Online Data Interface

Demo & Installation Training

BRAC 2005 Trusted Agent Training
9 October 2003

Outline

- Technical Overview
- Installation Workflow
- Demonstration
- Training Strategy
- Next Steps

Technical Overview

- Relational database built on Oracle 9i product suite
 - Efficient transactional processing over the internet
 - Encrypted database
- Hosted by Chief Technology Office at Ft. Belvoir, Virginia
 - Resides on .mil domain
 - Secured by Secure Sockets Layer (SSL)
- User accounts integrated with Army Knowledge Online (AKO)
 - Single Sign-on using AKO userid/password
 - Link on ASA (I&E) Community Page on AKO

Installation Workflow

1. All questions initially assigned to the Garrison Cdr
2. IA creates FP user accounts and assigns questions
3. FPs either
 - Answer questions; or
 - Create Responder user accounts and assign questions
4. Responders answer questions
5. FPs either approve or change answers
6. Garrison Cdr and IA have the option of reviewing some or all answers
7. Garrison Cdr pre-certifies installation
8. Sr Msn Cdr reviews answers, then opens installation for review by MACOM and IMA Region TAs
9. TAs contact Sr Msn Cdr if changes are required
10. Sr Msn Cdr certifies installation data

Group	Other (Non-Installation)	Sequence Number	99002	Data Element	Excess Capacity-Maintenance
Variable Name		As of Date	30 SEP 03	Collection	Data Call - I
Certifier	MACOM	Source	Installation	Answer Type	NUMERIC
POC Name	John Jones	POC Phone	703-555-1234	POC Email	john.jones@us.army.mil

Definition
Excess capacity is the amount of maintenance capacity, in vehicles per day, that your installation can maintain above its current average requirement.

Question
What is your installation's excess vehicle maintenance capacity, in vehicles per day?

Internal Note
Review the wording of this question.

Used For

- Environmental Baseline
- MVA
- OSAF
- IVT
- COBRA
- Capacity

Requestor

- Education and Training
- TABS
- Hqs and Support
- Industrial
- Medical
- Supply and Storage
- Technical
- Intelligence

Training Strategy

- 20-31 Oct – Distributed training
 - Slide show giving sequential steps for all installation users
 - Conference Call with each IMA Region (Installation Administrators) to discuss & answer questions
 - Live access to web site & assign questions to Functional Proponents
- 2 Dec – Initiate live test
 - Purpose: validate training & conduct full implementation test
 - Using small subset of actual data call questions
 - Each installation participates
 - IA -> FP -> Responder -> Garrison Cdr -> SMC
 - IMA Regions & MACOMs review

Next Steps

- Compiling list of Garrison Commanders and Senior Mission Commanders.
- IMA Regions will be requesting Senior Mission Commanders/Garrison Commanders identify Installation Administrators (IA) for BRAC study sites.
- TABS will coordinate directly with Installation Administrators to set up ODIN training.

Questions?

- **What are your questions???**
