Honorable Anthony J. Principi
 Chairman
 2005 Defense Base Closure and Realignment Commission
 2521 South Clark Street
 Suite 600
 Arlington, VA 22202

Dear Chairman Principi:

The Metropolitan Washington Council of Governments (COG) is pleased to transmit for the Commission's review and consideration recent action by the COG Board of Directors on the U.S. Department of Defense (DoD) recommendations on facilities in the National Capital Region.

COG is an association of 19 local governments in the National Capital Region. The COG Board of Directors adopted Resolution R25-05 (enclosed) at its July 13 meeting. The COG/TPB Regional Analysis Report (enclosed) summarizes findings on the land use, transportation and air quality impacts associated with the DoD recommendations. In addition to requesting the Commission's careful review and consideration of the report, COG urged the Commission to:

- Consider the compelling testimony provided by public officials and other community leaders at Commission hearings held in Arlington, Virginia; Baltimore, Maryland; and Washington, DC.;
- Renew attention to anti-terrorism building standards advanced by the U.S. General Services Administration that provide greater flexibility in achieving security goals than those established by DoD, as COG is concerned that DoD anti-terrorism building standards considered as part of the DoD recommendations are inconsistent with local land use policies; and
- In your final actions, allow for and encourage the consideration of all alternatives to DoD recommendations that increase military value and lower taxpayer costs.

Thank you for your leadership on this important national and regional issue.

Sincerely,

Judith F. Davis
 Chairman, Board of Directors

Cc: Washington Area Congressional Delegation
 Mayor Anthony A. Williams
 Governor Robert L. Ehrlich, Jr.
 Governor Mark R. Warner

JUL 19 2005

Received

Resolution R25-05
Adopted July 13, 2005

METROPOLITAN WASHINGTON COUNCIL OF GOVERNMENTS
777 North Capitol Street, N.E.
Washington, D.C. 20002

**RESOLUTION ADOPTING THE REPORT
COG/TPB REGIONAL ANALYSIS: IMPACTS OF THE U.S. DEPARTMENT OF DEFENSE
BASE REALIGNMENT AND CLOSURE RECOMMENDATIONS
FOR THE WASHINGTON METROPOLITAN REGION**

WHEREAS, on May 13, 2005, the Secretary of the U.S. Department of Defense (DoD) released its list of DoD facilities proposed for closure or realignment to the Base Realignment and Closure (BRAC) Commission; and

WHEREAS, there are significant implications to the jurisdictions of the Metropolitan Washington Council of Governments (COG) regarding future employment, transportation infrastructure needs, traffic congestion and air quality if the DoD recommendations are followed; and

WHEREAS, the DoD recommendations appear to deviate from the criteria established for making such recommendations and appear to be applied inconsistently across the country; and

WHEREAS, the DoD recommendations were to have been based, in part, on the economic impact on existing communities in the vicinity of the military installations, the infrastructure and sustainability of both existing and potential receiving communities, and environmental impacts of the proposed realignments and closures; and

WHEREAS, the Secretary of Defense already has the full authority to terminate facility leases and relocate functions from leased space, and does not need the BRAC process to do so; and

WHEREAS, after considering all of the recommendations of the DoD and the underlying basis and consequences of each proposal, the BRAC Commission must report its findings and recommendations to the President no later than September 8, 2005; and

WHEREAS, after submission of the BRAC Commission report to Congress on September 23, 2005, (or November 7, 2005, if the President does not concur totally with the Commission's initial recommendations), its recommendations become binding if not disapproved by Congress on an all-or-nothing basis, making the BRAC Commission's recommendations difficult to change; and

WHEREAS, the BRAC Commission held regional hearings to receive testimony from representatives of communities that may be impacted by the DoD recommendations, including hearings affecting District of Columbia and Virginia facilities on July 7 in Washington, DC and Northern Virginia, respectively, and a hearing on Maryland facilities on July 8 in Baltimore; and

WHEREAS, the COG Board of Directors adopted Resolution R19-05 on June 8, 2005 authorizing COG to conduct analysis on the land use, transportation and air quality impacts of the DoD recommendations to the BRAC Commission, compared with the adopted Round 6.4A cooperative forecasts, for review by the COG Board of Directors at its July 13, 2005 meeting.

WHEREAS, this analysis compared the potential impacts on employment and households, on regional activity centers, and on transportation and air quality projections, first for the year 2010 and then for the year 2020; and

1998

100

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud. The document outlines the various types of records that should be maintained, including receipts, invoices, and bank statements, and provides guidance on how to organize and store these records effectively.

2. The second part of the document addresses the issue of data security. It highlights the risks associated with the loss or theft of sensitive information and provides a comprehensive overview of the security measures that should be implemented to protect this data. These measures include the use of strong passwords, encryption, and regular security audits. The document also discusses the importance of employee training and awareness in maintaining a secure environment.

3. The third part of the document focuses on the importance of regular backups. It explains that backups are a critical component of any data protection strategy and provides detailed instructions on how to perform backups correctly. It also discusses the importance of testing backup recovery procedures to ensure that data can be restored in the event of a disaster.

4. The fourth part of the document discusses the importance of staying up-to-date with the latest security threats and vulnerabilities. It provides a list of resources for staying informed, including industry newsletters, security blogs, and conferences. The document also emphasizes the importance of promptly applying security patches and updates to all systems and software.

5. The fifth part of the document discusses the importance of having a disaster recovery plan in place. It explains that a disaster recovery plan is a critical component of any business continuity strategy and provides a detailed overview of the steps that should be taken to develop and implement such a plan. The document also discusses the importance of testing the plan regularly to ensure its effectiveness.

6. The sixth part of the document discusses the importance of having a clear incident response plan. It explains that an incident response plan is a critical component of any security strategy and provides a detailed overview of the steps that should be taken to respond to a security incident. The document also discusses the importance of having a designated incident response team and providing regular training to its members.

7. The seventh part of the document discusses the importance of having a clear data retention policy. It explains that a data retention policy is a critical component of any data protection strategy and provides a detailed overview of the steps that should be taken to develop and implement such a policy. The document also discusses the importance of regularly reviewing and updating the policy to ensure its effectiveness.

8. The eighth part of the document discusses the importance of having a clear data disposal policy. It explains that a data disposal policy is a critical component of any data protection strategy and provides a detailed overview of the steps that should be taken to develop and implement such a policy. The document also discusses the importance of regularly reviewing and updating the policy to ensure its effectiveness.

9. The ninth part of the document discusses the importance of having a clear data access policy. It explains that a data access policy is a critical component of any data protection strategy and provides a detailed overview of the steps that should be taken to develop and implement such a policy. The document also discusses the importance of regularly reviewing and updating the policy to ensure its effectiveness.

10. The tenth part of the document discusses the importance of having a clear data sharing policy. It explains that a data sharing policy is a critical component of any data protection strategy and provides a detailed overview of the steps that should be taken to develop and implement such a policy. The document also discusses the importance of regularly reviewing and updating the policy to ensure its effectiveness.

WHEREAS, projections for the year 2010 show regional disruptions and modifications, with significant impacts in certain sub-regional areas, including projected reductions in transit use and increases in vehicle trips, vehicle miles traveled and poor air quality, which are inconsistent with adopted regional land use, transportation and air quality policy goals.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF DIRECTORS OF THE METROPOLITAN WASHINGTON COUNCIL OF GOVERNMENTS THAT:

1. COG adopts the report, COG/TPB Regional Analysis: Impacts of the U.S. Department of Defense Base Realignment and Closure Recommendations for the Washington Metropolitan Region (attached).
2. The report and its findings shall be transmitted to the BRAC Commission, Washington area congressional delegation, Mayor of the District of Columbia, and the Governors of Maryland and Virginia, and COG member local governments to aid in evaluating the regional and local impacts of DoD recommendations to the BRAC Commission.
3. COG urges the independent BRAC Commission to carefully review and consider the testimony and written materials submitted by COG member jurisdictions and others that testified at the public hearings held in Maryland, Washington, DC and Virginia.
4. COG is concerned that DoD anti-terrorism building standards considered as part of the DoD recommendations to the BRAC Commission are inconsistent with local land use policies, for example, transit oriented development, and recommends that all federal agencies examine building standards developed by the U.S. General Services Administration for non-DoD federal agencies, which are less prescriptive and more performance based, as providing the best strategy to ensure that security measures are effective and consistent with local land use policies.
5. COG urges the independent BRAC Commission, in its final actions, should allow for and encourage the consideration of all alternatives to the DoD Secretary's recommendations that may increase military value and lower taxpayer costs.

