MEMORANDUM FOR Director, The Army Basing Study Group

SUBJECT: Inventory of Army Installations for Base Realignment and Closure 2005 Review and Analyses—Interim Report #5 (Project Code: A-2003-IMT-0440.000)

1. You asked us to review the changes made—subsequent to our first review—to the inventory of Army installations The Army Basing Study (TABS) Group will use in its review and analyses during BRAC 2005. Specifically, you asked us to determine if the changes made were in accordance with law.

2. On 18 June 2003, we issued Interim Report #3 on the methodology the contractor followed to determine the inventory of Army installations subject to review and analyses during BRAC 2005. In that report, we concluded that the methodology the contractor used was in accordance with law and appropriately applied. The methodology yielded 87 Army installations that should be included in the BRAC 2005 review and analyses. You subsequently notified us that the inventory changed from 87 to 88 installations. Consequently, we compared the list of 87 to the new list of 88 installations and determined that you:

- Eliminated three installations (Charles Melvin Price Support Center, Stanley Camp Storage Activity, and Hunter Army Airfield).
- Added four installations (Riverbank, Kansas, Louisiana, and Mississippi Army Ammunition Plants).

We reviewed the rationale and support for these deletions and additions and determined that the changes were in accordance with law. As a result, 88 Army installations are currently in the Army inventory for BRAC 2005 review and analyses. The enclosure lists the 88 installations.
