HSA-0114R: Co-Locate TRANSCOM and Service Component HQs

Candidate Recommendation (Summary): Realign Fort Eustis, VA, Hoffman 2, and TEA leased space in Newport News, VA, by relocating the Army Surface Deployment and Distribution Command to Scott Air Force Base, IL, and consolidating it with AF Air Mobility Command and TRANSCOM.

Justification

- ✓ Meets T.O. to consolidate or co-locate Service Component HQs w/COCOM HQs
- ✓ Reduces NCR footprint and eliminates 162,000 USF of leased space within DC Area
- ✓ Headquarters-level personnel reduction estimated at more than 19% (834 job positions)

Military Value

- ✓ Quantitative Military Value:
 - ✓ Ft. Eustis: 0.8758
 - ✓ TEA-Newport News: 0.305
 - ✓ SDDC-Alexandria: 0.1620
 - ✓ Scott AFB: 0.8467
- ✓ Military Judgment: Small Quantitative difference and less disruption to TRANSCOM favored Scott

Payback

- ✓ One Time Cost: \$ 91.3M
- ✓ Net Implementation Savings: \$ 402.7M
- ✓ Annual Recurring Savings: \$ 111.0M
- ✓ Payback Period: Immediate
- ✓ NPV Savings: \$ 1,451.6M

Impacts

- ✓ Criterion 6:
 - ✓ DC area: -1472 jobs (857 direct, 615 indirect); <0.1%
 - ✓ Norfolk area: -1133 jobs (484 direct, 649 indirect); 0.12%
- ✓ Criterion 7: No Issues
- ✓ Criterion 8: No Impediments

Candidate Recommendation #HSA-0114R

Candidate Recommendation: Realign Fort Eustis, VA, by relocating the Army Service Deployment and Distribution Command to Scott Air Force Base, IL, and consolidating it with the Air Force Air Mobility Command Headquarters and Transportation Command Headquarters at Scott Air Force Base, IL.

Realign Hoffman 2, a leased installation in Alexandria, VA, by relocating the US Army Service Deployment and Distribution Command to Scott Air Force Base, IL, and consolidating it with the Air Force Air Mobility Command Headquarters and Transportation Command Headquarters at Scott Air Force Base, IL.

Realign US Army Service Deployment and Distribution Command - Transportation Engineering Agency facility in Newport News, VA, by relocating US Army Service Deployment and Distribution Command – Transportation Engineering Agency to Scott Air Force Base, IL, and consolidating it with the Air Force Air Mobility Command Headquarters and Transportation Command Headquarters at Scott Air Force Base, IL.

Justification: Collocation of TRANSCOM and Service components will (1) collocate activities with common functions and facilitate large-scale transformation proposed by the TRANSCOM Commander, and (2) reduce personnel to realize long-term savings. The realignment will also terminate leased space operations in the National Capital Region and near Norfolk, VA.

Payback: The total estimated one-time cost to the Department of Defense to implement this recommendation is \$91.3 million. The net of all costs and savings to the Department during the implementation period is a savings of \$402.7 million. Annual recurring savings to the Department after implementation are \$111.0 million, with an immediate payback expected. The net present value of the costs and savings to the Department over 20 years is a savings of \$1,451.6 million.

Impacts:

Economic Impact: Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 1472 jobs (857 direct jobs and 615 indirect jobs) in the Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Division, which is less than 0.1 percent of economic area employment).

Assuming no economic recovery, this recommendation could result in a maximum potential reduction of 1133 jobs(484 direct jobs and 649 indirect jobs) in the

Virginia Beach-Norfolk-Newport News, VA-NC Metropolitan Statistical Area, which is 0.12 percent of economic area employment.

Community Infrastructure: A review of community attributes indicates that although Scott AFB job growth rates have on occasion fallen just below the national growth rates, there are no issues that affect the ability of the infrastructure of the communities to support missions, forces, and personnel.

