Candidate Recommendation # DONCR-0129

Candidate Recommendation: Close Navy Marine Corps Reserve Center (NMCRC) Tulsa, OK, and relocate to Armed Forces Reserve Center (AFRC) Broken Arrow, OK.

Justification: This recommendation is the Navy portion of a Joint Action Scenario Team (JAST) scenario and the companion recommendation to USA-0214. This recommendation reduces excess capacity in the Department of the Navy (DON) reserve center functional area. Existing capacity in support of the DON Reserve component continues to be in excess of force structure requirements. Sufficient capacity for drilling reserves is maintained throughout the United States, and all states will continue to have at least one NRC or NMCRC. The closure of NMCRC Tulsa, OK, along with other NRC/NRF/NMCRC closures (38 total) will result in a capacity reduction of 13.8 percent of total current square footage.

The JAST developed a number of scenarios to close Army, Air Force, Navy and Marine Corps reserve centers in a given geographic area and consolidate them into a single AFRC. The JAST scenarios originated from a Reserve Component Process Action Team conducted by the Reserve Component Headquarters for the military departments.

The DON decision to participate in a given JAST scenario was based on an analysis of criteria that examined whether the JAST scenario resulted in capacity reduction, increased the average military value of remaining reserve centers, had a reasonable payback period (within 20 years), addressed claimant interests, and compared favorably to alternate DON reserve center candidate recommendations, giving due consideration to the 50 State Review of reserve centers performed by Naval Reserve Forces Command and the Navy Reserve Readiness Commands.

Payback: The total estimated one time cost to the Department of Defense to implement this recommendation is \$5.98 million. The net of all costs and savings during the implementation period is a cost of \$3.76 million. Annual recurring savings to the Department after implementation are \$0.58 million with a payback expected in 12 years. The net present value of the costs and savings to the Department over 20 years is a savings of \$1.74 million.

Impacts:

Economic Impact on Communities: Assuming no economic recovery, this recommendation will result in a maximum potential reduction of 0 jobs (0 direct jobs and 0 indirect jobs) over the 2006-2011 period in the Tulsa, OK, Metropolitan Statistical Area (MSA), which is less than 0.1 percent of economic area employment. NMCRC Tulsa is in the same MSA as AFRC Broken Arrow.

Community Infrastructure Impact: A review of community attributes indicates no issues regarding the ability of the infrastructure of the community to support missions, forces and personnel.

Environmental Impact: This recommendation has no substantial impact on air quality; cultural, archeological, or tribal resources; dredging; land use constraints or sensitive resource areas; marine mammals, resources, or sanctuaries; noise; threatened or endangered species or critical habitat; waste management; water resources; or wetlands. This recommendation does not impact the costs of environmental restoration, waste management, and environmental compliance activities.

Summary of Scenario Environmental Impacts Report

Candidate Recommendation # DONCR-0129 Supporting Information:

Potential Competing Recommendations: There are no competing recommendations.

Force Structure Capabilities: This recommendation ensures that the Department will retain necessary capabilities to support the Force Structure Plan. Retained capacity for Navy Reserve Centers is 4,616,198 square feet while required capacity is 4,440,891 square feet. All surge requirements are included in the required capacity total. The totality of candidate recommendations for the Reserve Center function retains facilities that will be sufficient to ensure the Department will be able to support the force structure plan.

Military Value Analysis: Independently, this recommendation does not significantly change the average military value of the remaining reserve centers. However, as part of the larger group of 38 reserve center closures, the average military value of the remaining reserve centers increases from 59.96 to 61.75. NMCRC Tulsa's ranking in military value is 56 of 152.

Capacity Analysis Results: This recommendation will reduce excess capacity through the closure of a Navy Marine Corps Reserve Center. This recommendation will result in a capacity reduction of 8,980 square feet which includes the construction of replacement capacity at the AFRC. Closure of 38 NRC/NMCRCs retains sufficient capacity to meet future requirements given a 16.4 percent force structure reduction in Navy Reserve personnel.

In-state Tuition Continues if Member PCSs Out of State		Yes	

Education

This attribute defines the population in local school districts and identifies capacity. The pupil/teacher ratio, graduation rate, percentage of certified teachers and composite SAT I/ACT scores provide a relative quality indicator of education. This attribute also attempts to give communities credit for the potential intellectual capital they provide.

NOTE: “MFR” means a Memorandum For Record is on file at the installation/activity/agency to document problems in obtaining the required information. Reasons for not being able to obtain information may be that the school district refused to provide the information or the school district does not use or track the information.

If the installation/activity/agency has incomplete information from the local school system in order to accurately compute a score in this area, the number of school districts reporting information will be captured in addition to the computed answer.

		Basis
