TR

Dear General Newton,

As you know, the Naval Support Activity Base (NSA) in New Orleans was recommended for closure in the Secretary of Defense's Recommendations to the Base Realignment and Closure (BRAC) Commission.

It is my strong belief that NSA has been an extremely valuable military installation, which has been warmly and strongly embraced by the community in New Orleans and by the State of Louisiana. NSA has played an integral part in all our nation's conflicts, and it is today providing support to the Navy, Marine Corps, and Army units who are currently serving or who have recently served in Afghanistan or Iraq.

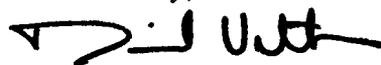

With that in mind, I strongly suggest that all nine members of the BRAC Commission immediately schedule a site visit to NSA to thoroughly review the base prior to making their final recommendation to the President on September 8, 2005.

In addition to better understanding the military assets at the base, I believe it is essential that each member of the commission gain a full understanding of the "Federal City" plan put into place by the City of New Orleans and the State of Louisiana before making its final BRAC recommendations. The Federal City plan will help the Department of Defense greatly improve the effectiveness and efficiency of NSA, while reducing commuting time for personnel and upgrading force protection to meet new, post-9/11 standards.

I appreciate the time and effort that would be required for the Commission to visit, and would like to express my gratitude for the work you will do in the coming months. I have no doubt that once the Commission visits NSA and sees first hand the merits it can offer DOD, you will recommend that the base be removed from the closure list.

I am willing to help in anyway possible and appreciate your prompt consideration to this matter.

Sincerely,

David Vitter
United States Senate