Environmental Impact: This recommendation has the potential to impact air quality at Scott AFB, which is in a non-attainment area for Ozone (8-hour), and Ozone maintenance (1 hour). An initial conformity analysis indicates that a conformity determination may not be necessary. An air permit revision may be needed. Scott has a 79 acre historic district that may be impacted by future development. Scott uses safety waivers and exemptions to accomplish the mission. Additional operations may compound the need for safety waivers. Military Munitions Response Program sites exist on the installation and may represent a safety hazard for future development. Threatened and Endangered species and/or critical habitats exist on Scott and impact operations. Additional operations may further impact these species and/or habitat. The state requires a permit for the withdrawal of groundwater at Scott. Modification of the on-installation treatment works may be necessary. This recommendation has no impact on dredging; marine mammals/marine resources/marine sanctuaries; noise; waste management; or wetlands. This recommendation will require spending approximately \$390K for environmental compliance activities at Scott. This cost was included in the payback calculation. This recommendation does not otherwise impact the costs of environmental restoration, waste management, and environmental compliance activities

HSA-0114R
Realign US TRANSCOM and Service Components to Scott AFB, IL
Supporting Information

A. Competing Recommendations/ Force Structure Capabilities.

There are no known competing recommendations that affect this scenario.

Force Structure Capabilities: This recommendation has been constructed to accommodate the current and surge requirements. Since the manpower levels remain generally stable through FY 2011 within this Force & Infrastructure Category (F&IC) for all services, and end strength levels as reported in the 20-year Force structure plan remain relatively flat, it follows that this recommendation is consistent with the 20-Year Force Structure Plan.

B. Military Value Results.

Consolidating SDDC and SDDC-TEA at Scott AFB with TRANSCOM and AMC realizes more than a 19% headquarters-level personnel reduction (834 personnel) across the US military transportation organizations, and resulting efficiencies in military transportation capabilities. Concentrating US military transportation organizations is vital to realizing the full value of the total US Defense Transportation System (DTS). While Scott AFB has a slightly lower quantitative military value score (.8467) than Ft. Eustis (.8758), the numerical difference is really very small (0.029 on a scale of 0 to 1.000).

Consolidation of these commands at Scott AFB eliminates stand alone headquarters, eliminates two leased activities (one within the NCR), and consolidates Service Component Commands with the Combatant Command Headquarters – providing synergy and reduction of personnel. This offers qualitative military value benefits that overcome the slight difference in Military Value quantitative scores, and gives military decision-makers in one location full and integrated control of all military transportation modes and assets. Co-location of all these common and integrating activities will enhance the value of SDDC and SDDC-TEA, and creates greater military value via the concentration of all military transportation management in one location. Realignment of TRANSCOM and Service component commands will (1) eliminate personnel redundancies and excess infrastructure capacity, (2) increase military effectiveness by improved transportation efficiency, and (3) reduce the cost of military transportation operations.

Realignment of SDDC and SDDC-TEA creates military value that is not measured by the Major Administrative & Headquarters Joint Cross Service Group's existing military value model. The Military Value Model is a general tool that scores a limited number of background factors -- general measures of merit -- and does not attempt to measure specific issues like co-location and critical mass of defense transportation capability. Scott AFB is a better military location and center of gravity than Ft. Eustis, Alexandria, VA, or Newport, VA because of the synergy with defense transportation entities already located there, a fact not accounted for in the Military Value model and installation scores. It is the military judgment of the H&SA JCSG that SDDC and SDDC-TEA realignment to Scott AFB, IL delivers highest overall military value to the Department through increased management effectiveness of integrated defense transportation activities, the resulting military effectiveness of the total Defense Transportation System, and reduced cost of operations.

C. Capacity Analysis.

The table below summarizes the personnel numbers received through scenario data calls with the Services in examining the CDR USTRANSCOM’s proposal.

