Sir,

Mr. Aimone would like your coordination on the attached memo regarding GOCOs prior him signing it and to it being sent out. We are basically limiting the three active Plants 4, 6, and 42 to answering the Combat Field Support/I-Level questions and the depot maintenance questions with the exception of the two core capacity/workload questions. None of the shipyard or munitions questions apply to these three GOCO plants.

As you can see below Col Fleming has requested via email SAF/AQs coordination also. Mr. Claude Hennessey and the PEM from SAF/AQRE were involved in all the discussions as to what should be included, along with Mark Van Gilst.

Tom, I put this on letter head, added AQ to the cc line (confirm this is the
right office symbol), and did some slight mods to the ltr.

If everybody is ok w/ this I need AQR & Mr Orr to chop on the ltr (no SSS
necessary, just chop on ltr) and I'll sign (officially sign, not just
electronically sign). Mark, that's your job w/ Carol. Try to get to closure
on this ASAP next week.

Mike Aimone
