17. For any **Shore Based Intermediate Maintenance Facility**, list the following:

17.a. List the **size** and the **condition** of the **intermediate maintenance facility** located at the installation. CCN refers to the five digit category code number from NAVFAC P-80.

Table 17.1

Facility Name/ Function	CCN	Adequate (sq ft)	Substandard (sq ft)	Inadequate (sq ft)

In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified describe why the facility is inadequate; indicate how the facility is being used and list other possible uses; and specify the costs to remove the deficiencies that make it inadequate. Indicate if current budget program includes any of the required funds.

17.b. Assuming that the shore intermediate maintenance facilities can be **fully staffed** with appropriately skilled workers and procurement clerks and that sufficient funding is available for all parts support, what would be the maximum ship intermediate maintenance capability of this installation. For this question, assume that all currently programmed improvements are executed and assume that all current depot work remains at the depot level.

If you have 10 classrooms with a capacity of 25 students per room, the design capacity would be 250. If these classrooms are available 8 hours a day for 300 days a year, the capacity in student hours per year would be 600,000.

LIMITING FACTORS FOR ADDITIONAL INSTRUCTION ARE (IN ORDER):

- AVAILABILITY OF SUBMARINE SERVICES FOR ADVANCED ASW TRAINING IN THE TEAM CLASS.
- AVAILABILITY OF WEAPONS SYSTEM TRAINERS FOR SCARP, SHARP AND BEARTRAP COURSES.
- LIMITED AVAILABILITY OF FLIGHT HOURS FOR SQUADRONS TO DEVOTE TO ADVANCED TRAINING.

23. Training Facilities

23.a. By Category Code Number (CCN), complete the following **student throughput capacity** table for all **training facilities** (adequate, substandard and inadequate) aboard the installation including tenant activities. Include all 171-xx, 179-xx CCN's and any other applicable CCN. Following the table, describe how the Student Hours/Yr capacity is derived.

For example: in the category 171-10, a type of training facility is academic instruction classroom. If you have 10 classrooms with a capacity of 25 students per room, the design capacity would be 250. If these classrooms are available 8 hours a day for 300 days a year, the capacity in student hours per year would be 600,000.

THIS INFORMATION PROVIDED BY **WEAPONS TRAINING GROUP.**

¹ **MRP: Maintenance of Real Property Dollars** is a budgetary term used to gather the expenses or budget requirements for facility work including recurring maintenance, major repairs, and minor construction (non-MILCON). It is the amount of funds spent on or budgeted for maintenance and repair of real property assets to maintain the facility in satisfactory operating condition.

² **CPV: Current Plant Value** of Class 2 Real Property is the hypothetical dollar amount to replace a Class 2 facility in kind with today's dollars. Example: the cost today to replace a wood frame barracks with a wood frame barracks.

³ **ACE: Acquisition Cost of Equipment** is the total cumulative acquisition cost of all "personal Property" equipment which includes the cost of installed equipment directly related to mission execution, such as lab test equipment. Class 2 installed capital equipment that is an integral part of the facility will not be reported as ACE.

30. Real Estate Resources. Identify in the table below the real estate resources which have the potential to facilitate future development and for which you are the plant account holder or into which, though a tenant, your activity could reasonably expect to expand. Complete a separate table for each individual site, i.e., main base, outlying airfields, special off-site areas, etc. The unit of measure is acres. Developed area is defined as land currently with buildings, roads, and utilities where further development is not possible without demolition of existing improvements. Include in "Restricted" areas that are restricted for future development due to environmental constraints (e.g. wetlands, landfills, archaeological sites), operational restrictions (e.g. ESQD arcs, HERO, HERP, HERF, AICUZ, ranges) or cultural resources restrictions. Identify the reason for the restriction when providing the acreage in the table. Specify any entry in "Other" (e.g. submerged lands).

31. Ordnance Stowage and Support

31.a Provide present and predicted inventories (coordinate with inventory control manager) and maximum rated capability of all stowage facilities at each weapons storage location controlled by this activity. In predicting the out year facility utilization, distribute overall ordnance compliment to the most likely configuration. The maximum rated capability is also an out year projection taking into account any known or programmed upgrades that may increase current stowage capacity. When listing stowage facilities, group by location, i.e. main base, outlying field, special area.

31.b For each Stowage facility identified in question 31.a above, identify the type of facility (specify if "igloo", "box", etc.). Identify the type of ordnance commodity (from the list above) which are currently stowed in that facility and all other ordnance types which, given existing restrictions, could be physically accommodated in that stowage facility. Specify below if such additional accommodation would require a modification of the facility (e.g. enhanced environmental controls, ESQD waiver).

Identify the reason(s) for which this ordnance is stored at your facility from the following list: own activity use (training); own activity use (operational stock); Receipt/Segregation/ Stowage/Issue (RSSI); transshipment/awaiting issue; deep stow (war reserve); deep stow (awaiting Demil); other. Explain each "other" entry in the space provided, including ordnance stowed which is not a DON asset.

42d. Assuming that the flight training facility is **not constrained by operational funding** (personnel support, increased overhead costs, etc.), with the present equipment, physical plant, etc. , what **additional use of airspace assets** could be realized? Provide details and assumptions for all calculations.

NONE

42h. In the event that it became necessary to increase base loading at your installation, does the **airspace** overlying and adjacent to your installation have the **capacity** to assume an additional workload? Estimate the percentage of the possible increase. Provide the basis/calculations for these estimates.

YES, CANNOT ESTIMATE PERCENTAGE OF INCREASE; DEPENDS ON WHO IS GOING TO BE AN ADDITION.

43.a. Using the types (and mix) of aircraft currently stationed at your installation, project the additional number of these aircraft (maintain approximate current mix/ratio of A/C) that could be based and parked on your **current parking aprons**.

Provide two estimates:

1. Using NAVFAC P-80 standard measures (1557 SF PER AIRCRAFT)
2. Using real world planning factors to accommodate a surge demand for space (maintaining safe operating procedures).

44.a. List the hangars at the air station. Identify by (P-80) type, year built, dimensions.

In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified describe why the facility is inadequate; indicate how it is being used and list other possible uses; and specify the costs to remove the deficiencies that make it inadequate. Indicate current plans to remove these deficiencies and the amount of any programmed funds. Discuss any material conditions of substandard facilities which have resulted in a C3 or C4 designation on your Baserep.

ADDITIONAL SITE TO HANDLE P-3 HOT REFUELING HAS BEEN PROPOSED BUT NOT YET FUNDED. HOT SITE #3 SUPPORTING THE S-3 AIRCRAFT IS LABOR INTENSIVE TO MANAGE AND INTENDED AS A TEMPORARY FACILITY ONLY.

AN INCREASE IN AIRCRAFT ACTIVITY AT THIS TIME SHOWS A NEED FOR ADDITIONAL DIRECT REFUELING CAPABILITY TO HANDLE P-3'S AND LARGE BODY AIRCRAFT. WITH FUTURE REQUIREMENTS UNKNOWN, A STUDY IS NECESSARY TO DETERMINE MOST APPROPRIATE CONFIGURATION TO SUPPORT PLANNED GROWTH.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

Mission Requirements

1. List the types and number of transient aircraft/detachments supported at this air station during FY 93 and describe the training and/or military missions conducted by these aircraft while stationed here. If supporting transient aircraft/detachments is a major mission, attach detailed schedules for the 1st & 2nd quarters FY 94.

Data on FY 93 transient aircraft no longer available. 1st and 2nd quarter FY 94 transients are listed in Table 1.1. The vast majority of our transient aircraft are on training missions including carrier landing qualifications, fleet and air exercises, night vision device, paradrops, fast line envelopments and other special operations, search and rescue, and instrument cross-country flights. North Island is an attractive stopover for transients because of its proximity to both on- and off-shore training areas, and being open 24-hours. Transients on non-training missions to North Island are almost entirely logistics (cargo and/or passengers) flights.

We do not maintain "detailed schedules" for transient aircraft, due to the very large volume of transient traffic.

HH-60H	NAVAIRES - HCS 5 OPERATED 4 HH-60H AIRCRAFT OUT OF NAS NORTH ISLAND FOR APPROXIMATELY 8 DAYS (2 DAYS EACH QUARTER) DURING FY93. THEIR PURPOSE WAS PARTICIPATION IN LOCAL EXERCISES.
MH-53D	NAVAIRES - HM 19 OPERATED 4 MH-53D AIRCRAFT OUT OF NAS NORTH ISLAND FOR APPROXIMATELY 20 DAYS (8 SEPARATE OCCASIONS) DURING FY93. THEY WERE PARTICIPATING IN LOCAL AREA EXERCISES.
C-9B AND DC-9	NAVAIRES - VARIOUS RESERVE VR SQUADRONS FREQUENTLY ROUTE C-9B AND DC-9 AIRCRAFT THROUGH NAS NORTH ISLAND ON LOGISTIC SUPPORT MISSIONS. THEIR TIME ON GROUND VARIES FROM AN HOUR TO NO MORE THAN 1 DAY.

