

MINUTES OF THE FEBRUARY 6, 2004 MEETING OF THE MEDICAL JOINT CROSS SERVICE GROUP (MJCSC)

LOCATION: 2300 E Street, NW, Washington, DC First Floor Conference Room, 1300 -1600

Attending: LG Taylor -- Chair, ADM Cowan -- Navy Surgeon General, MG Farmer -- Army Surgeon General, Mr. O'Connell - DoDIG, CAPT Shimkas- BUMED , Mr. Ford - ASD (HA)/CP&P, Col Hamilton -- Secretary, LTC McDonald - J-4 Medical; Dr. Christensen - Cna; Mr. Curry - USA OTSG; Mr. Gidwani - HA/TMA; Maj Harper - AF/SGSF; CDR Morrison - USN; Mr. Porth - OSD/BRAC; CDR Hight - BUMED; Mr. Yaglom - USA SG; Ms. Zamora - SAF/IEBJ; Lt Col Stultz-Lalk - AF/SG; Lt Col Jones - AF/SG; Maj Guerrero - AF/SG.

Decisions:

- Next meeting of 06 Lead, 12 Feb 04, Pentagon, 2C554 at 1530
- Briefing to ISG planned 19 Feb 04 at Pentagon, 3D1019
- All briefings reviewed and approved in total.

Action Items:

- Draft Briefing Slides for ISG must be completed 12 Feb 04. All information for ISG report is due now.
- Brief to principles will occur at 12 Feb meeting.

Meeting Overview:

- The Chair opened the meeting by reminding the group the briefing to the ISG was coming in two weeks. The secretary gave the Military Value overview, and explained the groups came prepared to address the issues that were raised at the last meeting.
- RDA
 - The military uniqueness metric caused concern last meeting. The group felt the yes/no question did not quite capture the whole picture therefore the group recommends adding an essay question to capture the needed information. The other concern was the clustering of facility ranges from 50-53. RDA ran simulated data to do a sensitivity test and the outcome was a range of 19-88. RDA believes the range supports a good differentiation between facilities. Navy SG raised a concern with why uniqueness was not scored higher (ie, 90) since it is imperative that we needed uniqueness for the mission. Army Deputy SG explained this issue to the groups' satisfaction. No further questions were asked and briefing was approved.
- Education and Training
 - The E & T group recapped the MJCSC items of concern. The "Providing the Benefit" attribute was reworded as a question, and moved under Physical Capacity attribute. Joint training was made an attribute not a metric. The throughput attribute was streamlined to one metric, which evaluates student starts and completes by program. There were other changes to questions and metrics. A sensitivity analysis was conducted and the range in scores went from 6-84. The value of GME was discussed at length. The comment was made GME product is higher quality out of military facilities vs civilian based on board scores. This will be important in the scenario building phase. The retention rates of

DELIBERATIVE DOCUMENT - FOR DISCUSSION PURPOSES ONLY

DO NOT RELEASE UNDER FOIA

DCN: 11362

military trained physicians need to be known. Military GME is a military value as stated by the Army Deputy SG. The Army Deputy SG feels we have missed an opportunity to ask more questions about civilian training. Navy SG stated he felt all we needed to compare was military to military at this point. Later the group could address military to civilian training. ASD(HA) stated what he wanted was the best value care at the best economic cost. The question is about facilities not quality of people. Army Deputy SG asked about clinical investigation piece. The research side is not captured in RDA. It is clearly a part of military value. Clinical research is required to have a GME program. The Army Deputy SG stated it did not appear to be addressed. Navy stated this data was captured in capacity and will be included in the scenario phase.

Infrastructure Group

- Infrastructure addressed military unique issues ie, Burn Unit at BAMC. The group discussed military value. The group felt how you define military unique must be clear. Military unique must be compared to the civilian community. Uniqueness metrics assign value to DoD activities, related facilities, and special equipment. Commercial availability difficult to determine within BRAC guidelines. The principles expressed concern about such a large swing from 0-5 and asked the group to review this. A simulated numbers were run and the range was 19-88 and the group felt the range was a good differentiation. Briefing approved.

