLMYs) for the CVN Complex Overhauls (COH) by ship hull number that were realized or are projected for this type of work through the period requested in the Tables.

Table 1.1a Historic / Predicted Work - CVN COH

(1986-1992: prior to costing change)

Ship Hull #	FY 1986	FY 1987	FY 1988	FY 1989	FY 1990	FY 1991	FY 1992	FY 1993
NONE	N/A							
Total	N/A							

Table 1.1b Historic / Predicted Work - CVN COH

Ship Hull #	FY 1994	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001
NONE	N/A							
Total	N/A							

1. Shipwork (Nuclear - CVN COH), continued

Answer the remaining CVN COH questions (Section 1.) only if your shipyard has some CVN workload scheduled, as reflected in Table 1.1.

1.2. Assuming (a) the current projected total workload remains as assigned; (b) that sufficient production demand is available to justify maximum hiring, maximum apprentice training, optimum (repeat order manufacturing lead times) procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which the CVN COH capability at this NSYD could be expanded? Please provide the response in absolute number of DLMYs that could be applied to CVN COHs without a significant increase in overhead costs and/or rates, assuming that you also have to execute the above workload and meet that cost schedule commitment to your customers.

Table 1.2 Maximum Potential Workload - CVN COH

CVN COH	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001
NONE	N/A						
Total	N/A						

1.3. What plant modifications, infrastructure, IPE and/or other facility improvements could be performed that would significantly open up additional CVN COH capability at this shipyard? Assume an environment unconstrained by funds or manning, but do not assume major MILCON on the order of additional drydocks. Please provide description, cost, and additional capability that would be realized. What would be the payback period and return on investment?

N/A

1.4 Are there any environmental, legal, or otherwise limiting factors that inhibit this shipyard's CVN COH present operations and/or development (encroachments, pollutant discharge, etc.)?

N/A

2. Shipwork (Nuclear - CVN RCOH)

2.1. Given the current configuration of the shipyard, provide the DLMYs for the CVN Refuelling Complex Overhauls (RCOH) by ship hull number that were realized or are projected for this type of work through the period requested in the Tables.

Table 2.1a Historic / Predicted Work - CVN RCOH

(1986-1992: prior to costing change)

NONE	N/A						
Total	N/A						

2.3. What plant modifications, infrastructure, IPE and/or facility improvements could be performed that would significantly open up additional CVN RCOH capability at this yard? Assume an environment unconstrained by funds or manning, but do not assume major MILCON on the order of additional drydocks. Please provide description, cost, and additional capability that would be realized. What would be the payback period or return on investment?

N/A

2.4. Are there any environmental, legal, or otherwise limiting factors that inhibit your CVN RCOH present operations and/or development (encroachments, pollutant discharge, etc.)?

N/A

3. Shipwork (Nuclear - CVN DSRA)

3.1. Given the current configuration of the yard, provide DLMYs for the CVN Docking Selected Restricted Availability (DSRA) that were realized or are projected for this type of work through the period requested in the Tables. Report Engineered Docking Selected Restricted Availability (EDSR) and Docking Phased Incremental Availability (DPIA) in the following section.

Table 3.1.a Historic / Predicted Work - CVN DSRA

(1986-1992: prior to costing change)

NONE	N/A						
Total	N/A						

3.3. What plant modifications, infrastructure, IPE and/or facility improvements could be performed that would significantly open up additional CVN DSRA capability at this yard? Assume an environment unconstrained by funds or manning, but do not assume major MILCON on the order of additional drydocks. Please provide description, cost, and additional capability that would be realized. What would be the payback period or return on investment?

N/A

3.4. Are there any environmental, legal, or otherwise limiting factors that inhibit your CVN DSRA present operations and/or development (encroachments, pollutant discharge, etc.)?

N/A

4. Shipwork (Nuclear - CVN EDSR)

4.1. Given the current configuration of the yard, provide DLMYs for the CVN Engineered Docking Selected Restricted Availability (EDSR) that were realized or are projected for this type of work through the period requested in the Tables. Report Docking Selected Restricted Availability (DSRA) in the section previous; report Docking Phased Incremental Availability (DPIA) in the section following.

Table 4.1.a Historic / Predicted Work - CVN EDSR

(1986-1992: prior to costing change)

NONE	N/A							
Total	N/A							

10. Shipwork (Nuclear - SSBN ERPs), continued

Answer the remaining SSBN ERP questions (Section 10.) only if your shipyard has some SSBN workload scheduled, as reflected in Table 10.1. Provide these answers in terms of additional SSBN 726 (TRIDENT) class workload only.

10.2 Assuming (a) the current projected total workload remains as assigned; (b) that sufficient production demand is available to justify maximum hiring, maximum apprentice training, optimum (repeat order manufacturing lead times) procurement, and maximum equipment support; and (c) no major MILCON additional to that already programmed: what is the maximum extent to which the SSBN Extended Refit Period capability at this NSYD could be expanded? Please provide the response in absolute number of DLMYs that could be applied to SSBN refits without a significant increase in overhead cost/rates assuming that you also have to execute the above workload and meet your cost schedule commitment to your customer.

Table 10.2 Maximum Potential Workload - SSBN ERPs

SSBN	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001
NONE	N/A						
Total	N/A						

10.3 What plant modifications, infrastructure, IPE and/or facility improvements could be performed that would significantly open up additional SSBN ERP capability at this yard? Assume an environment unconstrained by funds or manning, but do not assume major MILCON on the order of additional drydocks. Please provide description, cost, and additional capability that would be realized. What would be the payback period or return on investment?

N/A

10.4. Are there any environmental, legal, or otherwise limiting factors that inhibit your SSBN ERP present operations and/or development (encroachments, pollutant discharge, etc.)?

N/A

11. Shipwork (Nuclear - SSBN ROH/RFOH)

11.1 Given the current configuration of the yard, provide by ship's hull number DLMYs for the SSBN Regular and Refuelling Overhauls (ROH/RFOH) that were realized or are projected for this type of work through the period requested in the Tables. Report SSBN Engineered and Engineered Refueling Overhauls (EOH/ERO) in the next section.

Table 11.1.a: Historic/ Predicted Work - SSBN ROH/RFOH

(1986-1992: prior to costing change)

21.3 What plant modifications, infrastructure, IPE and/or facility improvements could be performed that would significantly open up additional overhaul capability for nonnuclear ships at this yard? Assume an environment unconstrained by funds or manning, but do not assume major MILCON on the order of additional drydocks. Please provide description, cost, and additional capability that would be realized. What would be the payback period or return on investment?

Build Diesel Engine and Gas Turbine Repair Shop; \$10,000,000
Would create diesel engine and gas turbine repair capability at SRF.

Extend Portal Crane Tracks; \$12,000,000
Would double available berthing space at repair piers.

Install Pier Platforms; \$200,000

Would allow SRF to stage tools and material closer to the ship

What would be the associated costs?

- a. Facilities - \$17,000,000
- b. Plant Equipment - \$35,000,000

What would be the payback?

- a. Facilities - 19 years
- b. Plant Equipment - 16 years

Add the following equipment:

two additional portal cranes
pre-heat stress relief oven
X-ray fluorescence spectrometer
portable shipboard corrosion control unit (including blasting unit and flame spray gun)
high volume/capacity dewatering equipment
walking anchor tooth booth (AL oxide grit)
diesel repair and diagnostic equipment
flex core welding capability equipment
high pressure liquid chromatograph
walk-in powder coat heating oven
gas turbine change out/repair
mobile tool center
broad band spectrum analyzer
cold working/rolling capability
propulsion shaft refit
hydraulic motor test capability
freeze seal capability
rubber/plastic shop

Upgrade the following equipment:

management information system, computer system, LAN
mobile HPACS flushing rigs (fuel oil/lube oil)
forge capacity
O₂/H₂ capability
foundry furnaces
electronic counter
circuit breaker test set
enhanced system diagnostic equipment (CDS/NTDS)
vacuum producers/collection tanks
asbestos decontamination trailer
wheelerizer

21.4. Are there any environmental, legal, or otherwise limiting factors that inhibit non-nuclear ship ROH present operations and/or development (encroachments, pollutant discharge, etc.)?

Guam is continually strengthening environmental regulations. However, technology has been developed to overcome all anticipated environmental regulations with appropriate funding.

22. Shipwork (NonNuclear - COH)

22.1 Given the current configuration of the shipyard, provide by ship's hull number the DLMYs for the Complex Overhauls (COH) of nonnuclear ships that were realized or are projected for this type of work through the period requested in the Tables.

27.3 What plant modifications, infrastructure, IPE and/or facility improvements could be performed that would significantly open up additional SCO capability at this yard? Assume an environment unconstrained by funds or manning, but do not assume major MILCON on the order of additional drydocks. Please provide description, cost, and additional capability that would be realized. What would be the payback period or return on investment?

Add the following equipment:

- two additional portal cranes
- pre-heat stress relief oven
- X-ray fluorescence spectrometer
- portable shipboard corrosion control unit (including blasting unit and flame spray gun)
- high volume/capacity dewatering equipment
- walking anchor tooth booth (AL oxide grit)
- diesel repair and diagnostic equipment
- flex core welding capability equipment
- high pressure liquid chromatograph
- walk-in powder coat heating oven
- gas turbine change out/repair

mobile tool center
broad band spectrum analyzer
cold working/rolling capability
propulsion shaft refit
hydraulic motor test capability
freeze seal capability
rubber/plastic shop

Upgrade the following equipment:

mobile HPACS flushing rigs (fuel oil/lube oil)
forge capacity
O2/H2 capability
foundry furnaces
electronic counter
circuit breaker test set
enhanced system diagnostic equipment (CDS/NTDS)
vacuum producers/collection tanks
asbestos decontamination trailer
type I calibration capability

What other investments in the industrial infrastructure would you make to increase non-nuclear capacity?

Replace Deteriorated Fleet Services Support Bldgs
Add Power Substation
Add Wharf Power Receptacles

What would be the associated costs?

- a. Facilities - \$17,000,000
- b. Plant Equipment - \$35,000,000

What would be the payback?

- a. Facilities - 19 years
- b. Plant Equipment - 16 years

27.4. Are there any environmental, legal, or otherwise limiting factors that inhibit your SCO present operations and/or development (encroachments, pollutant discharge, etc.)?

Guam is continually strengthening environmental regulations. However, technology has been developed to overcome all anticipated environmental regulations with appropriate funding.

28. Shipwork (NonNuclear - Inactivations)

28.1 Given the current configuration of the shipyard, provide by ship's hull number the DLMYs for the inactivation of nonnuclear ships (including conversion to RRF or RRT status) that were realized or are projected for this type of work through the period requested in the Tables.

Table 28.1.a: Historic/ Predicted Work - NonNuclear Inactivations
(1986-1992: prior to costing change)

30.4. Are there any environmental, legal, or otherwise limiting factors that inhibit development of RATA capability other than shipwork (encroachments, pollutant discharge, etc.)?

Guam is continually strengthening environmental regulations. However, technology has been developed to overcome all anticipated environmental regulations with appropriate funding.

31. Mission Area Workload Summary

In the following tables bring the information from the tables in Section 1-30 forward into the tables that follow and calculate workload variance for FY 1995-2001.

The total values for Maximum Potential Workload shown on the prior tables (those labeled #.2 in the preceding 30 sections) may not always transcribe directly to the Potential Workload column on the seven Predicted Workload Variance Tables that follow.

Provide responses in an absolute number of DLMYs that could be applied, without a significant increase in overhead cost/rates, assuming that you also have to (a) execute the projected workload and (b) meet your cost schedule commitments to your customer.

Remember that Potential Workload for these latter tables should be predicted within the framework of the total Navy corporate mix of depot events at durations/intervals consistent with: OPNAVNOTE 4700 (latest) (subj: "Notional Durations, Intervals, and Repair Mandays for Depot Level Availabilities of United States Navy Ships") and OPNAVINST 4700.7 (series) (subj: "Policies and Procedures for Maintenance of Ships").

Appropriately tabulated, the Potential Workload column should reflect the total potential workload for your yard with no remaining surplus capability for either emergency repair of battle damage, or depot repairs of other emergent damage.

33. Physical Space for Industrial Support , continued

33.2 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all shops and work centers in Tables 33.1.a and 33.1.b above where inadequate facilities are identified, provide the following information:

- a. Facility type/code:
- b. What makes it inadequate?
- c. What use is being made of the facility?
- d. What is the cost to upgrade the facility to substandard?
- e. What other use could be made of the facility and at what cost?
- f. Current improvement plans and programmed funding:
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP?

33. Physical Space for Industrial Support , continued

33.3 What is the actual useable area in total KSF of applicable floor space in appropriate structures for facilities to perform industrial support functions? **110 KSF**

33.4 What is the planned requirement (to support planned ship maintenance and modification over the next five years) in total KSF of applicable floor space in appropriate structures for facilities to perform industrial support functions? **100 KSF**

33.5 Given the foregoing, what is the surplus area in total KSF of applicable floor space in appropriate structures for facilities to perform industrial support functions? **10 KSF**

Table 33.3 : Industrial Support Physical Space

Categories of Space	Actual Area (KSF)	Required Area (KSF)	Surplus Area (KSF)
Office, warehouse, & external storage for procurement, storage, security, issue, packaging, and shipment, etc.	38.0	44.0	-6.0
Office space for command, management, & administrative, etc.	34.0	34.0	0.0
Office space for drafting, work planning, & computer aided design, etc.	3.0	3.0	0.0
Storage for technical manuals & drawings of equipment/components for life-cycle management, etc.	1.0	1.0	0.0

33. Physical Space for Industrial Support, continued

33.6 Identify in the table below the real estate resources which have the potential to facilitate future development and for which you are the plant account holder or into which, though a tenant, your activity could reasonably expect to expand. Complete a separate table for each individual site, i.e., main base, outlying airfields, special off-site areas, etc. The unit of measure is acres. Developed area is defined as land currently with buildings, roads, and utilities where further development is not possible without demolition of existing improvements. Include in "Restricted" areas that are restricted for future development due to environmental constraints (e.g. wetlands, landfills, archaeological sites), operational restrictions (e.g. ESQD arcs, HERO, HERP, HERF, AICUZ, ranges) or cultural resources restrictions. Identify the reason for the restriction when providing the acreage in the table. Specify any entry in "Other" (e.g. submerged lands).