BRAC Commission

JUL 19 2005

Received

**COG / TPB Regional Analysis:
Impacts of the U.S. Department of Defense (DoD)
Base Realignment and Closure (BRAC) Recommendations
For the Metropolitan Washington Region**

**DRAFT
July 6, 2005**

**Department of Human Services, Planning and Public Safety
Department of Transportation Planning
Metropolitan Washington Council of Governments**

Background and Purpose

On May 13, 2005, U.S. Department of Defense (DoD) Secretary Donald H. Rumsfeld forwarded the Department's recommendations concerning the closure, realignment or expansion of military and other defense-related facilities to the Base Realignment and Closure (BRAC) Commission.

Included in Secretary Rumsfeld's recommendations are a number of proposed changes to DoD facilities located in the District of Columbia, Maryland and Virginia. In addition to the base-specific BRAC recommendations, DoD has also recommended not renewing leases for buildings that do not meet the Department's Unified Facilities Criteria (UFC) Minimum Antiterrorism Standards for design and security. These workers may be relocated to facilities in other parts of metropolitan Washington, or to locations outside of the region.

The opportunities and challenges associated with these two linked issues were discussed at the COG Board of Directors meeting on Wednesday, May 11 and during a conference call with COG Board members on Thursday, May 19. During their conference call, Board members directed COG staff to compile information on the BRAC proposed changes and outline a proposed work program for assessing the potential land use, transportation and air quality impacts of the BRAC and UFC changes. The National Capital Region Transportation Planning Board (TPB) also discussed this issue during its May 18 meeting and directed TPB staff to undertake similar analyses.

Method of Analysis

The analyses in the report focus on two time periods:

- 2010 – a forecast year for which DoD workers currently in leased office space must be in facilities that meet the UFC security requirements, and by which much of the proposed BRAC base and facility changes would have occurred or be underway
- 2020 – a forecast year by which all of the BRAC DoD base realignments would be complete, and when absorption of space or redevelopment would have largely occurred for leased facilities which would be vacated in 2010 for failure to meet the UFC standards

BRAC and Department of Defense security-related employment changes have been estimated based upon information as of June 27, 2005. Utilizing this information, the Center for Regional Analysis (CRA) of George Mason University recommended modifications to the adopted Round 6.4A Cooperative Forecasts of population, households and employment for 2010 and 2020 by traffic analysis zone (TAZ). CRA staff also made assumptions concerning the number of DoD contractors likely to re-locate to areas adjacent to the DoD facilities. Specific data files used by CRA and COG staff to develop the modified TAZ forecasts include the "BRAC 2005 Base Closure and Realignment by State" list published by the Department of Defense; the Northern Virginia Regional Commission's (NVRC) database of DoD leased facilities; and the

National Capital Planning Commission's (NCPC) federal facility assigned employment data file.

Following development of the adjustments to the TAZ forecasts, the COG/TPB staff utilized travel demand forecasting models to prepare 2010 and 2020 summaries of regional transit and vehicle trips, vehicle miles traveled (VMT) and nitrogen oxide (NO_x) and volatile organic compound (VOC) emissions. Results of those models are published in Section III.

Next Steps in the BRAC Process

The BRAC Commission has scheduled a public hearing for the proposed BRAC changes for the District of Columbia and the Commonwealth of Virginia for July 7, 2005, and a hearing for changes impacting Maryland on July 8. The BRAC Commission will forward its report on recommendations for base realignments or closures to the President by September 8, 2005, and the President will have until September 23, 2005, to accept or reject the recommendations in their entirety. If accepted, Congress will have 45 legislative days to reject the recommendations in their entirety or they become binding on the Department of Defense.

Findings

July 6, 2005

The impacts of BRAC and Department of Defense security-related employment changes have been estimated based upon information as of June 27, 2005.

Compared to the adopted Round 6.4A Cooperative Forecasts for 2010:

BRAC Employment/Household Impacts

- Total projected employment for the Washington metropolitan region would be reduced by approximately -15,000 jobs. Due to anticipated net increases in 2010 employment for jurisdictions adjacent to the Washington region (primarily, Anne Arundel County) employment would be reduced by approximately -10,800 jobs for the TPB modeled region.
- Several jurisdictions would see a reduction in projected employment, including Arlington County (-19,321 jobs), the City of Alexandria (-7,539 jobs) and the District of Columbia (-6,508 jobs).
- Several jurisdictions would see an increase in projected employment, including Fairfax County (+14,506 additional jobs), followed by Anne Arundel County, Maryland (+4,450 jobs), Prince William County (+2,500 jobs) and Prince George's County (+1,496 jobs)
- No changes in the projected number of households in the region are anticipated.

BRAC Impacts on Regional Activity Centers

- The total number of jobs projected to be located in regional activity center clusters would change from 2.32 million to 2.29 million – a reduction of -28, 731 jobs or -1.2 percent.
- Several regional activity center clusters would see a reduction in projected employment including Pentagon/Reagan Airport/Alexandria Area (-16,318 jobs), the Rosslyn/Ballston Corridor (-8,886 jobs), the Baileys Crossroads Area (-5,021), and Silver Spring/Takoma Park/Wheaton (-4,673 jobs).
- The I-95-/Springfield Area would see an increase in forecast employment (7,375 jobs) followed by Bethesda/Friendship Heights (1,968 jobs).
- Employment at Fort Belvoir – a designated “Government Special Attractor” – would increase by approximately 15,000 jobs.

BRAC Transportation/Air Quality Impacts

- Total transit trips would decrease by -18,528 (-1.84%)
- Total vehicle trips would increase by 26,790 (+0.12%)
- Vehicle miles traveled would increase by 73,829 (+0.04%)
- VOC emissions would increase by 0.03 tons per day (+0.05%) while NO_x would increase 0.02 tons per day (+0.01%).

Compared to the adopted Round 6.4A Cooperative Forecasts for 2020:

BRAC Employment/Household Impacts

- Total projected employment for the Washington metropolitan region would increase by approximately 13,700 jobs. Total 2010 forecast employment for the larger, TPB modeled region in 2020 would increase 18,728 jobs
- Projected employment in Fairfax County would increase by approximately 21,400 jobs, followed by Anne Arundel County (+5,361 jobs), Prince William County (+3,013 jobs), and Prince George's County (+1,557 jobs).
- Projected employment in Arlington County would total approximately 6,600 fewer jobs, followed by the District of Columbia (-4,511 jobs) and the City of Alexandria (-2,400 jobs).
- Approximately 8,500 additional households would be added to the region with increases anticipated in Prince William (+3,000 households), Fairfax (+2,000 households) Stafford (+1,500 households) and Montgomery (+1,000) counties, and the District of Columbia (+1,000).

BRAC Impacts on Regional Activity Centers

- The total number of jobs projected to be located in Regional Activity Center Clusters would change from 2.63 million to 2.62 million – a reduction of 1, 617 jobs or 0.1 percent.
- Several regional activity center clusters would see a reduction in projected employment, including the Pentagon/Reagan Airport/Alexandria Area (-5,034 jobs), the Rosslyn/Ballston Corridor (-2,800 jobs), the Silver Spring/Takoma Park/Wheaton (-2,300 jobs), and Downtown Washington (-1,812 jobs).
- The I-95-/Springfield Area would see an increase in forecast employment (9,000 jobs) followed by Bethesda/Friendship Heights (2,289 jobs).
- Employment at the Fort Belvoir "Government Special Attractor" would also increase by approximately 16,000 jobs.
- The total number of households projected to be located in Regional Activity Center Clusters would change from 872,018 to 875,018 – an increase of 3,000 households or 0.3 percent.
- Approximately 3,000 additional households would be added to the regional activity center clusters with increases in the Potomac Mills Area (+1,200 households), the Silver Spring/Takoma Park/Wheaton (+1,000 households) and the I-95-/Springfield Area (+800 households).

BRAC Transportation/Air Quality Impacts

- Total transit trips would decrease by -6,097 (-0.52%)
- Total vehicle trips would increase by 84,932 (+0.34%)
- Total vehicle miles traveled would increase by 133,435 (+0.07%).
- VOC emissions would increase by 0.08 tons per day (+0.22%) while NO_x would increase 0.03 tons per day (+0.07%).

- VOC emissions would increase by 0.08 tons per day (+0.22%) while NO_x would increase 0.03 tons per day (+0.07%).

