Greetings;

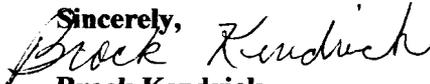

I am writing to voice my total support for all current BRAC recommendations.

I live very close to Ellington Field, near Houston Texas, and I fully understand that these recommendations were made after very careful and lengthy study. I believe all the recommendations are timely, fair, and necessary.

I do not believe that any recommendations have been made that would put our country in harm's way, and that if carried out, these recommendations will actually lead to more and better security.

As a former Marine Sergeant during the Viet Nam War, our country's security has been and always will be of up most importance to me, but I do not feel that these recommendations should be viewed in a negative way. I think the changes could be a very positive thing for our country.

Thank you for all your hard work.

Sincerely,

Brock Kendrick