Table 33.6: Real Estate Resources

Site Location: SRF, GUAM

Land Use	Total Acres	Developed Acreage	Available for Development	
			Restricted	Unrestricted
Maintenance	29.72	7.52	0	22.2
Operational	5.28	0.76	0	4.52
Training	0.24	0.24	0	0.0

Hunting/Fishing Programs	N/A			
Other	180.642	0	30	150.642
Total:	230.93	10.03	30	190.9

34. Facility and Equipment Values

34.1 Identify the facility and equipment values for your activity in the Table below, as executed/budgeted for the period requested. As applied herein:

- Maintenance of Real Property (MRP) is the budgetary term gathering the expenses or budget requirements for facility work and includes recurring maintenance, major repairs and minor construction (non-MILCON) inclusive of all Major Claimant funded Special Projects. It is the amount of funds spent on or budgeted for maintenance and real property assets to maintain the facility in satisfactory operating condition. For purposes of this Data Call, MRP includes all M1/R1 and M2/R2 expenditures.

- Current Plant Value (CPV) refer to incorporates Class 2 Real Property and is the hypothetical dollar amount required to replace a Class 2 facility in kind at today's dollars (e.g.: the cost today to replace an existing wood frame barracks with another barracks, also wood frame).

- Acquisition Cost of Equipment (ACE) reports the total cumulative acquisition cost of all "Personal Property" equipment which includes the cost of installed equipments directly related to mission execution (such as lab test equipment). Class 2 installed capital equipment which is integral to the facility should not be reported as ACE.

Table 34.1: Expenditures and Equipment Values

FY	MRP (\$ K)	CPV (\$ K)	ACE (\$ K)
1986	\$953K	\$59,663K	\$684K
1987	\$1,883K	\$65,564K	\$388K
1988	\$1,503K *	\$72,817K	\$1,020K
1989	\$3,096K *	\$75,543K	\$505K
1990	\$1,549K *	\$77,221K	\$206K
1991	\$1,268K *	\$78,861K	\$494K

35. Facility Limitations

35.1 Provide the maximum number of ship types and depot events that can be simultaneously worked under normal single shift operations in the present shipyard facilities (without improvements to the yard). Given the assumptions applied in the Mission Area portion of this Data Call (question #.2 of sections 1 through 30), provide the maximum number of ship types and depot events that could be simultaneously worked in the shipyard if it were expanded to maximum production capability (with the most reasonable set of practical improvements to the yard). As limiting factors, include any ship berthing, drydock, crane, shop space, assembly area, tools/equipment, technical documentation, replacement parts storage/issue, or pre-processing, etc., which physically restrict your industrial plant.

Table 35.1: Facility Limitations

Ship Type / Depot Event	Number of Depot Events that can be Simultaneously Worked		
	Present Configuration	Maximum Production	Limiting Factors
AFS CLASS / MTA	1	2	WORKFORCE
YTB CLASS / ROH	1	2	WORKFORCE
YON CLASS / ROH	1	1	DRYDOCK AVAILABILITY & WORKFORCE
AFS CLASS / RATA	2	4	WORKFORCE 7 PIER SPACE
FLOATING DRYDOCK/RATA	1	1	WORKFORCE
AO / RATA	1	2	WORKFORCE

36. Productive Output Factors

36.1 For the following Shops provide your productive output estimates in DLMYs. Add other critical Shops or Work Stations as appropriate and their planned productive output below the listed facility types.

Table 36.1.a: Productive Output Factors (DLMYs)

Shop Type	FY 1994	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001

37. Berthing Capability

37.1 Identify the age and structural characteristics for each pier and wharf at your facility or under your cognizance by NAVFAC P-80 Category Code Number (CCN), and dimensions as requested. If unable to maintain the stated design dredge depth, provide explanatory comment following the Table. Identify water distance between adjacent piers, in lieu of slip width, where appropriate. Indicate if the pier is inside a Controlled Industrial Area or High Security Area and the Net Explosive Weight (NEW) ESQD limits, if applicable. Identify any additional controls required in the space following this Table. Identify the average number of days per year over the last eight years (the period FY 1987-1994) that the pier or wharf was out of service (OOS) for maintenance (including dredging of the associated slip).

Table 37.1: Pier and Wharf Characteristics

Pier or Wharf	Age	CCN	Moor Length (FT)	Design Dredge Depth (FT)(MLLW)	Slip Width (FT)	Pier Width (FT)	CIA / Security Area? (Y / N)	ESQD NEW Limit	Average Annual Days OOS
R96	49	15120	325	8	-	60	Y	NONE	68
LIMA	49	15220	1129	35	-	100	Y	60K#	0
MIKE	49	15220	274	35	-	100	Y	60K#	0
NOVEMBER	49	15250	549	37	-	100	Y	60K#	0
OSCAR	49	15250	579	37	-	100	Y	NONE	31
PAPA	49	15220	519	37	-	100	Y	NONE	0
QUEBEC	49	15420	251	35	-	60	Y	NONE	0
ROMEO	48	15250	1035	37	-	100	N	NONE	0

Additional comments: Identify any piers or wharves already serving as dedicated berths (e.g. in support of inactive ships). NONE

37. Berthing Capability, continued

37.2 Identify all MILCON improvements executed in the period FY 1986-1994 for each pier or wharf identified in Table 37.1.

Table 37.2: Pier and Wharf MILCON

Pier or Wharf	Year MILCON Executed	Nature of Improvement
LIMA, MIKE, NOV., ROMEO	1992	P-130 (PWC) WHARVES POWER IMPROVEMENT
LIMA, MIKE, NOVEMBER	1991	P-002 REPAIR WHARVES IMPROVEMENT, EXTEND PORTAL CRANE TRACK

37.3 List all ESQD waivers currently in effect, with expiration dates, for all applicable piers and wharves identified in Table 37.1.

Table 37.3: ESQD Waivers In Effect

Pier or Wharf	Nature of Waiver	Date Waiver Expires
LIMA, MIKE, NOVEMBER	NONE	NONE

37. Berthing Capability, continued

37.4 For all piers and wharves at your facility or under your cognizance, indicate which, if any, are RO/RO and/or aircraft accessible, and conditions which apply.

Table 37.4: Pier and Wharf Access

Pier or Wharf	RO/RO Access?	Aircraft Access?
LIMA, NOVEMBER, OSCAR, PAPA, ROMEO	YES	NO

37.5 How much pier space is required to berth and support ancillary craft (tugs, barges, floating cranes, etc.) currently at your facility? Indicate if certain piers are uniquely suited to support these craft.

A TOTAL OF APPROXIMATELY 1000 LINEAL FEET OF PIER LENGTH TO BERTH ANCILLARY CRAFT. FINGER PIER (R96), MIKE, OSCAR, PAPA & QUEBEC PIERS ARE SUITABLE BERTHING FOR THIS CRAFT.

37. Berthing Capability, continued

37.7 For each pier and wharf listed above, state today's normal loading by ship class with current facility ship loading, the maximum berthing, maximum berthing for weapons handling evolutions, and maximum berthing to conduct maintenance. For ordnance handling capability, identify the maximum number of ships that can be moored at each pier or wharf to conduct ordnance handling evolutions, without necessitating berth shifts. Incorporate all applicable safety, ESQD, and access limitations. Include comments below the Table if necessary. For berthing in support of maintenance, list the maximum number of ships that can be serviced in maintenance availabilities at each pier or wharf without necessitating berth shifts to accommodate crane, laydown or access limitations. Provide any additional comments in the space following the Table.

Table 37.7: Pier and Wharf Normal Loading

Pier or Wharf	Typical Steady State Loading	Maximum Ship Berthing	Ordnance Handling Pierside?	Perform Maintenance Pierside?
FINGER	YC-1500 L	ONE	NO	YES
LIMA	AFS-1 CL	TWO	NO	YES
MIKE	YD-223	ONE	NO	YES
NOVEMBER	AFS-1 CL	ONE	NO	YES
OSCAR	YD-120	ONE	NO	YES
PAPA	AFDM-5	ONE	NO	YES
QUEBEC	YD-226	ONE	NO	YES
ROMEO	AFS-1 CL	ONE	NO	YES

37. Berthing Capability, continued

37.6 Identify the ship support characteristics for each Pier and Wharf under your activity's cognizance. Indicate if the pier or wharf is listed in OPNAVINST 3000.8. For Compressed Air and Oily Waste disposal, list only permanently installed facilities. For steam, indicate below the Table if any piers or wharves provide certified steam. If any permanent fendering arrangement limits apply, identify them in the space following the Table.

Table 37.6: Pier and Wharf Ship Support Characteristics

Pier/ Wharf	NPW Berth? (Y/N)	KVA		Comp. Air Pressure & Max Capability	Potable Water (GPD)	CHT (GPD)	Oily Waste (GPD)	Steam (LBM/HR & PSI)	Fendering Limits (Y/N)
		Shore Power	4160V						
	Include answer in separate annex								
LIMA	Y*	6875	480	120/7000	**	***	*****	*****	Y
MIKE	Y*	3125	480	120/7000	**	***	*****	*****	Y

QUEBEC	N								

Additional comments:

* NPW Berths identified purpose: LMR/OP/CM

** See Table 38.9. Total base capacity 250,000 GPD

*** Capacity for LIMA,MIKE,NOV 432,000 GPD; OSCAR,PAPA,ROMEO 432,000 GPD

**** Closed bottom donuts are currently used. Joint project in progress with Naval Station, Guam to develop Bilgewater treatment system.

***** Steam Plant capacity shown on Table 38.9. 15,985 LBM/HR @ 120PSI

37. Berthing Capability, continued

37.8 How much pier space is required to berth and support ancillary craft (tugs, barges, floating cranes, etc.) currently at your facility? Indicate if certain piers are uniquely suited to support these craft.

A TOTAL OF 1,000 FEET OF PIER TO BERTH ANCILLARY CRAFT. FINGER PIER, MIKE, OSCAR, PAPA, & QUEBEC ARE SUITABLE BERTHING FOR THE CRAFT.

37.9 What is the average pier loading in ships per day due to visiting ships at your facility/piers or wharves under your cognizance? Indicate if this varies significantly by season.

TWO SHIPS A DAY IS AN AVERAGE PIER LOADING. THIS INCREASES DURING PERIODIC OVERHAUL.

37.10 Given no funding or manning limits, what modifications or improvements would you make to the waterfront infrastructure to increase the cold iron ship berthing capability of your installation/under your cognizance. Provide a description, cost estimates, and additional capability gained.

DREDGE WATERFRONT AND HARBOR ENTRANCE TO 45 FOOT DEPTH TO ALLOW DEEP DRAFT VESSELS (35' MEAN DRAFT) (\$15 MIL). SHORE POWER UPGRADE COMMENSURATE WITH DEEP DRAFT VESSELS (\$3 MIL). CHT UPGRADE TO FACILITATE DEEP DRAFT VESSELS (\$7 MIL). CONSTRUCT SYNCHROLIFT TO ALLOW MORE EFFICIENT DOCKING OF SHIPS AND REDUCTION IN DRYDOCK MAINTENANCE COSTS (\$75 MIL). BILGE WATER TREATMENT/HAZARDOUS WASTE PROCESSING STATION (\$3/105 MIL). INSTALL TYPHOON MOOR AT ROMEO WHARF (\$.5 MIL).

37.11 Describe any unique limits or enhancements on the berthing of ships at specific piers or wharves under your cognizance.

NONE

38. Quarters and Messing

38.1 Housing and Messing. Provide data on the BOQs and BEQs assigned to your current plant account. The unit of measure for this capability is number of people housed. Use CCN to differentiate between pay grades (i.e., E1-E4, E5-E6, E7-E9, CWO-O2, O3 and above).

Table 38.1: Current Housing Facilities

Facility Type, Bldg. #, & CCN	Total # Beds	Total # Room s	Adequate		Substandard		Inadequate	
			# Beds	SF	# Beds	SF	# Beds	SF
NONE								

38.2 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code: N/A
- b. What makes it inadequate? N/A
- c. What use is being made of the facility? N/A
- d. What is the cost to upgrade the facility to substandard? N/A
- e. What other use could be made of the facility and at what cost? N/A
- f. Current improvement plans and programmed funding: N/A
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP? N/A

38. Quarters and Messing, continued

38.3 Provide data on the BOQs and BEQs projected to be assigned to your plant account in FY 1997. The desired unit of measure for this capacity is people housed. Use CCN to differentiate between pay grades, i.e., E1-E4, E5-E6, E7-E9, CWO-O2, O3 and above.

Table 38.3: Projected Berthing Facilities

		Seats	SF	Seats	SF	Seats	SF	
NONE								

38.6 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code: N/A
- b. What makes it inadequate? N/A
- c. What use is being made of the facility? N/A
- d. What is the cost to upgrade the facility to substandard? N/A
- e. What other use could be made of the facility and at what cost? N/A
- f. Current improvement plans and programmed funding: N/A
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP? N/A

38. Housing and Messing, continued

38.7 Provide data on the messing facilities projected to be assigned to your plant account in FY 1997.

Table 38.7: Projected Messing Facilities

Facility Type, Bldg. #, & CCN	Total SF	Adequate		Substandard		Inadequate		Avg # Noon Meals Served
		Seats	SF	Seats	SF	Seats	SF	
NONE								

38.8 In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

- a. Facility type/code: **N/A**
- b. What makes it inadequate? **N/A**
- c. What use is being made of the facility? **N/A**
- d. What is the cost to upgrade the facility to substandard? **N/A**
- e. What other use could be made of the facility and at what cost? **N/A**
- f. Current improvement plans and programmed funding: **N/A**
- g. Has this facility condition resulted in C3 or C4 designation on your BASEREP? **N/A**

38. Quarters and Messing, continued

38.9 Provide the following information on base infrastructure utility and support services.

Table 38.9: Base Utilities and Support Services

	On Base Capacity	Off Base Long Term Contract	Normal Steady State Load	Peak Demand
Electrical Supply (KWH)	45,000	0	40,000	43,000
Natural Gas (CFH)	0	0	0	0
Sewage (GPD)	144,000	0	120,000	140,000
Potable Water (GPD)	250,000	0	200,000	230,000
Steam (PSI & lbm/Hr)	15,985	0	7,000	12,788
Long Term Parking (SF)	560,000	0	156,000	336,000
Short Term Parking (SF)	560,000	0	93,600	100,000

39. Regional Maintenance Concept

39.1 If applicable, describe your activity's role, relationships, and functions under the Regional Maintenance Concept (RMC). Based on your current workload mix and capabilities, provide details on anticipated annual throughput associated with the RMC (workload transfers both in and away from your activity). For gained workload, report only workload projected in addition to workload identified previously in this Data Call. Utilize the applicable Joint Cross Service Group-Depot Maintenance Commodities Group List (provided at the beginning of this Data Call) as a base line for grouping workload. Add additional categories/commodity areas as required. Provide your answer by Units Throughput (as applicable) and Direct Labor Man Hours in the tables below. Identify the activity from which or into which the workload is expected to transfer in the last column.