Activity/Location, Employee Type	Personnel (start)	Personnel Reductions	Personnel Relocated	Contractors Start/ Remaining
TRANSCOM (Scott AFB)				500 / 400
- Military Officers	278	40	N/A

- Civilians	104	19	85	
TOTALS	2826	541	751	1473/1180

This recommendation realizes the reduction of 541 military and civilian personnel, plus the reduction of 293 contractor positions, for a total personnel reduction of 834. Normal BRAC 7% personnel reductions were not levied on the activities due to the larger reductions proposed by the TRANSCOM commander. At Scott AFB, 558 positions are being eliminated. The influx of personnel to Scott AFB is 1056.

The required additional GSF for US TRANSCOM and all Service components (Administrative Space) (@ 200 GSF/person) is 99,600 GSF. Excess administrative space is not available at Scott AFB as the consolidation begins, but administrative space becomes available as TRANSCOM and Air Mobility Command job reductions take place. This will be used for arriving personnel, until their number exceeds available space. The influx of 1056 people at Scott AFB requires a total of 165,000 GSF new MILCON. In addition, TRANSCOM will consolidate all component transportation

command and control functions in a new Joint Operations Center, requiring an addition 60,000 GSF of new MILCON.

Scott AFB, IL capacity data shows the following for administrative space:

Installation	Current Capacity	Maximum Potential Capacity	Current Usage @ 200 GSF/ Person	Surge Capacity Requirement	Excess (Shortfall)	
					%	GSF
Scott AFB, IL	1,605,620	1,583,697	1,729,450	0	- 9%	(145,753)

Capacity Analysis - Major Administrative and Headquarters

The Major Administrative and Headquarters (MAH) team is approaching its Capacity Analysis of Footprint of Administrative Space from two directions. The first is an analysis of administrative space on a targeted group of military installations. For each installation, total capacity of administrative space was measured and excess capacity calculated based on 160 Useable Square Feet (USF)/200 Gross Square Feet (GSF) per person (USF is converted to GSF by a 1.25 factor). Use of a single common standard is important to the analysis as it facilitates direct comparison of excess across the MILDEPs and the 4th Estate.

The following tables present the results of the analysis to date. The majority of the data comes from Capacity Data Call Question #303, and the Second Capacity Data Call.

The reported data indicate there is significant excess administrative space on military installations when compared against the space standards. This observation is dependent upon the correct reporting of personnel figures for the inventory of installations; and unless personnel information is obviously incorrect, we are using it as reported. Minor exception: Data provided in DOD Question 445 by Bolling AFB was adjusted downward (from 989,649 GSF to 396,192 GSF) in order to estimate the amount of space on the installation occupied by the Defense Intelligence Agency (DIA). DIA space was not reported to the HSA JCSG.

For the Navy, host installations reported for the listed Navy "fence lines". Current capacity data (DOD Question 303) included detailed data for multiple fence lines where applicable. Maximum potential capacity data (DOD Question 445) was mostly reported as a total by host installations.

* Data provided in DOD Question 445 was adjusted downward (from 989,649 GSF to 396,192 GSF) in order to estimate the amount of space on the installation occupied by the Defense Intelligence Agency (DIA). DIA space was not reported to the HSA JCSG because it is an intelligence activity. This action was taken to avoid overstating excess space.

D. Use of USAF Scenario Data Call (SDC) Response Concerning COBRA Costs/Savings.

The tables below show the USAF SDC response.

