- The Army intends to close Umatilla as there is no additional chemical demilitarization workload slated to go to Umatilla Chemical Depot. Closing of this depot signifies the successful completion of the Army's mission to destroy aging chemical weapons and components that pose a threat to the security of our Nation.
- Closing RC facilities is offset by the construction of modern AFRCs that will be the right size and design to support units that will be stationed there. Transforming RC facilities in Oregon will improve training, readiness and quality of life for more than 1425 RC soldiers, full-time unit support personnel, and their families.

Transform Reserve Component Facilities in the State of Oregon

BRAC 2005 recommendations transform Reserve Component facilities in the State of Oregon into multi-functional installations that will enhance unit readiness, increase training opportunities, and generate operational efficiencies. These transformed facilities will provide the capability to conduct Soldier Readiness Processing and Home Station Mobilization, reduce the number of substandard / undersized Reserve Component facilities, enhance Anti-Terror / Force-Protection, promote effective recruiting and retention, and enhance the Homeland Security and Homeland Defense capabilities of the Army Reserve and the Army National Guard.

Reserve Component Transformation in Oregon (New Facility)

Close Sears Hall United States Army Reserve Center in Portland, Oregon, close Sharff Hall United States Army Reserve Center in Portland, Oregon, and relocate units to a new Armed Forces Reserve Center on Camp Withycombe, Oregon. The new Armed Forces Reserve Center (AFRC) shall have the capability to accommodate Oregon National Guard units currently on Camp Withycombe and from the following Oregon ARNG Armories: Lake Oswego Armory, Maison Armory, and Jackson Band Armory, Oregon, if the state decides to relocate those National Guard units.

Why: The implementation of this recommendation will enhance military value, improve homeland defense capability, greatly improve training and deployment capability, create significant efficiencies and cost savings, and is consistent with the Army's force structure plans and Army transformational objectives.

This recommendation considered feasible locations within the demographic and geographic areas of the closing facilities and affected units. The site selected was determined as the best location because it optimizes the Reserve Components ability to recruit and retain Reserve Component soldiers and to train and mobilize units impacted by this recommendation.

This recommendation provides the opportunity for other Local, State, or Federal organizations to partner with the Reserve Components to enhance Homeland Security and Homeland Defense at a reduced cost to those agencies.

Other

The Department of Defense understands that the State of Oregon will close: Lake Oswego Armory in Lake Oswego, Oregon, the Jackson Band Armory, and the Maison Armory. The Armed Forces Reserve Centers will have the capability to accommodate these units if the State decides to relocate the units from the closed and realigning facilities to the new AFRC complex.

Quantitative Results

Number of USAR Centers Closed for that state	2	Number of opportunities to close ARNG Armories for that state	3
Approximate Closing Square Footage	165,630	Approximate New Military Construction Square Footage	114,752

Estimated Implementation Timeline:

Design new AFRCs and acquire land	FY06	Construct new AFRCs	FY07
Relocate units to new AFRCs	FY08	Shut down closing facilities	FY08

Internal Communications:

- The Army knows that transforming Reserve Component facilities is the key to enable Reserve forces to better meet current and future operational requirements. BRAC helps us get there.
- Closing these Reserve Component facilities is offset by the construction of a modern Armed Forces Reserve Center that will be the right size and design to support our unit and other local Guard and Reserve units that will be stationed there.
- Transforming Reserve Component facilities in the State of Oregon will improve training, readiness and quality of life for more than 1425 Reserve Component soldiers, full-time unit support personnel, and their families.

External Communications: (Civilian community)

- The Secretary of Defense's BRAC 2005 recommendations demonstrate that Reserve Component facilities are valuable installations to the Army and DoD.
- The Department of the Army has more than 4000 Reserve Component facilities across the United States. Because of the sheer numbers of these facilities, the process the Army had developed for arriving at a quantitative military value score for its 97 major installations (including leases) was not practical for its Reserve Component facilities. Additionally, if measured by the active process, which valued training lands and ranges among other things, the Reserve Component facilities would not have compared well against the active installations. For these reasons, it was the military judgment of the Department of the Army that it needed to craft a unique approach for ascertaining the overall military value of Reserve Component facilities.
- A team of functional experts from Headquarters, Department of the Army, the Office of the State Adjutant General, and the Army Reserve Regional Readiness Command conducted a military value assessment of state-owned and Army Reserve sub-threshold facilities. These facilities were assessed, specifically against DoD Criteria one through

four, in their ability to support joint stationing options that enhance Army and DoD transformation.

- The Department of the Army decided to consolidate multiple Army Reserve Centers and, where allowed, Army National Guard Armories into modern Armed Forces Reserve Centers because of their potential to enhance Reserve Component operations, training, mobilization and power projection capabilities, and their ability to sustain recruiting and retention.
- The sites for the new AFRCs are also based on their ability to consolidate functions wherever appropriate, to include schools, personnel, logistics, and other management functions.
- New AFRC sites were also selected based on their ability to relocate Reserve Component units and activities from leased and encroached properties that do not meet anti-terrorism and force-protection requirements onto established military facilities, and their ability to ensure the future readiness of Army forces while reducing the long-term costs of sustaining the base structure.
- It is a part of the plan to transform our Armed Services.
- We expect the demands on the community and the benefits to the community from the closure of these Reserve Component properties and the construction of a new Armed Forces Reserve Center will be minimal.

Approving BRAC Recommendations - Statutory Steps:

08 Sept 05	BRAC Commission recommendations due to President
23 Sept 05	President approves/disapproves Commission recommendations
20 Oct 05	Commission resubmits recommendations (if initially rejected by President)
07 Nov 05	President submits final recommendations to Congress. Once submitted, the plan becomes final within 45 legislative days, unless Congress passes a joint resolution to block the entire package.

According to BRAC law, this action must be initiated within two years and completed within six years from the date the President transmits the report to Congress.

Umatilla Army Chemical Depot

BRAC 05 recommendation will formally close Umatilla Army Chemical Depot upon completion of its chemical demilitarization mission. This is a single function installation used for the storage of chemical munitions, which is governed by the Chemical Weapons Convention Treaty.