2.a. List the training ranges (including land areas used for tactical or infantry training), outlying airfields, auxiliary airfields and airspace that are actively managed (scheduled or controlled) by the air station.

General Military Support

3.a. Does this air station directly support a military or civilian area control and surveillance mission (i.e., FACSFAC, FAA support)? If so, provide details of your level of support.

A STANDARD TENANT/LANDLORD RELATIONSHIP EXISTS BETWEEN FACSFAC AND NAS NORTH ISLAND. FACSFAC HEADQUARTERS AND ADMINISTRATIVE STAFF ARE LOCATED AT NAS NORTH ISLAND PROPER. FACSFAC OPERATED RANGES AND RADAR SITES ARE LOCATED ON SAN CLEMENTE ISLAND, WHICH IS ADMINISTERED BY NAS NORTH ISLAND. NAS NORTH ISLAND PROVIDES DAILY PERSONNEL AIR LIFT SERVICES TO AND FROM SAN CLEMENTE ISLAND (SCI), AND WEEKLY BARGE SERVICE TO SCI FOR PARTS AND MATERIALS.

3.b. Over the foreseeable future, is this mission requirement expected to decrease, increase, or remain the same?

BASED ON PLANS TO INCORPORATE THE LARGE AREA TRACKING RANGE SYSTEM AND A THREAT AVOIDANCE SITE, INCREASED UTILIZATION OF SCI IS ANTICIPATED. COMMENSURATELY, INCREASED AVAILABILITY FOR TRAINING WOULD DRIVE INCREASED TRAINING FLIGHTS.

3.c. List all other installations (DoD and Non-DoD) that could potentially support this mission. THERE ARE NO OTHER COMMANDS AVAILABLE THAT COULD SUPPORT THE FACSFAC MISSION.

4.a. Describe the role this air station plays in the Logistics Support and Mobilization Plan (LSMP)?

NAS NORTH ISLAND WOULD BE RESPONSIBLE FOR LOAD OUT OF AIRCRAFT CARRIERS AND OTHER SURFACE SHIPS. THE ROLE OF NAS NORTH ISLAND REMAINS BASICALLY THE SAME DURING A CONTINGENCY OR WARTIME OPERATION. NAS NORTH ISLAND WOULD ASSIST IN RAPID DEPLOYMENT AND LOAD OUT OF HOMEPORTED FORCES AND OTHER SURFACE SHIPS AS WELL AS RECEIVE AND SUPPORT INCOMING FORCES, MATERIAL, AND PERSONNEL OPERATING THROUGH NAS NORTH ISLAND COMPLEX AND PROVIDE WEAPONS LOGISTICS SUPPORT.

4.b. Over the foreseeable future, is this mission requirement expected to decrease, increase, or remain the same?

DUE TO THE IMPACT FROM BRAC 93 THE CURRENT MISSION LEVEL IS EXPECTED TO INCREASE IN THE FORESEEABLE FUTURE (I.E., CVN HOMEPORTING, NAVY

NAS North Island UIC 00246 DATACALL #38

BAND)

4.c. List all other installations (DoD and Non-DoD) that could potentially support this mission.

NWS SEAL BEACH COULD PROVIDE WEAPONS LOGISTICS SUPPORT.

5. List any other military support missions currently conducted at/from this air station (i.e., port of embarkation for USMC personnel).

- SPECIAL WARFARE/SEAL TRAINING OPERATIONS (FAST ROPE, SOF DUCK, VBSS, CAST AND RECOVERY)
- EXPLOSIVE ORDNANCE DISPOSAL TRAINING SUPPORT
- NAVAL AVIATION DEPOT
- DEEP SUBMERGENCE RESCUE VEHICLES

6. Are any new military missions planned for this air station?

CHG BY CNAP 9406

As a result of base closures and consolidations, several activities are in the process of relocating to NAS North Island and OLF Imperial Beach. These activities include the VQ-5, Navy Band, San Diego, Navy Recruiting District HQ, Naval Safety School Detachment, Naval Inshore Undersea Warfare Group, Construction Battalion Unit 405, and the PWC Environmental Laboratory & Inspection Group. In addition, NAS North Island is being proposed for the homeporting of 3 CVN's and as the site for a Southern California Controlled Industrial Facility to provide CVN maintenance and support.

14. Is land and/or air encroachment an issue which endangers long term availability of any training areas? If so, provide details.

YES, POSSIBLE AIR ENCROACHMENT AS A RESULT OF THE 1988 EXPANSION OF THE U.S. TERRITORIAL SEA FROM THREE TO 12 NAUTICAL MILES IS OF GRAVE CONCERN TO FACSAC SAN DIEGO. WHEN PRESIDENTIAL PROCLAMATION 5928 (27 DEC 1988) EXTENDED THE U.S. TERRITORIAL SEA FROM THREE TO 12 NAUTICAL MILES, IT DID NOT AUTOMATICALLY EXTEND DOMESTIC AIRSPACE BEYOND THREE NAUTICAL MILES. BY SEPARATE ACTION, THE FEDERAL AVIATION ADMINISTRATION (FAA) EXPANDED APPLICATION OF THE FAA ACT OF 1958 TO EXTEND ITS DOMESTIC AIR TRAFFIC CONTROL AUTHORITY TO INCLUDE THE AIRSPACE BETWEEN THREE AND 12 NAUTICAL MILES FROM THE COAST OF THE UNITED STATES. AT THAT TIME IT WAS GENERALLY UNDERSTOOD THE CHANNEL ISLANDS WERE EXEMPT FROM THE DOMESTIC AIRSPACE EXPANSION. ADDITIONALLY, PRIOR TO THE EXTENSION OF THE DOMESTIC AIRSPACE BOUNDARY, THE EXISTING THREE NAUTICAL MILE LIMIT, FOR AIRSPACE PURPOSES, WAS NOT IN EFFECT AROUND THE CHANNEL ISLANDS. SPECIAL FEDERAL AIR REGULATIONS (SFAR'S) HAVE BEEN ISSUED PERIODICALLY BY THE FAA TO ENSURE CURRENT SPECIAL USE AIRSPACE (SUA) BOUNDARIES ARE MAINTAINED UNTIL FINAL RESOLUTION CAN BE ACHIEVED. SFAR 53 IS SCHEDULED TO EXPIRE 15 JANUARY 1996 AND THE FAA HAS ADVISED THE DOD THAT ADDITIONAL EXTENSIONS ARE UNLIKELY. IF DOMESTIC AIRSPACE BECOMES COINCIDENTAL WITH THE CURRENT U.S. TERRITORIAL SEA BOUNDARIES AROUND SAN CLEMENTE AND SANTA CATALINA ISLANDS, IT WILL RADICALLY CHANGE THE NORTHERN BOUNDARIES OF W-291. THIS CHANGE WOULD REQUIRE FOUR NEW PIECES OF SUA TO BE CREATED, THEREBY EXACERBATING THE ALREADY COMPLEX SCHEDULING PROCEDURES USED IN W-291. FURTHER, THERE IS NO GUARANTEE THE NEW SUA PROPOSALS WOULD GAIN FAA APPROVAL, PARTICULARLY IN LIGHT OF THE REQUIRED ENVIRONMENTAL ASSESSMENT PROCESS. THE MOST DEVASTATING RESULT COULD BE LOSS OF THE ONLY SHORE BOMBARDMENT RANGE IN THE PACIFIC, CAUSING SERIOUS DEGRADATION TO FLEET TRAINING AND READINESS. THESE CONCERNS HAVE BEEN COMMUNICATED, VIA THE CHAIN OF COMMAND, TO CNO (N885).

NAS North Island UIC 00246 DATACALL #38

21.b. For all facilities that were classified as inadequate in the preceding table, identify the type of facility and describe why the facility is inadequate; indicate how the facility is being used and list other possible uses; and specify the costs to remove the deficiencies that make it inadequate (do not be concerned with the economic justification for these costs). Indicate current plans to remove these deficiencies and the amount of any programmed funds. Does the deficiency result in a C3 or C4 designation on your baserep?