Section I - 2010 Forecast Changes

Table I-1
Comparison of Round 6.4A 2010 and
BRAC-Related 2010 Employment by Jurisdiction

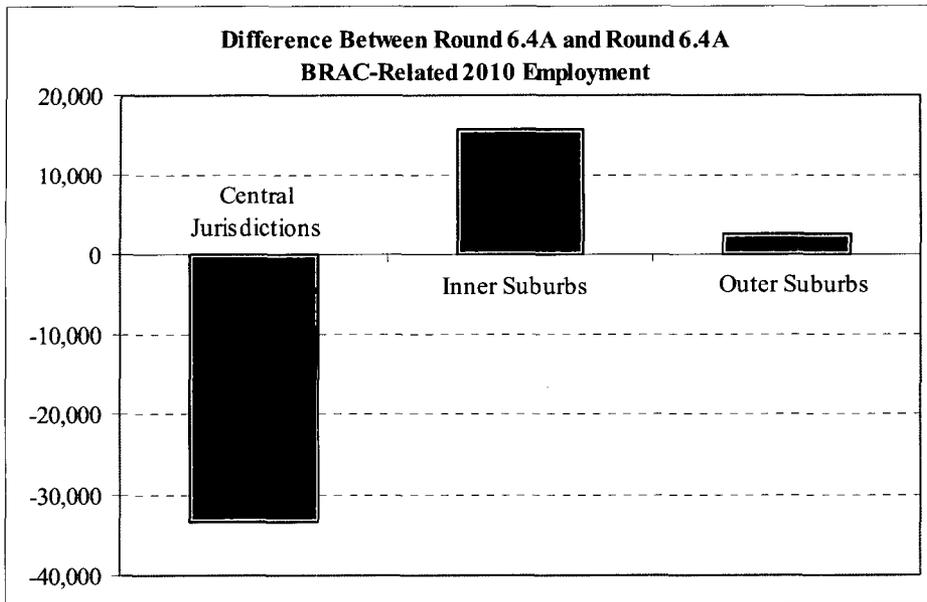

JURISDICTION	Round 6.4A 2010	Round 6.4A BRAC- Related 2010	Difference between Round 6.4A and Round 6.4A BRAC- Related	
			Number	% Change
District of Columbia	752,016	745,508	-6,508	-0.9%
Arlington County	217,834	198,513	-19,321	-8.9%
City of Alexandria	114,881	107,342	-7,539	-6.6%
Central Jurisdictions	1,084,731	1,051,363	-33,368	-3.1%
Montgomery County	565,000	564,854	-146	0.0%
Rockville	91,400	91,400	0	0.0%
Prince George's County	402,500	403,996	1,496	0.4%
Fairfax County	653,171	667,677	14,506	2.2%
City of Fairfax	31,464	31,464	0	0.0%
City of Falls Church	10,000	10,000	0	0.0%
Inner Suburbs	1,662,135	1,677,991	15,856	1.0%
Loudoun County	141,644	141,644	0	0.0%
Prince William County	122,449	124,949	2,500	2.0%
City of Manassas	23,025	23,025	0	0.0%
City of Manassas Park	4,723	4,723	0	0.0%
Calvert County	32,897	32,897	0	0.0%
Charles County	62,888	62,809	-79	-0.1%
Frederick County	120,700	120,768	68	0.1%
Stafford County	38,344	38,344	0	0.0%
Outer Suburbs	546,670	549,159	2,489	0.5%
Northern Virginia	1,357,535	1,347,681	-9,854	-0.7%
Suburban Maryland	1,183,985	1,185,324	1,339	0.1%
MSA REGIONAL TOTAL	3,293,536	3,278,513	-15,023	-0.5%
TPB MODEL REGION TOTAL	4,095,367	4,084,531	-10,836	-0.3%

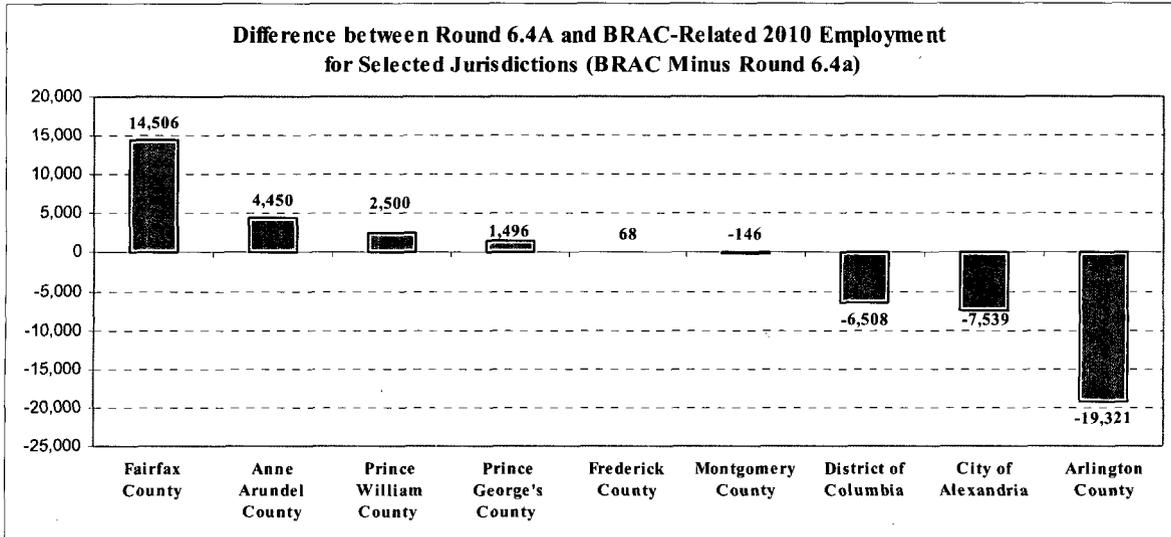

Table I-1 compares the 2010 Round 6.4A Cooperative Forecasts of Employment by jurisdiction with 2010 employment modified to reflect the proposed BRAC changes.

No changes in the projected number of households in the region in 2010 are anticipated due to BRAC activities.

As can be seen in the table, compared to the Round 6.4A Cooperative Forecasts, total forecast employment for the Washington metropolitan region would be reduced by a net of approximately -15,000 jobs. Due to net gains in employment anticipated in jurisdictions adjacent to the COG region such as Anne Arundel County, total employment for the larger TPB modeled region in 2010 would be approximately -10,800 jobs less than Round 6.4A

Assuming the BRAC-related changes, employment in the region's Central Jurisdictions would be approximately 33,400 jobs lower than the Round 6.4A projections; employment in the Inner Suburbs would be nearly 15,900 jobs higher than Round 6.4A, and employment in the region's Outer Suburbs would be approximately 2,500 jobs higher.

Jurisdictions that would see a reduction in projected 2010 employment due to the BRAC changes when compared to the Round 6.4A Forecasts include Arlington County (-19,321 jobs), the City of Alexandria (-7,539 jobs) and the District of Columbia (-6,508 jobs).

Compared to Round 6.4A, Fairfax County would see an increase in forecast employment due to BRAC-related changes in 2010 (+14,506 additional jobs) followed by Anne Arundel County (+4,450 jobs), Prince William County (+2,500 jobs) and Prince George's County (+1,496 jobs).

