To: Mr. James V. Hansen

Thank you for coming to Clavis and Cannon Air Force Base and for hearing our side of the story. I was there.

As a citizen, tax payer, home owner and business owner of this town, I am very concerned for the welfare of the people and for businesses people <sup>who</sup> have worked a life time to build us to. as you were told in the report we are a very poor state and country.

The Clavis people take pride in our base and our country and their people who come here. They are invaluable in our character, schools and family affairs.

Because America is a hard working country, take pride in our cities - the leaders need to consider they must not give everything we live & die for but they need to consider their own people, care for them, appreciate them and pass the good fortune around. If you can help all nations, it can consider the people who work so hard.

I am just an 82 year woman who cares what happens to the younger generation who aren't afraid to work for a living. My husband worked 30 years to pay for a subdivision he bought less than one mile from where you spent the night. He passed away in 2000. I finished his dream and paid it off. One good year and the bad news for our economy. I am only one.

Thank you

cc: Mrs. James St. Albans  
for

Thank you coming to Blair and Carmen on June 23 & 24th.  
and for hearing our side of the story. I was there.

As a citizen, tax payer, home owner and business  
owner of this town, I for one am very concerned for the  
welfare of our people - because we all you have been  
back on a poor state and country.

We have recovered our share and its people, so money  
involved in church, school and family affairs. They just at  
home for and we treat them the way.

We must defend our country we are take pride in,  
but the leader must realize we the american  
people need to be educated and listened to. We must  
keep her to and we want that for our share and  
live.

I am just an 82 old woman who lives and care -  
fair we have all worked as hard for. my husband worked  
since in the 1970's to pay off a subdivision north of Blair.  
He died just before I paid it off. One year later her good  
and now who know the future.  
about you

Thank you for coming to Cannon and Chair in June 23rd 2005. and for hearing our side of the story. I was there as a citizen, top paper, home owner and business owner of this town, I am so concerned about our home, the welfare of our people and the business they own. as in the report you were that we are a very poor state and country.

We have thousands in here and their people. They participate in our church, school and are joining affairs. They just at home because we treat them this way. We in China take pride in our land and our country but the leaders must Neology American people are look meeting people and we need to have help too to keep what we have earned and land. The good future should be shared.

I am just an 83 year old woman who loved and care for our town and the people who live here so bad.

My husband worked 30 years to buy off a subdivision at the north edge of China when you stayed. He did in 2000. I have just finished his dream of paying it off. I had one good year. Now because of this we cannot covered. I am only one who survive for the future.

Thank you

A concerned citizen

To: Mr. Lloyd "Fig" Newton

Thank you for coming to Cannon Air Force Base and Clain on June 23 and 24th and for hearing our side of the story. I was there.

As a citizen, tax payer, home owner and business owner of this town I am very concerned about the welfare of our people and the businesses they have worked so hard to build on to. Losing school personnel, and medical facilities that have just been built are on the strength of Cannon. We are a poor State and County.

Clain people take pride in our base and the people they send here. They are involved in our churches, schools, and community affairs. They are one of us.

The Defense Facilities need to be shared in America to those communities to take pride in them and need them for survival. So if a nation may not get hardly as much aid as we like the leaders need to consider and take care of their own first. We give and give and give until our spirit is gone!

I am just an 82 year old woman who loves my country and my town and I worry about our young people. My husband had a subdivision 30 yrs. 1/2 mile from where you spent the night. He died in 2000 just before he made his last profit. I fulfilled his dream and had one good year and Brac news came. I am only one —

Thank you

Thank you for coming to Clair and Cannon Air Force Base on June 23 and 24th and for hearing our side of the story. I was there.

As a citizen, tax payer, home owner and business owner of this little town I am concerned about the welfare of our people and our businesses they have worked so hard to "build on to." So our businesses, colleges, hospitals, schools, home owners and people who won't have a job it is devastating.

Clair has always taken care of our base and their people. They are in our churches, schools, homes and community affairs. They are a part of us.

The Defense Department needs to share the facilities with the people across the U.S.A. & to the hard working people who has made America what we are. When we consider aid and more aid wared wide leaders must consider our own. We give and give and give and then break our spirit.

I am an 82 year old woman. My husband was a pilot in World War II. He loved his country. He worked 30 years to pay off a mortgage on a subdivision he established  $\frac{1}{2}$  mile from where you spent the night in Clair. He died in 2000. and finally made his dream come true. Mortgage free and one good year - then Brac news. I am only one.

Thank you  
a concerned citizen

Thank you for coming to Clair and Cannon Air Force Base and for hearing our side of the story. I was there.

As a citizen, tax payer, home owner and business owner of this town I am very concerned for the welfare of the people and the businesses they own who have worked a life time to build on to them. As you were told we are a very poor county and state.

The Clair people do and always have taken great pride in our home and country and their people who come here. They are involved in our churches, schools and community affairs.

The leaders of our country as they are supporting other nations must not forget who made us what we are to-day. It is the body of people who love our country and work hard to make it what it is and we need to be considered before something is taken away from us to better other places and leave us behind. Places like this should be saved for the people and what it can be in the future for our air force.

My husband worked 30 years at paying for a subdivision about 1/2 mile from where you spent the night in Clair. He died in 2000. I fulfilled his dream when I paid the mortgage off. I have had one good year and then the Brae news came. I am only one.
