MEMORANDUM FOR THE RECORD

FOR INFRASTRUCTURE ANALYSIS TEAM

SUBJECT: DATA CALL ONE RESPONSE STATUS, 19 APR 2004

As the IAT implements the DON Data Call Issue Resolution process, particular issues regarding Data Call One have been identified that require special handling. As of this date, these issues and the intended actions are noted below:

1. During execution of Data Call One, the IAT asked respondents to provide spreadsheets with detailed data, for those questions where and the data field provided required the respondent to "roll up" their response for all their subordinate activities and/or tenants. The detailed data used to generate the rolled up response was requested as an attachment, although the detailed data was not requested by the JCSGs. The IAT requested the detailed data so it would be available if questions arose later about the sources of the rolled up responses. Some respondents provided these attachments and others did not. The IAT does not plan to request any missing attachments, unless requested later by either the JCSGs or the IEG.
2. The following 13 questions were asked but the DONBITS format for the questions did not permit the respondents to provide a response in the proper format. The IAT will not request any new or corrective information regarding these questions. The questions will be re-asked in a subsequent Data Call.
  - DON 1.1.F (DoD 591): Supported Activities
  - DON 1.3.0.G (DoD 27): Base/Facility-Level Network Infrastructure Capacity
  - DON 1.6.2.D (DoD 91): Runway Capacity Data