Figure I-1: BRAC-Related Change in 2010 Employment

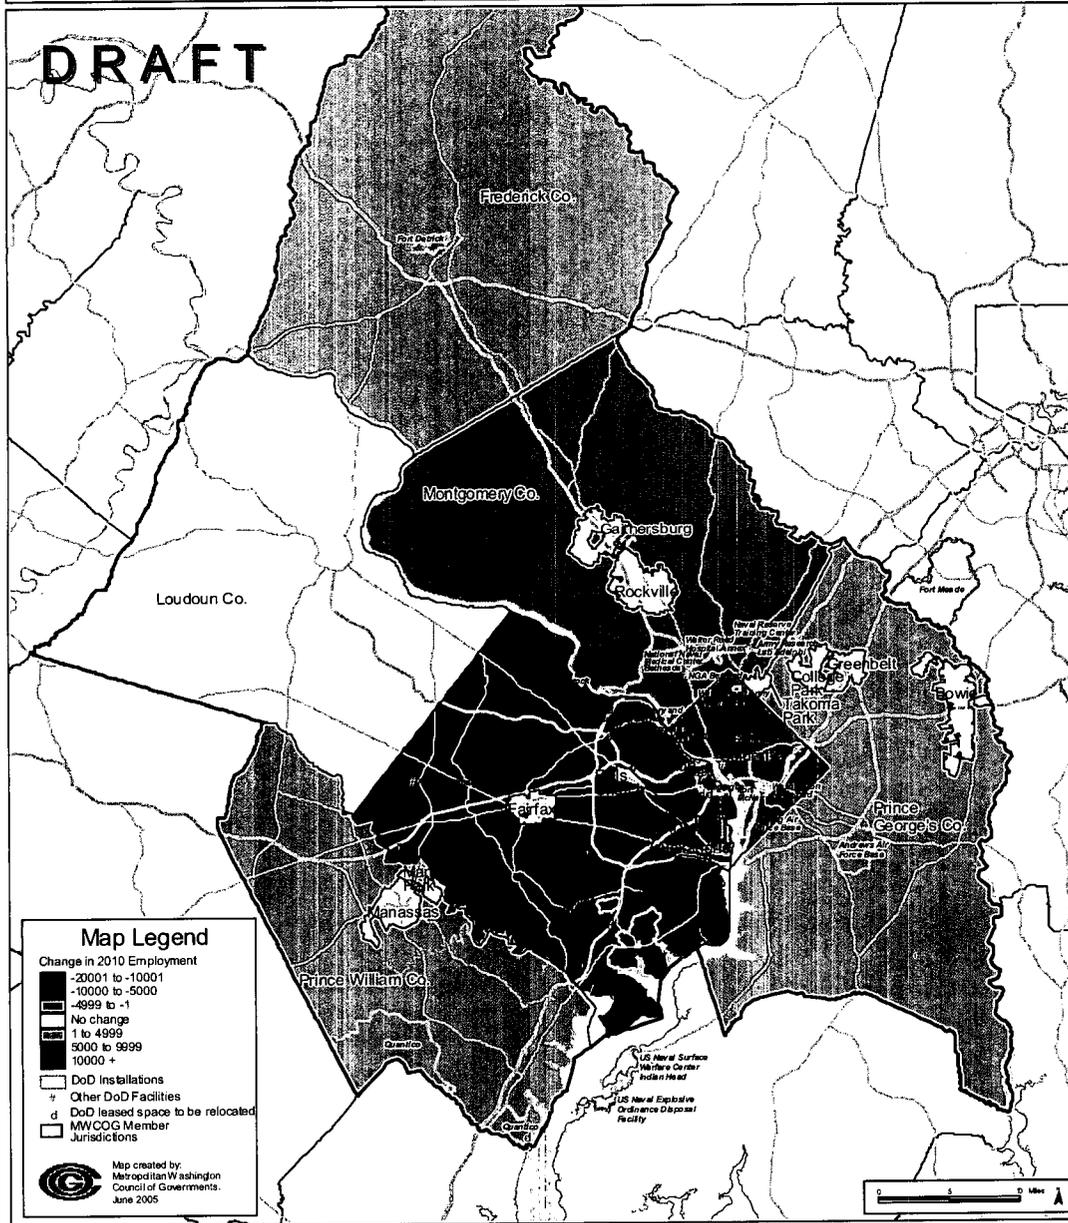

Figure I-2: BRAC-Related Change in 2010 Employment

Germantown/Clarksburg	31,751	31,751	0	0.0%
Potomac Mills Area	30,238	30,238	0	0.0%
Waldorf Commercial	30,997	30,997	0	0.0%
Leesburg Area	17,701	17,701	0	0.0%
National Harbor	7,663	7,663	0	0.0%
Regional Activity Clusters Total	2,322,705	2,293,974	-28,731	-1.2%

The map(s) in Figures I-1, I-2 and I-3 show, respectively, Round 6.4A 2010 employment and change in projected employment in 2010 reflecting the proposed BRAC realignments. Table I-3 shows the estimated change in 2010 employment summarized for the Regional Activity Center Clusters. As can be seen in the maps and table, projected employment in 2010 due to the proposed BRAC changes would be lower than the Round 6.4A Forecasts for the Pentagon/Reagan Airport/Alexandria Area (-16,318 jobs), Silver Spring/Takoma Park/Wheaton (-4,673 jobs) Dulles Corridor (-1,500), and Downtown Washington (-1,504) Regional Activity Center Clusters. Projected 2010 employment in the I-95 / Springfield Area (+7,375 jobs) and Bethesda / Friendship Heights (+1,968 jobs) Activity Center Clusters would increase due to BRAC changes. Employment at Fort Belvoir – a designated “Government Special Attractor” would increase by approximately 15,000 jobs.

Table II-1 compares the 2020 Round 6.4A Cooperative Forecasts of Employment by jurisdiction with 2020 employment modified to reflect the proposed BRAC changes.

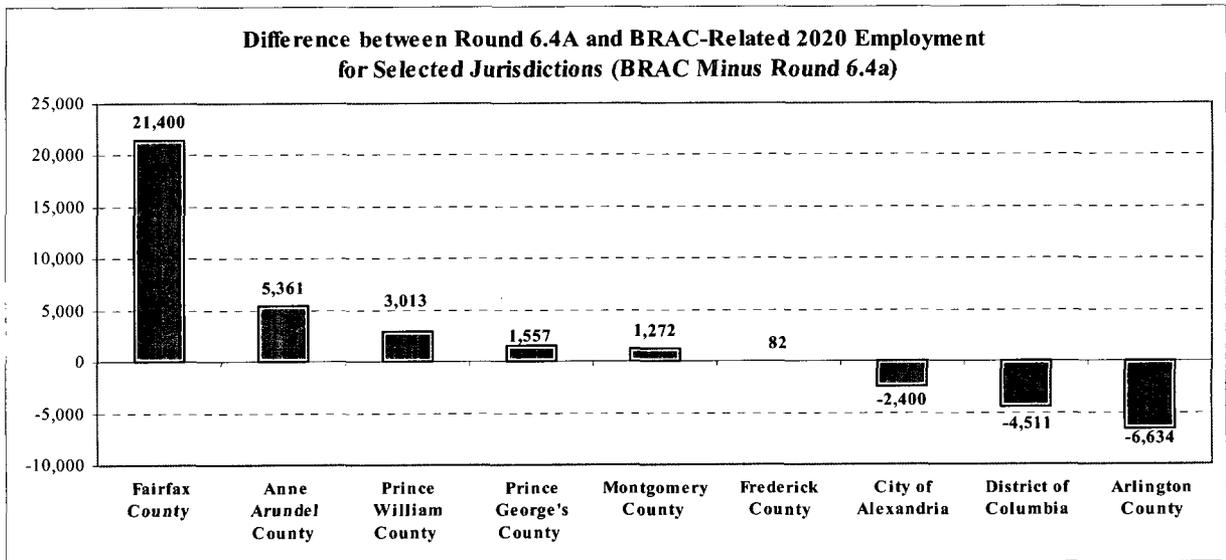

Compared to the Round 6.4A Cooperative Forecasts, total forecast employment for the Washington metropolitan area would increase by nearly 13,700 jobs. When employment

increases in adjacent jurisdictions are included, employment for the larger TPB modeled region in 2010 would be approximately 18,700 higher than Round 6.4A.

Employment in the region's Central Jurisdictions in 2020 would be nearly -13,500 jobs lower than the Round 6.4A projections; employment in the Inner Suburbs would be more than 24,200 jobs higher than Round 6.4A, and employment in the region's Outer Suburbs in 2020 due to BRAC would be approximately 3,000 jobs higher.

Jurisdictions that would see a reduction in projected 2020 employment due to the proposed BRAC changes include Arlington County (-6,634 jobs), the District of Columbia (-4,511 jobs), and the City of Alexandria (-2,400 jobs).

Fairfax County would see an increase in forecast 2020 employment due to BRAC-related changes (+21,400 additional jobs) followed by Anne Arundel County (+5,361) Prince William County (+3,000 jobs), Prince George's County (+1,557 jobs), and Montgomery County (+1,272 jobs).

