

DRAFT

Department of Defense

Transformation Through Base Realignment and Closure (BRAC)

LIST OF AIR FORCE INSTALLATIONS, ACTIVITIES AND LEASED FACILITIES

Sorted by State and then by Name

DRAFT

Source Documents and Methodology: This is a list of Air Force installations, activities and leased facilities and Reserve Components when the civilian manpower authorizations exceed 300 personnel.

Source documents used to compile this list include:

- **DOD** List of Military Installations (Major, Minor, and Support) (1990)
- Report of the Department of Defense on Base Realignment and Closure (April 1998)
- Military Department BRAC 95 reports to the Secretary of Defense (March 1995)
- DOD Base Structure Reports
- DOD Installation Fact Sheets (2001)

Methodology used to develop the list:

- 1) Removed all installations, organizations and activities closed or disestablished by prior BRAC rounds. Also, removed installations, organizations and activities that were listed in the April 1998 Report that have reorganized, disestablished or consolidated with other activities.
- 2) Air Force Go-Co's were not reviewed in prior BRAC rounds and are not listed.
- 3) Installations, activities and leased facilities with less than 300 civilian positions authorized are not included.

Added: SAF/IEBB LEGEND

RED = Recommended Changes and Notes identifying non-AF activities with DoD direct-hire civilians that may result in a total DoD civilian population greater than 300

GREEN = Civilian manpower numbers for individual activities at locations where there are fewer than 300 DoD direct hire AF civilians.
