I would like to add further input on the issue to close Cannon. Because I am a citizen to New Mexico and to Curry County I feel it is my responsibility to help save Cannon the best way I can. I have written letters in the past but everyone is still encouraging the letter writing campaigns and even sending emails concerning the issue. Before, I wrote about how closing the base would effect things in my community and even those of which relate to Cannon itself. Furthermore, watching the news lately has not been what most of us want to hear. As the deadlines draw near so does our chances to keep our beloved base. It seems closing Cannon is still strong in the hearts of those who control our defense in America. Which means why close a base to build another one? Why close a base that has no encroachments? Why close a base that has so much room to grow? And why close a base without thoroughly inspecting it in the first place? Forgive me if I impede but after all Clovis and the surroundings areas have done to keep Cannon all efforts seem to be for nothing. If Cannon does close then it is evident that the personnel stationed here will be sent to other places. Also, the same applies to the personnel of other base closures. Is this going to crowd the bases that are not being closed? So the question is what does the Department of Defense have in store for those people. I believe there is good reason to close a base that is below standards, or even because of good relevant reasons. Cannon does not seem like to type of base to close for such reasons so I would like to stress as long as what ever happens is done truthfully and with the best intentions, then we as Americans have to trust our Defense is working for its people.

Sincerely,

Keith Dickson

Dear Lloyd Newton:

First off I would like to ask you a question, have you ever felt compelled to write about something that means so much to you? To stop and think about a simple question like this one may not seem very important. If you consider the amount of support and team work the people of Eastern New Mexico and West Texas have contributed to this cause it might help. Now think about how many other communities big or small that have created an entire campaign to save their very own base. Consider the love and devotion you and I have to our brothers and sisters in arms. Think about the kind of bonds created with these military personnel, the friendships made because of how close some of us are to these people. Yes, it is safe to say these kinds of relationships form more easily because of our smaller community. Through time Cannon and the surrounding areas have grown together, depended on each other, and so much more. For reasons you already know Cannon should not be closed! The real reason I am writing is in the smallest of hope that some of these things I am writing will make you stop and think. Sometimes in life things are better understood in someone else's shoes. So again before a decision is made can you at the end of the day say, "I did everything I could to help save Cannon Air Force Base and those people in the surrounding areas"! If this is true then I hope with deepest regard you can help, because no matter how many letters you read or throw away the ball is in your court, and your teammates are counting on you! We all are counting on you to do what is right.

Sincerely,

Deanne Dickson

Dear Sue Ellen Turner,

Many people work and live on Cannon Air Force Base. There are many retired military personnel who live in Clovis and the surrounding areas. On any given day a person can see a vehicle with some form of military reference and not just one mind you many! Do you realize how many people will be looking for a new home or job because Cannon may close? I do not know about you but I would not like looking for a new job or even a new home if I were 60,70,80 years old because Cannon is closing. Of course everyday things happen for a reason but some say closing Cannon is because of profit and loss, Cannon being under code, or whatever the real reason may be can you honestly say that closing the base will make things better? In my opinion closing the base will create many problems for the people around it. The fact of the matter is by closing Cannon the Defense department is fixing whatever problem Cannon is creating for them. Unless there is a solution for what the base closure will do to our community then it is obvious it is not right. Lets find the problem, fix it then if the problem persists, consider another method. But lets be rash do we deserve the effects of closing Cannon? If you lived here would you see things differently? I think so. Clovis is thriving and growing everyday I do not want to see that end. Think how you may feel about such a thing. With that said you may understand the position my friends and I am faced with.

Sincerely,

Keith Dickson

To stop and think about a simple question like this one may not seem very important. If you consider the amount of support and team work the people of Eastern New Mexico and West Texas have contributed to this cause it might help. Now think about how many other communities big or small that have created an entire campaign to save their very own base. Consider the love and devotion you and I have to our brothers and sisters in arms. Think about the kind of bonds created with these military personnel, the friendships made because of how close some of us are to these people. Yes, it is safe to say these kinds of relationships form more easily because of our smaller community. Through time Cannon and the surrounding areas have grown together, depended on each other, and so much more. For reasons you already know Cannon should not be closed! The real reason I am writing is in the smallest of hope that some of these things I am writing will make you stop and think. Sometimes in life things are better understood in someone else's shoes. So again before a decision is made can you at the end of the day say, "I did everything I could to help save Cannon Air Force Base and those people in the surrounding areas"! If this is true then I hope with deepest regard you can help, because no matter how many letters you read or throw away the ball is in your court, and your teammates are counting on you! We all are counting on you to do what is right.