Figure II-1: BRAC-Related Change in 2020 Employment

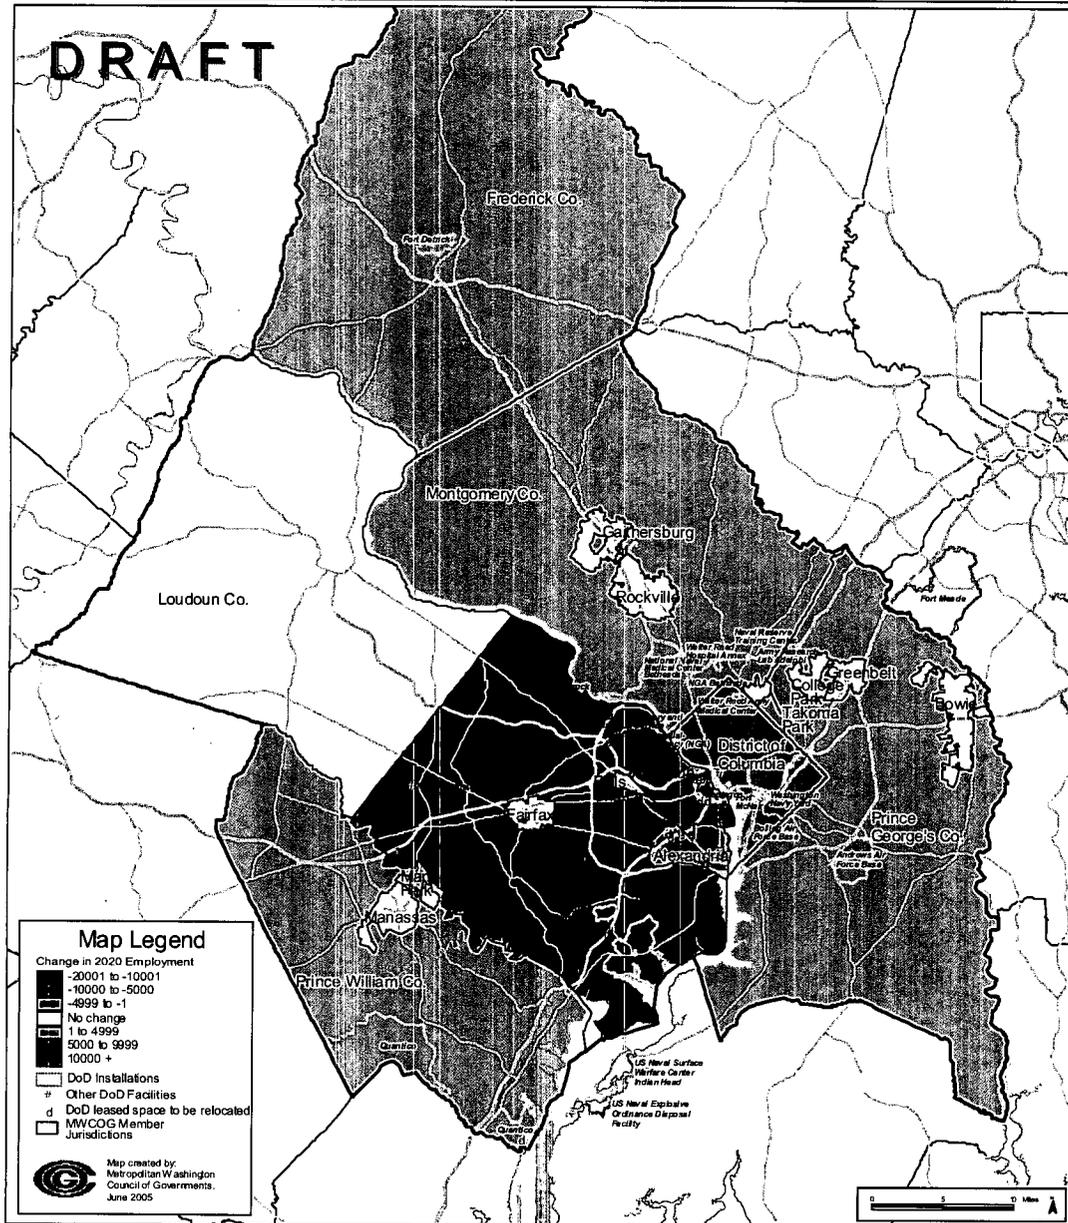

Figure II-2: BRAC-Related Change in 2020 Employment

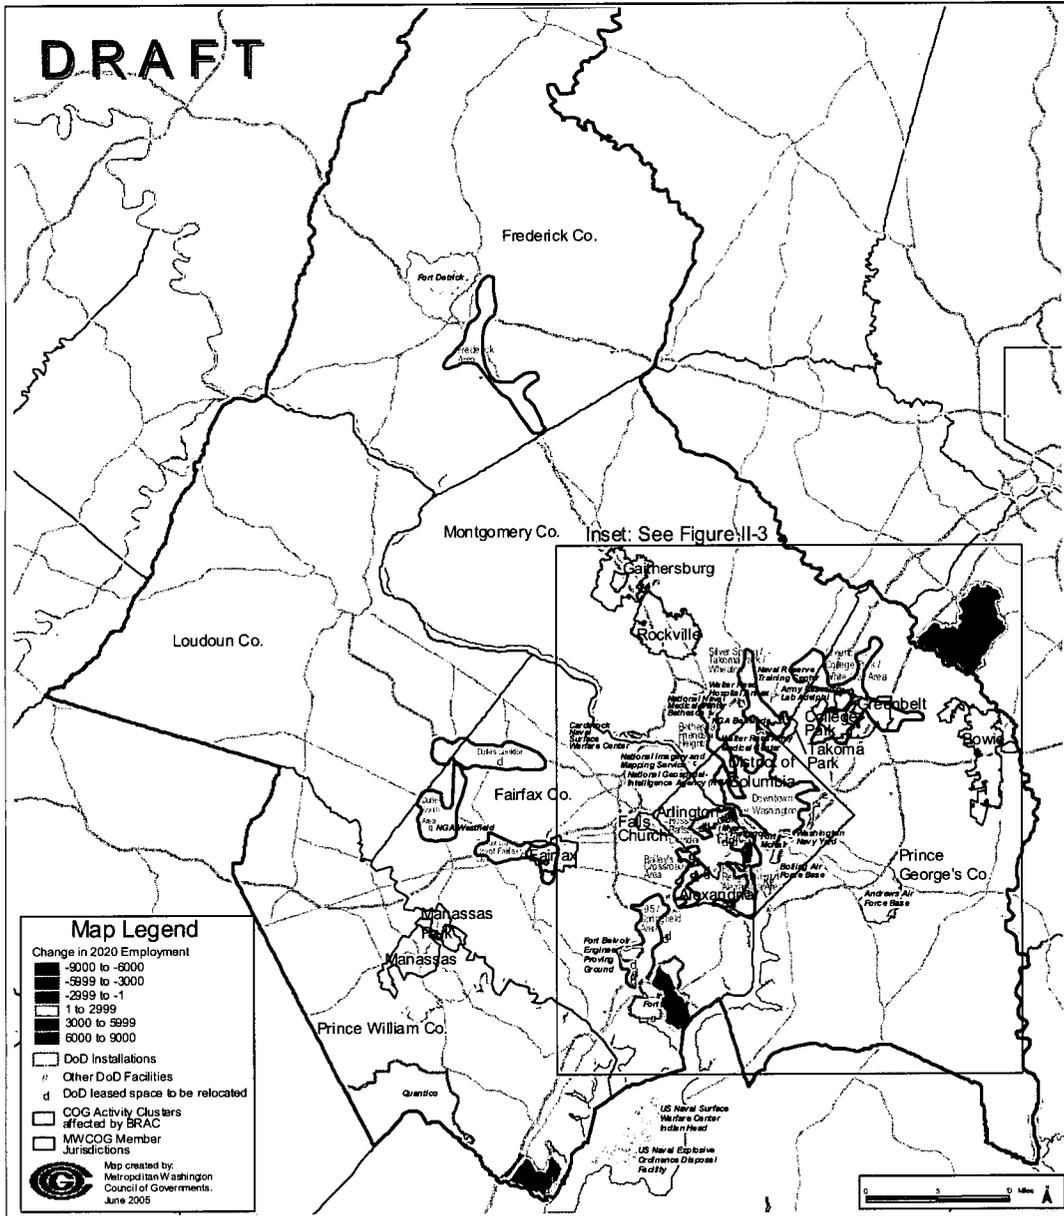

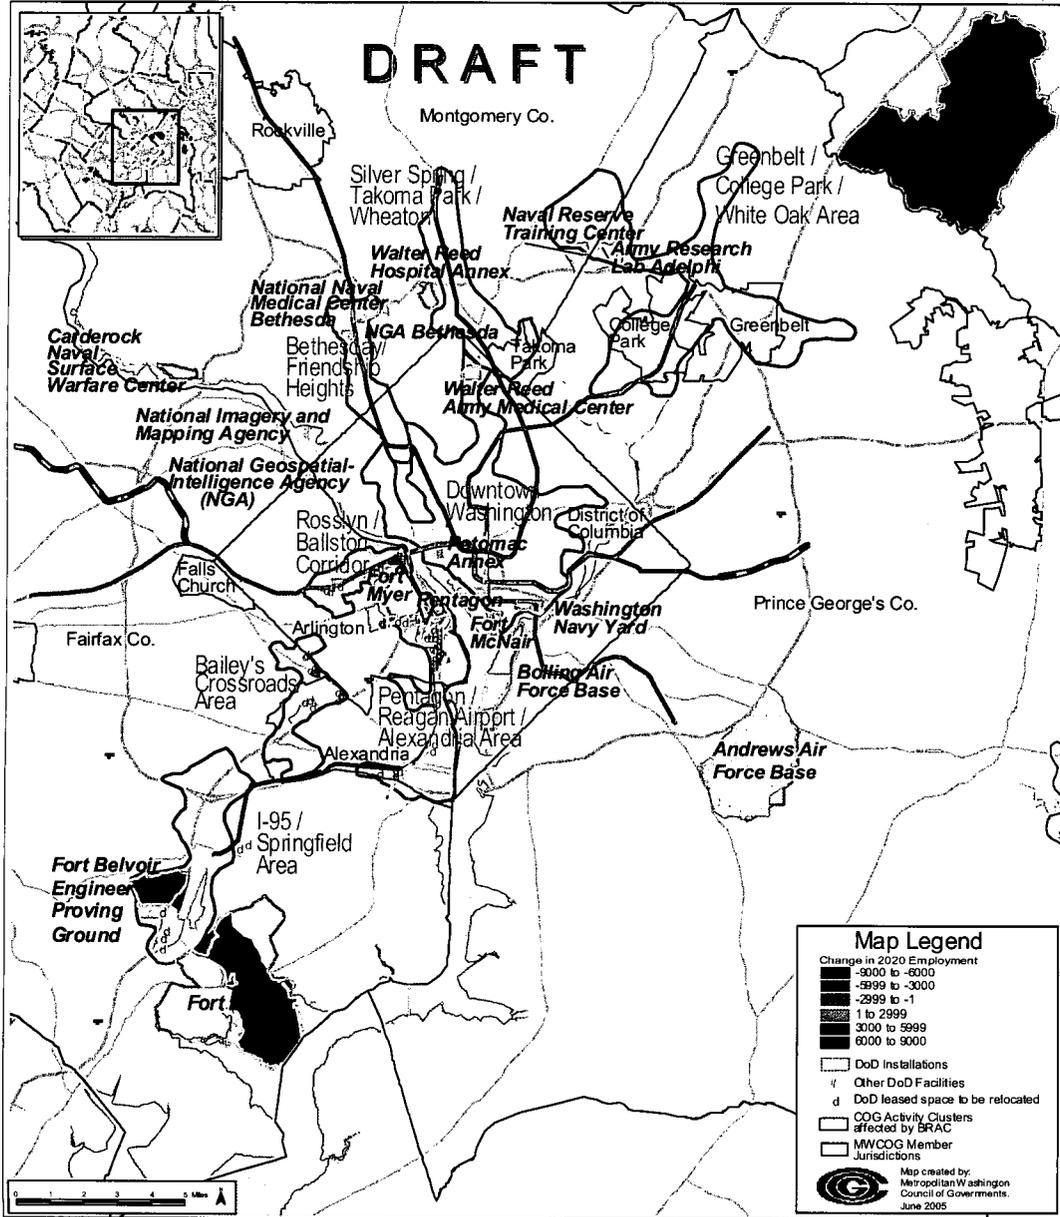

Figure II-3: BRAC-Related Change in 2020 Employment

Potomac Mills Area	37,703	37,703	0	0.0%
Waldorf Commercial	32,935	32,935	0	0.0%
Leesburg Area	23,894	23,894	0	0.0%
National Harbor	14,544	14,544	0	0.0%
Regional Activity Clusters Total	2,625,675	2,624,058	-1,617	-0.1%

Figures II-1, II-2 and II-3 show, respectively, Round 6.4A 2020 employment, and changes in projected employment in 2020 reflecting the proposed BRAC realignments. The figures and Table II-2 show that the 2020 employment forecast which reflects the proposed BRAC changes would be lower than the Round 6.4A Forecasts for the Pentagon/Reagan Airport/Alexandria Area (-5,034 jobs), Rosslyn-Ballston Corridor (-2,800 jobs), Silver Spring/Takoma Park/Wheaton (-2,300), Downtown Washington (-1,812) Regional Activity Center Clusters, while projected 2020 employment in the I-95 / Springfield Area (+9,000 