

JUL 15 2005

## CALL TO ACTION TO SAVE CRANE

Received

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the Continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

**CALL TO ACTION TO SAVE CRANE**

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the Continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

**CALL TO ACTION TO SAVE CRANE**

The undersigned wholeheartedly support Crane Navel Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Navel Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Navel Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Navel Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Navel Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Navel Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

**CALL TO ACTION TO SAVE CRANE**

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

**CALL TO ACTION TO SAVE CRANE**

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

**CALL TO ACTION TO SAVE CRANE**

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally, there are thousands of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving thousands unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.

## CALL TO ACTION TO SAVE CRANE

The undersigned wholeheartedly support Crane Naval Surface Warfare Center and the continuation of its operations. This facility provides much needed research and development that has contributed to the success of this great Nation's national defense, continued safety of its people and support for businesses throughout the State of Indiana. Additionally there are hundreds of highly trained technical and engineering positions that support the mission of this facility. To eliminate its presence would devastate the Southwest region of Indiana, leaving hundreds unemployed and without much promise of finding similar positions.

We ask and pray that this facility be allowed to remain in Southwest Indiana.
