

Congress of the United States

Washington, DC 20510

June 7, 2005

061 42005

The Honorable Samuel Skinner
Member, Base Realignment and Closure Commission
2521 South Clark Street Suite 600
Arlington, VA 22202

Dear Commissioner Skinner:

We wanted to take this opportunity to bring to your attention information in Volume IV of DoD's Base Closure and Realignment Report regarding Portsmouth Naval Shipyard (PNSY). The supporting documentation, particularly in regard to the estimated economic impact of closing PNSY, can be noted on page J-13 of the Navy's Analyses and Recommendations.

The Navy's report notes that, over the period of 2006-2011, the closure of PNSY would result in a reduction of 9,166 jobs in the Portland-South Portland-Biddeford Metropolitan Statistical Area (MSA), which would account for 2.76 percent of employment in the MSA. In describing the local impact of the loss of 9,166 jobs in terms of the Portland-South Portland-Biddeford Metropolitan Statistical Area (MSA), DoD included the shipyard in an MSA of which it is not a part. In fact, according to the definitions of the local labor market from the Maine Department of Labor and the New Hampshire Economic and Labor Market Information Bureau, Portsmouth, Kittery, and the local communities surrounding PNSY are located in the Portsmouth-Rochester NH-ME MSA. Since the Kittery-Portsmouth area is not a part of the Portland-South Portland-Biddeford MSA, the Navy inaccurately estimated the actual economic impact of PNSY's closure in terms of jobs lost on the regional economy.

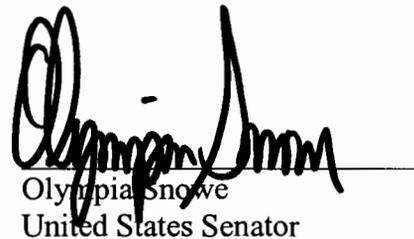

As the Pentagon has testified that it is willing to put the economic impact of its BRAC recommendations into any context requested by the Commission, we hope that you will request amended information from the Navy that demonstrates the real effect the proposed closure would have on the local economy.

We would be happy to work closely with you and your staff in order to ensure that the BRAC Commission is receiving accurate data from DoD. Given the enormity of DoD's recommendation for PNSY, it is crucial that the Pentagon be honest with the Commission by providing data that represents the true economic impact of its proposals. As an additional resource, information about the Maine communities located in the Portsmouth-Rochester MSA can be accessed at www.maine.gov/labor/lmis/LaborMarketAreaDefinitionsChange.html. The New Hampshire portion can be viewed at www.nhes.state.nh.us/elmi/geoareapmsa.htm.

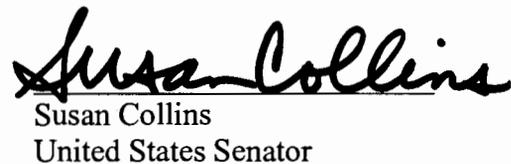

We appreciate all of your hard work in ensuring that the Pentagon's recommendations were formulated fairly, openly, and objectively. As you conduct your review, we hope that you will investigate this particular error of great concern to New England and our nation.

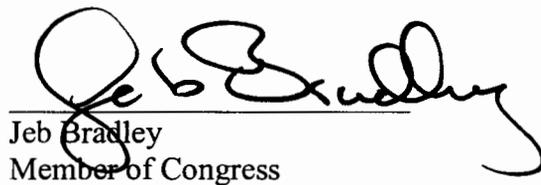

Sincerely,

Judd Gregg
