RECEIVED

Dear Base Commissioner:

A savings of 48.5 billion in 20 years and we are spending 1 (one) billion a week in Iraq and we have built them 14 new bases. Does anyone any more have any common sense.

Are we trying to wreck America. If this administration doesn't wake up soon I fear the worst.

I am relying on your commission and enough of our level headed Congress to just pull the plug on this most ludicrous proposal in modern times.

Please apply the criteria as we knew it to the list that has been drawn up and void it for the lack of credibility. None on the list need to be ~~sold~~ closed for the betterment of America and our security.

I know we are not talking
out sourcing but is it not
the same its the taking jobs
of middle class amiss in
as we are low income families
and making it even worse.

I believe to many wealthy
individuals are trying to
run our country and they
like the skills to do so
and ordinary citizens need to
listen to stop taking from
the poor.

This Pentagon (Rumsfeld) cocky-a-
mania BRAC list should be
thrown out and I ask you
to do this very thing.

Taking and closing a base that
has all anyone could ask for in
a base and leaving a base the
also has F14 that has a tremendous
encroachment tells you something about
how the list was compiled.

Help Us Keep Common Because its

the right thing to do