NAS North Island UIC 00246 DATACALL #38

Existing facilities classified as inadequate due to facility age, seismic inadequacy, failure to meet current building standards, lack of adequate fire protection and structural deterioration. Alternate uses of these existing inadequate facilities are restricted by the same factors that caused these buildings to initially be classified as inadequate. Estimated costs to rehabilitate/upgrade these facilities to meet current seismic and other building standards is \$6,567,250. Of this, \$1,302,000 is critical maintenance backlog. \$751,000 has been programmed in FY94. These deficiencies have not resulted in C3 or C4 designations in the BASEREP.

22. Describe any administrative support facility limitations. Describe the potential for expansion of the services that administrative support facilities provide.

33.c. Do local weather conditions have a regular impact on maintenance schedules? If so, describe how the air station accommodates these conditions.

LOCAL WEATHER CONDITIONS DO NOT HAVE A REGULAR IMPACT ON MAINTENANCE SCHEDULES.

33.d. Do the normal weather conditions at the most frequently used training areas pose a significant problem for scheduling training sorties? If so, are alternate training areas used? Does the use of alternate training facilities involve relocating aircraft and support personnel to other air stations during certain times of the year?

THE AREA USED MOST OFTEN FOR TRAINING IS NOLF IMPERIAL BEACH FOR THE HELICOPTERS AND THE W-291 SOUTHERN CALIFORNIA OPERATING AREA (SOCAL OPAREA) FOR THE FIXED WINGS. WEATHER IS NOT NORMALLY A FACTOR AND WEATHER CONDITIONS AT NAS NORTH ISLAND DO NOT POSE A SIGNIFICANT PROBLEM FOR SCHEDULING OF SORTIES.

1990	11.2 MILLION ANNUAL PASSENGERS
1995	14.7 MILLION ANNUAL PASSENGERS
2000	16.4 MILLION ANNUAL PASSENGERS

THE DISTRICT DOES NOT EXPECT A REASONABLE RATE OF GROWTH IN THE FUTURE. THE FIGURES ABOVE MAY BE SOMEWHAT HIGH BASED ON RECENT ECONOMIC CONDITIONS, BUT THEY ARE THE BEST AT THIS TIME.

35.a. Have there been any ATC delays (15 minutes or greater) between initial take-off request and actual take-off during the past three years as a result of civilian traffic? If so, please complete the following table.

NAS NORTH ISLAND DOES NOT EXPERIENCE ATC DELAYS AS A RESULT OF CIVILIAN TRAFFIC.

Table 35.1 Delays

Fiscal Year	Average Delay (minutes)	Number of Delays	% of Total Flight Operations Scheduled

1992			
1993			

35.b. How many times during each of the past three years have any of your low level training routes been modified to accommodate development or population growth (noise complaints)?

NAS NORTH ISLAND DOES NOT HAVE LOW LEVEL TRAINING ROUTES.

36.a. Is the existing AICUZ study encoded in local zoning ordinances?

AICUZ IS NOT A PART OF THE CORONADO OR IMPERIAL BEACH ORDINANCES.

36.b. Provide a description of local zoning ordinances and their impact on future encroachment, restricted flight hours and details of any litigation history.

THERE ARE CURRENTLY NO LOCAL ZONING ORDINANCES ON FILE OR IN DISCUSSION THAT MIGHT IMPACT ON FUTURE ENCROACHMENT OR FLIGHT OPERATIONS AT NORTH ISLAND OR IMPERIAL BEACH.

36.c. Do current estimates of population growth and development or environmental constraints pose problems for existing or planned missions/other operations/or development.?

NAS North Island UIC 00246 DATACALL #38

WITH ALL BORDERS OF NORTH ISLAND BEING WATER OR DEVELOPED RESIDENTIAL PROPERTY, GROWTH IS NOT A FORESEEN PROBLEM. NAS NORTH ISLAND HAS AN ONGOING AIRCRAFT NOISE AND TRAFFIC ISSUE WITH A SMALL PORTION OF THE LOCAL COMMUNITY THAT ESCALATES ABOUT EVERY TWO YEARS. THIS HAS THE POSSIBILITY TO BECOME A POLITICAL ISSUE THAT COULD IMPACT OPERATIONS. IMPERIAL BEACH IS BORDERED BY RESIDENTIAL PROPERTY, THE MEXICAN BORDER, A NATIONAL REFUGE AND THE PACIFIC OCEAN. WHILE GROWTH DOES NOT APPEAR TO BE AN ISSUE, ENVIRONMENTAL CONSTRAINTS AS RELATED TO THE WILDLIFE REFUGE ARE POSSIBLE BASED ON CHANGES IN FEDERAL PROTECTION LAWS.

36.d. Provide a summary of the current and proposed land development plans for the area surrounding the air station (e.g. the local government's comprehensive land-use plan).

SEE AICUZ ENCLOSURE 2.

36.e. Discuss briefly any ongoing litigation concerning environmental or airspace problems.

THERE IS NO KNOWN LITIGATION CONCERNING ENVIRONMENTAL OR AIRSPACE PROBLEMS.

SOUTHWESTDIVNAVFACENCOM reports zero litigation concerning environmental or airspace problems.

38.a. Are there any assets in the vicinity of the air station that are currently not used because of a deficiency but could be improved or enhanced to increase the air station's capabilities?

38.b. Does the operational infrastructure (i.e., parking apron, fuel and munitions storage, warehouse space, hangar space) meet current requirements and provide capabilities for future expansion or change in mission?

REVISED 26 SEPTEMBER 1994 PER NAVAL AUDIT SERVICE (SEE NAS NORTH ISLAND SUPPLY DEPARTMENT SQUARE FOOTAGE REVISION)

YES, WITH SOME EXCEPTIONS, FACILITIES GENERALLY MEET CURRENT REQUIREMENTS. BUT, WITHOUT A MAJOR TENANT VACATING ITS SPACES, NAS NORTH ISLAND CANNOT EXPAND TO ANY MEANINGFUL DEGREE. CURRENT WEAPONS, HANGAR, AND WAREHOUSE FACILITIES ARE SATURATED.

SWATS - SWATS' FACILITIES MEET CURRENT AND EXPECTED NEEDS.

FACSFAC - ANTIQUATED EQUIPMENT PREVENTS USE OF THE THREAT AVOIDANCE SITE AT SAN CLEMENTE ISLAND. THERE ARE INSUFFICIENT FUNDS PRESENTLY AVAILABLE TO REPAIR AND BRING THIS TRAINING TOOL ON-LINE. ROAD REPAIR IS AN ONGOING ISSUE AT SAN CLEMENTE ISLAND. EXISTING ROADS BECOME IMPASSABLE SEVERAL TIMES PER YEAR. WHEN THIS OCCURS, REMOTE SITES WHICH CONTROL FACSFAC TRAINING SITES ARE UNACCESSIBLE AND THUS INOPERABLE.

VRC 30 - OPERATIONAL INFRASTRUCTURE CURRENTLY MEETS OUR REQUIREMENTS, BUT IN THE NEAR FUTURE THE SQUADRON NUMBER OF AIRCRAFT WILL INCREASE FROM 6 TO 17. VRC-30 IS CURRENTLY HANGARED AT BLDG 525 WHICH SHARES WITH VR-57. ONCE THIS OCCURS, OPERATIONAL INFRASTRUCTURE WILL BE OVER TASKED WITH NO CHANCE OF EXPANSION.

TYPEWINGS:

- ALL CURRENT REQUIREMENTS ARE BEING MET AND FUTURE EXPANSION WOULD BE EXTREMELY LIMITED DUE TO A LACK OF AVAILABLE SPACE.
- CURRENT HANGAR SPACE AND AIRCRAFT PARKING APRONS ARE ADEQUATE AND PROVIDE ROOM FOR ADDITIONAL AIRCRAFT IF NECESSARY.
- EXPANSION INVOLVING ADDITIONAL HELICOPTER UNITS IS LIMITED BY THE CAPACITY OF OLF IMPERIAL BEACH TO SUPPORT ADDITIONAL TRAINING OPERATIONS.

NAS NORTH ISLAND - CURRENTLY THE OPERATIONAL INFRASTRUCTURE MEETS CURRENT REQUIREMENTS. FUTURE EXPANSION WOULD REQUIRE ADDITIONAL HANGARS, AND UPGRADING OF PARKING SURFACES.

NAS NORTH ISLAND WEAPONS DEPARTMENT - CURRENTLY MEETING INCREASING REQUIREMENTS. INCREASED CAPABILITIES FOR FUTURE EXPANSION WOULD REQUIRE MILCON TO BUILD MORE MAGAZINES AND WOULD REQUIRE ADDITIONAL MANPOWER.