Table 39.1: Workload Transfers Resulting From RMC

Commodity Group	Workload (Units Throughput)							Losing / Gaining Activity
	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001	
NONE	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Total:	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Table 39.2: Workload Transfers Resulting From RMC

Commodity Group	Workload (DLMHs)							Losing / Gaining Activity
	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001	
NONE	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Total:	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

40. Other Issues

40.1 What recruiting, staffing, hiring limits, apprenticeship training, industrial work standards, promotion policies, personnel support facilities, etc., constrain the productive output of the facility?

- Qualified candidates from within DOD Guam activities are insufficient to allow the filling of critical vacancies under the current civilian hiring freeze and downsizing efforts.

- It is not possible to maintain current ship repair capabilities without the annual induction of apprentices into training programs. The recruitment of apprentices on an annual basis is absolutely essential for the continuation of critical trade capabilities in the production shops of SRF Guam.

- Problems SRF Guam continually experiences are lack of skill and qualifying education. There are no marine trade schools or ship repair private industries on Guam and the skills required are extremely rare on island.

- This Command has one cafeteria owned and operated by the Navy Exchange which services both military and civilian personnel assigned to SRF and the Homeported ships. This facility is overcrowded during lunch hour and a need for an additional lunch room is necessary.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

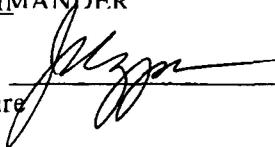

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

BRAC DATA CALL NUMBER 64
CONSTRUCTION COST AVOIDANCE

Information on cost avoidance which could be realized as the result of cancellation of on-going or programmed construction projects is provided in Tables 1 (MILCON) and 2 (FAMILY HOUSING). These tables list MILCON/FAMILY HOUSING projects which fall within the following categories:

1. all programmed construction projects included in the FY1996 - 2001 MILCON/FAMILY HOUSING Project List,
2. all programmed projects from FY1995 or earlier for which cost avoidance could still be obtained if the project were to be canceled by 1 OCT 1995, and,
3. all programmed BRAC MILCON/FAMILY HOUSING projects for which cost avoidance could still be obtained if the project were to be canceled by 1 OCT 1995.

Projects listed in Tables 1 and 2 with potential cost avoidance were determined as meeting any one of the following criteria:

Projects with projected Work in Place (WIP) less than 75% of the Current Working Estimate (CWE) as of 1 OCT 1995 .

Projects with projected completion dates or Beneficial Occupancy Dates subsequent to 31 March 1996.

Projects with projected CWE amount greater than \$15M.

The estimated cost avoidance for projects terminated after construction award would be approximately one-half of the CWE for the remaining work. Close-out, claims and other termination costs can consume the other half.

DATA CALL SUPPLEMENT FOR JOINT CROSS SERVICE GROUP-DEPOT MAINTENANCE

This supplement is designed to facilitate the cross service analysis required of the 1995 Base Realignment and Closure (BRAC-95) process. It requests data in a standardized format that will be used by the Joint Cross Service Group-Depot Maintenance (JCSG-DM) to develop closure and realignment alternatives to be given to the Military Departments for their analysis and final recommendations. The JCSG-DM Data Call consists of two sections, one for capacity measurements and a second measuring "measures of merit". This Data Call has been formatted to assist the preparer in providing the required information with the minimum amount of effort. If questions arise, contact your Military Department BRAC-95 office for clarification.

Notes in the context of this data call:

1. Base your responses on workload as programmed for your activity. Unless otherwise specified, use workload mixes as programmed in the FYDP.
2. Direct Labor Hours (DLH) is the common unit of measure unless specifically noted otherwise in the question.
3. Information requested in this supplement may duplicate data requested by BRAC 95 data calls from the individual Military Departments. If this occurs, read both questions carefully to ensure that they are in fact asking for identical information, and if that is the case, transfer information from one data call to the other.
4. These questions should be passed up and down the chain of command without editing or rewriting. This standardized data call is designed to support an auditable process by having each activity (regardless of Military Department assigned) respond to the same question.
5. "Core" capability calculations are to be performed in accordance with Office of the Under Secretary of Defense (Logistics) Memorandum dated November 15, 1993 (Subject: Policy for Maintaining Core Depot Maintenance Capability).
6. Capacity and utilization index calculations will be performed in accordance with the Defense Depot Maintenance Council approved update to DoD 4151.15H (Depot Maintenance Capacity/Utilization Index Measurement) dated December 5, 1990.
7. All calculations will assume a one shift, 40 hour work week.
8. Workload, capabilities, and capacities will be measured by commodity groups. A detailed breakout of the JCSG-DM commodity groups is contained in the following box. Insert the commodity groups applicable to your depot maintenance activity into the tables whenever a specific break out is requested by the question. Individual Military Departments in their Service specific data calls, may measure data in different commodity groups or categories, but for the Joint Cross Service analysis, these commodity groups must be utilized.
9. Data will be amounts as of the end of the applicable fiscal year.

**DATA CALL SUPPLEMENT
FOR
JOINT CROSS SERVICE GROUP - DEPOT MAINTENANCE**

CAPACITY

1. Capacity Utilization

1.1 Calculate the capacity index for the commodity groups applicable to depot maintenance work at your activity. Provide your answers expressed in direct labor hours (DLHs) in Table 1.1.a by commodity groups for the Fiscal Years requested.

Table 1.1.a: Capacity Index

COMMODITY GROUP	INDEX (DLHs)				
	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999
11	423,938	428,621	333,336	265,009	445,889
14	153,425	153,425	153,425	153,425	153,425
TOTAL	577,363	582,046	486,761	418,434	599,314

1. Capacity Utilization, continued

1.2 Calculate the utilization index for the commodity groups applicable to depot maintenance work at your activity. Provide your answers expressed as a percentage (%) in Table 1.2.a by commodity groups for the Fiscal Years requested.

Table 1.2.a: Utilization Index

COMMODITY GROUP	INDEX (%)				
	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999
11	73	74	68	64	75
14	27	26	32	36	25
TOTAL	100	100	100	100	100

1. Capacity Utilization, continued

1.3 Assuming (a) the current projected total workload remains as assigned; (b) that sufficient production demand is available to justify maximum hiring, with no significant investment in capital equipment; and (c) no major Military Construction additional to that already approved and funded: what is the maximum extent to which operations, by commodity group, could be expanded for depot maintenance work at your activity, based on the current and future planned workload mixes? Please provide your response in the absolute maximum number of direct labor hours (DLHs).

Table 1.3.a: Maximum Potential Capacity

COMMODITY GROUP	INDEX (DLHs)				
	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999
11	531,012	493,221	496,451	423,776	535,211
14	195,738	233,529	230,299	302,974	191,539
TOTAL	726,750	726,750	726,750	726,750	726,750

CAPACITY

2. Plant Replacement Value

2.1 What is the estimated Plant Replacement Value (PRV) as of the end of each Fiscal Year of your depot maintenance activity expressed in thousands of dollars (\$K) as a function of the facilities and equipment? Provide your answer in Table 2.1.

Table 2.1: Expenditures and Equipment Values

PRV	\$ K				
	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999
Facilities	\$107,687K	\$116,302K	\$125,606K	\$135,565K	\$147,422K
Equipments	\$9,500K	\$10,165K	\$10,980K	\$11,856K	\$12,805K
TOTAL	\$117,187K	\$126,467K	\$136,586K	\$147,421K	\$160,227K

CAPACITY

3. Programmed Workload

3.1 Given the current configuration and operation of your activity, provide the programmed depot level workload by commodity group in Tables 3.1.a and 3.1.b. Express your answer in both dollars (\$K) and direct labor hours (DLH) for the Fiscal Years requested.

Table 3.1.a: Programmed Workload

COMMODITY GROUP	\$ K				
	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999
11	18,769K	18,976K	14,758K	11,733K	19,741K
14	6,793K	6,793K	6,793K	6,793K	6,793K
TOTAL	25,562K	25,769K	21,551K	18,526K	26,534K

Table 3.1.b: Programmed Workload

CAPACITY

4. Service Centers of Excellence

4.1 If your activity has been designated as a Service Center of Excellence for any of the commodity groups, please identify them below.

N/A

**DATA CALL SUPPLEMENT
FOR
JOINT CROSS SERVICE GROUP - DEPOT MAINTENANCE**

MEASURES OF MERIT

Geographic

1. Location

1.1 Specify any special strategic importance or military value consideration of your activity accruing from its geographical location.

<u>Activity</u>	<u>Location</u>	<u>Description of Strategic Importance/Military Value</u>
SRF	Guam, USA	<ol style="list-style-type: none"> 1. Proximity to the customer base (i.e. Military Sealift Command, Coast Guard homeported ships). Eliminates costly fuel expenses and reduces offline time due to transit time to mainland repair facilities 2. Sole, US owned land based repair facility on U.S. territory within 4,000 miles; therefore not subject to foreign policy politics. 3. Only Western Pacific facility capable of dry docking nuclear submarines. 4. Isolated from attacks by regional aggressors (i.e. North Korea). 5. Under the control of the U.S. Government and manned by U.S. citizens 6. Logistically supported by a local International Airport and a U.S. Air Force Base 7. The only cost effective facility available to support depot level repairs to Diego Garcia Service Craft

Geographic, continued

2. Environmental Compliance

Answers to the following questions need to reflect the particular workloads or processes affected by the environmental restrictions/compliance.

2.1 Is your activity in full compliance with all Federal, state, and local environmental regulations? If not in full compliance, provide a comprehensive list of individual regulations that require actions to be taken. What compliance waivers have been granted? When must the activity come into compliance?

<u>Type</u>	<u>Regulation</u>	<u>Waiver (Date Expires)</u>	<u>Date Must be in Compliance</u>
Federal	Clean Air Act	December, 1994	December, 1994 (Currently have permit to perform outdoor sandblasting. Repairs to SRF sandblasting facility are scheduled to be completed by November, 1994.

2.2 Has any actual or programmed work at this installation been restricted or delayed because of environmental considerations, such as air or water quality? If so, provide the details of the impact of the restrictions or delays.

<u>Programmed Work</u>	<u>Restriction/Delay</u>	<u>Describe Impact</u>
AFDM-5 (Drydock) NPDES permit to operate	Permit/Approval from USEPA, Region IX	Work stoppage and inability to drydock vessels.

Geographic, continued

3. Environmental Restrictions

Answers to the following questions need to reflect the particular workloads or processes affected by the environmental restrictions/compliance.

3.1 Are there any special programs relating to environmental or industrial waste considerations for your activity? If so, provide the details.

<u>Special Program</u>	<u>Environmental/Industrial Waste</u>	<u>Describe</u>
------------------------	---------------------------------------	-----------------

No. All programs are typical of an industrial repair facility.

3.2 Within what provisions must the activity operate with regard to disposal of hazardous wastes and radioactive materials?

<u>Type</u>	<u>Provisions</u>	<u>Describe</u>
Hazardous waste	Environmental Regulations	RCRA Regulations

Geographic, continued

4. Other Collocated Activities

4.1 Are there any collocated activities that directly benefit or relate to the depot maintenance activity? If yes, list and describe the impact of each. Include benefits derived from being collocated.

<u>Collocated Activity</u>	<u>Benefit/Relationship</u>	<u>Describe Impact</u>
Naval Station, Guam	Depot Level Repairs	Performs repairs not within the capabilities of the Ships Force.
USS HOLLAND (AS-32)	Depot Level Repairs	Performs Repairs to tended units beyond the capabilities of an Intermediate Maintenance Activity (IMA).
Government of Guam	Industrial Repairs	Perform infrastructure repairs not available through other local sources.
Coast Guard	Depot Level Repairs	Performs periodic maintenance/inspections required for certification and continued operation of their vessels (i.e. dry dockings for hull inspections).
Special Warfare Boat Units	Depot Level Repairs	Performs overhauls/repairs not within the capabilities of the Ships Force.
ANDERSON AFB	Depot Level Repairs	Performs corrosion control repairs to mobile power generators and other repairs beyond the capability of local Air Force personnel

4.2 Do collocated activities support, or are they supported by, the depot maintenance activity?

<u>Collocated Activity</u>	<u>Describe Relationship</u>
Naval Station, Guam	Supported by SRF
USS HOLLAND (AS-32)	Supported by SRF
Government of Guam	Supported by SRF
Coast Guard	Supported by SRF
Special Warfare Boat Units	Supported by SRF
ANDERSON AFB	Supported by SRF

Geographic, continued

4. Other Collocated Activities, continued

4.3 How would these activities and the depot maintenance activity function if they were not collocated?

<u>Collocated Activity</u>	<u>Describe Impact if not Collocated</u>
Naval Station, Guam	Reduced ability to maintain readiness
USS HOLLAND (AS-32)	Reduced ability to maintain readiness
Government of Guam	Reduced ability to maintain readiness
Coast Guard	Reduced ability to maintain readiness
Special Warfare Boat Units	Reduced ability to maintain readiness
Explosive Ordnance Disposal Unit	Reduced ability to maintain readiness

Geographic, continued

5. Encroachment

5.1 Have operations at this activity been at all constrained to accommodate requests of the local communities?

<u>Type of Encroachment</u>	<u>Operation Impacted</u>	<u>Describe</u>
None	N/A	N/A

5.2 Indicate any encroachment constraints on current or future operations that would restrict future expansion.

<u>Type of Encroachment</u>	<u>Constraint on Expansion</u>	<u>Describe</u>
None	N/A	N/A

MEASURES OF MERIT

Facilities and Equipage

6. Unique or Peculiar Facilities

6.1 List unique or peculiar testing facilities, excluding equipment (e.g. runways, railheads, ports, tracks, ponds, etc.).

<u>Test Facility</u>	<u>Describe Uniqueness/Peculiarity</u>
Calibration Lab	Only facility on island
Industrial Lab	Only lab on island to provide one stop shopping

6.2 Indicate the reasons that these facilities are required by the depot maintenance function.

<u>Test Facility</u>	<u>Reasons Required for Maintenance</u>
Calibration Lab	Properly calibrated tools and equipment are required to make precision repairs.
Industrial Lab	Quantitative/Qualitative analysis are required to perform a vast number of repairs.

6.3 How could the depot maintenance functions be performed without these specialized facilities?

<u>Test Facility</u>	<u>Describe Testing Alternatives</u>
Calibration Lab	Equipment would have to be sent off island for calibration.
Industrial Lab	Specimens would have to be sent to an industrial facility off island.