One-Time Unique Costs (On-Installation Infrastructure) – Gaining Installations			
Table 6.1.3			
Special Space			
Infrastructure Item	Estimated Cost (Current \$)	Time to Complete (Months)	Comments
System Furniture	\$2,494,000	12	FY 09 expenditure
IT Costs	\$88,000	12	FY 09 expenditure
Environmental Costs	\$240,000	12	FY 06; NEPA Analysis
Environmental Costs	\$50,000	12	FY 07; Air Conf. Analysis
Environmental Costs	\$100,000	12	FY 07; Air Permit Revision
Joint Operations Center	\$18,000,000	12	FY 08 expenditure

The MILCON items identified below were used as GSF requirements for the scenario, but did not use the Air Force-generated cost (the COBRA model was allowed to generate these costs based on internal data/algorithms):

Cost of Living

Cost of Living provides a relative measure of cost of living in the local community. General Schedule (GS) Locality Pay provides a relative scale to compare local salaries with government salaries and Basic Allowance for Housing (BAH) is an indicator of the local rental market. In-state tuition is an indicator of the support provided by the state for active duty family members to participate in higher-level education opportunities.

Median Household Income	(US Avg \$41,994)	\$42,448	Basis: MSA

In-state Tuition for Family Member	No	
In-state Tuition Continues if Member PCSs Out of State		

Education

This attribute defines the population in local school districts and identifies capacity. The pupil/teacher ratio, graduation rate, percentage of certified teachers and composite SAT I/ACT scores provide a relative quality indicator of education. This attribute also attempts to give communities credit for the potential intellectual capital they provide.

NOTE: “MFR” means a Memorandum For Record is on file at the installation/activity/agency to document problems in obtaining the required information. Reasons for not being able to obtain information may be that the school district refused to provide the information or the school district does not use or track the information.

If the installation/activity/agency has incomplete information from the local school system in order to accurately compute a score in this area, the number of school districts reporting information will be captured in addition to the computed answer.

Transportation

Distance to an airport shows convenience and availability of airline transportation. Public transportation shows potential for members and DoD civilians to use it to commute to/from work under normal circumstances and for leisure.

Distance from FORT EUSTIS to nearest commercial airport: 8.0 miles

Is FORT EUSTIS served by regularly scheduled public transportation? Yes

Utilities

This attribute identifies a local community's water and sewer systems' ability to receive 1,000 additional people.

Does the local community's water system have the ability to meet an expanded need of an additional 1,000 people moving in the local community? Yes

Does the local community's sewer system have the ability to meet an expanded need of an additional 1,000 people moving in the local community? Yes

Summary of Cumulative Environmental Impacts - Criterion 8

Scenario ID: HSA-0114

Brief Description:

Co-locate TRANSCOM Components at Scott AFB and personnel realignment from Army Surface Deployment and Distribution Center (SDDC), Alexandria, VA; Fort Eustis, VA; and SDDC, TEA.

<u>General Environmental Impacts</u>	
Environmental Resource Area	Scott
Air Quality	Scott is in an area that is in nonattainment for ozone (8 hr, moderate) and maintenance for ozone (1 hr). An initial conformity analysis indicates that a conformity determination may not be necessary. An air permit revision may be needed.
Cultural/ Archeological/ Tribal Resources	Scott AFB has a 79-acre historic district that may be impacted by future development.
Dredging	No impact
Land Use Constraints/ Sensitive Resource Areas	The base uses safety waivers and exemptions to accomplish the mission. Additional operations may compound the need for safety waivers. Military Munitions Response Program sites exist on the installation and may represent a safety hazard for future development.
Marine Mammals/ Marine Resources/ Marine Sanctuaries	No impact
Noise	No increase in off-base noise is expected.
Threatened& Endangered Species/ Critical Habitat	T&E species and/or critical habitats exist and impact operations. Additional operations may further impact T&E species and/or critical habitats.
Waste Management	No impact
Water Resources	The state requires a permit for withdrawal of groundwater. Modification of on-installation treatment works may be necessary.
Wetlands	No impact

<u>Impacts of Costs</u>	
	Scott
Environmental Restoration	DERA money spent through FY03 (\$K): 10425 Estimated CTC (\$K): 167222 DO NOT ENTER IN COBRA
Waste Management	No impact
Environmental Compliance	FY06 NEPA \$240K FY07 Conformity Analysis \$50K FY07 Air Permit Revision \$100K