NAS NORTH ISLAND SUPPLY DEPARTMENT:

- DUE TO AGE OF FACILITIES, FUEL FARMS AT BOTH NAS NORTH ISLAND AND NALF SAN CLEMENTE ISLAND CANNOT CURRENTLY MEET FUTURE ENVIRONMENTAL WAREHOUSE REGULATIONS. STATE AND FEDERAL REGULATIONS PLANNED FOR 1997 REQUIRE MODERNIZATION OF FUEL FACILITIES FOR ENVIRONMENTAL PURPOSES. ADDITIONAL EXPANSION OF STATION OPERATIONS WOULD REQUIRE ADDITIONAL FUELING CAPACITY. THIS APPLIES TO BOTH NAS NORTH ISLAND AND NALF SAN CLEMENTE ISLAND.

NAS NORTH ISLAND MANAGES 185 PACK-UP KITS FOR 6 DIFFERENT AIRCRAFT T/M/S. THERE ARE CURRENTLY 67 BASIC AND 24 OUT-OF-AREA KITS IN-HOUSE. 40. Does the local area provide a skilled work force that is essential for air station operations? Are these skills unique to the area or readily duplicated or available elsewhere?

THE LOCAL AREA PROVIDES A SKILLED WORK FORCE; LOCAL AREA INCLUDES NOT ONLY THE FEDERAL GOVERNMENT, BUT THE PRIVATE SECTOR AS WELL. SKILLS ESSENTIAL FOR AIR STATION OPERATIONS ARE USUALLY NOT UNIQUE AND ARE READILY DUPLICATED AND/OR AVAILABLE ELSEWHERE.

THIS IS ESPECIALLY TRUE WITH THE CURRENT ENVIRONMENT OF BRAC CLOSURES AND REALIGNMENTS, AS WELL AS OTHER BUSINESS/BUDGET-BASED DECISIONS, BOTH IN THE PUBLIC AND PRIVATE SECTORS.

ONE SIGNIFICANT EXAMPLE OF THIS ENVIRONMENT IS THE CLOSURE OF THE NAVAL AVIATION DEPOT, ALAMEDA, WHERE SEVERAL THOUSAND INDIVIDUALS IN A MULTITUDE OF OCCUPATIONS ARE FACING JOB LOSS. THOSE EMPLOYEES WILL FILL POSITIONS AT A WIDE VARIETY OF MILITARY BASES IN THE U.S. (INCLUDING NAVAL AIR STATION, NORTH ISLAND) AS A RESULT OF MANDATORY GOVERNMENT-WIDE PLACEMENT SYSTEMS.

AT THE SAME TIME, THE PRIVATE SECTOR IS ALSO UNDERGOING

41a.(5) What do you consider to be the top five factors driving the demand for base housing? Does it vary by grade category? If so provide details.

Top Five Factors Driving the Demand for Base Housing	
1	<p>COST - SAN DIEGO IS ONE OF THE MOST EXPENSIVE AREAS WITHIN THE UNITED STATES IN WHICH TO LIVE. AVERAGE MONTHLY RENTAL RATES EXCEED MAXIMUM ALLOWABLE HOUSING COST (MAHC) FOR MOST MILITARY PAY GRADES. GENERALLY, E1-E6 PERSONNEL CAN ONLY AFFORD TO RENT HOMES IN HIGH CRIME NEIGHBORHOODS. E1-E3 PERSONNEL CAN AFFORD ONLY ONE BEDROOM HOMES. E4-E6 PERSONNEL CAN AFFORD TWO BEDROOM HOMES. FOUR BEDROOM HOMES ARE OUT OF REACH FOR ALL BUT O4 AND ABOVE PERSONNEL. A DECEMBER 1992 MARKET ANALYSIS INDICATES THIS PROBLEM WILL WORSEN WITHIN THE NEXT FIVE YEARS. THE AVERAGE PRICE OF A SINGLE FAMILY HOME IN 1993 WAS \$219,609 - WELL BEYOND THE MEANS OF MOST MILITARY FAMILIES.</p>
2	<p>SECURITY - DUE TO THE HIGH COST OF HOUSING IN SAN DIEGO, MANY FAMILIES ARE FORCED TO LIVE IN HIGH CRIME AREAS. GANG ACTIVITY AND OTHER TYPES OF CRIME COMMON TO MAJOR METROPOLITAN AREAS ARE PREVALENT WITHIN THE REGION. SECURITY IS A PRIMARY CONCERN OF SERVICE MEMBERS WHOSE FAMILIES MUST FEND FOR THEMSELVES DURING DEPLOYMENTS.</p>
3	<p>PROXIMITY TO WORK/LOCATION - MILITARY FAMILY HOUSING SITES ARE LOCATED WITHIN MINUTES OF ALL ELEVEN MAJOR MILITARY INSTALLATIONS IN THE SAN DIEGO AREA. MANY SERVICE MEMBERS PREFER TO RESIDE CLOSE TO WORK TO LIMIT COMMUTE TIME, SAVE MONEY, AND FACILITATE RAPID RECALL. MOST HOUSING SITES ARE LOCATED CLOSE TO SUPPORT FACILITIES SUCH AS FAMILY SERVICE CENTERS, COMMISSARY AND EXCHANGE FACILITIES. SOME SITES ARE PARTICULARLY DESIRABLE DUE TO THEIR LOCATION. THE HOUSING SITES ON CORONADO, FOR EXAMPLE, HAVE THE LONGEST WAITING LISTS DUE TO THE QUIET ATMOSPHERE AND OUTSTANDING SCHOOLS LOCATED THERE.</p>
4	<p>COMMUNITY SUPPORT - MANY SERVICE MEMBERS AND THEIR DEPENDENTS CITE THE STRONG BOND AND SUPPORT THEY RECEIVE FROM MILITARY NEIGHBORS AS A PRIMARY REASON FOR APPLYING FOR FAMILY HOUSING. THIS IS ESPECIALLY IMPORTANT TO FAMILIES WITH SPONSORS ATTACHED TO AFLOAT COMMANDS.</p>

5	<p>QUALITY OF FACILITIES - SAN DIEGO OFFERS MANY DIFFERENT TYPES OF HOMES. AGE, STYLE, AMENITIES, LOCATION VARIES FROM ONE SITE TO ANOTHER. SINGLE FAMILY, DUPLEX, TOWNHOMES AND APARTMENT STYLE HOMES ARE AVAILABLE. MANY NEW SITES HAVE BEEN ACQUIRED THROUGH THE "DIRECT PURCHASE PROGRAM". THE PROGRAM ENABLES THE GOVERNMENT TO PURCHASE ENTIRE COMMUNITIES FROM DEVELOPERS. THESE MILITARY HOUSING COMMUNITIES BLEND IN WITH OTHER CIVILIAN HOMES AS THEY WERE CONSTRUCTED TO BE RENTAL OR SALES PROPERTIES.</p>
---	---

WHILE THE TOP FIVE FACTORS APPLY TO ALL GRADE CATEGORIES, THEY DO VARY IN ORDER OF IMPORTANCE DEPENDING UPON THE GRADE. SENIOR OFFICERS ARE MORE LIKELY TO CHOOSE FAMILY HOUSING DUE TO PROXIMITY TO WORK/LOCATION OR COMMUNITY SUPPORT. COST AND SECURITY ARE THE PRIMARY CONCERNS OF ENLISTED PERSONNEL.

- a. That the monthly payment would include mortgage, taxes and homeowners fees.**
- b. That an E5 would not be able to afford a large down payment.**
- c. That a purchase cost range of \$55,000 to \$73,000 would be appropriate to include varying interest rates and minimal down payment.**

48.e. Describe the principle housing cost drivers in your local area.

(COST DRIVERS BELOW WERE IDENTIFIED IN A DECEMBER 1992 MARKET ANALYSIS PREPARED BY ROBERT D. NEIHAUS, INC.)

HOUSING COST IS CLOSELY CORRELATED WITH LOCATION, AMOUNT OF LAND AND NUMBER OF BEDROOMS. SOUTHERN CALIFORNIA COASTAL REGIONS ARE AMONG THE MOST COSTLY IN CONUS. TEMPERATURES IN BOTH THE SUMMER AND WINTER ARE MODERATED BY NEARBY WATERS OF THE PACIFIC OCEAN. AVERAGE DAILY MAXIMUM TEMPERATURES ARE APPROXIMATELY 65 DEGREES FAHRENHEIT DURING THE WINTER AND 75 DEGREES FAHRENHEIT DURING THE SUMMER. TEMPERATURES BELOW FREEZING RARELY OCCUR. ANNUAL RAINFALL AVERAGES APPROXIMATELY NINE INCHES. ALTHOUGH MOST HOUSEHOLDS ARE LIKELY TO PREFER HOUSING CLOSE TO THE AMENITIES ASSOCIATED WITH COASTAL COMMUNITIES, THE COST OF HOUSING IN THESE COMMUNITIES IS GENERALLY HIGHER THAN LOCATIONS FURTHER INLAND.