Facilities and Equipage, continued

7. Buildings and Their Condition

7.1 List the buildings used to perform the depot maintenance functions by category code numbers (five or six digit CCNs), identifying their current condition (adequate, substandard, and inadequate) in Table 7.1 in thousands of square feet (KSF).

Table 7.1: Facility Conditions

CCN	Shop Type / Work Stations	Units	Condition			Comments
			Adequate	Inadequate	Substandard	
213-41	Central Tool (06)	SF	5,684	0	10,750	Figures are based upon AIS and BASEREP and do not reflect impending reduction of personnel from 950 to 750
213-42	Shipfitting Shop (11)	SF	15,020	0	1,200	
213-43	Sheet Metal (17)	SF	6,880	0	0	
213-44	Forge & Heat Treatment (23)	SF	0	0	0	
213-45	Welding (26)	SF	6,940	0	2,332

Facilities and Equipage, continued

8. Unique and/or Peculiar Capabilities and Capacities

8.1 What unique and/or peculiar capabilities and capacities does the depot maintenance activity possess?

<u>Depot Maintenance Capability/Capacity</u>	<u>Describe Why Unique/Peculiar</u>
Battery/Plating Shop	Sole region asset
Foundry	Sole region asset
Recompression Chamber	Sole shore based region asset
Corrosion Control Facility	Sole region asset
Floating Cranes	Sole region asset
Floating Drydock	Sole region asset

8.2 Separately list the depot maintenance facilities and equipment which are one of a kind within the Service and/or DoD.

<u>Facility/Equipment</u>	<u>Describe Why It is One of a Kind</u>
---------------------------	---

NONE

Facilities and Equipage, continued

9. Acreage Available for Building

9.1 What acreage on the installation does the government own in the proximity of the depot maintenance area that could be used for future expansion? Identify in the table below the real estate resources which have the potential to facilitate future development and for which you are the plant account holder or into which, though a tenant, your activity could reasonably expect to expand. Developed area is defined as land currently with buildings, roads, and utilities where further development is not possible without demolition of existing improvements. Report in "Restricted" areas that are restricted for future development due to environmental constraints (e.g. wetlands, landfills, archaeological sites), operational restrictions (e.g. ESQD arcs, HERO, HERP, HERF, AICUZ, ranges) or cultural resources restrictions. Identify the reason for the restriction when providing the acreage.

Table 9.1: Real Estate Resources

Land Use	Total Acres	Developed Acreage	Available for Development	
			Restricted	Unrestricted
Maintenance				
Operational				
Training				
R & D				
Supply & Storage				
Admin				
Housing				
Recreational	13.10	0.072		13.028
Forestry Program				
Agricultural Outlease Program				
Hunting/Fishing Programs				
Other	57.54	0	30.00	27.54
Total:	70.64	0.072	30.00	40.568

Facilities and Equipage, continued

10. Administrative Space

10.1 What amount in square feet of administrative space could be made available to the depot maintenance function?

<u>Current Use</u>	<u>Square Feet</u>	<u>Potential Use (Be Specific)</u>
General Parking	496,203	Administrative Office, Security Office (Pass & I.D.)

11. Industrial Waste

11.1 Are there any inhibiting factors that would limit future expansion on the base? Provide the details if applicable.

Inhibiting Factor Provide Detailed Description

SRF does not have an Industrial Waste Treatment Plant. All Industrial Waste is currently tested & discharged to the Sanitary Sewage System. Only limitation would be operational capacity of PWC's Sewage Treatment Facility.

MEASURES OF MERIT

Workload and Capabilities

Answers to the following questions are to reflect programmed amounts by commodity group, by activity in direct labor hours by Fiscal Year for FY 1996 through FY 1999.

12. Core Capabilities (DoD)

12.1 What is the amount of core capability required to support your own Service? Provide your answers in Table 12.1.a by commodity group for the Fiscal Years requested.

Table 12.1.a: Service Required Core

COMMODITY GROUP	Capability (DLHs)			
	FY 1996	FY 1997	FY 1998	FY 1999
11	0	0	0	0
14	0	0	0	0
TOTAL	0	0	0	0

Workload and Capabilities, continued

12. Core Capabilities (DoD), continued

12.2 What is the amount of capability retained for the performance of other Services core? Provide your answers in Table 12.2.a by commodity group for the Fiscal Years requested.

Table 12.2.a: Core Capability Retained for Other Services

COMMODITY TYPE	Capability (DLHs)			
	FY 1996	FY 1997	FY 1998	FY 1999
NONE				
TOTAL	0	0	0	0

Workload and Capabilities, continued

12. Core Capabilities (DoD), continued

12.3 What portion of the Service Core capability identified in the 12.1a above is identified as Service-Controlled Core (Title 10 responsibility)? Provide your answer in Table 12.3.a by commodity group for the Fiscal Years requested.

Table 12.3.a: Service-Controlled Core (Title 10)

COMMODITY GROUP	Capability (DLHs)			
	FY 1996	FY 1997	FY 1998	FY 1999
11	0	0	0	0
14	0	0	0	0
TOTAL	0	0	0	0

Workload and Capacities, continued

13. Core Workloads

13.1 What are your total Core Workloads to be applied against capabilities identified in Tables 12.1a and 12.2a)? Provide your answer (DLH) in Table 13.1.a by commodity group for the Fiscal Year requested.

Table 13.1a Total Core Workloads

COMMODITY GROUP	Workload (DLHs)			
	FY 1996	FY 1997	FY 1998	FY 1999
11	0	0	0	0
14	0	0	0	0
TOTAL	0	0	0	0

Workload and Capabilities, continued

14. Other Workloads (Above Core)

14.1 What above core workloads do you perform by these source categories? Use the most appropriate category, but do not duplicate workload on more than one table. Provide answers in Tables 14.1.a through 14.1.g by commodity group for the Fiscal Years requested.

Table 14.1.a: **FMS Above Core Workload**

COMMODITY GROUP	Workload (DLHs)			
	FY 1996	FY 1997	FY 1998	FY 1999
TOTAL	0	0	0	0

Workload and Capabilities, continued

16. Scope of Work Performed

16.1 Indicate the services/functions performed at this activity that are associated with depot maintenance, but not generally classified or considered as integral to the depot maintenance functions.

<u>Service/Function</u>	<u>Description</u>
Industrial Support Non-DOD Activities	Provide repairs and industrial services to local commercial/private companies if the capability is not available through a local businesses. Service include parts manufacturing, crane and rigging support, marine machinery repair, etc.

16.2 Describe how these services/functions are related to accomplishment of the depot maintenance mission, and the benefits of these relationships.

<u>Service/Function</u>	<u>Describe Relationship and Benefit to Maintenance Mission</u>
Industrial Support Non-DOD Activities	Supports Guam's economy by providing to local businesses a ready source of industrial services. The work generated by non-DOD sources employees the workforce during low work load periods and brings in revenue to reduce the operating cost to the major claimant.

Workload and Capabilities, continued

17. Interface with Customers

17.1 Indicate any special functions that the depot maintenance function performs that require close interface with customers, such as on-site workloads (e.g. technical assistance, crash/battle damage repairs, modification/upgrade installations).

<u>Service/Function</u>	<u>Describe Required Interface/Relationship/Benefit</u>
Work Scope Identification	Constant discussion with customers on limits/scope/definition of work to be performed.
Funds Control	Maintain control of funds placed with SRF for work defined.
Technical Support	Advise customers regarding technically correct repair methods.
Work Coordination	Closely coordinate with customer work sequencing/scheduling.
Workload Forecasting	Coordinate with all customers with respect to scheduling future repair periods.
Follow-on Guarantee Support	Continue customer discussions after a project completes to correct failed repairs.

MEASURES OF MERIT

Costs ¹

18. Real Property Maintenance (RPM)

18.1 What is your activity's backlog of real property maintenance for facilities performing depot maintenance as of 30 September 1993 (express in \$K)? **\$1,964K**

18.2 What were your activity's annual RPM expenses (in \$K) for Fiscal Years 1990-1993? Provide your answers in Table 18.2.

Table 18.2: Real Property Maintenance Expenses

	FY 1990	FY 1991	FY 1992	FY 1993
RPM Expenses (\$K)	\$1,413K	\$1,120K	\$2,148K	\$1,434K

19. Annual Operating Costs (Excludes Materials used in Depot Maintenance Workloads)

19.1 What were the total depot maintenance actual annual operating costs for your activity (AOC/\$K), excluding materials, used in depot maintenance workloads for Fiscal Years 1990-1993? What was the cost per direct labor hour (\$DLH) for actual executed hours reported in the DBOF? Provide your answers in Table 19.1.a.

Table 19.1: Annual Operating Costs

EXPENSE	FY 1990	FY 1991	FY 1992	FY 1993
AOC (\$ K)	15,277	17,088	17,158	19,781
\$ / DLH	19.46	21.08	22.13	21.66

¹There are inherent differences in organizational structure and accounting systems across the Services. Consequently, cost accumulations vary considerably. This severely limits the comparability of the cost per direct labor hour (\$/DLH) rates across Service lines.

Costs, continued

20. Environmental Compliance

20.1 What were your total depot maintenance actual and programmed environmental compliance costs (expressed in \$K) for Fiscal Years 1990-1997? Provide your answers in Table 20.1.

Table 20.1: Environmental Compliance Costs

COST(\$K)	FY 1990	FY 1991	FY 1992	FY 1993	FY 1994	FY 1995	FY 1996	FY 1997
Actual	\$66K	\$97K	\$193K	\$312K	N/A	N/A	N/A	N/A
Programmed	\$66K	\$128K	\$300K	\$312K	\$611K	\$697K	\$925K	\$952K

20.2 If spending is accomplished as programmed above, what will be the remaining costs (backlog at the end of Fiscal Year 1997 expressed in \$K) to bring existing facilities/equipment into environmental compliance?

\$500K. Environmental regulations will force a changeout of all HVAC&R due to ozone requirements. All other industrial processes will comply with todays standards by 1997.

21. Local Wage Rate

21.1 What were your Department of Labor local wage rates for a WG-11, step 3 for Fiscal Years 1991 through 1994?

Table 21.1: Wage Rate

Wage Rate	FY 1991	FY 1992	FY 1993	FY 1994
WG-11 / Step3	13.50	14.03	14.54	14.89

Costs, continued

22. Programmed Capital Investments

22.1 How much is programmed for new mission equipment for Fiscal Years 1996 through 1999? Provide your answer (in \$K) in Table 22.1.

22.2 How much is programmed for replacement equipment for Fiscal Years 1996 through 1999? Provide your answer (in \$K) in Table 22.1.

Table 22.1: Programmed Capital Investments

TYPE	FY 1996	FY 1997	FY 1998	FY 1999
NEW MISSION (\$K)	\$170K	\$150K	\$250K	\$200K
REPLACEMENT (\$K)	\$230K	\$400K	\$350K	\$350K

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

 FAMILY HOUSING DATA**

Information on Family Housing is required for use in BRAC-95 return on investment calculations.

Installation Name:	NAVSHIPREPFAC GUAM
Unit Identification Code (UIC):	N62586
Major Claimant:	CINCPACFLT

Percentage of Military Families Living On-Base:	86%
Number of Vacant Officer Housing Units:	0
Number of Vacant Enlisted Housing Units:	0
FY 1996 Family Housing Budget (\$000):	\$965
Total Number of Officer Housing Units:	19
Total Number of Enlisted Housing Units:	62

Note: All data should reflect figures as of the beginning of FY 1996. If major DON installations share a family housing complex, figures should reflect an estimate of the installation's prorated share of the family housing complex.

DATA CALL 66
INSTALLATION RESOURCES

Activity Information:

Activity Name:	SRF GUAM
UIC:	62586
Host Activity Name (if response is for a tenant activity):	N/A
Host Activity UIC:	N/A

General Instructions/Background. A separate response to this data call must be completed for each Department of the Navy (DON) host, independent and tenant activity which separately budgets BOS costs (regardless of appropriation), and, is located in the United States, its territories or possessions.

1. Base Operating Support (BOS) Cost Data. Data is required which captures the total annual cost of operating and maintaining Department of the Navy (DON) shore installations. Information must reflect FY 1996 budget data supporting the FY 1996 NAVCOMPT Budget Submit. Two tables are provided. Table 1A identifies "Other than DBOF Overhead" BOS costs and Table 1B identifies "DBOF Overhead" BOS costs. These tables must be completed, as appropriate, for all DON host, independent or tenant activities which separately budget BOS costs (regardless of appropriation), and, are located in the United States, its territories or possessions. Responses for DBOF activities may need to include both Table 1A and 1B to ensure that all BOS costs, including those incurred by the activity in support of tenants, are identified. If both table 1A and 1B are submitted for a single DON activity, please ensure that no data is double counted (that is, included on both Table 1A and 1B). The following tables are designed to collect all BOS costs currently budgeted, regardless of appropriation, e.g., Operations and Maintenance, Research and Development, Military Personnel, etc. Data must reflect FY 1996 and should be reported in thousands of dollars.

a. Table 1A - Base Operating Support Costs (Other Than DBOF Overhead). This Table should be completed to identify "Other Than DBOF Overhead" Costs. Display, in the format shown on the table, the O&M, R&D and MPN resources currently budgeted for BOS services. O&M cost data must be consistent with data provided on the BS-1 exhibit. Report only direct funding for the activity. Host activities should not include reimbursable support provided to tenants, since tenants will be separately reporting these costs. Military personnel costs should be included on the appropriate lines of the table. Please ensure that individual lines of the table do not include duplicate costs. Add additional

**DATA CALL 66
INSTALLATION RESOURCES**

lines to the table (following line 2j., as necessary, to identify any additional cost elements not currently shown). Leave shaded areas of table blank.

