What world do you live in? Have you looked at history or just about sailing one more day on Chesapeake Bay or one more summer in the Hamptons. The world is at war with extremism, the Chinese will need oil, just like the Japanese before World War 2, Europe could go in numerous directions or create another one of their century blasting adventurous wars. Number WW3? We have already spent the money to build the bases.....Do you really think that making oil deals and being a good guy is really going to cut it???? We can't make it work here, how can make other cultures who have been fighting wars and tribal conflicts for thousands of years, change??? People come to the US to be Americans, people that cherish who and what we are. They leave because the vast majority of the people in their home countries do not want to change. We are sending all our jobs and industry over seas. Can we rebuild the bases and forces cut, or that are being sent to the junk yard or scraped in time. Will we have time???? History is a bastard at repeating itself. If we keep trying to be the world task master/policy/leader with no goal, to be the good guy to many times. Sharpen the bayonets, bang the drum and rally around the flag. Look at history, look at history.

Respectfully, sincerely and very concerned.
