

Dear BRAC Commission,

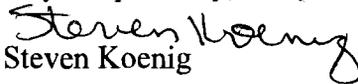

I am growing increasingly concerned that the DOD has not properly followed the selection criteria in making its re-alignment recommendations. One of the main criteria of the BRAC process seems to be the creation of joint centers of excellence in order to improve our efficiency while maintaining the quality of service provided to our war fighters. NSWC Crane is a joint activity providing products and services to all branches of the military. Another key criteria of the BRAC process centers on Military Value. The Military Value scores for NSWC Crane in the area of Sensors, Electronics and Electronic Warfare (S, E and EW) are higher than almost every other DOD activity.

One example of a recommendation that does not make sense is the re-alignment of Army S, E and EW work from Fort Monmouth to Aberdeen Proving Grounds. According to the Technical Joint Cross Service Group Analysis and Recommendations document dated 19 May 2005, which is available on the DOD BRAC website (www.defenselink.mil/brac), NSWC Crane has much higher Military Value scores than both Fort Monmouth and Aberdeen Proving Grounds. In addition, NSWC Crane already has a close working relationship with the Army since it is co-located with CAAA. If the BRAC criteria are followed properly, this workload should be re-located to NSWC Crane instead of Aberdeen Proving Grounds. Additionally, this same logic applies to the Army S, E and EW work being relocated from Fort Belvoir to Aberdeen Proving Grounds. The Fort Belvoir workload should be re-aligned to NSWC Crane since NSWC Crane has existing joint S, E and EW capability as well as higher Military Value scores.

Another example of a recommendation that does not make sense is the re-alignment of S, E and EW workload from Space and Naval Warfare sites at Charleston and San Diego to NSWC Dahlgren. NSWC Crane has higher Military Value scores than Charleston, San Diego and Dahlgren and should have been designated as the receiving site for this workload.

I urge you to reconsider the recommendation to re-align S, E and EW workload to sites other than NSWC Crane by properly taking into account the joint capability of NSWC Crane and CAAA as well as the DODs own Military Value scoring analysis.

Very Respectfully,

Steven Koenig

BRAC Commission