jobs) and Bethesda/Friendship Heights (+2,289 jobs) Activity Center Clusters would increase due to BRAC changes. Employment at Fort Belvoir – a designated “Government Special Attractor” would increase by approximately 16,000 jobs.

**Table II-3

Outer Suburbs	573,924	578,424	4,500	0.8%
Northern Virginia	1,000,387	1,006,887	6,500	0.6%
Suburban Maryland	954,449	955,449	1,000	0.1%
MSA REGIONAL TOTAL	2,253,080	2,261,580	8,500	0.4%
TPB MODEL REGION TOTAL	2,836,145	2,844,645	8,500	0.3%

Table II-2 compares 2020 household projections from the adopted Round 6.4A Cooperative Forecasts and to 2020 households due to the proposed BRAC-related changes. The total number of households in 2020 would increase by an estimated 8,500 households, with the largest increases foreseen in Prince William County (3,000), Fairfax (2,000) and Stafford (1,500) counties. The District of Columbia and Montgomery County would each add 1,000 additional households.

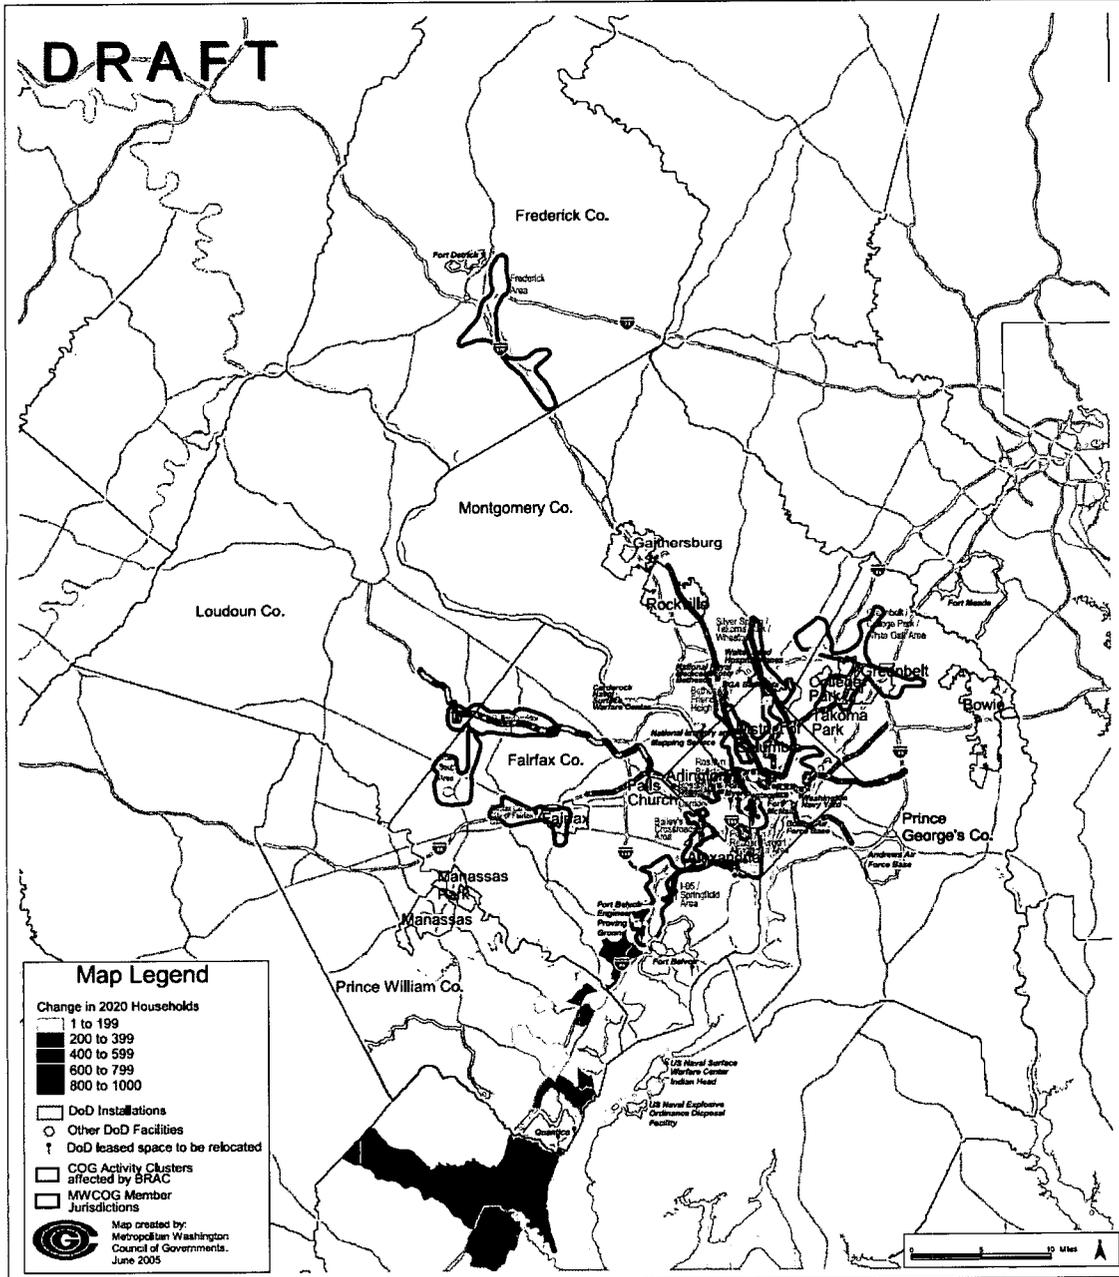

**Table II-3

National Harbor	4,902	4,902	0	0.0%
Regional Activity Clusters Total	872,018	875,018	3,000	0.3%