Table 1A - Base Operating Support Costs (Other Than DBOF Overhead)			
Activity Name: SRF Guam			UIC: 62586
Category	FY 1996 BOS Costs (\$000)		
	Non-Labor	Labor	Total
1. Real Property Maintenance Costs:			
1a. Maintenance and Repair	767	3070	3837
1b. Minor Construction	320	1300	1620
1c. Sub-total 1a. and 1b.	1087	4370	5457
2. Other Base Operating Support Costs:			
2a. Utilities	1840	500	2340
2b. Transportation	444	279	723
2c. Environmental	625	300	925
2d. Facility Leases			N/A
2e. Morale, Welfare & Recreation			N/A
2f. Bachelor Quarters			N/A
2g. Child Care Centers			N/A
2h. Family Service Centers			N/A
2i. Administration			N/A
2j. Other (Specify)			N/A
2k. Sub-total 2a. through 2j:	2909	1079	3988
3. Grand Total (sum of 1c. and 2k.):	3996	5449	9445

**DATA CALL 66
INSTALLATION RESOURCES**

b. Funding Source. If data shown on Table 1A reflects more than one appropriation, then please provide a break out of the total shown for the "3. Grand-Total" line, by appropriation:

<u>Appropriation</u>	<u>Amount (\$000)</u>
N/A	N/A

c. Table 1B - Base Operating Support Costs (DBOF Overhead). This Table should be submitted for all current DBOF activities. Costs reported should reflect BOS costs supporting the DBOF activity itself (usually included in the G&A cost of the activity). For DBOF activities which are tenants on another installation, total cost of BOS incurred by the tenant activity for itself should be shown on this table. It is recognized that differences exist among DBOF activity groups regarding the costing of base operating support: some groups reflect all such costs only in general and administrative (G&A), while others spread them between G&A and production overhead. Regardless of the costing process, all such costs should be included on Table 1B. The Minor Construction portion of the FY 1996 capital budget should be included on the appropriate line. Military personnel costs (at civilian equivalency rates) should also be included on the appropriate lines of the table. Please ensure that individual lines of the table do not include duplicate costs. Also ensure that there is no duplication between data provided on Table 1A. and 1B. These two tables must be mutually exclusive, since in those cases where both tables are submitted for an activity, the two tables will be added together to estimate total BOS costs at the activity. Add additional lines to the table (following line 21., as necessary, to identify any additional cost elements not currently shown). Leave shaded areas of table blank.

Other Notes: All costs of operating the five Major Range Test Facility Bases at DBOF activities (even if direct RDT&E funded) should be included on Table 1B. Weapon Stations should include underutilized plant capacity costs as a DBOF overhead "BOS expense" on Table 1B..

Note: NSRF, Guam is not a DBOF activity

**DATA CALL 66
INSTALLATION RESOURCES**

Table 1B - Base Operating Support Costs (DBOF Overhead)			
Activity Name: N/A			UIC:
Category	FY 1996 Net Cost From UC/FUND-4 (\$000)		
	Non-Labor	Labor	Total
1. Real Property Maintenance Costs:			N/A

2l. Other (Specify)			
2m. Sub-total 2a. through 2l:			N/A
3. Depreciation			N/A
4. Grand Total (sum of 1c., 2m., and 3.) :			N/A

**DATA CALL 66
INSTALLATION RESOURCES**

2. Services/Supplies Cost Data. The purpose of Table 2 is to provide information about projected FY 1996 costs for the purchase of services and supplies by the activity. (Note: Unlike Question 1 and Tables 1A and 1B, above, this question is not limited to overhead costs.) The source for this information, where possible, should be either the NAVCOMPT OP-32 Budget Exhibit for O&M activities or the NAVCOMPT UC/FUND-1/IF-4 exhibit for DBOF activities. Information must reflect FY 1996 budget data supporting the FY 1996 NAVCOMPT Budget Submit. Break out cost data by the major sub-headings identified on the OP-32 or UC/FUND-1/IF-4 exhibit, disregarding the sub-headings on the exhibit which apply to civilian and military salary costs and depreciation. Please note that while the OP-32 exhibit aggregates information by budget activity, this data call requests OP-32 data for the activity responding to the data call. Refer to NAVCOMPTINST 7102.2B of 23 April 1990, Subj: Guidance for the Preparation, Submission and Review of the Department of the Navy (DON) Budget Estimates (DON Budget Guidance Manual) with Changes 1 and 2 for more information on categories of costs identified. Any rows that do not apply to your activity may be left blank. However, totals reported should reflect all costs, exclusive of salary and depreciation.

Table 2 - Services/Supplies Cost Data	
Activity Name: U.S. NAVAL SHIP REPAIR FACILITY GUAM	UIC: 62586
Cost Category	FY 1996 Projected Costs (\$000)
Travel:	461
Material and Supplies (including equipment):	946
Industrial Fund Purchases (other DBOF purchases):	5,346
Transportation:	0
Other Purchases (Contract support, etc.):	249
Total:	7,002

**DATA CALL 66
INSTALLATION RESOURCES**

3. Contractor Workyears.

a. On-Base Contract Workyear Table. Provide a projected estimate of the number of contract workyears expected to be performed "on base" in support of the installation during FY 1996. Information should represent an annual estimate on a full-time equivalency basis. Several categories of contract support have been identified in the table below. While some of the categories are self-explanatory, please note that the category "mission support" entails management support, labor service and other mission support contracting efforts, e.g., aircraft maintenance, RDT&E support, technical services in support of aircraft and ships, etc.

Table 3 - Contract Workyears	
Activity Name: SRF Guam	UIC: 62586
Contract Type	FY 1996 Estimated Number of Workyears On-Base
Construction: Minor Con, MilCon, Repair Projects	7
Facilities Support: Janitorial, Grounds	5
Mission Support:	0
Procurement:	0
Other:*	0
Total Workyears:	12

* **Note:** Provide a brief narrative description of the type(s) of contracts, if any, included under the "Other" category.

**DATA CALL 66
INSTALLATION RESOURCES**

b. Potential Disposition of On-Base Contract Workyears. If the mission/functions of your activity were relocated to another site, what would be the anticipated disposition of the on-base contract workyears identified in Table 3.?

1) Estimated number of contract workyears which would be transferred to the receiving site (This number should reflect the number of jobs which would in the future be contracted for at the receiving site, not an estimate of the number of people who would move or an indication that work would necessarily be done by the same contractor(s)):

NONE

2) Estimated number of workyears which would be eliminated:

12

3) Estimated number of contract workyears which would remain in place (i.e., contract would remain in place in current location even if activity were relocated outside of the local area):

NONE

**DATA CALL 66
INSTALLATION RESOURCES**

c. "Off-Base" Contract Workyear Data. Are there any contract workyears located in the local community, but not on-base, which would either be eliminated or relocated if your activity were to be closed or relocated? If so, then provide the following information (ensure that numbers reported below do not double count numbers included in 3.a. and 3.b., above):

No. of Additional Contract Workyears Which Would Be Eliminated	General Type of Work Performed on Contract (e.g., engineering support, technical services, etc.)
NONE	

No. of Additional Contract Workyears Which Would Be Relocated	General Type of Work Performed on Contract (e.g., engineering support, technical services, etc.)
NONE

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

DATA CALL 1: GENERAL INSTALLATION INFORMATION

1. **ACTIVITY:** Follow example as provided in the table below (*delete the examples when providing your input*). If any of the questions have multiple responses, please provide all. If any of the information requested is subject to change between now and the end of Fiscal Year (FY) 1995 due to known redesignations, realignments/closures or other action, provide current and projected data and so annotate.

• Name

Official name	<i>U.S. NAVAL SHIP REPAIR FACILITY, GUAM</i>
Acronym(s) used in correspondence	<i>NAVSHIPREPFAC GUAM</i>
Commonly accepted short title(s)	<i>SRF GUAM</i>

• Complete Mailing Address

U.S. NAVAL SHIP REPAIR FACILITY, GUAM
PSC 455, BOX 191
FPO AP 96540-1400

• PLAD

• PRIMARY UIC: 62586 (Plant Account UIC for Plant Account Holders)

Enter this number as the Activity identifier at the top of each Data Call response page.

• ALL OTHER UIC(s): N/A PURPOSE: _____
N/A _____
N/A _____

2. PLANT ACCOUNT HOLDER:

• Yes XX No _____ (check one)

3. **ACTIVITY TYPE:** Choose most appropriate type that describes your activity and completely answer all questions.

● **HOST COMMAND:** A host command is an activity that provides facilities for its own functions and the functions of other (tenant) activities. A host has accountability for Class 1 (land), and/or Class 2 (buildings, structures, and utilities) property, regardless of occupancy. It can also be a tenant at other host activities.

• Yes XX No _____ (check one)

● **TENANT COMMAND:** A tenant command is an activity or unit that occupies facilities for which another activity (i.e., the host) has accountability. A tenant may have several hosts, although one is usually designated its primary host. If answer is "Yes," provide best known information for your primary host only.

• Yes _____ No XX (check one)

- Primary Host (current) UIC: _____
- Primary Host (as of 01 Oct 1995) UIC: _____
- Primary Host (as of 01 Oct 2001) UIC: _____

● **INDEPENDENT ACTIVITY:** For the purpose of this Data Call, this is the "catch-all" designator, and is defined as any activity not previously identified as a host tenant. The activity may occupy owned or leased space. Government Owned/Contractor Operated facilities should be included in this designation if not covered elsewhere.

• Yes _____ No XX (check one)

4. **SPECIAL AREAS:** List all Special Areas. Special Areas are defined as Class 1/Class 2 property for which your command has responsibility that is not located on or contiguous to main complex.

Name	Location	UIC
RESERVE CRAFT BRANCH BEACH	DRYDOCK ISLAND, APRA HARBOR, GUAM (AB)	62586

Change
CPF
9402

5. **DETACHMENTS:** If your activity has detachments at other locations, please list them in the table below.

Name	UIC	Location	Host name	Host UIC
NONE				

6. **BRAC IMPACT:** Were you affected by previous Base Closure and Realignment decisions (BRAC-88, -91, and/or -93)? If so, please provide a brief narrative.

1. NAS Agana closure may result in the consolidation of all island wide calibration at SRF, Guam. This would require some on-island equipment and manpower.

2. Naval Ship Repair Facility (SRF) Subic Bay , Philippines was not included in the Base Closure and Realignment process however, some impact resulted by its closure:

- Transfer of additional western pacific oil analysis requests to SRF Guam.
- Transfer of all MSC homeported ships in Subic Bay to Naval Station, Guam.

7. MISSION: Do not simply report the standard mission statement. Instead, describe important functions in a bulletized format. Include anticipated mission changes and brief narrative explanation of change; also indicate if any current/projected mission changes are a result of previous BRAC-88, -91,-93 action(s).

Current Missions

- Emergent and scheduled docking support for USN submarines, surface ships, MSC ships, service craft, and vessels of other governmental agencies. SRF Guam has the only floating dry dock in the Mariana Islands and is the only nuclear capable docking facility in the area.
- Diving and salvage services/maintenance and operation of the island's only hyperbaric chamber.
- Overhaul, repair, and alteration of USN ships, MSC ships, service craft and vessels of other governmental agencies.
- Emergent infrastructure maintenance and repair as requested by other federal agencies.

Projected Missions for FY 2001

- Emergent and scheduled docking support for USN submarines, surface ships, MSC ships, service craft, and vessels of other governmental agencies. SRF Guam has the only floating dry dock in the Mariana Islands and is the only nuclear capable docking facility in the area.
- Diving and Salvage Services/Maintenance and Operation of the island's only hyperbaric chamber.
- Overhaul, repair, and alteration of USN ships, MSC ships, service craft and vessels of other governmental agencies.
- Emergent infrastructure maintenance and repair as requested by other federal agencies.

10. PERSONNEL NUMBERS: Host activities are responsible for totalling the personnel numbers for all of their tenant commands, even if the tenant command has been asked to separately report the data. The tenant totals here should match the total tally for the tenant listing provided subsequently in this Data Call (see Tenant Activity list). (Civilian count shall include Appropriated Fund personnel only.)

On Board Count as of 01 January 1994

	Officers	Enlisted	Civilian (Appropriated)
● Reporting Command	<u>12</u>	<u>144</u>	<u>908</u>
● Tenants (total)	<u>0</u>	<u>0</u>	<u>0</u>

Authorized Positions as of 30 September 1994

	Officers	Enlisted	Civ (App)	Non DOD
● Reporting Command	<u>13</u>	<u>154</u>	<u>750</u> *	
● Tenants (total)	<u>0</u>	<u>0</u>	<u>0</u>	<u>0</u>

Change
CPF
9402

*300 Mission funded and 450 reimbursable direct labor

11. KEY POINTS OF CONTACT (POC): Provide the work, FAX, and home telephone numbers for the Commanding Officer or OIC, and the Duty Officer. Include area code(s). You may provide other key POCs if so desired in addition to those above.

<u>Title/Name</u>	<u>Office</u>	<u>Fax</u>	<u>Home</u>
● CO/OIC			
<u>J. L. CUZZOCREA, CAPT, USN</u>			
● COMMANDING OFFICER	COMM (671)339-4000	(671)339-4198	(671)563-1178
	DSN 339-4000

<u>A. LERCHBAKER, CDR, USN</u>			
● EXECUTIVE OFFICER	COMM (671)339-5258	(671)339-4198	(671)649-5368
	DSN 339-5258		

C. O. NATIVIDAD

- ADMINISTRATIVE OFFICER COMM (671)339-3310 (671)339-5182 (671)632-2623

12. TENANT ACTIVITY LIST: This list must be all-inclusive. Tenant activities are to ensure that their host is aware of their existence and any "subleasing" of space. This list should include the name and UIC(s) of all organizations, shore commands and homeported units, active or reserve, DOD or non-DOD (include commercial entities). The tenant listing should be reported in the format provide below, listed in numerical order by UIC, separated into the categories listed below. Host activities are responsible for including authorized personnel numbers, on board as of **30 September 1994**, for all tenants, even if those tenants have also been asked to provide this information on a separate Data Call. (Civilian count shall include Appropriated Fund personnel only.)

- Tenants residing on main complex (shore commands)

Tenant Command Name	UIC	Officer	Enlisted	Civilian
NONE				

- Tenants residing on main complex (homeported units.)

Tenant Command Name	UIC	Officer	Enlisted	Civilian
NONE				

- Tenants residing in Special Areas (Special Areas are defined as real estate owned by host command not contiguous with main complex; e.g. outlying fields).

Tenant Command Name	UIC	Location	Officer	Enlisted	Civilian
NONE					

- Tenants (Other than those identified previously)

Tenant Command Name	UIC	Location	Officer	Enlisted	Civilian
NONE					

13. REGIONAL SUPPORT: Identify your relationship with other activities, not reported as a host/tenant, for which you provide support. Again, this list should be all-inclusive. The intent of this question is capture the full breadth of the mission of your command and your customer/supplier relationships. Include in your answer any Government Owned/Contractor Operated facilities for which you provide administrative oversight and control.

