Commissioner James T. Hill
Base Realignment and Closure Commission
2521 South Clark St., Suite 600
Arlington, VA 22202

Dear Commissioner Hill:

I write you as a member of New Hampshire Governor John Lynch's Portsmouth Naval Shipyard Advisory Task Force. I am a former Acting Commissioner of the New Hampshire Department of Environmental Services, and I also served many years in the New Hampshire Attorney General's Office, concluding my service there as Deputy Attorney General for 5 years. I now am the Partner in Charge of Pierce Atwood's Portsmouth Office. I bring this public and private perspective to the question of the Portsmouth Naval Shipyard, and urge that the Commission recommend removal of this facility from the closure list.

You are to be commended for the tremendous diligence and care that you are taking in carrying out the responsibility of making the final recommendation on base closures and realignments to the President. Your personal visits to the facilities on the Department of Defense's initial list, your meetings with federal, state and local officials, your consideration of views from the shipyards, the shipyard workers, and the public has been remarkable. Your efforts are greatly and genuinely appreciated.

I know that you are fully aware of the outpouring of enthusiastic concern about the future of the Portsmouth Naval Shipyard from all sectors of the Kittery/Portsmouth community. This has demonstrated unparalleled community support in two states for the continued operation of this shipyard, and underlies the energy and ability of the shipyard workers. It is this latter characteristic that has been the hallmark of the Portsmouth Naval Shipyard – and is fully recognized by the Department of Defense. Portsmouth Naval Shipyard's documented record of cost, schedule, quality and safety performance is exemplary.

I cannot comment with any expertise on the military value of Portsmouth over the other submarine repair facilities, but I can comment on the environmental costs of closure of this facility. The Navy's cost estimate for environmental cleanup that were the basis of the Department of Defense's recommendations is very low. A fair assessment of the additional costs associated with closure must include a far greater total for the environmental remediation that will be necessary at this site.

Commissioner James T. Hill
August 4, 2005
Page 2

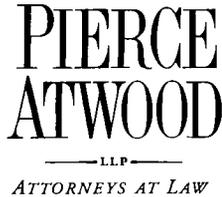

Thank you again for your service, and for your very serious consideration of the fate of the Portsmouth Naval Shipyard. In view of its superb performance and productivity, the cost savings from keeping the facility open, and the community support for this shipyard, I urge you to vote to remove it from the closure list.

Sincerely,

A handwritten signature in black ink, appearing to read "G. Dana Bisbee". The signature is fluid and cursive, with a large, stylized initial "G" and "B".