NAS North Island UIC 00246 DATACALL #38

A WELL-DEVELOPED REGIONAL ROAD TRANSPORTATION SYSTEM OF INTERSTATE, STATE AND COUNTY HIGHWAYS SERVES THE AREA, AS DOES A SYSTEM OF CAUSEWAYS LINKING THE MAINLAND WITH CORONADO AND NORTH ISLAND. AIR SERVICE IS AVAILABLE AT SAN DIEGO INTERNATIONAL AIRPORT (LINDBERGH FIELD), MONTGOMERY FIELD, AND RAMONA AIRPORT. PASSENGER AND FREIGHT RAIL SERVICE ARE PROVIDED BY AMTRAK AND THE SANTA FE RAILROAD, RESPECTIVELY. BUS AND TROLLEY SERVICES ARE AVAILABLE WITHIN THE AREA FOR LOCAL TRANSPORTATION.

SAN DIEGO HAS A DIVERSIFIED ECONOMIC BASE CHARACTERIZED BY SEVERAL KEY ELEMENTS:

- A WIDE RANGE OF MANUFACTURING AND SERVICE ACTIVITIES;
- A LARGE MILITARY PRESENCE;
- AN ACTIVE TOURISM SECTOR;
- AN EDUCATIONAL COMPLEX CONSISTING OF CAMPUSES OF BOTH THE UNIVERSITY OF CALIFORNIA AND CALIFORNIA STATE UNIVERSITY SYSTEMS AS WELL AS FIVE OTHER PRIVATE UNIVERSITIES AND COLLEGES; AND
- A GROWING RESEARCH AND DEVELOPMENT SECTOR SPECIALIZING IN HEALTH CARE SERVICES.

LOCAL FORECASTS OF POPULATION GROWTH INDICATE EXPECTED INCREASES THROUGH 1996 AVERAGING 2.1 PERCENT ANNUALLY. BOTH THE JOB AND POPULATION PROJECTIONS REFLECT A REDUCTION IN EXPECTED GROWTH COMPARED TO THE RAPID RATES OF THE PAST TWO DECADES.

THE MAJOR INDUSTRY SECTIONS IN THE COUNTY ARE THE SERVICES SECTOR, THE WHOLESALE AND RETAIL TRADE SECTORS AND THE CIVILIAN GOVERNMENT. A MILD RECOVERY IS PROJECTED FOR THE COUNTY WITH EMPLOYMENT INCREASING SLOWLY.

Location	% Employees	Distance (mi)	Time(min)

PARADISE HILLS, SAN DIEGO, CA	4	12	25

THE ABOVE CHART PROVIDES THE AVERAGE ONE-WAY COMMUTE FOR THE FIVE LARGEST CONCENTRATIONS OF MILITARY AND CIVILIAN PERSONNEL LIVING OFF-BASE. THESE FIGURES WERE OBTAINED THROUGH A SURVEY CONDUCTED AT NAS NORTH ISLAND AND COMPILED BY COMMUTER COMPUTER ORGANIZATION. THE LENGTH OF COMMUTE TIME WAS PREDICATED UPON ANY FREEWAY ACCESS IN AND OUT OF EACH AREA AND ONLY CONSIDERED NORMAL TRAFFIC FLOW.

52. Spousal Employment Opportunities

Provide the following data on spousal employment opportunities.

CHG BY CNAP 9406

Skill Level	Number of Military Spouses Serviced by Family Service Center Spouse Employment Assistance			Local Community Unemployment Rate
	1991	1992	1993	
Professional		40	13	***
Manufacturing		0	0	
Clerical		70	110	
Service		50	38	
Other		5	9	

NOTE - LOCAL UNEMPLOYMENT RATE:

- 1991 - 6.1%
- 1992 - 7.4%
- 1993 - 7.8%

***** The "Local Community Employment Rate" is a figure provided by the State of California, Employment Development Department (EDD), Labor Market Information Division. The unemployment rate county-wide currently stands at 6.9%. The figure is derived from a combination of a household survey and unemployment insurance claims.**

However, there is no breakdown from the unemployment claims data nor are surveyed individuals asked the type of work they are trained for nor the type of work they are seeking. Therefore, the local community employment rate for professional, manufacturing, clerical, service, other categories is unavailable, per local EDD, Labor Market Information Division.

53. Do your active duty personnel have any difficulty with access to medical or dental care, in either the military or civilian health care system? Develop the why of your response.

MEDICAL - ACTIVE DUTY PERSONNEL DO HAVE DIFFICULTY OBTAINING PRIMARY CARE DUE TO FACILITY LIMITATIONS AND STAFFING. ACTIVE DUTY DO NOT HAVE DIRECT ACCESS TO THE CIVILIAN HEALTH CARE SYSTEM AND MUST SEEK CARE WITHIN THE MHSS. ALTHOUGH ACCESS VARIES FROM SETTING TO SETTING, THERE ARE CONSTRAINTS ON ACCESS TO VARIOUS LEVELS OF CARE WITH LONG WAITING TIMES FOR SPECIALTY APPOINTMENTS (E.G., ORTHOPEDICS) AND LIMITED AVAILABILITY OF SOME VERY SPECIALIZED SERVICES/TREATMENTS (E.G., MENTAL HEALTH)

ACTIVE DUTY PERSONNEL ARE REQUIRED TO USE THE MHSS, WHICH IS LIMITED IN ITS ABILITY TO SERVE THE PATIENTS IN A TIMELY FASHION. THIS MEDICAL CENTER IS A TERTIARY REFERRAL CENTER AND OPERATES GME PROGRAMS WHICH, IN ORDER TO REMAIN VIABLE (IN TERMS OF ACCREDITATION), MUST TREAT A WIDE RANGE OF DISORDERS (AND AGE GROUPS) NOT AVAILABLE IN THE YOUNGER AND PHYSICALLY HEALTHIER ACTIVE DUTY POPULATION. THE CASE SELECTION NECESSARY TO ACHIEVE THE PROPER CASE-MIX OFTEN LEADS TO SITUATIONS IN WHICH NON-ACTIVE-DUTY PATIENTS MUST BE ACCEPTED PREFERENTIALLY, RESULTING IN LIMITATIONS OF THE AVAILABILITY OF SPECIALTY CARE APPOINTMENTS FOR ACTIVE DUTY MEMBERS. NON-ACTIVE-DUTY BENEFICIARIES MAY ACCESS LOCAL CIVILIAN CARE UNDER CHAMPUS (TRICARE); HOWEVER, ACTIVE DUTY MEMBERS MUST OFTEN TRAVEL CONSIDERABLE DISTANCES TO THE NEAREST TERTIARY CENTER AND WAIT FOR AN APPOINTMENT AVAILABILITY.

THE NMCS D WAS ORIGINALLY DESIGNED IN THE 1970'S FOR INPATIENT STAYS. MEDICAL OFFICER EXAMINATION ROOMS WERE NOT CONFIGURED FOR OUTPATIENT CARE. OUTPATIENT SERVICES WERE TO BE PERFORMED IN BRANCH MEDICAL CENTERS WHICH HAVE LIMITED SPACE AND PERSONNEL. IDEALLY, THE MEDICAL OFFICER SHOULD HAVE TWO TREATMENT ROOMS AND ONE MEDICAL OFFICE TO MAXIMIZE EFFICIENCY OF PATIENT CARE DELIVERY.

NAS North Island UIC 00246 DATACALL #38

DENTAL: A SURVEY WAS CONDUCTED IN APRIL 1994. 103 SURVEYS WERE COLLECTED AND THE RESULTS WERE AS FOLLOWS:

--84% OF 103 RESPONDENTS SURVEYED SAID "IT WAS EASY TO GET AN APPOINTMENT AT THE CLINIC."

--83% OF 103 RESPONDENTS STATED THAT THEY WERE ABLE TO SCHEDULE A REQUIRED FOLLOW-UP APPOINTMENT.

--BASED ON ABOVE STATISTICS AS WELL AS INPUT FROM FLEET AND SHORE LIAISON OFFICERS, THERE IS NO DIFFICULTY IN ACCESS TO DENTAL CARE ABOARD NDC SAN DIEGO.

54. Do your military dependents have any difficulty with access to medical or dental care, in either the military or civilian health care system? Develop the why of your response.

