

BRAC Commission  
7/26/05

Dear Mr Principi and the JUL 29 2005  
members of the BRAC received  
Commission:

It's me again! I don't  
mean to make you mad but  
just keeping your attention  
to the 188th AFG fighter  
wing in Ft Smith, AR.

We appreciate the on-set  
use, teleconferences and many  
other meetings with local City,  
Congressional and state leaders.

I know your job is not  
easy. I have watched C-Span  
and prayed for every community  
represented.

Please remember the 188th  
is the most cost effective.  
Our unit passed all inspections  
with the highest marks  
when compared with other  
bases. Our fire fighting training  
center is the only one in  
the U.S. to use all combustible  
materials when training  
firefighters. It has been used  
more than any of the other  
fire training sites in the  
last year. I know more  
about the fire fighting than  
the other departments. The  
other departments have been

Keeping up with the very latest training. They are constantly at night, days, weekends and holidays to always be prepared.

Over two - there's 60 our unit are deployed in Iraq and Europe at this time. If that does not prove their value to the military there must be no value on all of these soldiers lives and families.

Please keep our unit flying. We can accept new planes just keep us flying.

Thank you for your help. May God bless as you make your decisions.

There is one thing I know for sure, the 188th is doing its best to restore democracy to the Iraq's and I want to do my part for justice for the 188th. They were undersold. Respectfully, please encourage them. May God Bless,

Brenda McAllister
