Ligone, Tyrone

From: Lindenbaum, Eric
To: Ligone, Tyrone
Subject: RE: A map of Guam in our future?
Date: Friday, March 10, 1995 11:38AM

I NEED TO MAP (A) ALL OF THE MILITARY FACILITIES ON GUAM (B) A "BLOW-UP" OF THE NAVAL STATION AREA SO I CAN DRAW IN THE BLDGS THAT WILL BE RETAINED AND (C) A GENEARL MAP OF GUAM THAT I MAY USE AS A COVER SHEET FOR BRIEFS etc.

THANX IN ADVANCE,

LINDY

>From: Ligone, Tyrone
>To: Lindenbaum, Eric

Ligon, Tyrone

From: Beyer, Merrill
To: Ligon, Tyrone
Subject: RE: The Map Store is open
Date: Wednesday, March 22, 1995 9:02AM

Can you give me the "basic map" for my four bases, Homestead, Patrick, Bergstrom and Reese? After I take a look at those, I'll do my best to keep that chain tight and put you to work making some of those three-hour specials!

Many Domo's,
- Merrill

>-----
> From: Ligon, Tyrone
> To: R&A Staff
> Subject: The Map Store is open
> Date: Tuesday, March 21, 1995 6:36PM

>
> In case you didn't know, the mapping database from the 1993
> BRAC is up and updated. If you need nationwide, region, state
> or area maps please see me, or pick up a form from my desk or
> the table with the printers (the form is titled "Mitchmap" in
> honor of the database's parent). The back of the form has a
> map of the lower 48 states, where you can highlight a certain
> state or region as a boundary. A partial list of features that
> can be presented are:

>
> Point and area representations of bases
> Major highways
> Major and minor airports (both civilian and military)
> Air routes
> MOAs
> State and county boundaries

>
> In addition, I can create with a rather high degree of accuracy
> outline maps of just about any city in the lower 48 states; one
> caveat - the outlines are created from zip code files from
> 1993, and zip codes don't always end at a city boundary. In
> addition, zip codes have been added and/or modified in the last
> two years.

>
> The map process is usually iterative - I put the data together,
> position text and labels, add a title and a legend (if needed),
> show it to you, and make any required changes.
> I'm also willing to at least listen to your special requests,
> so ask and you shall (probably) receive.

>
> Turnaround depends on the number of maps you need, their
> complexity, whether or not the data is in the database, how
> many requests are queued up, and how many "rush" requests are
> in. A single map can take anywhere from 20 minutes to three
> hours (though most have been on the lower end).

>
> The Cook-meister isn't happy unless he sees me chained to my
> desk producing maps, and the queue is currently very short, so
> "give it to me straight - I can take it".

>
> (Famous last words!)

b. TIER DEPOT ANALYSIS

(1) The Tier Depot Concept, in its end state alignment, must support two primary objectives: the power projection requirements of the two MRCs as outlined in Defense Planning Guidance (DPG) and provision of sufficient storage space for assigned tier stockage configurations. Current asset distribution is mal-aligned placing shipping directives on some installation during a contingency operation that exceed their organic capabilities to outload, while in other installations, based on stockage configurations only a small percentage of their capabilities are utilized. The end state asset distribution of the Tier Depot Concept will maximize the outloading capabilities at Tier I and II installations.

(2) The Tier Depot Concept allows the stockpile to be distributed within geographically oriented regions with a minimum of one Tier I and one Tier II installation configured within each region. Regional distribution fully supports area training requirements and provides an active installation within the proximity of the two sea ports of embarkation for supporting MRC power projection requirements.