Sincerely,

Deanne Dickson

I would like to add further input on the issue to close Cannon. Because I am a citizen to New Mexico and to Curry County I feel it is my responsibility to help save Cannon the best way I can. I have written letters in the past but everyone is still encouraging the letter writing campaigns and even sending emails concerning the issue. Before, I wrote about how closing the base would effect things in my community and even those of which relate to Cannon itself. Furthermore, watching the news lately has not been what most of us want to hear. As the deadlines draw near so does our chances to keep our beloved base. It seems closing Cannon is still strong in the hearts of those who control our defense in America. Which means why close a base to build another one? Why close a base that has no encroachments? Why close a base that has so much room to grow? And why close a base without thoroughly inspecting it in the first place? Forgive me if I impede but after all Clovis and the surroundings areas have done to keep Cannon all efforts seem to be for nothing. If Cannon does close then it is evident that the personnel stationed here will be sent to other places. Also, the same applies to the personnel of other base closures. Is this going to crowd the bases that are not being closed? So the question is what does the Department of Defense have in store for those people. I believe there is good reason to close a base that is below standards, or even because of good relevant reasons. Cannon does not seem like to type of base to close for such reasons so I would like to stress as long as what ever happens is done truthfully and with the best intentions, then we as Americans have to trust our Defense is working for its people.

Sincerely,

Keith Dickson

Many people work and live on Cannon Air Force Base. There are many retired military personnel who live in Clovis and the surrounding areas. On any given day a person can see a vehicle with some form of military reference and not just one mind you many! Do you realize how many people will be looking for a new home or job because Cannon may close? I do not know about you but I would not like looking for a new job or even a new home if I were 60,70,80 years old because Cannon is closing. Of course everyday things happen for a reason but some say closing Cannon is because of profit and loss, Cannon being under code, or whatever the real reason may be can you honestly say that closing the base will make things better? In my opinion closing the base will create many problems for the people around it. The fact of the matter is by closing Cannon the Defense department is fixing whatever problem Cannon is creating for them. Unless there is a solution for what the base closure will do to our community then it is obvious it is not right. Lets find the problem, fix it then if the problem persists, consider another method. But lets be rash do we deserve the effects of closing Cannon? If you lived here would you see things differently? I think so. Clovis is thriving and growing everyday I do not want to see that end. Think how you may feel about such a thing. With that said you may understand the position my friends and I am faced with.

Sincerely,

RK Dickson

I would like to add further input on the issue to close Cannon. Because I am a citizen to New Mexico and to Curry County I fill it is my responsibility to help save Cannon the best way I can. I have written letters in the past but everyone is still encouraging the letter writing campaigns and even sending emails concerning the issue. Before, I wrote about how closing the base would effect things in my community and even those of which relate to Cannon itself. Furthermore, watching the news lately has not been what most of us want to hear. As the deadlines draw near so does our chances to keep our beloved base. It seems closing Cannon is still strong in the hearts of those who control our defense in America. Which means why close a base to build another one? Why close a base that has no encroachments? Why close a base that has so much room to grow? And why close a base without thoroughly inspecting it in the first place? Forgive me if I impede but after all Clovis and the surroundings areas have done to keep Cannon all efforts seem to be for nothing. If Cannon does close then it is evident that the personnel stationed here will be sent to other places. Also, the same applies to the personnel of other base closures. Is this going to crowd the bases that are not being closed? So the question is what does the Department of Defense have in store for those people. I believe there is good reason to close a base that is below standards, or even because of good relevant reasons. Cannon does not seem like to type of base to close for such reasons so I would like to stress as long as what ever happens is done truthfully and with the best intentions, then we as Americans have to trust our Defense is working for its people.

