SUBJECT: Audit Subject, 2005 Base Realignment and Closure – Installation Visualization Tool Data Reliability (Project F2003-FB4000-0854.000)

1. Reference our memorandum, 30 May 2003, 2005 Base Realignment and Closure – Installation Visualization Tool Data Reliability, announcing the planning phase of our audit. Audit application will begin during March 2004 and we expect to complete it by April 2004. The Deputy Assistant Secretary for Basing and Infrastructure Analysis (SAF/IEB) requested the audit. The Installation Visualization Tool (IVT) is a planned capability to enhance DoD's overall ability to manage its infrastructure and will be used as a tool during the Base Realignment and Closure (BRAC) 2005 process. The Air Force is the lead service for this effort.

2. The overall objective is to determine the reliability of IVT data. Specifically, we will determine whether major command geospatial integration consultants:

- a. Confirmed installations included all applicable IVT layers.
- b. Verified consistency of IVT data with BRAC data call questionnaire responses.
- c. Validated quality controls and metadata as outlined in the IVT Quality Assurance Plan.

3. Selected audit locations and dates are:

Air Combat Command (ACC)	09 March 2004