MEDICAL: MILITARY DEPENDENTS HAVE DIFFICULTY ACCESSING THE MHSS (ESPECIALLY TO THE SEVERELY LIMITED DENTAL CARE AND PRIMARY CARE) BECAUSE THE MHSS IS INADEQUATELY SIZED TO SUPPORT THE NUMBERS OF BENEFICIARIES REQUIRING HEALTH CARE SERVICES. HOWEVER, DEPENDENTS MAY ACCESS THE CIVILIAN HEALTH CARE SYSTEM UNDER CHAMPUS (TRICARE) WITH RELATIVE EASE, ALTHOUGH THE CO-PAY HAS IN THE PAST BEEN A DETERRANT TO SOME BENEFICIARIES.

DENTAL: APPROXIMATELY 97% OF PATIENTS ACCESSING DENTAL CLINIC ARE ACTIVE DUTY MEMBERS.

--FAMILY MEMBERS ARE UTILIZING "DEPENDENTS DENTAL CARE PLAN" (DDP) WITHOUT DIFFICULTY IN MAJORITY OF CASES.

--FAMILY MEMBERS NOT USING DDP ARE ABLE TO ACCESS MILITARY DENTAL CARE ON A HUMANITARIAN BASIS FOR RELIEF OF PAIN.

ENCLOSURE (1)

North Island NAS

(NAVFIL/FIL 93-13)

1. **GENERAL POLICY** - NAS North Island is located in a densely populated area which is extremely noise sensitive. Strict compliance with Noise Abatement and ATC procedures is mandatory. Flight course rules violations will be processed per OPNAVINST 3710.7.

a. PPR - Required for all aircraft not on an approved flight advisory, DSN 735-8233 C619-545-8233.

b. **HEAVY AIRCRAFT RESTRICTIONS** - Land Rwy 36 (TACAN, ASR, PAR, or Visual) or Rwy 18 (ILS-A or LOC-A).

c. **AV-8 HARRIER RESTRICTIONS** - Rwy 36 is primary landing runway. Landing Rwy 29 not authorized. If rolling vertical or slow landing not possible, vertical landing will be executed to approach end of rwy 36.

2. **NOISE ABATEMENT** - Strict compliance with following noise abatement procedures required by all transient aircraft unless controller instructions or safety of flight dictate otherwise. Use appropriate aircraft configuration, power settings and airspeeds for low noise profiles.

a. Practice approach not authorized.

b. **FULL STOP LANDING ONLY.**

c. Section approach not authorized.

d. Expect visual approach (Wind/Weather permitting).

e. Do not overfly the following communities below 2500' MSL:

(1) City of Coronado - East of airport

(2) Point Loma - Land mass West of airport

(3) Coronado Cays - 6.5 DME SE of airport on the coast.

(4) High-rise apartments and Hotel Del Coronado - 2.3 to 3 DME on Rwy 29 final approach, except during instrument approach.

3. **RUNWAY USE PROGRAM** - The following Runway Use Program is in effect for Noise Abatement (Wind/Weather permitting).

a. Land Rwy 29 - Depart Rwy 18

(1) 0700-2200L Monday-Thursday

(2) 0700-1800L Friday

(3) 1200-1600L Saturday

b. Land Rwy 36 - Depart Rwy 18 all other times, except when weather below basic VFR minima.

4. **ARRIVAL RUNWAY 18** - Transient aircraft expect ILS-A or LOC-A instrument approach.

5. **ARRIVAL RUNWAY 29.**

a. Visual entry and landing for all aircraft as follows:

(1) Interception of extended Rwy 29 centerline North of NZY TACAN R-125 not authorized until inside 2.5 DME.

(2) Arrival from East - Cross Silver Strand Beach beyond NZY 4 DME and remain SW of NZY TACAN R-125 until inside 2.5 DME.

(3) Arrivals from West - Remain SW of NZY TACAN R-125 until inside 2.5 DME. CAUTION: Departing traffic climbing south on NZY TACAN R-175 within 7 DME.

b. Rwy 29 ASR/PAR approach:

(1) When weather is 600-2 or better, Rwy 29 ASR/PAR final approach course is OFFSET 8 degrees clockwise. At one mile from runway/touch down (approx. NZY TACAN 2 DME) pilot proceeds visually.

6. **ARRIVAL RUNWAY 36.**

a. Straight-in approaches only for transient aircraft.

b. Straight-in approach preferred procedure for local aircraft and "break" only authorized when Tower sequencing required for runway separation.

c. Expect up to 30-minute delay for instrument approach due sequencing with San Diego International Airport arrivals and departures.

7. **ENGINE TURN-UP RESTRICTIONS** - Transient flight crew and/or maintenance personnel shall coordinate with North Island ODO, Bldg 516 next to transient line, prior to commencing any engine maintenance turn-ups. High performance turn-ups are not authorized under any circumstances on parking aprons. Pre-departure turn-ups immediately prior to takeoff are included from limitations; however, they must be accomplished in designated areas and prudence must be exercised to avoid excessive turn-up time.

MESSAGE TRAFFIC - All message traffic to NAS North Island and pertaining to flight operations shall be directed to "NAS NORTH ISLAND CA/30//". Request to use NAS North Island as a GO field for carrier operations requires 7 days prior notice.

AIR TERMINAL - Operates H24. All passengers (except infants) are required to enplane/deplane at the Air Terminal. Loading of large passenger aircraft will be accomplished after all passengers/baggage have been off-loaded.

TRANSIENT SERVICE - Ground transportation and billeting extremely limited. Prior coordination required. Contact the Operations Duty Officer DSN 735-8233 C619-545-8233 for billeting and transportation information.

III. BACKGROUND

A. Location

1. NAS North Island

NAS North Island is located directly northwest of the City of Coronado, approximately two miles west of the City of San Diego and two miles southwest of San Diego International Airport (Lindbergh Field). NAS North Island is situated on a flat peninsula bounded by San Diego Bay on the north and west and the Pacific Ocean to the south. The air station ranges in elevation from 0 to 33 feet and has an average elevation of 24 feet above Mean Sea Level (MSL). Figure III-1 is an aerial photograph of the air station and its immediate surroundings.

2. Point Loma

Directly west of NAS North Island, across the entrance of San Diego Bay, lies the Point Loma peninsula. Point Loma forms a barrier which, under conditions of low ceilings and/or low visibility, constitutes a definite hazard to aircraft operations. During periods of fog, Point Loma often has a beneficial effect on ceilings at North Island. Frequently, the coastal area to the west and north of the point will be below aviation minimum visibility requirements in fog, while NAS North Island will remain on Instrument or even Visual Flight Rules. The Point Loma peninsula is a significant topographic feature which directly affects aircraft flight operations at the air station. This peninsula is an area of unique topography, with slopes often greater than 50 percent and a maximum elevation of 497 feet. The average elevation ranges between 340 and 360 feet above Mean Sea Level.

B. Population in the Vicinity

San Diego County has been an area of rapid population growth over the last forty years. In 1940, the County had a population of 289,348. By 1980, the total population had increased by a factor of six to 1,861,846 persons. By the year 2,000, the County is projected to have over 2,699,200 residents. Figure III-2 describes the historical and projected population growth for San Diego County and the Incorporated cities of San Diego and Coronado from 1950 through the year 1990.

The City of San Diego has closely paralleled the growth experienced by the county. In 1940, the City had a population of 202,341. By 1980, it had increased by a factor of four to 875,504. Since 1970, San Diego's growth rate has been decreasing with respect to that of the County. This trend is expected to continue as more of the County's growth occurs outside the City of San Diego. However, the actual numbers of people added per decade will remain large. By the year 2000, the City will receive approximately 265,000 new residents.

The City's community planning areas surrounding NAS North Island are expected to capture 8,636 new residents by the year 2000. This represents less than one-half of one percent of the total City's growth between 1980 and the year 2000. Table III-1 summarizes the population projections of the San Diego City Planning Department and the Coronado City Planning Department. The locations of the respective planning areas are illustrated in Figure III-3.

The population of the City of Coronado has more than doubled in the last 35 years. Estimates in 1940 placed the population of Coronado at 6,932 persons, while most recent estimates indicate approximately 19,000 persons reside within the city limits. An additional 4,300 persons are expected to move into Coronado by the year 2000, with most new growth expected to occur in the northeastern portion of the City.