Medical/Dental Marketing

- The acceptance of Tricare patients was addressed. This data will be available for the scenario-building phase. Some basic assumptions will be made. The civilian capacity the higher the score. Scoring will be based on a gradient. A sensitivity analysis was conducted with simulated data. Scales/ranges were from 25-75. Army Deputy SG expressed concern about aggregate databases. Army Deputy SG felt some of the numbers are including multiple catchment areas. Concern is about double counting catchment areas. ASD (HA) stated eligible and enrolled use quite different numbers. May need to consider only active duty to prevent overlap. BRAC is an installation drill. Eligibility is what should be focused on and does not allow for discretionary issues.

Veterinary Medicine, Preventive Medicine and Health Promotions

- HA TMA discussed role of Vet Medicine. Cost is a good metric to use. Cost to DOD to provide those functions is very high if we close or realign. The group will determine the cost on contracting this function out or moving the function elsewhere. We are not comparing installation to installation. The group is looking at capacity. Much discussion took place and the subject was determined to be a capacity issue and should have been completed earlier. May have to do a separate data call to get this information. Army Deputy SG feels this issue is part of military value. OSD asked if we needed this data to make a decision. Navy stated the infrastructure group is collecting facility information on preventive medicine and occupational health groups. In addition, the infrastructure group agreed to identify vet facilities as a military unique activity or unit under the operational/mission readiness attribute - military unique metric. Chair stated the need to develop a data call for the information for capacity then look for a few questions for military value. The brief was approved.

Comments

- OSD stated Lt Gen Taylor must brief three of the groups work and be able to speak to the details at the ISG on 19 Feb
- Secretary reminded all that draft briefing slides needed NLT 12 Feb. All information for ISG report is due now. Cna and LMI will provide analytical support for the MJCSG for

DO NOT RELEASE UNDER FOIA

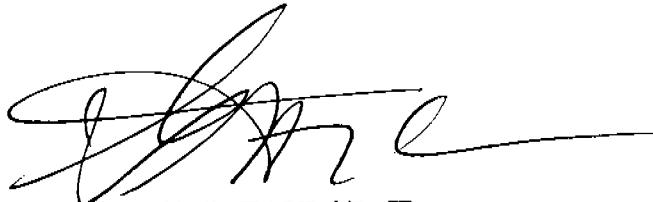

DELIBERATIVE DOCUMENT - FOR DISCUSSION PURPOSES ONLY

DO NOT RELEASE UNDER FOIA

DCN: 11362

less than \$1M. Group will need to be trained on the Optimization Model. Secretary will determine how to best provide this training for the group.

- Chair thanked the group members for all their hard work and ask them to thank the members of the subgroups.
- NEXT MEETING: Thursday, 12 February 2004 at 1530 – 1730, Pentagon 2C554.

GEORGE P. TAYLOR, JR.
Lieutenant General, USAF, MC, CFS
Chair

Recap MJCSG Items

DCN: 1-362

- **Military Value determination of DoD uniqueness and commercial availability of RDA capabilities**
 - Med/Den RDA Subgroup SMEs reviewed the issue
 - **Conclusions:**
 - ◆ **Uniqueness metrics assign value to DoD activities and related facilities and special equipment**
 - ◆ **Commercial availability difficult to determine within BRAC guidelines**
 - No central national association from which to draw data
 - Data call will require surveys to be sent to individual corporations and companies
 - ◆ **RDT&E processes require that DoD validated requirements are first offered to commercial sources**
 - **Recommendation:** Take no action

Changes to Mil Value

DCN: 11362

- No changes were made to the Military Value approach and scoring plan for the Medical and Dental RDA

Sensitivity Analysis

DCN: 11362

■ Approach

- Estimated hypothetical normalized values were assigned for a best and a worst activity
- Two potential activities were simulated to reflect high and low activity scores

■ Results

- Hypothetical range was 100 to 5.4
- Simulated range was 60 to 18

Scoring Plan Results

DODN 11362

Issues

DCN: 11362

- All known issues resolved

Medical Joint Cross Service Group

DCN: 11362

Military Value Update

(Education and Training)

Recap MJCSG Items

DCN: 1-362

- **Attribute: Providing the Benefit - 17 points.** Too heavily weighted and workload is not a good measure.
 - Reworded as a question, and moved under Physical Capacity Attribute.
- **Directed to value jointness.** Make Joint Training an attribute and not a metric.
 - Attribute with 2 metrics – 1)civilian 2)interservice
- **Military can provide the same training in less time.**
 - Created this metric under Military Unique Attribute.