Table II-3 shows that approximately 3,000 additional households would be added to the regional activity center clusters with increases in the Potomac Mills Area (+1,200 households), the Silver Spring/Takoma Park/Wheaton (+1,000 households) and the I-95-/Springfield Area (+800 households).

Figure II-4: BRAC-Related Change in 2020 Households

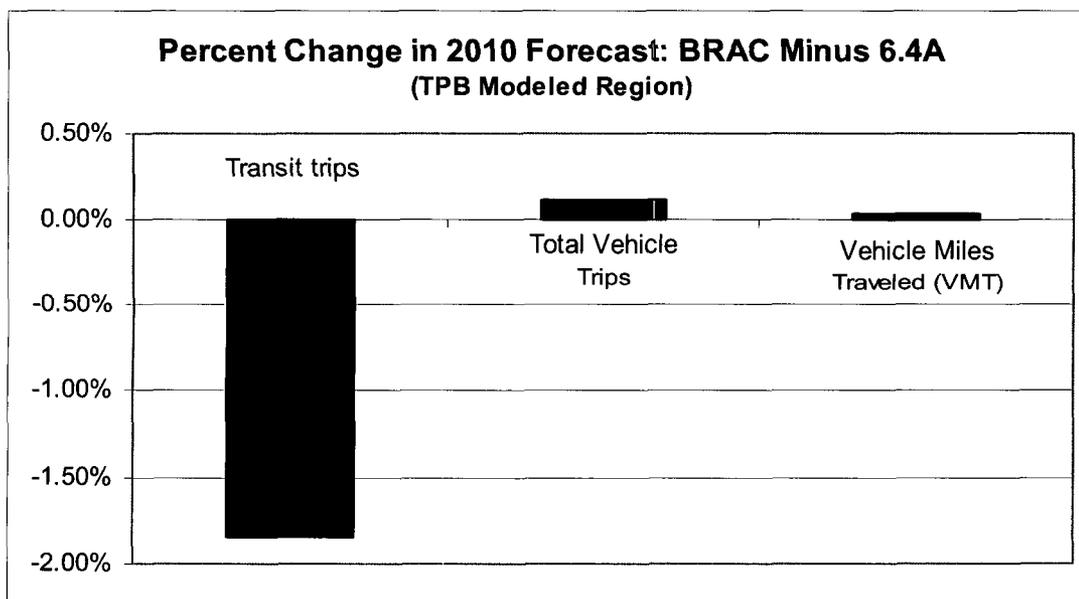

**Section III –Transportation and Air Quality Impacts
Forecast Year 2010**

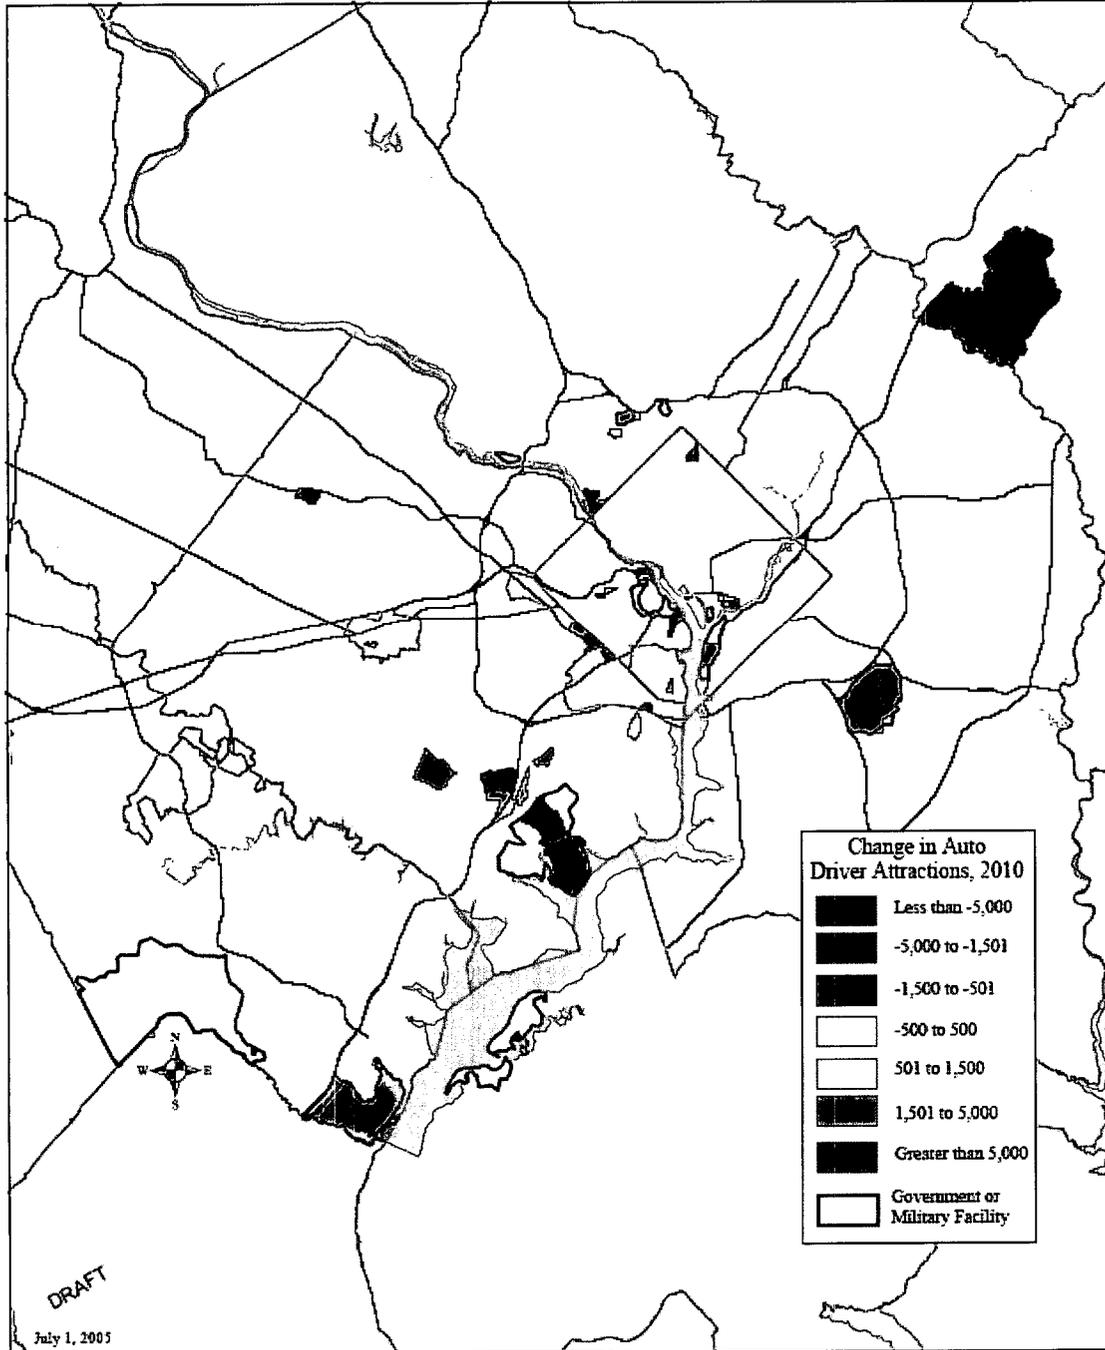

Transportation Measures	<u>Rnd 6.4A</u> <u>2010</u>	<u>BRAC</u> <u>2010</u>	Change in 2010 Forecast: BRAC Minus 6.4A	
			<u>Number</u>	<u>Percent</u>
Transit trips	1,004,747	986,219	-18,528	-1.84%
Total Vehicle Trips	22,234,574	22,261,364	26,790	0.12%
Vehicle Miles Traveled (VMT)	168,482,758	168,556,587	73,829	0.04%

Table III-1 compares the differences between forecast 2010 transportation measures for the adopted Round 6.4A Cooperative Forecasts and the BRAC-related 2010 forecasts for the TPB modeled region.