STATISTICAL AREAS, CITY OF CORONADO
AND CITY OF SAN DIEGO

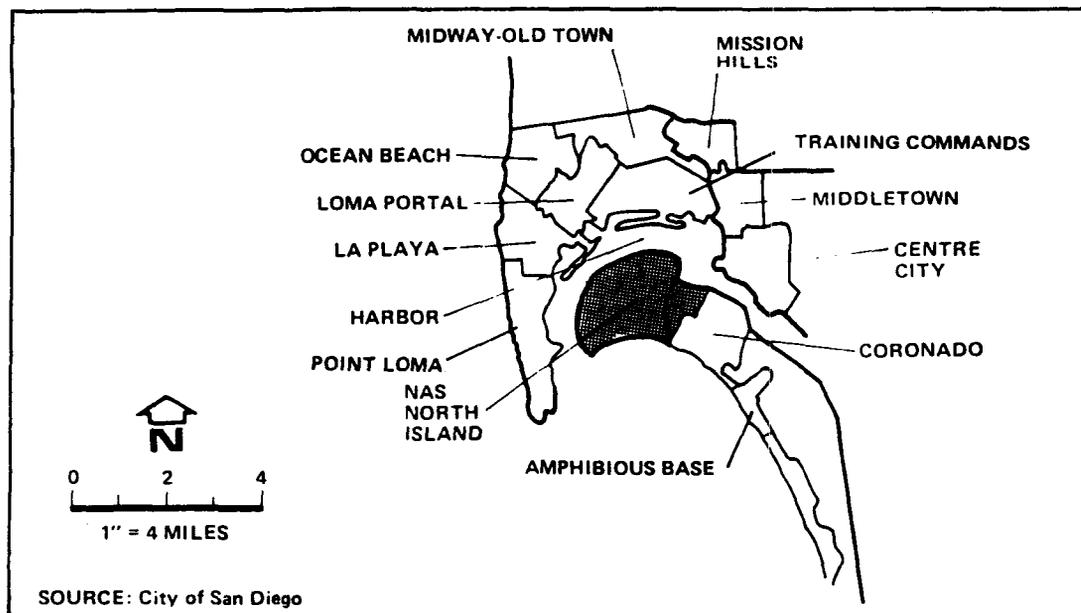

Figure III-4 illustrates the existing land use patterns in the vicinity of NAS North Island. Of most concern for AICUZ purposes are residential areas. Since most of the traffic patterns (and noise and safety considerations) occur over water, there is no significant conflict, except in the Coronado area. In general, the older areas of the city are in single-family residential, relatively low density use. The newer developments consist of multiple-family residential, medium and high density use. In order to highlight all of the higher density areas, they are shown by a single solid black symbol. Figure III-5 shows the current zoning in the base vicinity and the few changes in zoning that have occurred since the previous study. Tables III-2 and III-3 are abstracts of the City of San Diego and City of Coronado zoning ordinances (updated to 1982).

E. Proposed Land Use

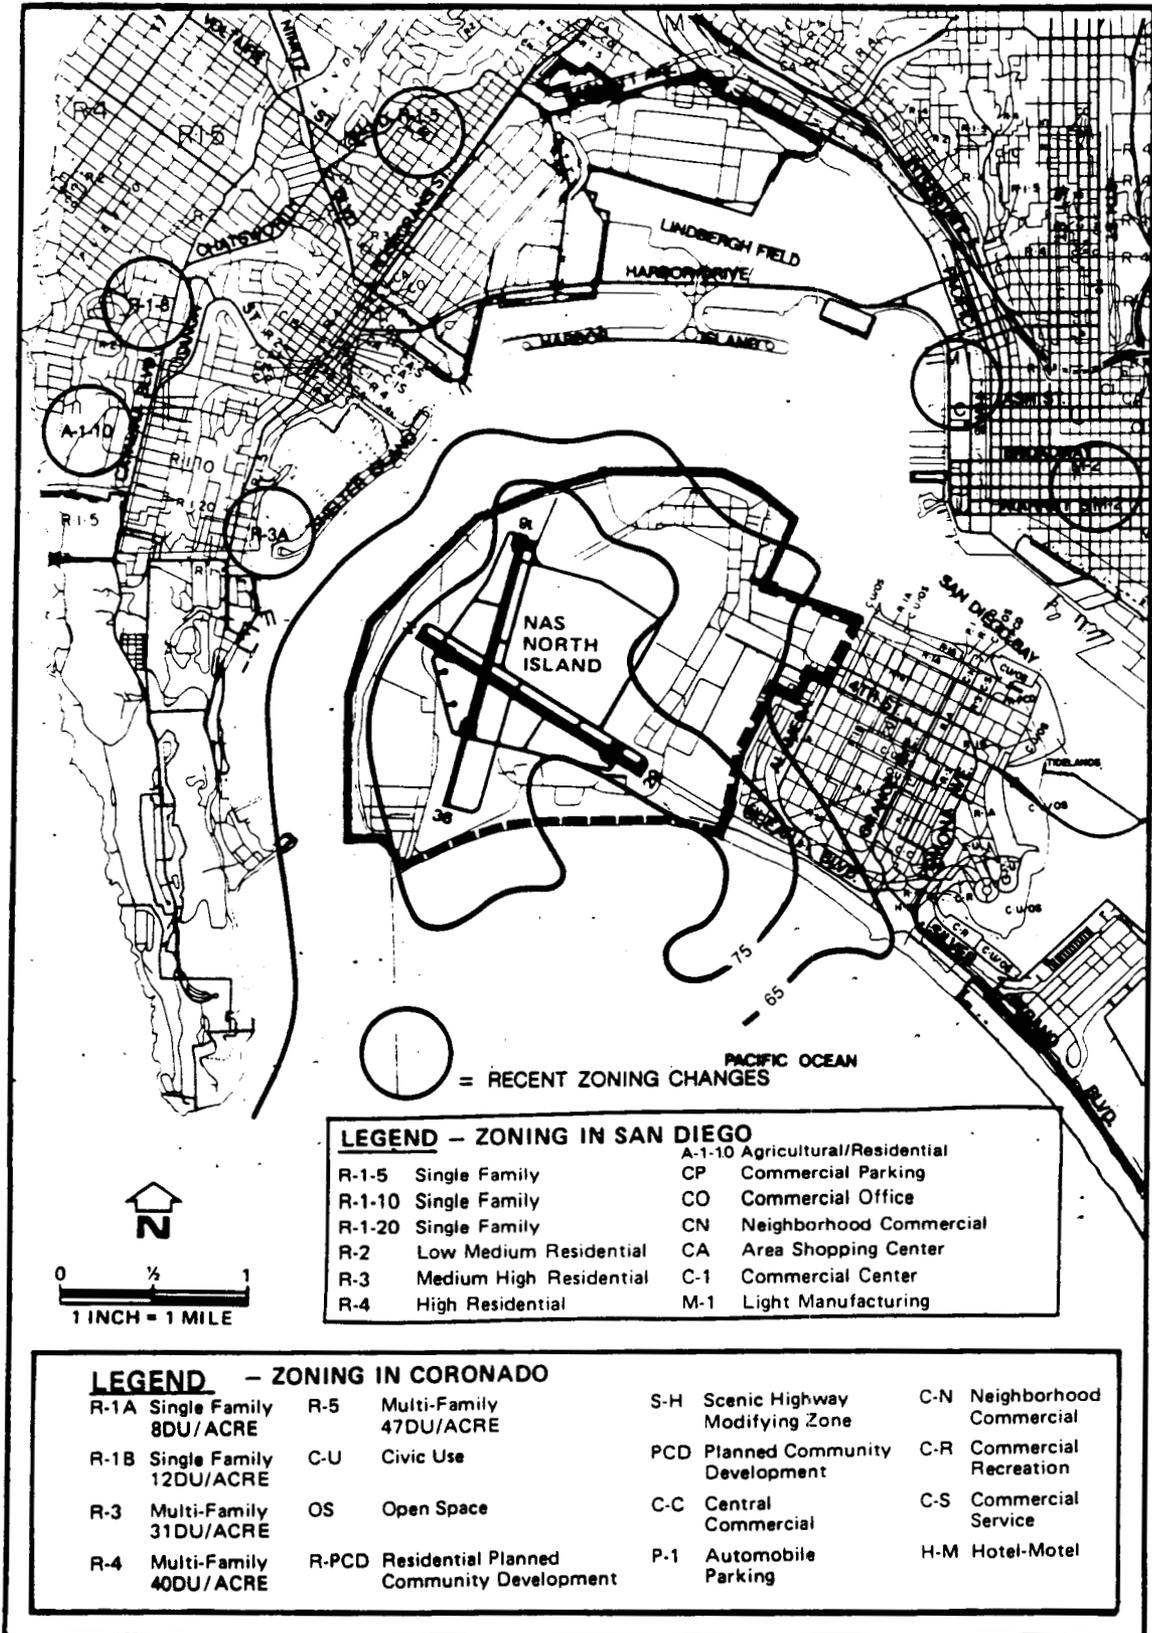

A closer examination of the development plans for both Coronado and San Diego provides a perspective of the relationship between potential community growth and noise policies.