Changes to Mil Value

DCN: 1-382

- Streamlined the throughput attribute to one metric, which evaluates student starts and completes by program.
- Changed the wording to reflect the ability to complete entire training without TD outside local area. Added a second metric that looked at student programs increasing the level of services offered.
- Two metrics under military unique to reflect military unique training and training conducted in shorter time.
- Took out accreditation and board certification question.
- Made joint/integrated training an attribute.

Sensitivity Analysis

DCN 11362

- Put in expected results for a small hospital, a MTF with only a few GME programs, a medical center, and a schoolhouse.

- The range in scores went from:
 - No GME/Initial Training = 6.42**
 - Small Hospital with GME = 28.50**
 - Schoolhouse with no GME = 42.80**
 - Medical Center with GME/Initial = 84.30**

Medical Joint Cross Service Group

DCN: 11362

Military Value Update

(Infrastructure)

Recap MJCSG Items

DCN: 1-362

- **Military Unique Units, i.e. BAMC Burn Unit**
- **Action taken:** Added a question to the facility metric, to note military unique features.

Changes to Mil Value

DDN: 1162

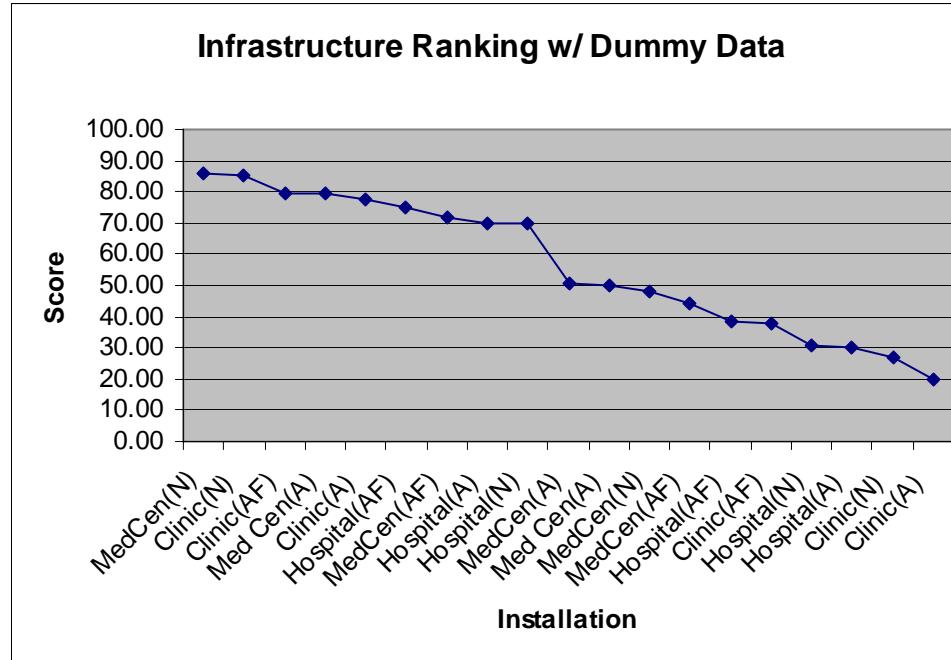

- Reduced questions which would not produce significant differences between facilities.
- Took out the Pharmacy piece, as the Market Group is already assessing this piece.
- Contracting is more appropriate to the scenario analysis.

Sensitivity Analysis

DCN 11362

- Approach to analysis: Looked at two clinics, hospitals, medical centers for each service.
- Results

Medical Joint Cross Service Group

DCN: 11362

Military Value Update

Medical Dental Market

Recap MJCSG Items

DCN: 1-362

- MJCSG Item
 - Acceptance of TRICARE patients
- Action Taken
 - Using HHS information on health care shortage areas with respect to civilian capacity
 - For hospitals, looking at number of facilities and available beds
 - For outpatient looking a primary care and specialty care provider shortages

Changes to Mil Value

DCN: 1-382

- Scales have been added to each question
 - Scales are broken into ranges from 0-10 points
 - Linear in nature
 - Scales were established to smooth range by adjusting for outliers

Sensitivity Analysis

DCN 11362

- Approach to analysis
 - A sample set of MTFs were chosen
 - Objective was to determine spread
- Results
 - For MTFs chosen, found significant spread
 - Active Duty population and Civilian Capacity offset each other to certain extent
 - For Hospitals range is expected to be between 25 and 75
 - For Clinics range is expected to be between 5 and 55
