

Dear General Turner:

I am writing in regards to the proposed closings of Red River Army Depot and Lone Star Army Ammunition plants. I am not employed by a local, state or federal governments. I am just a mother and housewife that feels her voice should be heard. I am fifty two years of age and a mother of four children, one of which is only twenty months old.

My husband, 55, is an employee of Lone Star for the past five years and a past employee of Red River for fourteen years. This household certainly has a vested interest in the survival of both plants. My husband also knows the rigors of war and has spent most of his adult life supporting our military and the American way of life.

For decades, both Red River and Lone Star have supported our military and government and to propose closure of these facilities is both assinine and dangerous. Red River and Lone Star are actively supporting the war in the Middle East. They have been passed over for forclosure in the past because of their importance and it should be no different now. If our government intends to outsource military equipment and ammunition then might I suggest that they also outsource soldiers or even congressmen and women.

It goes without saying that a complete breakdown of the Four-State (Texas, Arkansas, Louisiana and Oklahoma) economies will be immediate, affecting all buisnesses, local governments and schools as well as disrupting tens of thousands of families.

Red River and Lone Star plants produces products and perform services directly to the military. These plants are not a pork barrel facility that was/is protected by congressmen.

Rest assured that this family loves and supports our county, state and country. Our success in life is based upon our service to others. I pray for the success of our government and country.

May God Bless Us All

Thank you
Mrs. Ronald W. Ling Sr.