Activity name	Location	Support function (include mechanism such as ISSA, MOU, etc.)
<i>USAF (OTHER MILITARY DEPARTMENT)</i>	<i>ANDERSEN AIR FORCE BASE GUAM</i>	<i>REPAIR/CALIBRATION OF TEST EQUIPMENT & MISC EQUIPMENT, CORROSION CONTROL - ISSA</i>

<i>COMLOGWESTPAC (U.S. NAVY)</i>	<i>NAVSTA, GUAM (SUMAY)</i>	<i>OVERHAUL/TEST SHIPS AND CRAFT UNDER COMNAVSURFPAC COG ASSIGNED TO GUAM AVAILS</i>

Activity name	Location	Support function (include mechanism such as ISSA, MOU, etc.)
<i>COMSUBGRU SEVEN REP (U.S. NAVY)</i>	<i>PITI, GUAM</i>	<i>PROVIDE REPAIR ASSIST AND MFG OF VARIOUS EQUIPMENT PARTS FOR SUBMARINE & SUBMARINE TENDER</i>

NOTE: SINCE SRF IS THE ONLY INDUSTRIAL REPAIR FACILITY IN GUAM, SRF ALSO PROVIDES REPAIR OF VARIOUS EQUIPMENT, MFGR OF PARTS AND FLOATING CRANE SERVICES FOR THE GOVERNMENT OF GUAM (I.E. GUAM POWER AUTHORITY, PORT AUTHORITY OF GUAM, PUBLIC UTILITY AGENCY OF GUAM), WHEN REQUESTED. THESE SERVICES CAN ONLY BE PROVIDED BY SRF GUAM.

14. FACILITY MAPS: This is a primary responsibility of the plant account holders/host commands. Tenant activities are not required to comply with submission if it is known that your host activity has complied with the request. Maps and photos should not be dated earlier than 01 January 1991, unless annotated that no changes have taken place. Any recent changes should be annotated on the appropriate map or photo. Date and label all copies.

- **Local Area Map.** This map should encompass, at a minimum, a 50 mile radius of your activity. Indicate the name and location of all DoD activities within this area, whether or not you support that activity. Map should also provide the geographical relationship to the major civilian communities within this radius. (Provide 12 copies.)

- **Installation Map / Activity Map / Base Map / General Development Map / Site Map.** Provide the most current map of your activity, clearly showing all the land under ownership/control of your activity, whether owned or leased. Include all outlying areas, special areas, and housing. Indicate date of last update. Map should show all structures (numbered with a legend, if available) and all significant restrictive use areas/zones that encumber further development such as HERO, HERP, HERF, ESQD arcs, agricultural/forestry programs, environmental restrictions (e.g., endangered species). (Provide in two sizes: 36"x 42" (2 copies, if available); and 11"x 17" (12 copies).)

- **Aerial photo(s).** Aerial shots should show all base use areas (both land and water) as well as any local encroachment sites/issues. You should ensure that these photos provide a good look at the areas identified on your Base Map as areas of concern/interest - remember, a picture tells a thousand words. Again, date and label all copies. (Provide 12 copies of each, 8½"x 11".)

- **Air Installations Compatible Use Zones (AICUZ) Map.** (Provide 12 copies.)

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certificate constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certification and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached in this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

GENERAL INFORMATION

This is the first Data Call for the 1995 base realignment and closure (BRAC-95) process. This General Information Data Call is designed to provide the Base Structure Evaluation Committee (BSEC) with a broad view of each installation, looking across the entire range of missions performed, who performs them, and the geographic alignment of each installation (internal to itself and the relationship to the surrounding community). The desired end result of this Data Call is to give the BSEC a complete picture of the shore facility infrastructure and general information on every organization performing a mission for the Department of the Navy today. This review is not limited to "above threshold" activities (those activities with more than 300 civilian personnel). It is absolutely imperative that all organizations complete the appropriate information about their organization so that follow-on Data Calls can be correctly focused and complete. There will be other Data Calls organized by category/subcategory (function) to gather information on military value, capacity, and economic/environmental impact.

The activities receiving this Data Call will fall into one of three categories: host command; tenant command; or independent activity. Each activity will be asked to identify themselves into one of these three categories. Due to the broad nature of the Data Call, not all questions will be applicable to all respondents, but all questions require a complete response. If a question is not applicable to your organization, clearly mark the response as "N/A"; do not leave blank.

The Data Call has been structured so that all responses, with the exception of the facility maps, can be made within the Data Call without the need to provide enclosures. The format for the tabular data allows for the expansion of each row as additional data is inputted, by pressing "enter" each time a new entry is made. Responses should be as complete and concise as possible.

In accordance with SECNAVNOTE 11000 of 08 December 1993, pertaining to the BRAC-95 process, all data provided must be certified and will be submitted hardcopy. Distribution of the Data Calls will flow through the operational command structure and inquiries should be directed in that manner to facilitate consistent and informative responses.

**DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity Identification: Please complete the following table, identifying the activity for which this response is being submitted.

Activity Name:	U. S. NAVAL SHIP REPAIR FACILITY, GUAM
UIC:	62586
Major Claimant:	CINCPACFLT, PEARL HARBOR, HI

General Instructions/Background:

Information requested in this data call is required for use by the Base Structure Evaluation Committee (BSEC), in concert with information from other data calls, to analyze both the impact that potential closure or realignment actions would have on a local community and the impact that relocations of personnel would have on communities surrounding receiving activities. In addition to Cost of Base Realignment Actions (COBRA) analyses which incorporate standard Department of the Navy (DON) average cost factors, the BSEC will also be conducting more sophisticated economic and community infrastructure analyses requiring more precise, activity-specific data. For example, activity-specific salary rates are required to reflect differences in salary costs for activities with large concentrations of scientists and engineers and to address geographic differences in wage grade salary rates.

Questions relating to "Community Infrastructure" are required to assist the BSEC in evaluating the ability of a community to absorb additional employees and functions as the result of relocation from a closing or realigning DON activity.

Due to the varied nature of potential sources which could be used to respond to the questions contained in this data call, a block appears after each question, requesting the identification of the source of data used to respond to the question. To complete this block, identify the source of the data provided, including the appropriate references for source documents, names and organizational titles of individuals providing information, etc. Completion of this "Source of Data" block is critical since some of the information requested may be available from a non-DoD source such as a published document from the local chamber of commerce, school board, etc. Certification of data obtained from a non-DoD source is then limited to certifying that the information contained in the data call response is an accurate and complete representation of the information obtained from the source. Records must be retained by the certifying official to clearly document the source of any non-DoD information submitted for this data call.

DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA

General Instructions/Background (Continued):

The following notes are provided to further define terms and methodologies used in this data call. Please ensure that responses consistently follow this guidance:

Note 1: Throughout this data call, the term "activity" is used to refer to the DON installation that is the addressee for the data call.

Note 2: Periodically throughout this data call, questions will include the statement that the response should refer to the "area defined in response to question 1.b., (page 3)". Recognizing that in some large metropolitan areas employee residences may be scattered among many counties or states, the scope of the "area defined" may be limited to the sum of:

- those counties that contain government (DoD) housing units (as identified in 1.b.2)), and,
- those counties closest to the activity which, in the aggregate, include the residences of 80% or more of the activity's employees.

Note 3: Responses to questions referring to "civilians" in this data call should reflect federal civil service appropriated fund employees.

1. Workforce Data

a. **Average Federal Civilian Salary Rate.** Provide the projected FY 1996 average gross annual appropriated fund civil service salary rate for the activity identified as the addressee in this data call. This rate should include all cash payments to employees, and exclude non-cash personnel benefits such as employer retirement contributions, payments to former employees, etc.

Average Appropriated Fund Civilian Salary Rate:	\$37,821
--	-----------------

Source of Data (1.a. Salary Rate): CP-1 BUDGET EXHIBIT

**DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

b. Location of Residence. Complete the following table to identify where employees live. Data should reflect current workforce.

1) Residency Table. Identify residency data, by county, for both military and civilian (civil service) employees working at the installation (including, for example, operational units that are homeported or stationed at the installation). For each county listed, also provide the estimated average distance from the activity, in miles, of employee residences and the estimated average length of time to commute one-way to work. For the purposes of displaying data in the table, any county(s) in which 1% or fewer of the activity's employees reside may be consolidated as a single line entry in the table, titled "Other".

County of Residence	State	No. of Employees Residing in County		Percentage of Total Employees	Average Distance From Base (Miles)	Average Duration of Commute (Minutes)
		Military	Civilian			
NORTHERN	GUAM	9	263	31%	15	45
CENTRAL	GUAM	6	269	32%	15	35
SOUTHERN	GUAM	102	215	37%	15	25

= 100%

As discussed in Note 2 on Page 2, subsequent questions in the data call refer to the "area defined in response to question 1.b., (page 3)". In responding to these questions, the scope of the "area defined" may be limited to the sum of: a) those counties that contain government (DoD) housing units (as identified below), and, b) those counties closest to the activity which, in the aggregate, include the residences of 80% or more of the activity's employees.

**DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

2) Location of Government (DoD) Housing. If some employees of the base live in government housing, identify the county(s) where government housing is located:

NONE

Change
N4644-
CPF
JUL 94

Source of Data (1.b. 1) & 2) Residence Data): SRF, ADMIN DEPT, CODE 800

c. Nearest Metropolitan Area(s). Identify all major metropolitan area(s) (i.e., population concentrations of 100,000 or more people) which are within 50 miles of the installation. If no major metropolitan area is within 50 miles of the base, then identify the nearest major metropolitan area(s) (100,000 or more people) and its distance(s) from the base.

City	County	Distance from base (miles)
NONE		

Source of Data (1.c. Metro Areas): SRF ADMIN DEPT, CODE 800

**DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

d. Age of Civilian Workforce. Complete the following table, identifying the age of the activity's civil service workforce.

Age Category	Number of Employees	Percentage of Employees
16 - 19 Years	9	1%
20 - 24 Years	78	11%
25 - 34 Years	192	26%
35 - 44 Years	200	27%
45 - 54 Years	183	24%
55 - 64 Years	61	8%
65 or Older	24	3%
TOTAL	747	100 %

Source of Data (1.d.) Age Data): HRO, GUAM REPORT DTD	1 JUL 94
--	-----------------

DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA

e. Education Level of Civilian Workforce

1) **Education Level Table.** Complete the following table, identifying the education level of the activity's civil service workforce.

Last School Year Completed	Number of Employees	Percentage of Employees
8th Grade or less	15	3%
9th through 11th Grade	52	7%
12th Grade or High School Equivalency	572	76%
1-3 Years of College	71	9%
4 Years of College (Bachelors Degree)	31	4%
5 or More Years of College (Graduate Work)	5	1%
TOTAL	746	100 %

2) **Degrees Achieved.** Complete the following table for the activity's civil service workforce. Identify the number of employees with each of the following degrees, etc. To avoid double counting, only identify the highest degree obtained by a worker (e.g., if an employee has both a Master's Degree and a Doctorate, only include the employee under the category "Doctorate").

Degree	Number of Civilian Employees
Terminal Occupation Program -Certificate of Completion, Diploma or Equivalent (for areas such as technicians, craftsmen, artisans, skilled operators, etc.)	572
Associate Degree	5
Bachelor Degree	31
Masters Degree	2
Doctorate	3

DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA

Source of Data (1.e.1) and 2) Education Level Data): HRO RPT DTD 1 JUL 94

f. **Civilian Employment By Industry.** Complete the following table to identify by "industry" the type of work performed by civil service employees at the activity. The intent of this table is to attempt to stratify the activity civilian workforce using the same categories of industries used to identify private sector employment. Employees should be categorized based on their primary duties. Additional information on categorization of private sector employment by industry can be found in the Office of Management and Budget Standard Industrial Classification (SIC) Manual. However, you do not need to obtain a copy of this publication to provide the data requested in this table.

Note the following specific guidance regarding the "Industry Type" codes in the first column of the table: Even though categories listed may not perfectly match the type of work performed by civilian employees, please attempt to assign each civilian employee to one of the "Industry Types" identified in the table. However, only use the Category 6, "Public Administration" sub-categories when none of the other categories apply. Retain supporting data used to construct this table at the activity-level, in case questions arise or additional information is required at some future time. **Leave shaded areas blank.**

Industry	SIC Codes	No. of Civilians	% of Civilians
1. Agriculture, Forestry & Fishing	01-09	0

Description of Occupational Categories used in Table 1.g. The following list identifies public and private sector occupations included in each of the major occupational categories used in the table. Refer to these examples as a guide in determining where to allocate **appropriated fund civil service jobs** at the activity.

1. **Executive, Administrative and Management.** Accountants and auditors; administrative services managers; budget analysts; construction and building inspectors; construction contractors and managers; cost estimators; education administrators; employment interviewers; engineering, science and data processing managers; financial managers; general managers and top executives; chief executives and legislators; health services managers; hotel managers and assistants; industrial production managers; inspectors and compliance officers, except construction; management analysts and consultants; marketing, advertising and public relations managers; personnel, training and labor relations specialists and managers; property and real estate managers; purchasing agents and managers; restaurant and food service managers; underwriters; wholesale and retail buyers and merchandise managers.
2. **Professional Specialty.** Use sub-headings provided.
3. **Technicians and Related Support.** Health Technologists and Technicians sub-category - self-explanatory. Other Technologists sub-category includes aircraft pilots; air traffic controllers; broadcast technicians; computer programmers; drafters; engineering technicians; library technicians; paralegals; science technicians; numerical control tool programmers.
4. **Administrative Support & Clerical.** Adjusters, investigators and collectors; bank tellers; clerical supervisors and managers; computer and peripheral equipment operators; credit clerks and authorizers; general office clerks; information clerks; mail clerks and messengers; material recording, scheduling, dispatching and distributing; postal clerks and mail carriers; records clerks; secretaries; stenographers and court reporters; teacher aides; telephone, telegraph and teletype operators; typists, word processors and data entry keyers.
5. **Services.** Use sub-headings provided.
6. **Agricultural, Forestry & Fishing.** Self explanatory.
7. **Mechanics, Installers and Repairers.** Aircraft mechanics and engine specialists; automotive body repairers; automotive mechanics; diesel mechanics; electronic equipment repairers; elevator installers and repairers; farm equipment mechanics; general maintenance mechanics; heating, air conditioning and refrigeration technicians; home appliance and power tool repairers, industrial machinery repairers; line installers and cable splicers; millwrights; mobile heavy equipment mechanics; motorcycle, boat and small engine mechanics; musical instrument repairers and tuners; vending machine servicers and repairers.

DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA

8. **Construction Trades.** Bricklayers and stonemasons; carpenters; carpet installers; concrete masons and terrazzo workers; drywall workers and lathers; electricians; glaziers; highway maintenance; insulation workers; painters and paperhangers; plasterers; plumbers and pipefitters; roofers; sheet metal workers; structural and reinforcing ironworkers; tilesetters.
9. **Production Occupations.** Assemblers; food processing occupations; inspectors, testers and graders; metalworking and plastics-working occupations; plant and systems operators, printing occupations; textile, apparel and furnishings occupations; woodworking occupations; miscellaneous production operations.
10. **Transportation & Material Moving.** Busdrivers; material moving equipment operators; rail transportation occupations; truckdrivers; water transportation occupations.
11. **Handlers, Equipment Cleaners, Helpers and Laborers** (not included elsewhere). Entry level jobs not requiring significant training.

**DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

h. Employment of Military Spouses. Complete the following table to provide estimated information concerning military spouses who are also employed in the area defined in response to question 1.b., above. Do not fill in shaded area.

1. Percentage of Military Employees Who Are Married:	74%
2. Percentage of Military Spouses Who Work Outside of the Home:	32%
3. Break out of Spouses' Location of Employment (Total of rows 3a. through 3d. should equal 100% and reflect the number of spouses used in the calculation of the "Percentage of Spouses Who Work Outside of the Home".	
3a. Employed "On-Base" - Appropriated Fund:	24%
3b. Employed "On-Base" - Non-Appropriated Fund:	18%
3c. Employed "Off-Base" - Federal Employment:	36%
3d. Employed "Off-Base" - Other Than Federal Employment	22%

(NOTE: BLOCKS 2., 3., 3a-3d to be provided by COMNAVMAR C41, per conversation btwn CNM LT Harshberger and SRF R. Damian of 7/8/94.

Source of Data (1.h.) Spouse Employment Data): COMNAVMAR, C41 DATED 7/8/94

DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA

2. Infrastructure Data. For each element of community infrastructure identified in the two tables below, rate the community's ability to accommodate the relocation of additional functions and personnel to your activity. Please complete each of the three columns listed in the table, reflecting the impact of various levels of increase (20%, 50% and 100%) in the number of personnel working at the activity (and their associated families). In ranking each category, use one of the following three ratings:

- A** - Growth can be accommodated with little or no adverse impact to existing community infrastructure and at little or no additional expense.
- B** - Growth can be accommodated, but will require some investment to improve and/or expand existing community infrastructure.
- C** - Growth either cannot be accommodated due to physical/environmental limitations or would require substantial investment in community infrastructure improvements.

Table 2.a., "Local Communities": This first table refers to the local community (i.e., the community in which the base is located) and its ability to meet the increased requirements of the installation.

Table 2.b., "Economic Region": This second table asks for an assessment of the infrastructure of the economic region (those counties identified in response to question 1.b., (page 3) - taken in the aggregate) and its ability to meet the needs of additional employees and their families moving into the area.

For both tables, annotate with an asterisk (*) any categories which are wholly supported on-base, i.e., are not provided by the local community. These categories should also receive an A-B-C rating. Answers for these "wholly supported on-base" categories should refer to base infrastructure rather than community infrastructure.

DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA

a. **Table A: Ability of the local community to meet the expanded needs of the base.**

1) Using the A - B - C rating system described above, complete the table below.

Category	20% Increase	50% Increase	100% Increase
Off-Base Housing	A	A	A
Schools - Public	A	B	B
Schools - Private	A	A	A
Public Transportation - Roadways	A	A	A
Public Transportation - Buses/Subways	A	A	A

3. Public Facilities Data:

- a. **Off-Base Housing Availability.** For the counties identified in the response to question 1.b. (page 3), in the aggregate, estimate the current average vacancy rate for community housing. Use current data or information identified on the latest family housing market analysis. For each of the categories listed (rental units and units for sale), combine single family homes, condominiums, townhouses, mobile homes, etc., into a single rate:

Rental Units: **7,000 UNITS**

Units for Sale: **NO AFFORDABLE UNITS AVAILABLE BASED UPON
AVERAGE SERVICE MEMBER INCOME (40-50% DOWN
PAYMENT BASED ON SALARY).**

Source of Data (3.a. Off-Base Housing): **PUBLIC WORKS CENTER - HOUSING
OFFICE**

**DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

b. Education.

1) Information is required on the current capacity and enrollment levels of school systems serving employees of the activity. Information should be keyed to the counties identified in the response to question 1.b. (page 3).

School District/County	Number of Schools			Enrollment		Pupil to Teacher Ratio		Serve Government Housing?*		
	Elementary	Middle	High	Current	Maximum Capacity	Current	Maximum Ratio			
Guam Private/Parochial Schools	20	1	3	6524	At or above	Varies	Varies from 15 to 28:1	Yes		
	Six elementary have middle and high school grades. Six elementary have middle grades.							Yes		
										Yes
										Yes
Guam Public School System	23	6	5	30417	At or above	Varies	18:1 for kindergarten	Yes		
						Varies	24:1 for grades 1,2,3	Yes		
						Varies	25:1 for grades 4,5	Yes		
						Varies	28:1 for grades 6-12	Yes		

* Answer "Yes" in this column if the school district in question enrolls students who reside in government housing.

Source of Data (3.b.1) Education Table): Guam Dept of Education and Various Private Schools

2) Are there any on-base "Section 6" Schools? If so, identify number of schools and current enrollment.

There are no on-base Section 6 Schools.

Source of Data (3.b.2) On-Base Schools): COMNAVMARIANAS Education Specialist

**DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

3) For the counties identified in the response to question 1.b. (page 3), in the aggregate, list the names of undergraduate and graduate colleges and universities which offer certificates, Associate, Bachelor or Graduate degrees :

Undergraduate

Guam Community College
(Associates and Certificates)
University of Guam
University of Maryland

Graduate

University of Guam
University of Oklahoma
University of Portland
(Master in Education Only)

Source of Data (3.b.3) Colleges): Navy Campus Office and Andersen Base Education Center
--

4) For the counties identified in the response to question 1.b. (page 3), in the aggregate, list the names and major curriculums of vocational/technical training schools:

Guam Community College major vocational/technical curriculums:

Accounting	Electronic Engineering
Accounting Clerk	Fire Science Technology
Architectural Engineering Technology	Food And Beverage Operations
Automotive Technology	Hotel Operations
Basic Surveying Technology	Information Systems
Carpentry	Masonry
Civil Engineering Technology	Office Administration
Computer Science	Plumbing
Construction Drafting	Refrigeration & Air Conditioning
Construction Electricity	Retailing And Marketing
Criminal Justice	Supervision & Management
Early Childhood Education	Welding

Source of Data (3.b.4) Vo-tech Training): Guam Community College and Navy Campus

5) What is the Interstate route number and distance, in miles, from the activity to the nearest Interstate highway?

N/A - ISLAND HAS NONE.

**Source of Data (3.c.5) Transportation): PUBLIC WORKS DEPARTMENT, SRF
CODE 400**

6) Access to Base:

a) Describe the quality and capacity of the road systems providing access to the base, specifically during peak periods. (Include both information on the area surrounding the base and information on access to the base, e.g., numbers of gates, congestion problems, etc.)

4 LANE, ASPHALT CONCRETE, US STANDARD UNDER CONSTRUCTION/
MODERNIZATION.

b) Do access roads transit residential neighborhoods?

NO.

c) Are there any easements that preclude expansion of the access road system?

YES.

d) Are there any man-made barriers that inhibit traffic flow (e.g., draw bridges, etc.)?

NO.

**Source of Data (3.c.6) Transportation): PUBLIC WORKS DEPARTMENT, SRF
CODE 400**

**DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

- d. **Fire Protection/Hazardous Materials Incidents.** Does the activity have an agreement with the local community for fire protection or hazardous materials incidents? Explain the nature of the agreement and identify the provider of the service.

NO.

Source of Data (3.d. Fire/Hazmat): PUBLIC WORKS DEPARTMENT, SRF CODE 4002
--

- e. **Police Protection.**

- 1) What is the level of legislative jurisdiction held by the installation?

NONE.

- 2) If there is more than one level of legislative jurisdiction for installation property, provide a brief narrative description of the areas covered by each level of legislative jurisdiction and whether there are separate agreements for local law enforcement protection.

N/A.

- 3) Does the activity have a specific written agreement with local law enforcement concerning the provision of local police protection?

NO.

- 4) If agreements exist with more than one local law enforcement entity, provide a brief narrative description of whom the agreement is with and what services are covered.

N/A.

- 5) If military law enforcement officials are routinely augmented by officials of other federal agencies (BLM, Forest Service, etc.), identify any written agreements covering such services and briefly describe the level of support received.

N/A.

Source of Data (3.e. 1) - 5) - Police): PUBLIC WORKS DEPARTMENT, SRF CODE 400
--

DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA

f. **Utilities.**

1) Does the activity have an agreement with the local community for water, refuse disposal, power or any other utility requirements? Explain the nature of the agreement and identify the provider of the service.

NO.

2) Has the activity been subject to water rationing or interruption of delivery during the last five years? If so, identify time period during which rationing existed and the restrictions imposed. Were activity operations affected by these situations? If so, explain extent of impact.

YES, JUN 93 - OCT 93. FREQUENT OUTAGES. TWICE PER WEEK. COMPRESSED AIR PLANT IS COOLED BY WATER AND WAS NOT OPERABLE DURING RATIONING DAYS. MAJOR AFFECT ON PRODUCTION.

3) Has the activity been subject to any other significant disruptions in utility service, e.g., electrical "brown outs", "rolling black outs", etc., during the last five years? If so, identify time period(s) covered and extent/nature of restrictions/disruption. Were activity operations affected by these situations? If so, explain extent of impact.

YES, FREQUENTLY. EARTHQUAKE CREATED THE LARGEST POWER IMPACT. OTHER NORMAL OUTAGES HAVE AFFECTED PRODUCTION, BUT DID NOT LAST FOR ANY SUBSTANTIAL AMOUNT OF TIME.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

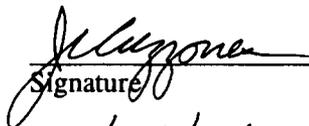

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

INPUT SCREEN ONE - GENERAL SCENARIO INFORMATION

Model Year One : FY 1996

Model does Time-Phasing of Construction/Shutdown: Yes

Base Name	Strategy:
-----	-----
NAVSTA GUAM, GU	Realignment
NAVMAG LUALUALEI, HI	Realignment
NAVSTA PEARL HARBOR, HI	Realignment
NCTAMS WESTPAC, GU	Realignment
NAVMAG GUAM, GU	Realignment

Summary:

 Close NAVSTA function at GUAM. Retain pier assets and necessary activities at NAVMAG GUAM. Ship homeporting function to Hawaii. Pier BOS retained as a percent of total BOS based on CPV.

SCEN 022

BRAC-95 SCENARIO DEVELOPMENT DATA CALL

ENCLOSURE (1) - SCENARIO SUMMARY

Complete one copy of Enclosure (1) - Scenario Summary for the entire closure/realignment scenario. Tables included in this enclosure are 1-A, 1-B and 1-C.

Table 1-A: Scenario Description. Identify the Scenario Number, Title and Response Date. The Scenario Number and Title will be provided to you by the BSAT as part of the data call tasking.

Scenario No.:	1-02-0035-022
Scenario Title:	U.S. NAVAL ACTIVITIES, GUAM
Date:	15 DECEMBER 1994

Table 1-B: Point of Contact Information. Please identify a knowledgeable point of contact familiar with the information relating to this closure/realignment scenario whom the BSAT can contact to answer any questions or to provide additional information as required. This point of contact must also be familiar with the location and name of the person responsible for maintaining any supporting documentation relating to this data call response.

Name:	LCDR WILLIAM G. ROBERTS
Organization/Code:	N10
Office Phone Number:	339-8278
Fax Number:	339-8219
Home Phone Number:	564-3500

BRAC-95 SCENARIO DEVELOPMENT DATA CALL
ENCLOSURE (1) - SCENARIO SUMMARY

Table 1-C: Losing/Gaining Bases Involved in Scenario. Complete the table on the next page to identify "bases" involved in the closure/realignment scenario. Note that the term "Losing Base" refers to host activities, independent activities or other activities specifically identified in the Scenario Development Data Call tasking which are being reduced in size, i.e., closing or being realigned. The term "Gaining Base" refers to host or independent activities which will be receiving sites for functions/personnel transferred from losing base(s). For example, a losing base is the activity referred to in the data call tasking, i.e., a Naval Station, Hospital, etc. Individual tenants should not be separately listed on this table, e.g., Branch Medical Clinic, Personnel Support Detachment, etc. Individual tenants will, however, be specifically identified in subsequent tables in the data call. The third column of the table Enclosure (1) should be used to identify relevant information regarding workload/missions to be transferred. For example, entries in this column should be short phrases such as, "missile workload", "ships", "F-14 squadrons", "tenants", etc., or to provide other clarifying information. This third column need only be completed to identify major components of the closure/realignment scenario, and should not be used to list all tenant names, etc.

Table 1-C: Losing/Gaining Bases Involved in Scenario

Losing Base(s)	Gaining Base(s)	Workload/Missions Transferring
NAVAL ACTIVITIES, GUAM	NAVMAG GUAM	CHILD DEVELOPMENT CENTER, HUMAN RESOURCES OFFICE, PORT OPERATIONS, FIRE DEPARTMENT, SUPPLY, PUBLIC WORKS, DEPLOYED SEABEES
NAVAL ACTIVITIES, GUAM	NEXCOM VA BEACH	RETAIL SALES
NAVAL ACTIVITIES, GUAM	NCTAMS WESTPAC GUAM	DENTAL, PUBLIC WORKS
NAVAL ACTIVITIES, GUAM	NAVFACENCOM	CARETAKER FUNCTIONS
NAVAL ACTIVITIES, GUAM	NAVSTA PEARL HARBOR	WEATHER SERVICES, DENTAL, MSC
NAVAL ACTIVITIES, GUAM	NAVMAG LUALUALEI	MSC SHIP BERTHING/SUPPORT

* Includes 1 CIV residual accounting position.

** 5 OF THE EXISTING 10 SPECIAL AGENT AND 3 SUPPORT BILLETS MUST REMAIN TO PROVIDE INVESTIGATIVE SUPPORT FOR THE PIERSIDE ASSETS, IN ADDITION TO THE PORT VISITS BY NAVY AND MARINE CORPS ELEMENTS.

Due to the need to get approval to conduct nuclear propulsion plant maintenance in a foreign country and the need to construct adequate housing, the earliest the USS CAPE COD would relocate from Guam would be FY02. (This plan has not yet been approved by CNO).

***Force structure changes eliminate 9 civpers positions, however due to recent proposed SECNAV plan to re-establish both Camp Covington and Battalion in FY97 and outyears, NCB must seek restoral of both funding and manpower. Then if BRAC determines closure of NAVACTS and we are successful in restoral effort, all positions will relocate to Camp Covington, Guam.

