MEMORANDUM FOR MAJCOM/XP      HQ USAFA/XP  
11 Wing/XP                      ANGXP

SUBJECT: Base Realignment and Closure (BRAC 2005) Data Call #1 Questionnaire

Please find enclosed subject data call in “.pdf” format. Two files reside on the attached CD-ROM – the second file paginates the file after each question for ease of dissemination of specific questions. This format of the questionnaire is provided at the request of several of the Commands during our December MAJCOM meeting; it allows you to not only “see” the questions within the on-line web-based tool (WIDGET), but to have a word-formatted version of all the questions for reference. That said, this accommodation for you in no way reduces the sensitivity of the information on this CD-ROM. While you may make copies of the CD-ROM for your Wings to help in developing the answers, you must also provide the controls to ensure the information is protected in accordance with the Air Force BRAC Internal Control Plan.

Note that there might be minor variations between this CD-ROM version and the WIDGET data base. In all cases the WIDGET information is prime, just as WIDGET data is prime over that data collected using the Installation Visualization Tool.

Questions can be forwarded to Col Tom Fleming, SAF/IEBB, DSN 222-9515.