Sincerely,

RK Dickson

Dear James V. Hansen,

Many people work and live on Cannon Air Force Base. There are many retired military personnel who live in Clovis and the surrounding areas. On any given day a person can see a vehicle with some form of military reference and not just one mind you many! Do you realize how many people, will be looking for a new home or job because Cannon may close? I do not know about you but I would not like looking for a new job or even a new home if I were 60,70,80 years old because Cannon is closing. Of course everyday things happen for a reason but some say closing Cannon is because of profit and loss, Cannon being under code, or whatever the real reason may be can you honestly say that closing the base will make things better? In my opinion closing the base will create many problems for the people around it. The fact of the matter is by closing Cannon the Defense department is fixing whatever problem Cannon is creating for them. Unless there is a solution for what the base closure will do to our community then it is obvious it is not right. Lets find the problem, fix it then if the problem persists, consider another method. But lets be rash do we deserve the effects of closing Cannon? If you lived here would you see things differently? I think so. Clovis is thriving and growing everyday I do not want to see that end. Think how you may feel about such a thing. With that said you may understand the position my friends and I am faced with.

Sincerely,

Keith Dickson

Dear James H. Bilbray:

First off I would like to ask you a question, have you ever felt compelled to write about something that means so much to you? To stop and think about a simple question like this one may not seem very important. If you consider the amount of support and team work the people of Eastern New Mexico and West Texas have contributed to this cause it might help. Now think about how many other communities big or small that have created an entire campaign to save their very own base. Consider the love and devotion you and I have to our brothers and sisters in arms. Think about the kind of bonds created with these military personnel, the friendships made because of how close some of us are to these people. Yes, it is safe to say these kinds of relationships form more easily because of our smaller community. Through time Cannon and the surrounding areas have grown together, depended on each other, and so much more. For reasons you already know Cannon should not be closed! The real reason I am writing is in the smallest of hope that some of these things I am writing will make you stop and think. Sometimes in life things are better understood in someone else's shoes. So again before a decision is made can you at the end of the day say, "I did everything I could to help save Cannon Air Force Base and those people in the surrounding areas"! If this is true then I hope with deepest regard you can help, because no matter how many letters you read or throw away the ball is in your court, and your teammates are counting on you! We all are counting on you to do what is right.

Sincerely,

Keith Dickson

Furthermore, watching the news lately has not been what most of us want to hear. As the deadlines draw near so does our chances to keep our beloved base. It seems closing Cannon is still strong in the hearts of those who control our defense in America. Which means why close a base to build another one? Why close a base that has no encroachments? Why close a base that has so much room to grow? And why close a base without thoroughly inspecting it in the first place? Forgive me if I impede but after all Clovis and the surroundings areas have done to keep Cannon all efforts seem to be for nothing. If Cannon does close then it is evident that the personnel stationed here will be sent to other places. Also, the same applies to the personnel of other base closures. Is this going to crowd the bases that are not being closed? So the question is what does the Department of Defense have in store for those people. I believe there is good reason to close a base that is below standards, or even because of good relevant reasons. Cannon does not seem like to type of base to close for such reasons so I would like to stress as long as what ever happens is done truthfully and with the best intentions, then we as Americans have to trust our Defense is working for its people.

Sincerely,

Keith Dickson

Dear James T. Hill:

First off I would like to ask you a question, have you ever felt compelled to write about something that means so much to you? To stop and think about a simple question like this one may not seem very important. If you consider the amount of support and team work the people of Eastern New Mexico and West Texas have contributed to this cause it might help. Now think about how many other communities big or small that have created an entire campaign to save their very own base. Consider the love and devotion you and I have to our brothers and sisters in arms. Think about the kind of bonds created with these military personnel, the friendships made because of how close some of us are to these people. Yes, it is safe to say these kinds of relationships form more easily because of our smaller community. Through time Cannon and the surrounding areas have grown together, depended on each other, and so much more. For reasons you already know Cannon should not be closed! The real reason I am writing is in the smallest of hope that some of these things I am writing will make you stop and think. Sometimes in life things are better understood in someone else's shoes. So again before a decision is made can you at the end of the day say, "I did everything I could to help save Cannon Air Force Base and those people in the surrounding areas"! If this is true then I hope with deepest regard you can help, because no matter how many letters you read or throw away the ball is in your court, and your teammates are counting on you! We all are counting on you to do what is right.

Sincerely,

RK Dickson