Note: Additional personnel required to support USS HOLLAND and her proposed follow-on USS CAPE COD, SUBGRU Seven Rep Guam, and resupply capabilities less TAFS support.

--The CINCPACFLT interim WESTPAC maintenance strategy includes forward basing USS CAPE COD (AD43) in GUAM as the relief for USS HOLLAND (AS32) from FY96 until at least FY02 when the tender would be relocated elsewhere in PACFLT. This plan has not yet been approved by CNO.

Note: To maintain a minimum drydocking capability on Guam.

--Based on SRF GUAM scenario which closes SRF GUAM in FY97, the floating drydock would migrate to NAVACTS IN FY97 and follow on migration to NAVMAG in FY99

This includes a requirement for 6 Civilians to support the Operations and Maintenance of the floating crane.

Note: To maintain a minimum drydocking capability on Guam.

"R"-This includes a requirement for 5 Enlisted in support of Port Polaris Security.

on official

Type of Equipment/Vehicles
AFDM-8 FLOATING DRY DOCK

Rationale for Relocating

SRF GUAM OPERATES THE ONLY
SSN-CERTIFIED DRYDOCK IN
WESTPAC. RETENTION OF
DRYDOCK IN GUAM IS ESSENTIAL
TO SUPPORTING THE EMERGENT
DRYDOCKING REQUIREMENTS OF
DEPLOYED SSNs IN WESTPAC. IF SRF
CLOSED, THE FLOATING DRYDOCK
MUST BE RETAINED IN GUAM OR ALL
SSN EMERGENT DRYDOCKINGS IN
WESTPAC WOULD HAVE TO BE SENT
TO PEARL HARBOR WHICH WOULD
SEVERELY IMPACT WESTPAC
DEPLOYMENT SCHEDULES. U.S.
POLICY DOES NOT ALLOW FOR
NUCLEAR REPAIRS/DRY DOCKINGS
IN FOREIGN COUNTRIES. SINCE
THE GUAM DRYDOCK IS THE ONLY
SSN-CERTIFIED DOCK IN WESTPAC,
THE FALLBACK FOR EMERGENT SSN
DOCKING WOULD BE PEARL HARBOR
NON-NUCLEAR DRY DOCKINGS CAN BE
CONDUCTED IN VARIOUS LOCATIONS
IN WESTPAC, PRIMARILY AT SRF
YOKOSUKA AND ITS DETACHMENT
SASEBO.

Enclosure (2) - LOSING BASE QUESTIONS

Table 2-F: Dynamic Base Information

Complete the following "Supporting Data" section. Then, summarize this data in the Summary Data Table (2-F) that immediately follows this "Supporting Data" section. Show all entries in (\$000).

Table 2-F: Supporting Data:

a. **Other One-Time Unique Costs.** Identify any other one-time unique costs at the losing base which will not be calculated automatically by the COBRA algorithms (as noted in the Introduction section). Examples include use of temporary office space, lease termination costs, etc. Only costs directly attributable to the closure/realignment action should be identified. This area should not be used to identify routine moving or personnel costs, which are calculated automatically by the COBRA algorithms, nor should it be used to identify one-time unique moving costs which will be addressed separately in item c. below. For each unique one-time cost, identify the amount, year in which the cost will be incurred and describe the nature of the cost. Do not double count any costs identified on Gaining Base tables (Enclosure (3)).

1.	\$140	96	<i>VACATE LEASE OF TEMPORARY BLDG 6060</i>

Enclosure (2)

BRAC -95 SCENARIO DEVELOPMENT DATA CALL
Enclosure (2) - LOSING BASE QUESTIONS

b. **Other One-Time Unique Savings.** Identify any other one-time unique savings at the losing base which will not be calculated automatically by the COBRA algorithms (as noted in the Introduction section). Examples include net proceeds to DoD resulting from an existing MOU with a state or local government, one-time environmental compliance cost avoidances, etc. This area should not be used to identify routine moving or personnel savings, which are calculated automatically by the COBRA algorithms. Do not include Construction Cost Avoidances (which were identified in a separate data call), or Procurement Cost Avoidances (which are covered under item i. below). For each savings, identify the amount, year in which it will occur and describe the nature of the savings. Only savings directly attributable to the closure/realignment action should be identified. Do not double count any savings identified on Gaining Base tables (Enclosure (3)).

Losing Base:

Cost	FY	Description
1.	NONE	

c. **One-Time Unique Moving Costs.** The COBRA algorithms use standard packing and shipping rates to calculate the cost of transporting equipment and vehicles. Identify here only those unique moving costs associated with movements out of the losing base that would be incurred in addition to standard packing and shipping costs associated with tonnage and vehicles identified in Table 2-B. Examples of unique moving costs include packing, special handling or recalibration of specialized laboratory or industrial equipment; movement of special materials, etc. If unique costs identified here include packing and shipping costs, then ensure that tonnage for this "unique" equipment is not included under the Mission and Support equipment identified in Table 2-B. For each cost included in the table above, identify the amount, year in which the cost will be incurred, the name of the gaining base and a brief description of the cost.

<i>Cost</i>	<i>FY</i>	<i>Gaining Base</i>	<i>Description</i>
<i>\$200</i>	<i>97</i>	<i>NAVSTA PEARL HARBOR HI</i>	<i>MOVEMENT OF DIEGO GARCIA RESUPPLY ASSETS TO NAVSTA PEARL HARBOR HI</i>

Note: MSC intends to use MSC CSM ships for all cargo movements.

d. and e. **Changes in Mission Costs.** Items d. and e. should be used to identify those changes in mission costs that result from the closure/realignment action, but are not counted elsewhere in this data call response or COBRA algorithms. For example, **do not include** changes in non-payroll Base Operating Support (BOS), Family Housing Operations, housing allowances, CHAMPUS costs/savings, or salary savings for eliminated positions/billets, all of which are calculated by other COBRA algorithms. Examples of items to include here are changes in operating costs due to the transfer of workload to gaining bases, economies of scale, changes in travel requirements, differences in wage grade labor rates or locality pay differentials, changes in the amount of mission work performed on contract, and changes in utility requirements or ADP/telecommunications costs not included in responses provided in the Base Operating Support tables of Data Call 66.

For purposes of calculating changes in costs associated with the transfer of mission workload from a losing to a gaining base, the following information is provided below. Calculations should take into consideration both economies of scale and differences in operating costs. Remember, any salary savings resulting from eliminated military billets and/or civilian positions must be identified as a number of

Enclosure (2)

BRAC-95 SCENARIO DEVELOPMENT DATA CALL
Enclosure (2) - LOSING BASE QUESTIONS

billets/positions eliminated in Table 2-C. Do not include basic salary and fringe benefit savings associated with billets/positions identified as eliminated on Table 2-C. Also, do not identify changes in the non-payroll BOS Costs (including non-payroll G&A for DBOF activities) reported in Data Call 66.

First, identify economies of scale by examining the historic pattern of how labor, overhead and other costs vary with workload volume (adjust prior year costs for inflation to make them comparable; use statistical tests to determine the type of relationship that exists). The relationship between costs and workload can then be used to estimate changes in labor and overhead rates which result from the projected change in workload. Economies of scale benefits will generally accrue to gaining bases on an incremental basis, as the workload ramps up, and will remain in future years after all workload is transitioned.

Second, calculate resulting changes in operating costs. Changes in operating costs should be calculated by pricing out direct labor manhours of work, using the projected labor and productive overhead rates (which have been adjusted to take into consideration economies of scale resulting from the workload transfer) for both the losing and gaining base. The difference in total costs associated with the workload transition is then identified as the net change in mission costs. Relative differences in the numbers of hours required to complete a project at the losing base and gaining base(s) should be taken into consideration, if identifiable. Also, include contract costs in this analysis, but unless cost changes are identifiable, assume that contract price rates will remain constant.

If a net change in mission costs is included in the data call response, the response must also include supporting data to show calculations and methodology used to estimate this change in costs. Furthermore, data used in these calculations must be consistent with previously submitted certified data.

BRAC-95 SCENARIO DEVELOPMENT DATA CALL
ENCLOSURE (3) - GAINING BASE QUESTIONS

Table 3-B - Military Construction Requirements. Identify the amount of new construction or rehabilitation (using the designated unit of measure) which will be required at the receiving site. Include a brief description of the requirement in the Comment column.

- . Do not include Family Housing construction requirements on this table, they will be identified on a separate data call format.
- . The COBRA MILCON algorithm will estimate the cost of MILCON requirements for the standard categories of construction listed on the next page. However, if an engineered estimate(s) is already available, then a dollar value for the requirement(s) should be identified in the "Comment" column of the table.
- . Any identified Environmental Mitigation MILCON projects must include a total cost and brief description of the requirement in the "Comment" column of the table.
- . The "Other" row is provided to identify MILCON requirements which do not fit the standard construction categories, e.g., dry docks, SCIF conversions, aircraft wash racks, etc. Enter a total cost and brief description for each identified requirement. For these "unique" categories of construction, a square footage estimate should also be indicated, if possible.

For Rehabilitation Requirements: if entered as a "unit of measure" (e.g., SF, etc.), then corresponding costs will be calculated at 75% of the cost of new construction (worst-case cost estimate for rehabilitation costs). If the rehabilitation will involve renovation at an anticipated rate of less than 75%, then in addition to identifying the requirement (SF, etc.), enter in the Comment block either a rehabilitation cost or an appropriate percentage which should be used in lieu of the 75% rate.

Show any cost entries in (\$000).

Description of "Units of Measure" used in Table 3-B:

- SY - Square Yards
- FB - Feet of Berthing
- SF - Square Feet
- BL - Barrels

Description of standard "Categories of Construction" used in Table 3-B (including examples of types of construction included in these categories):

Horizontal - Aprons/Paving (Aircraft Parking Aprons, Combat Aircraft Ordnance Loading Areas, etc.), shown in square yards.

Berthing - General Purpose Berthing Piers, shown in feet of berthing.

	<u>Annual Cost</u>	<u>FY</u>	<u>Description</u>
1.	<i>NONE</i>		

e. Miscellaneous Recurring Savings. Identify any other recurring savings associated with the closure/realignment action which will not be calculated automatically by the model, e.g., elimination of leases of facilities or equipment, etc. For the savings, identify the year in which each will begin and describe the nature of the savings. Only savings directly attributable to the closure/realignment action should be identified. (Do not include changes in non-payroll BOS, Family Housing Operations, housing allowances, CHAMPUS costs or salary savings for eliminated positions/billets, all of which are calculated by other COBRA algorithms.). Do not double count any savings identified on Losing Base tables (Enclosure (2)).

Gaining Base: *NEXCOM VIRGINIA BEACH*

	<u>Annual Savings</u>	<u>FY</u>	<u>Description</u>
1.	<i>NONE</i>		

f. Land Purchases. Identify any land purchases required at gaining bases to accommodate relocating activities/functions. Identify the cost, number of acres, year in which purchase will occur and a brief description identifying why the land needs to be purchased.

Gaining Base: *NEXCOM VIRGINIA BEACH*

	<u>Cost</u>	<u>No. of Acres</u>	<u>FY</u>	<u>Description</u>
1.	<i>NONE</i>			

Enclosure (3)

BRAC-95 SCENARIO DEVELOPMENT DATA CALL
ENCLOSURE (3) - GAINING BASE QUESTIONS

Summarize data shown in response to supporting data questions a. through f. above in the following table:

Table 3-A: Dynamic Base Information

Gaining Base Name: <i>NEXCOM VIRGINIA BEACH</i>								
		1996	1997	1998	1999	2000	2001	Total
a.	One-Time Unique Costs *	N/A	N/A	N/A	<i>N/A</i>	N/A	N/A	<i>N/A</i>
b.	One-Time Unique Savings	N/A	N/A	N/A	N/A	N/A	N/A	N/A
c.	Environ. Mitigation	<i>N/A</i>	N/A	N/A	N/A	N/A	N/A	<i>N/A</i>
d.	Misc. Recurring Costs	N/A	N/A	N/A	N/A	N/A	N/A	N/A
e.	Misc. Recurring Savings	N/A	N/A	N/A	N/A	N/A	N/A	N/A
f.	Land Purchases	N/A	N/A	N/A	N/A	N/A	N/A	N/A

* Includes both Community Infrastructure Impact and Other One-Time Unique Costs, as applicable.

BRAC-95 SCENARIO DEVELOPMENT DATA CALL
ENCLOSURE (3) - GAINING BASE QUESTIONS

Table 3-B - Military Construction Requirements. Identify the amount of new construction or rehabilitation (using the designated unit of measure) which will be required at the receiving site. Include a brief description of the requirement in the Comment column.

Do not include Family Housing construction requirements on this table, they will be identified on a separate data call format.

The COBRA MILCON algorithm will estimate the cost of MILCON requirements for the standard categories of construction listed on the next page. However, if an engineered estimate(s) is already available, then a dollar value for the requirement(s) should be identified in the "Comment" column of the table.

Any identified Environmental Mitigation MILCON projects must include a total cost and brief description of the requirement in the "Comment" column of the table.

The "Other" row is provided to identify MILCON requirements which do not fit the standard construction categories, e.g., dry docks, SCIF conversions, aircraft wash racks, etc. Enter a total cost and brief description for each identified requirement. For these "unique" categories of construction, a square footage estimate should also be indicated, if possible.

For Rehabilitation Requirements: if entered as a "unit of measure" (e.g., SF, etc.), then corresponding costs will be calculated at 75% of the cost of new construction (worst-case cost estimate for rehabilitation costs). If the rehabilitation will involve renovation at an anticipated rate of less than 75%, then in addition to identifying the requirement (SF, etc.), enter in the Comment block either a rehabilitation cost or an appropriate percentage which should be used in lieu of the 75% rate.

Show any cost entries in (\$000).

Description of "Units of Measure" used in Table 3-B:

SY - Square Yards
FB - Feet of Berthing
SF - Square Feet
BL - Barrels

Description of standard "Categories of Construction" used in Table 3-B (including examples of types of construction included in these categories):

Horizontal - Aprons/Paving (Aircraft Parking Aprons, Combat Aircraft Ordnance Loading Areas, etc.), shown in square yards.

Berthing - General Purpose Berthing Piers, shown in feet of berthing.

EXPLANATORY NOTES (INPUT SCREEN NINE)

SCREEN 4 PERSONNEL NUMBERS ARE FROM MANPOWER DATA BASE. SCREEN 6 FORCE
STRUCTURE CHANGES REFLECT PERSONNEL RECEIVED FROM MAVSTA, FISC AND SRF
GUAM.

The other numbers added to Anderson AFB were identified as additional
personnel required to support the transferred functions.