1. Coronado General Plan

The Coronado General Plan establishes long-range land use policies and objectives for the City. Since Coronado is adjacent to NAS North Island and experiences noise from both flying aircraft and ground operation sources, its policies are particularly significant in relation to land use compatibility.

The plan has estimated future growth and initiated policies and land use controls to direct development to areas suitable to particular kinds of land uses. Growth has, in part, been a result of the area's improved access due to the completion of the Coronado-San Diego Bay Bridge.

land uses envisioned are retail, service, office, hotel, and residential.

The major objectives of the 1982 redevelopment plan are to stimulate growth in the Centre City by expanding downtown residential opportunities, promoting general business growth, and redirecting urban development from the perimeter of San Diego into the core area where community facilities and services presently exist. The plan constitutes a pivotal step in the effort to redevelop the downtown into a viable central area.

3. City of San Diego, Peninsula Community Plan

The Peninsula community is located on the western edge of the City of San Diego. It contains the neighborhoods of Point Loma, Loma Portal, Roseville, La Playa and Shelter Island. The community is bounded by the Pacific Ocean and Ocean Beach area on the west, the Midway community and the San Diego River Channel on the north, the Naval Training Center, Port District tidelands and San Diego Bay on the east, and the Point Loma Naval Complex on the south. The plan constitutes a cooperative effort between the City of San Diego Planning Department, the California Coastal Commission, and a citizens committee known as Peninsulans, Inc.

The main goal of the plan is to preserve the area's existing low-density residential character. It is, however, envisioned that some future residential development will take place in the form of higher density, multi-family units. These will generally be located in the northern and northwestern sectors of the Peninsula, within the West Point Loma/Voltaire neighborhoods. In addition, a segment of the La Playa area, adjacent to the bay and the Point Loma military reservation, is proposed for high-density development.

Commercial developments in the Roseville neighborhood attract business from a broad market area. Because of this area's success, the plan has recommended an expansion of commercial activity in order to better capitalize on the market area.

recommended along the shoreline to provide for continuous pedestrian access. Other recommendations include the continued development of the "G" Street Mole as a major facility for the Embarcadero's commercial fishing industry and to support the already proposed Fifth Avenue Marina.

The Coronado Planning District includes a total area of 162 acres of tidelands and 103 acres of submerged tidelands. Long-term use commitments, such as the golf course, absorb a significant portion of the area. The remaining area consists of 52.76 acres of tidelands and 37.62 acres of submerged tidelands. An agreement has been reached with the City of Coronado which provides the basis for a plan that divides the 52.76-acre area into equal allocations for commercial development, park, and recreational uses. Redevelopment proposals encourage the expansion of marine sale and service activities in the Orange Avenue area. The Second Street shoreline is under consideration for a major convention center. Such a concept may include a 300-unit hotel, a restaurant, shops, personal services, and entertainment facilities. In addition, a tidelands park is planned for a 22-acre site north of the Bay Bridge Toll Plaza.

F. Economic Aspects

1. Economy of the Area

The economy of San Diego County is dependent on manufacturing, the military, tourism and agriculture, in rank order of contribution. These are considered "basic industries" which bring new money into the county. These monies are then spent for goods, services, and taxes, thus generating thousands of jobs for San Diego residents.

Manufacturing is the major basic activity of considerable impact to the economy of San Diego County. In 1981, 106,300 persons were engaged in some form of manufacturing activity. The manufacture of electrical (electronic) machinery is the prime manufacturing activity in the county. In 1980, it displaced aircraft manufacturing as the primary

31.b For each Stowage facility identified in question 31.a above, identify the type of facility (specify if "igloo", "box", etc.). Identify the type of ordnance commodity (from the list above) which are currently stowed in that facility and all other ordnance types which, given existing restrictions, could be physically accommodated in that stowage facility. Specify below if such additional accommodation would require a modification of the facility (e.g. enhanced environmental controls, ESQD waiver).

Identify the reason(s) for which this ordnance is stored at your facility from the following list: own activity use (training); own activity use (operational stock); Receipt/Segregation/ Stowage/Issue (RSSI); transshipment/awaiting issue; deep stow (war reserve); deep stow (awaiting Demil); other. Explain each "other" entry in the space provided, including ordnance stowed which is not a DON asset.

23.a. By Category Code Number (CCN), complete the following **student throughput capacity** table for all **training facilities** (adequate, substandard and inadequate) aboard the installation including tenant activities. Include all 171-~~xx~~, 179-~~xx~~ CCN's and any other applicable CCN. Following the table, describe how the Student Hours/Yr capacity is derived.

For example: in the category 171-10, a type of training facility is academic instruction classroom. If you have 10 classrooms with a capacity of 25 students per room, the design capacity would be 250. If these classrooms are available 8 hours a day for 300 days a year, the capacity in student hours per year would be 600,000.

deficiencies and the amount of any programmed funds. Discuss any material conditions of substandard facilities which have resulted in a C3 or C4 designation on your Baserep.

NOTES:

* HOT SITE #1 CAN HANDLE P-3'S, BUT IS IMPRACTICAL DUE TO DISTANCE FROM PARKING RAMP. SITE WAS DESTINED FOR HELICOPTER REFUELING EVOLUTIONS. ADDITIONAL SITE TO HANDLE P-3 HOT REFUELING HAS BEEN PROPOSED BUT NOT YET FUNDED. HOT SITE #3 SUPPORTING THE S-3 AIRCRAFT IS LABOR INTENSIVE TO MANAGE AND INTENDED AS A TEMPORARY FACILITY ONLY.

AN INCREASE IN AIRCRAFT ACTIVITY AT THIS TIME SHOWS A NEED FOR ADDITIONAL DIRECT REFUELING CAPABILITY TO HANDLE P-3'S AND LARGE BODY AIRCRAFT. WITH FUTURE REQUIREMENTS UNKNOWN, A STUDY IS NECESSARY TO DETERMINE MOST APPROPRIATE CONFIGURATION TO SUPPORT PLANNED GROWTH.

** FACILITY IS OVER 50 YEARS OLD AND IN NEED OF MODERNIZATION AS WELL AS ALTERATIONS TO COMPLY WITH ENVIRONMENTAL STANDARDS. TANKS AND EQUIPMENT WILL NOT MEET 1998 MANDATORY STATE AND FEDERAL REQUIREMENTS.

FOLLOWING PROJECTS SUBMITTED FOR FY98 MILCON FUNDING FROM DEFENSE LOGISTICS AGENCY (DLA) ARE CURRENTLY ON HOLD DUE TO LACK OF FUNDING FOR PUBLIC WORKS CENTER PRELIMINARY STUDY DOCUMENTS, (DD1392, DD1391, ENVIRONMENTAL IMPACT STATEMENTS, ETC.) REQUIRED PRIOR TO SUBMISSION TO DLA:

**REVISED 26 SEPTEMBER 1994 PER NAVAL AUDIT SERVICE -
(ADDITION OF FACSFAC INFORMATION TO HSLWINGPAC SUBMISSION)**

FACSFAC OPERATES 24 HOURS PER DAY, 7 DAYS PER WEEK. 75% OF THE SURFACE AND AIR OPERATIONS IN W-291 ARE CONDUCTED MONDAY THROUGH FRIDAY FROM SUNRISE TO SUNSET. FACSFAC COULD SUPPORT A 30% INCREASE IN OPERATIONS DURING PEAK HOURS AND 70% DURING NON-PEAK HOURS. ALL INCLUSIVE (24 HRS/DAY, 7 DAYS/WK), FACSFAC COULD SUPPORT TWICE THE NUMBER OF CURRENT OPERATIONS (100% CAPACITY INCREASE).

R

THE COMBINED SCORE/REWS RANGE COULD SUPPORT A 60% INCREASE TO 1000 ANNUAL OPERATIONS IF MAINTENANCE REPAIRS/PERSONNEL SUPPORT WERE NOT A CONSIDERATION.

R

COMHSLWINGPAC DOES NOT HAVE THIS DATA. THE SCHEDULING AUTHORITY OF SPECIAL USE AIRSPACE WOULD HAVE THE DATA.

42d. Assuming that the flight training facility is **not constrained by operational funding** (personnel support, increased overhead costs, etc.), with the present equipment, physical plant, etc. , what **additional use of airspace assets** could be realized? Provide details and assumptions for all calculations.