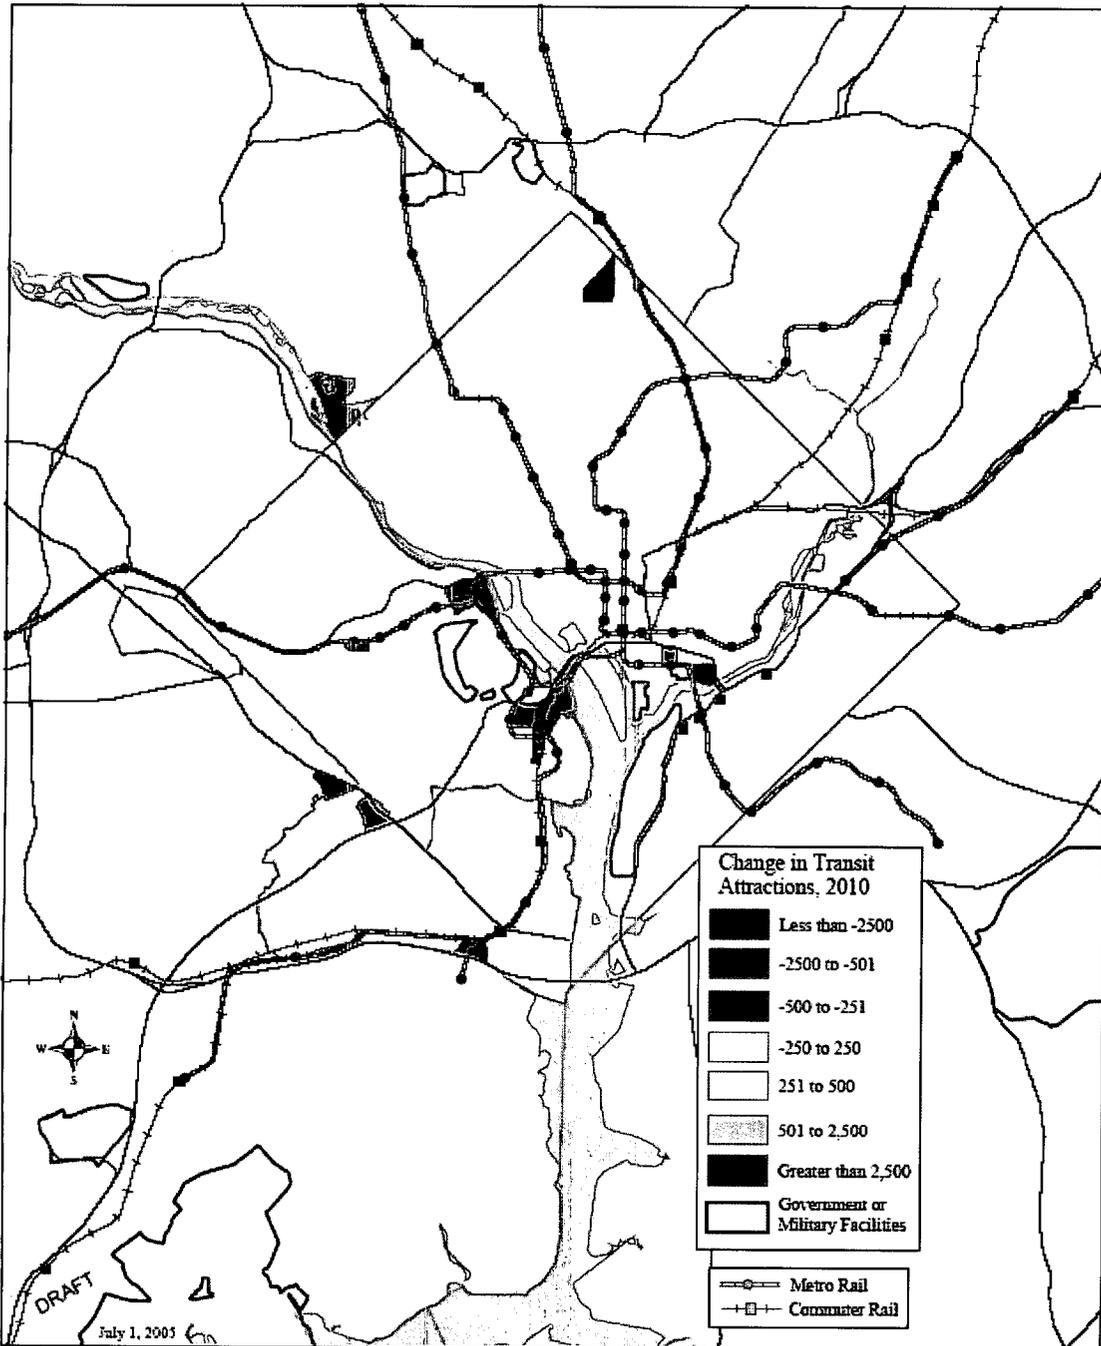

The table shows that regional transit trips in 2010 would be reduced by approximately -18,528 trips or a decrease of approximately -1.84 percent. Total regional vehicle trips would increase by more than 26,800 trips or approximately 0.12 percent, and total regional vehicle miles traveled would increase by more than 73,800 or 0.04 percent.

Section IV
Interagency Security Committee (ISC) and U.S. Department of Defense (DoD)
Building Security Standards and Guidelines

In addition to the base and facility-specific recommendations of the Base Realignment and Closure Commission (BRAC), DoD and federal civilian agencies in the metropolitan Washington region must also adhere to policy guidelines concerning design and security. While the safety and security of building occupants is the most important requirement of both ISC and DoD, each

Interagency Security Committee (ISC)

Following the bombing of the Alfred P. Murrah Federal Building in Oklahoma City, the General Services Administration (GSA) was directed by President Clinton through Executive Order 12977 to establish construction and security standards for federal buildings. The result of this effort was the Interagency Security Committee (ISC) *ISC Security Design Criteria for New Federal Office Buildings and Major Modernization Projects* (ISC, 2001). The design and security criteria apply to new construction or major renovation for office buildings and courthouses occupied by non-Department of Defense employees in the United States. The terrorist attacks on the World Trade Center and Pentagon in September 2001 renewed concerns about the vulnerability of federal buildings, and in 2003, chairmanship of the ISC was transferred to the Department of Homeland Security (DHS). In July 2004, ISC began reviewing federal agencies' security and design plans and in September 2004, the ISC released its updated *Security Design Criteria* which contains performance-based guidelines for federal non-DoD facilities.

Unified Facilities Criteria of the U.S. Department of Defense

In July 2002, the Department of Defense (DoD) published the Unified Facilities Criteria (UFC) *DoD Minimum Antiterrorism Standards for Buildings* which "provides planning, design, construction, operations, and maintenance criteria, and applies to all DoD commands. UFC will be used for all service projects and work for other customers where appropriate." The UFC system contains 22 specific design and security standards which must be met for DoD owned and leased facilities by 2009. A copy of the complete UFC standards is included in Appendix B.

Additional materials concerning security standards

Included in the appendices of this report are several key documents pertaining to the ISC and DoD standards. Appendix C contains the National Capital Planning Commission's adopted Urban Design and Security Policies and Objectives concerning federal facilities in the National Capital Region. Appendix E contains a summary of the November 2004 NCPC / COG / Greater Washington Board of Trade "Surviving Security" conference during which representatives from the Department of Defense, GSA and the private sector discussed the implications of the two standards. Finally, the National Association of Industrial and Office Parks (NAIOP) recently published an article comparing and

contrasting the two standards from a development perspective. NAIOP notes, for example, that:

“..The basis of both standards involve three key terms: Design Basis Threat; Level of Protection; and Layers of Defense. While both the ISC and DoD standards focus on manmade threats, and use the design Basis Threat as the initial step and Layers of Defense (or zones) as the protection strategy, they approach the protection requirement with different perspectives and in different formats. The ISC standards are defined by the tenant mission, size of the building and number of employees. A building can have multiple Levels of Protection based on the risk by tenant or location; the DoD standards are based on the Level of Protection to be provided for a given building....”

A complete copy of this article is contained in Appendix F.
