MEMORANDUM FOR RECORD

SUBJECT: Military Value Score for COMNAVMARIANAS

1. The Installation Management Military Value score for COMNAVMARIANAS was locked as of 12 April 2005. On Friday 15 April it was determined that an error in computing the score for COMNAVMARIANAS existed as a result of an incorrect answer to Capacity Data Call question number 326. This question requested a yes or no answer from DISA regarding whether or not a DISN Point of Presence exists on an installation. A yes answer was recorded for COMNAVMARIANAS after email from the questions author and discussion between COL Carla Coulson and Mr. David Bullock (certification authority at DISA) on 11 April determined that this would be the most accurate response. Subsequent conversation between Mr. Bullock and COL Coulson on 15 April 2005 determined that a no answer would stand as the certified response based on strict interpretation of the question and the status of the Navy as it exists today.

Deleted: ??

2. Subsequent to the determination that the DISN POP response was incorrect, it was determined by the HSA that no correction was warranted since based on lock down of the data base. This determination was based on DISA confirmation that a response provided six months from the present would result in a yes answer.

Ryan F. Ferrell, Jr.
