

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS UNITED STATES AIR FORCE
WASHINGTON, DC

MEMORANDUM FOR ALMAJCOM/CEP

22 DEC 2003

FROM: AF/ILEP

SUBJECT: Preparation for BRAC 2005 Data Call

On 05 Jan 04, all qualifying Air Force installations will receive the first BRAC data call to be completed within 60 days. Prior to receiving the questions, installations should ensure that they have ready access to the source documents listed in the attachment. Doing so will save time, allowing for a more efficient response to the data call.

Additionally, all installations will need to run an ACES-PM report on 05 Jan 04 that provides the following basic information:

- Project fiscal year (fiscal year of funds)
- Project number
- Facility number (may not be available for FY04 MILCON projects)
- Facility cat code
- Size/Quantity
- Unit of Measure
- Estimated completion date

The ACES-PM report will be a source in answering questions and should include SRM and MILCON projects awarded in FY03 and previous years that are NOT construction complete. DO NOT INCLUDE SRM projects, unless the project cost exceeds 50 percent of the replacement value. Include FY04 MILCON projects which have been authorized and/or appropriated. If the plant project changes the existing category code or facility type, list the new category code and facility type. The report should be run for the parent installation and any sites, GSUs, ranges, and/or auxiliary fields that the parent installation is designated to support.

Should you have any questions, contact our ILEPB point of contacts: Maj. Ed Oshiba at DSN 664-5256, (703) 604-5256 or Ryan Alvis at DSN 664-5273 (703) 604-5273. Thank You.

A handwritten signature in black ink that reads "William F. Eng".

William F. Eng
